1933, the President of the United States issued a proclamation under the foregoing provision of law directing the appropriate agencies of this Government to carry out the provisions of the agreement so far as they concerned the United States.[20] The agreement was not submitted for ratification to the Senate. The statutory authority on the basis of which the agreement was entered into by this country specifically contemplated that "agreements" would be entered into with foreign countries in order to "protect the foreign commerce of the United States."

10. International Wheat Agreement

Another development of the Monetary and Economic Conference of 1933 was the calling of a conference in London in August 1933 which resulted in the signing of the International Wheat Agreement, 1933, between the nations concerned with international trade in wheat.[21] Important commitments were undertaken by the United States by virtue of provisions that the United States, Argentina, Australia, and Canada would adjust total exports of wheat from their countries during the crop year 1933–34, taking into consideration the exports of other countries, by the acceptance of export maxima fixed on the assumption that world import demand for wheat would amount during that period to 560,000,000 bushels. The same countries also agreed to limitations of exports for the year 1934–35. In return, the wheat-importing countries made certain commitments under the agreement with respect to production and consumption of wheat.

Although the agreement imposed these obligations upon the United States, ample legislative authority already existed to carry out these obligations by virtue of the provisions of the Agricultural Adjustment Act.[22] Although various difficulties prevented the execution of the agreement in accordance with its terms, it is nevertheless pertinent to this study as an example of international agreement reached through the exercise of a combination of legislative and executive authority.

11. Stabilization Agreement of 1936

A further and more important effort to bring about international cooperative action in the monetary field was the Tripartite Stabilization Agreement of September 25, 1936, which was brought about by simultaneous and identical declarations issued on that date by the Governments of Great Britain, France, and the United States, to which Belgium, the Netherlands, and Switzerland adhered shortly thereafter.[23] The declaration of the United States stated that it was joining with the other governments to restore order in international monetary relations and to that end to endeavor to maintain the greatest possible equilibrium in international exchange; that the French Government had informed the United States of its intention to readjust its currency; and that the three Governments intended to use appropriate available resources to avoid as far as possible exchange disturbances arising from the proposed readjustment and to arrange for consultation for this purpose among the governments and their authorized agencies. The United States entered into this agreement under the authority of section 10 of the Gold Reserve Act of 1934 providing as follows:

"For the purpose of stabilizing the exchange value of the dollar, the Secretary of the Treasury, with the approval of the President, directly or through such agencies as he may designate, is authorized, for the account of the fund established in this section, to deal in gold and foreign exchange and such other instruments of credit and securities as he may deem necessary to carry out the purpose of this section. * * *"[24]

International organizations

During the last 75 years there have been repeated and important instances of the exercise of congressional power to bring about United States membership in international organizations. It is significant that, with a few exceptions, our participation therein resulted in the imposition upon this country of commitments of a substantial and continuing nature.[25]

12. International Labor Organization

One of the most important international organizations to which this country belongs is the International Labor Organization which during the last 25 years has assumed a vital and dynamic role in labor affairs. This organization is primarily a recommendatory and fact-finding organization, its activities consisting to a large extent in recommending for adoption by the member governments draft conventions on a variety of subjects within its competence. However, membership in this organization does entail important commitments on the part of the members in respect of observance of conventions promulgated by the organization and accepted by the members. Thus, under article 22 of the constitution of the ILO, all members must file reports of measures taken to give effect to such conventions and any other member has the right to file a complaint with the labor office if it is not satisfied with the action of the first member. Such complaint may be referred to the International Court of Justice, whose decision shall be final. The court may "indicate the measures, if any, of an economic character which it considers to be appropriate, and which other governments would be justified in adopting against a defaulting government."[26]

The constitution of the International Labor Organization was originally promulgated as part XIII of the Treaty of Versailles, and payment of its expenses, with certain exceptions, was to be made from the general funds of the League of Nations. Although the United States was not originally a member of the International Labor Organization, since it was not a member of the League of Nations, Congress by joint resolution of June 19, 1934, enacted that "the President is hereby authorized to accept membership for the Government of the United States of America in the International Labor Organization, which, through its general conference of representatives of its members and through its International Labor Office, collects information concerning labor throughout the world and prepares international conventions for the consideration of member governments with a view to improving conditions of labor."[27]

The Organization thereupon invited the United States to accept membership therein, it being understood that the United States should not thereby assume any obligations under the Covenant of the League of Nations. The statement also authorized the Organization's governing body to settle with the Government of the United States the question of the latter's financial contribution. Pursuant to this invitation the President, under the previous congressional authorization, accepted the invitation and his acceptance was transmitted to the Director of the International Labor Office at Geneva by a letter from the American consul at Geneva.[28]

13. UNRRA

A somewhat different procedure was employed to bring about United States membership in the United Nations Relief and Rehabilitation Administration. After consultation over a period of several months with Members of the Senate and House of Representatives, President Roosevelt, on November 9, 1943, signed an agreement creating the Administration, providing in part as follows:

"Insofar as its appropriate constitutional bodies shall authorize, each member government will contribute to the support of the Administration in order to accomplish the purposes of article I, paragraph 2 (a). The amount and character of the contributions of each member government under this provision shall be determined from time to time by its appropriate constitutional bodies."[29]

After the signature of the agreement and the conclusion of the first session of the Council of the Administration, the Congress, by joint resolution approved March 28, 1944, authorized appropriations to the President of "such sums not to exceed $1,350,000,000 in the aggregate, as the Congress may determine from time to time to be appropriate for participation by the United States * * * in the work of the United Nations Relief and Rehabilitation Administration, established by an agreement concluded * * * on November 9, 1943, reading as follows * * *."[30] The agreement was set forth in full at this point in the legislation. Subsequently the Congress appropriated funds for the work of the Administration in accordance with this authorization.[31]

While the agreement creating the Administration did not impose specific commitments on the United States and by its terms left the question of contributions to the discretion of the member governments, the Congress subsequently adopted as the basis of appropriations the financial plan devised by the Council at its first session.[32] Although UNRRA is to a large extent an emergency organization and the UNRRA agreement in itself imposes no binding obligations upon the United States, the proceedings in this case, nevertheless, present a striking example of interdependent action between the executive and legislative

branches to effectuate an important step in United States foreign policy through association and agreement with foreign countries.

14. Food and Agriculture Organization

Another international organization of which the United States has become a member through a combination of legislative and executive action is the Food and Agriculture Organization of the United Nations. This Organization has been created pursuant to a constitution prepared and submitted to the governments by the Interim Commission on Food and Agriculture set up by the Hot Springs Conference on Food and Agriculture of May 1943.[33] A subcommittee of the Committee on Foreign Relations conferred with United States Government officials who were concerned with the drafting of the constitution and several changes were made in the drafts as the result of this consultation. The members of the subcommittee also concerned themselves with the constitutional questions involved in relation to the procedure for bringing about United States membership in the Organization.[34] It was decided, partly on the basis of examples such as the ILO and UNRRA legislation referred to above, that the joint resolution procedure would be entirely in order. The constitution as finally submitted to the governments provided that it should be open to acceptance. The joint resolution approved July 31, 1945,[35] provided that "the President is hereby authorized to accept membership for the United States in the Food and Agriculture Organization of the United Nations * * * the constitution of which is set forth in * * * the First Report to the Governments of the United Nations by the Interim Commission on Food and Agriculture dated August 1, 1944."

It also authorized appropriations for the expenses of the United States in connection with such membership and provided that in the absence of congressional action no amendment to the constitution of the Organization imposing any new obligation on the United States shall be accepted on behalf of the United States. Pursuant to this authorization the United States filed its instrument of acceptance of the constitution and became a member of the Organization. The principal difference between the procedure followed in this case from that which was used with respect to UNRRA is that the UNRRA agreement was signed by the President before the authorizing legislation was enacted, whereas here acceptance of the constitution was delayed until after the approval of the joint resolution. There does not appear to be any substantial difference between these methods, so far as concerns the constitutional question herein discussed.

15. Bretton Woods Agreements

One of the most important acts ever passed by Congress in relation to an international agreement is the Bretton Woods Agreements Act approved July 31, 1945.[36] The primary purpose of this legislation was to authorize the President to accept membership for the United States in the International Monetary Fund and in the International Bank for Reconstruction and Development provided for in the respective articles of agreement prepared at the Bretton Woods Conference in 1944. The legislation also prescribes certain conditions and limitations with respect to United States participation in the respective institutions; provides for authority to carry out certain commitments provided for in the basic agreements, including the payment of subscriptions to the two institutions aggregating approximately $6,000,000,000; and establishes a National Advisory Council on International Monetary and Financial Problems. The United States representatives on the bank and the fund are directed by the legislation, in the event of the failure of the bank and fund, to give satisfactory interpretations with respect to certain phases of the functions and authority of the respective institutions, to propose corresponding amendments to the respective articles of agreement.

The Bretton Woods agreements are among the most important international agreements ever entered into by the United States. They impose important obligations on this country and contain provisions which are of great advantage to the international economic relations of the United States. During the hearings before the Banking and Currency Committee of the Senate on the Bretton Woods bill, the question was raised as to the constitutionality of the legislation in relation to the treaty issue and there was inserted in the record a memorandum prepared by the State and Treasury Departments which made a detailed review of the precedents and expressed the view in substance that the legislation was entirely appropriate as being within the scope of the power of Congress over monetary and financial matters, and that the Congress was not deprived of jurisdiction in the matter on the ground that the bill was related to an agreement with foreign countries.[37] This contention was apparently accepted since the constitutional point did not thereafter arise during the consideration of the legislation in the Senate.

16. United Nations Participation Act

Another instance in which the treaty-making power was thoroughly discussed during the first session of the Seventy-ninth Congress was the debate in the Senate on the United Nations Charter and the subsequent debate on the United Nations Participation Act of 1945, approved December 20, 1945,[38] in relation to the method by which the military agreements with the Security Council should be negotiated and approved in the case of the United States. This question was originally raised during the debate on the Charter, and the preponderant view in the Senate was that the military agreements when subsequently negotiated with the Security Council should not be viewed as treaties but rather as agreements subject to approval by Congress. This view was expressed on the ground not only that the agreements were to be entered into in pursuance of a treaty obligation but also on the ground that these agreements would relate to powers which under the Constitution are vested in the Congress.[39]

The bill was designed, among other things, to prescribe exactly the procedure to be followed in this regard and to this end provided in part as follows:

"The President is authorized to negotiate a special agreement or agreements with the Security Council which shall be subject to the approval of the Congress by appropriate act or joint resolution, providing for the numbers and types of armed forces, their degree of readiness and general location, and the nature of facilities and assistance, including rights of passage, to be made available to the Security Council on its call for the purpose of maintaining international peace and security in accordance with article 43 of said Charter."

The report of the Committee on Foreign Relations of the Senate stated, with respect to this provision, that:

"At the same time the bill, by providing that the Congress shall approve any such agreement or agreements as may be negotiated, insures that the Congress will have full opportunity to pass upon the terms and provisions thereof.

"The bill provides that such approval by Congress shall be expressed by appropriate act or joint resolution. During the debate in the Senate on the Charter last July, there was considerable discussion as to whether the military agreements should be considered as treaties or whether they might be approved by the Congress through the joint resolution procedure. The preponderant view was that the latter procedure was preferable since the agreements would be entered into for the purpose of giving effect to the obligation assumed by this country under article 43 of the Charter to make available to the Security Council the armed force necessary for the purpose of maintaining international peace and security. Under this view, the precise details of the obligation—such as the exact amount of the forces to be contributed and the places where they are to be stationed—is not a matter for treaty consideration but for legislative sanction by the Congress under its constitutional powers to raise and support armies, to provide and maintain a navy, and to make rules for the government and regulation of the land and naval forces (art. I, sec. 8, pars. 12, 13, and 14 of the Constitution.) * * * On the last day of the debate in the Senate, July 28, the President, then attending the Potsdam Conference, sent a message to the Congress in which he stated that 'When any such agreement or agreements are negotiated, it will be my purpose to ask the Congress by appropriate legislation to approve them.' The committee believes that it is desirable to determine this question once and for all, and that it is appropriate to specify that the military agreement or agreements should be submitted for approval to the Congress." [40]

This provision caused considerable discussion in the Senate, and an amendment was offered so as to provide that the military agreements must be entered into only as treaties by and with the advice and consent

[33] See S. Rept. 357, 79th Cong., 1st sess.

[34] Ibid., pp. 10–11, 20, 21.

[35] Public Law 174, 79th Cong., ch. 342, 1st sess.

[36] Public Law 171, 79th Cong., ch. 339, 1st sess.

[37] Hearings, pt. V, June 28, 1945, pp. 533–566. Agreement with this view was shared by Mr. George E. Smith, research assistant to the minority leader of the Senate, in whose article, entitled "Summary Report on Bretton Woods Monetary Conference," it is stated (91 CONGRESSIONAL RECORD, pp. A915, A922) that:

"So far as the United States is concerned this leaves the question open to a debate over the appropriate form of congressional approval. A cogent argument can be made that the agreement amounts to a treaty and must be approved by a two-thirds vote of the Senate. But an equally valid argument could be made that this is an agreement that can be approved by a simple majority resolution of both Houses on the ground that the agreement contemplates operations either exclusively left to the House of Representatives (such as bills for raising revenue—for example, the American quota to the fund) or shared equally by both Houses as in powers given to Congress by art. I, sec. 8 of the Constitution."

[38] Public Law 264, 79th Cong., ch. 583, 1st sess.

[39] See especially 91 CONGRESSIONAL RECORD, pp. 8121–8133, 8157–8169, 8275, 8324–8326. With respect to the argument that the procedure is valid because the military agreements are to be entered into under the terms of a treaty, reference is made to the discussion in sec. VI below of the relationship of the St. Lawrence agreement to the procedure prescribed in the Boundary Waters Treaty of 1909 for the execution of special agreements subject to approval by reciprocal legislation.

[40] S. Rept. 717, 79th Cong., 1st sess.

of the Senate.[41] This amendment was supported on the ground that the only constitutional method of entering into foreign agreements subject to ratification "in accordance with the constitutional processes" of the United States is through the treaty process. The original provision of the bill was defended on the ground that the procedure of ratification by joint action of the two Houses of Congress is "strictly a constitutional process," and that such process had never "been challenged in any court in the land as an unconstitutional process." The joint resolution procedure was also defended on the ground that "the House has equal responsibility with the Senate in respect to raising armies and supporting and sustaining them. The House has primary jurisdiction over the taxation necessities involved in sustaining armies and navies and in maintaining national defenses." [42]

The amendment was defeated by a vote of 57 to 14 and the original provision of the bill was retained.

Acquisition of territory

Probably the outstanding examples of the exercise of congressional power to effect action in the international field other than through the treaty process are the cases in which Congress has authorized the acquisition of foreign territory under its power to admit States and make regulations respecting the territory of the United States. In particular, the cases of Texas and Hawaii, described below demonstrate strikingly the possibility of alternative use of the power of Congress with respect to a matter which is likewise a proper subject for treaty action.

17. Annexation of Texas

After Texas had established its independence from Mexico and had gained the recognition of the United States as a sovereign power, negotiations were undertaken for its incorporation into the United States. On April 12, 1844, a treaty of annexation was signed by representatives of the two countries.[43] This treaty was rejected by the Senate on June 8, 1844, by vote of 16 ayes to 35 noes. President Tyler immediately submitted the matter to the entire Congress in a message in which he stated that "the power of Congress is, however, fully competent in some other form of proceeding to accomplish everything that a formal ratification of the treaty could have accomplished * * *." [44]

Subsequently President Tyler again called upon Congress saying that "the two governments having already agreed through their respective organs on the terms of annexation, I would recommend their adoption by Congress in the form of a joint resolution or act to be perfected and made binding on the two countries when adopted in like manner by the Government of Texas." [45]

A joint resolution was thereupon enacted by majority votes of both Houses (the vote in the Senate being 27–25) and approved March 1, 1845, which expressed the conditional consent of the Congress to the admission of Texas and authorized the President to initiate negotiations.[46] This resolution was transmitted to the American Charge d'Affaires in Texas to be presented as an offer of agreement to the Texas Government with the request that Texas should signify "their acceptance and ratification of the provisions contained in this joint resolution." [47]

In due course the Congress and people of Texas voted to accept "the proposals, conditions, and guaranties" contained in the offer of the United States. Thereafter President Polk reported to Congress that Texas had "complied with all the terms and conditions of the joint resolution" of March 1, 1845, and requested the passage of additional legislation to admit the State of Texas into the Union.[48] Such legislation was adopted [49] and the matter was thus successfully concluded.

The opponents of the St. Lawrence seek to deny the relevance of this case on the ground that the act of Congress was not supplemental to an executive agreement and the annexation was not outside the inherent powers of Congress * * *."[50] This seems to be a very narrow view of the case. Although there was never any executive agreement expressed on one piece of paper, the entire negotiations were in terms of offer and acceptance of specific terms resulting in agreement through combined action of the executive and legislative agencies of the two countries. The case remains as a remarkable demonstration of the exercise of the powers of Congress in relation to a foreign negotiation. The fact that a treaty on the same subject had failed of ratification did not in any sense restrict the exercise of congressional jurisdiction over the matter.

18. Hawaii

The annexation of Hawaii was similar in many respects. In 1897, President McKinley submitted to the Senate for ratification a treaty with Hawaii for the annexation of the islands which had already been approved by the Hawaiian authorities.[51] The treaty failed of ratification. On July 7, 1898, the President approved a joint resolution providing that "the Government of the Republic of Hawaii having * * * signified its consent * * * to cede * * * to the United States of America all rights of sovereignty of whatsoever kind in and over the Hawaiian Islands * * * said cession is accepted, ratified and confirmed * * * said Hawaiian Islands * * * are * * * annexed * * *." [52]

19. Horse Shoe Reef

By act of March 3, 1849,[53] the Congress appropriated funds for the construction of a lightboat on Horse Shoe Reef in the Niagara River. Subsequently it was found that the best site lay on the Canadian side of the boundary line and the necessary territory was thereupon ceded by Great Britain to the United States.[54] Since that time Congress has consistently voted appropriations to maintain the light. This, then, is another example of congressional action to effectuate or ratify an international act of the executive branch.

Summary

The foregoing and other examples point strongly to a constitutional practice whereunder the power of Congress has been exercised through legislation in a particular field to authorize the executive branch to enter into arrangements with foreign governments, or to effectuate or approve agreements negotiated by the executive branch. In each case the subject matter dealt with was one which concerned a function specifically delegated to Congress in the Constitution. These cases constitute some of the most notable as well as some of the most successful specific acts of the United States Government in the field of foreign affairs during recent years. While in none of these cases has the constitutionality of the action been passed upon by the Supreme Court, it is of perhaps greater significance that the method employed to bring about United States participation therein has never been questioned.

IV. JUDICIAL RECOGNITION OF AGREEMENTS OTHER THAN TREATIES

It is not proposed in this paper to review in detail the familiar thesis that the Constitution does not require all arrangements with foreign nations to be concluded through the treaty procedure. From the point of view of constitutional law, the validity of executive agreements, whether entered into under the authority of Congress or under the authority of the President, or both, and not subject to the advice and consent of the Senate, is clearly established by precedent and judicial decision. Nor is the line of demarcation between treaties and executive agreements dependent upon whether or not a particular treaty or agreement imposes a binding commitment on the United States; many executive agreements, in fact the vast majority, have imposed such obligations.,

It may be noted, however, for the purpose of clarifying the issue, that the use of the term "executive agreement" has contributed to some of the confusion in the thinking on this subject to the extent that it has been used as a generic term, descripitive of all arrangements with foreign governments which are not submitted to the Senate for advice and consent to ratification. Since some opprobrium appears to attach to the term "executive agreement" because of the implication that such an instrument may involve the bypassing of a constitutional prerogative of the Senate, it is essential to point out that there are several varieties of agreements to which the term "executive agreement" is customarily applied or situations in which some procedure other than the treaty procedure has been or may be resorted to. These divide themselves in two general categories, as follows:

1. The classical example of "executive agreement" would appear to be an agreement entered into by the President, irrespective of specific congressional action, in the exercise of his powers as the principal military and diplomatic officer of the Government. These may either take the form of statements of policy such as the Root-Takahira agreement of 1908 [55] and the Lansing-Ishii agreement of 1917 [56] which dealt with the special interests of the United States and Japan in China; or they may be agreements incidental to the waging of war such as the undertakings with reference to the prosecution of the war entered into at the Crimea Conference in February 1945 [57] or the transitory provisions of the act of Chapultepec which specifically contemplated the use of force by this country during the war and before the final adoption of a treaty.[58] A closely related form of executive agreement entered into under the power of the President is an agreement which is nonexecutory and in effect relates to a specific act and imposes no further binding commitments upon this country. Outstanding examples of this type of agreement are the exchange of notes between President Roosevelt and Foreign Commissar Litvinov in 1933 relating to the recognition by the United States of the Soviet Union and the assignment by the latter to the United States of certain claims against United States nationals arising from confiscatory decrees of the Soviet Government; [59] and the so-called Hull-Lothian agreement of September 1940 by which the United States transferred to Great Britain 50 destroyers in exchange for the

rights for 99 years to military bases in British possessions in the Western Hemisphere.[60]

2. An entirely different type of constitutional procedure is involved in the case of an agreement with one or more foreign nations which is entered into by the executive branch in conjunction with legislative action by the Congress under one of its delegated powers. While for want of a better term such an agreement is customarily referred to as an "executive agreement," it might with equal correctness be called a "congressional agreement" since in the nature of this type of instrument its provisions could not be binding upon the United States without legislative action by the Congress. In practice there may be several variations in the interplay of executive and congressional action with reference to undertakings of this nature. The simplest type of case is an agreement which is entered into by the executive branch under general powers vested therein by previous act of Congress; examples of this type are the International Silver Agreement of 1933 and the International Air Services Transit Agreement and the International Air Transport Agreement discussed above. Secondly, there are examples of specific prior congressional authorization to enter into international agreement as in the case of Trade Agreements Act of 1934 and United States membership in the International Labor Organization. Thirdly, there may be an Executive agreement submitted for subsequent approval to Congress such as the debt-funding agreements of 1923 or for subsequent legislative action to provide for the carrying out of the provisions of the agreement as in the case of the United Nations Relief and Rehabilitation Administration and the subsequent legislation providing for contributions of funds by the United States. In any of these three types of cases the necessity of congressional sanction is present in order that the terms of the agreement may be carried out by this country, and in all of these cases the constitutional problems involved are different from those in relation to executive agreements entered into solely on the authority of the President.

This memorandum is concerned exclusively with the constitutionality of the procedure followed in the executive-legislative approach to international agreements as applied to the execution by the United States of the specific agreement dealt with herein. Nevertheless, since the treaty issue has been raised in relation to the propriety of the procedure followed by the United States in connection with the St. Lawrence agreement, it is necessary to make reference to judicial decisions of the Supreme Court upholding the validity of agreements with foreign nations concluded otherwise than through the treaty process, whether under the authority of the President alone or in conjunction with congressional action. Time and again agreements of these kinds have been upheld; never has their validity been impugned by the Court[61] on the ground of failure to comply with the treaty procedure, regardless of whether such agreements have been entered on the authority of the President or in conjunction with legislative action. Whether the question of their constitutionality has been presented to the Court on the issue of unlawful delegation of power or on the treaty issue, the decisions have been the same. Summaries of outstanding Supreme Court decisions are set forth below:

1. In *B. Altman & Co.* v. *United States*,[62] there was involved the question of the power of the Supreme Court to review a judgment of the circuit court of appeal in a case involving the interpretation of a reciprocal trade agreement between the United States and France under the authority vested in the President by section 3 of the Tariff Act of 1897[63] which authorized the President to make reciprocal agreements with foreign countries with reference to certain articles. The contention was made that the judgment of the lower court was not reviewable under the provisions of the Circuit Court of Appeals Act of 1891 because the negotiations with France had concluded in an agreement rather than a treaty. The court rejected this contention and stated as follows:

"While it may be true that this commercial agreement made under authority of the Tariff Act of 1897, section 3, was not a treaty possessing the dignity of one requiring ratification by the Senate of the United States, it was an international compact, negotiated between the representatives of two sovereign nations and made in the name and on behalf of the contracting countries, and dealing with important commercial relations between the two countries, and was proclaimed by the President. If not technically a treaty requiring ratification, nevertheless it was a compact authorized by the Congress of the United States, negotiated and proclaimed under the authority of its President. We think such a compact is a treaty under the Circuit Court of Appeals Act, and, where its construction is directly involved, as it is here, there is a right of review by direct appeal to this court."

2. One of the leading cases on the subject of the powers of the executive in the field of foreign affairs is *United States* v. *Curtiss-Wright Export Corp.*[64] which involved an attack upon the constitutionality of a joint resolution of Congress of May 28, 1934,[65] which provided that: "If the President finds that the prohibition of the sale of arms and munitions of war in the United States to those countries now engaged in armed conflict in the Chaco may contribute to the reestablishment of peace between those countries, and if after consultation with the governments of other American Republics and with their cooperation, as well as that of such other governments as he may deem necessary, he makes proclamation to that effect, it shall be unlawful to sell, except under such limitations and exceptions as the President prescribes, any arms or munitions of war in any place in the United States to the countries now engaged in that armed conflict, or to any person, company, or association acting in the interest of either country, until otherwise ordered by the President or by Congress."

Under the authority of this statute the President issued a proclamation prohibiting the sale of arms in the United States to the countries engaged in the Chaco War, namely, Bolivia and Paraguay. The Curtiss-Wright Corp. was indicted for conspiracy to violate the joint resolution and on appeal attacked the constitutionality of the joint resolution on the ground that it constituted an unlawful delegation of legislative power to the Executive. Excerpts from the opinion of the Court follow:

"It results that the investment of the Federal Government with the powers of external sovereignty did not depend upon the affirmative grants of the Constitution. The powers to declare and wage war, to conclude peace, to make treaties, to maintain diplomatic relations with other sovereignties, if they had never been mentioned in the Constitution, would have vested in the Federal Government as necessary concomitants of nationality. Neither the Constitution nor the laws passed in pursuance of it have any force in foreign territory unless in respect of our own citizens (see *American Banana Co.* v. *United Fruit Co.*, 213 U. S. 347, 356); and operations of the Nation in such territory must be governed by treaties, international understandings and compacts, and the principles of international law. As a member of the family of nations, the right and power of the United States in that field are equal to the right and power of the other members of the international family. Otherwise, the United States is not completely sovereign. The power to acquire territory by discovery and occupation (*Jones* v. *United States*, 137 U. S. 202, 212), the power to expel undesirable aliens (*Fong Yue Ting* v. *United States*, 149 U. S. 698, 705 et seq.), the power to make such international agreements as do not constitute treaties in the constitutional sense (*Altman & Co.* v. *United States*, 224 U. S. 583, 600–601; Crandall, Treaties, Their Making and Enforcement, 2d ed., p. 102, and note 1), none of which is expressly affirmed by the Constitution, nevertheless exist as inherently inseparable from the conception of nationality. * * *

"Practically every volume of the United States Statutes contains one or more acts or joint resolutions of Congress authorizing action by the President in respect of subjects affecting foreign relations, which either leave the exercise of the power to his unrestricted judgment, or provide a standard far more general than that which has always been considered requisite with regard to domestic affairs.

* * * * *

"The result of holding that the joint resolution here under attack is void and unenforceable as constituting an unlawful delegation of legislative power would be to stamp this multitude of comparable acts and resolutions as likewise invalid. And while this Court may not, and should not, hesitate to declare acts of Congress, however many times repeated, to be unconstitutional if beyond all rational doubt it finds them to be so, an impressive array of legislation such as we have just set forth, enacted by nearly every Congress from the beginning of our national existence to the present day, must be given unusual weight in the process of reaching a correct determination of the problem. A legislative practice such as we have here, evidenced not by only occasional instances, but marked by the movement of a steady stream for a century and a half of time, goes a long way in the direction of proving the presence of unassailable ground for the constitutionality of the practice to be found in the origin and history of the power involved, or in its nature, or in both combined."

3. *United States* v. *Belmont*[66] involved certain aspects of the agreements between President Roosevelt and Foreign Commissar Litvinov in 1933 referred to above. This agreement, among other things, provided for the assignment to the United States of all claims of the Soviet Government against United States nationals arising by virtue of a decree of 1918 of the Soviet Government nationalizing and appropriating certain property, including a sum of money deposited prior to 1918 by a Russian corporation with Belmont. The United States sued to recover the deposit under the assignment. The lower court dismissed the complaint on the ground that a judgment for the United States would be contrary to the controlling public policy of the State of New York. The Supreme Court reversed the decision of the lower court and held that the United States was entitled to recover. In so holding the Court stated:

"We take judicial notice of the fact that coincident with the assignment set forth in the complaint, the President recognized the Soviet Government, and normal diplomatic relations were established between that Government and the Government of the United

[60] Department of State Bulletin, August 24, 1940, p. 154.

[61] McClure, International Executive Agreements, p. 221.

[62] 244 U. S. 583.

[63] 30 Stat. 151.

States, followed by an exchange of ambassadors. * * * The effect of this was to validate, so far as this country is concerned, all acts of the Soviet Government here involved from the commencement of its existence. The recognition, establishment of diplomatic relations, the assignment, and agreements with respect thereto, were all parts of one transaction, resulting in an international compact between the two Governments. That the negotiations, acceptance of the assignment, and agreements and understandings in respect thereof were within the competence of the President may not be doubted. Governmental power over internal affairs is distributed between the National Government and the several States. Governmental power over external affairs is not distributed, but is vested exclusively in the National Government. The assignment and the agreements in connection therewith did not, as in the case of treaties, as that term is used in the treaty-making clause of the Constitution (art. II, sec. 2), require the advice and consent of the Senate.

"A treaty signifies 'a compact made between two or more independent nations with a view to the public welfare.' *Altman & Co.* v. *United States* (224 U. S. 583, 600). But an international compact, as this was, is not always a treaty which requires the participation of the Senate. There are many such compacts, of which a protocol, a modus vivendi, a postal convention, and agreements like that now under consideration are illustrations. (See 5 Moore, Int. Law Digest, 210–221.) The distinction was pointed out by this Court in the Altman case, supra, which arose under section 3 of the Tariff Act of 1897, authorizing the President to conclude commercial agreements with foreign countries in certain specified matters. We held that althought this might not be a treaty requiring ratification by the Senate, it was a compact negotiated and proclaimed under the authority of the President, and as such was a treaty within the meaning of the Circuit Court of Appeals Act, the construction of which might be reviewed upon direct appeal to this Court."

4. *United States* v. *Pink*[67] involved the recognition of the effect in the United States of another decree of the Soviet Government which purported to nationalize the insurance business and all of the property, wherever situated, of all Russian insurance companies, including the First Russian Insurance Co., which had a branch in New York. The United States Government, suing as assignee of the Soviet Government under the Litvinov Assignment, was held entitled to recover the surplus of the New York branch of the Russian Insurance Co. subsequent to its liquidation. In so holding and in reversing the decision of the lower court, the Court stated:

"If the priority had been accorded American claims by treaty with Russia, there would be no doubt as to its validity. (Cf. *Santovincenzo* v. *Egan*, supra.) The same result obtains here. The powers of the President in the conduct of foreign relations included the power, without consent of the Senate, to determine the public policy of the United States with respect to the Russian nationalization decrees. 'What government is to be regarded here as representative of a foreign sovereign state is a political rather than a judicial question, and is to be determined by the political department of the government.' *Guaranty Trust Co.* v. *United States* (supra, 304 U. S. at p. 137). That authority is not limited to a determination of the government to be recognized. It includes the power to determine the policy which is to govern the question of recognition. Objections to the underlying policy as well as objections to recognition are to be addressed to the political department and not to the courts. See *Guaranty Trust Co.* v. *United States* (supra, p. 138); *Kenneth* v. *Chambers* (14 How. 38, 50–51). As we have noted, this Court in the Belmont case recognized that the Litvinov Assignment was an international compact which did not require the participation of the Senate. It stated (301 U. S. pp. 330–331): 'There are many such compacts, of which a protocol, a modus vivendi, a postal convention, and agreements like that now under consideration are illustrations.'"

* * * * *

The foregoing cases are referred to herein for the sole purpose of establishing (a) the validity of agreements with foreign countries entered into as to this country otherwise than as treaties and (b) that the treaty process is not the only constitutional method for concluding arrangements with other countries. Despite the assertions in the past of the opponents of the St. Lawrence project that all or some of these cases may have been incorrectly decided by the Supreme Court, it is submitted that they conclusively establish the propositions above stated and that, consequently, such decisions, in conjunction with the legislative and other precedents discussed above, are conclusive authorities with respect to the constitutionality of the St. Lawrence legislation.

V. ARGUMENTS OF OPPONENTS

The opponents of the St. Lawrence project have endeavored to sustain the thesis that the project cannot be passed upon by Congress under the commerce clause in view of the fact that any such legislation would be related to an agreement with a foreign country. The argument is made that an "executive agreement" transmitted to Congress for information to be approved by a majority vote in each House may not be constitutionally used as an alternative to the conclusion of a treaty submitted to the Senate for its advice and consent by two-thirds of the Senators present.[68] The arguments of the opponents are based on a series of considerations of both a legal and political[69] nature which, it is submitted, do not successfully refute the points which have been developed herein with respect to the exercise powers of Congress.

Before any detailed analysis is made of the arguments of the opponents, two points should be stressed. First, the line of argument taken by the opponents tends to be misleading to the extent that, for certain arguments at least, it lumps all "executive agreements" as being subject to the same alleged legal disqualifications. The argument fails to differentiate between those executive agreements which are made on the authority of the President alone under the powers vested in his office by the Constitution, and, on the other hand those agreements which in their nature require authorizing or effectuating legislation in order to carry them out and are in fact entered into either under congressional authorization or, as in the case of the 1941 agreement and others noted above, subject to the enactment of adequate implementing legislation. Thus, the alarm expressed by the opponents[70] over the alleged evils of secrecy in the case of "executive agreements" is totally inapplicable and misleading in relation to an agreement which is in fact public and which by its terms and by the very nature of its subject matter cannot become a perfected and binding agreement until it has been passed upon by Congress.

Secondly, it should be clearly understood that it is not the thesis of this memorandum that any international arrangement can be entered into through the procedure which has been used in this case. The only precedents which have been cited as being of any relevance in this case are those in which Congress has enacted legislation to authorize, effectuate, or approve international agreements in a field related to one of the delegated powers of Congress, and certain additional and very special considerations with respect to the legal basis of the 1941 agreement are referred to in the next section of this memorandum. There are obvious limitations upon the types of cases in which the Congress as a whole can act in relation to an international agreement. The most important limitation is that the subject matter of the agreement must be in a field of congressional responsibility under the constitution.[71]

These limitations do not exist with respect to the use of treaties. On the other hand, however, while it is beyond argument that the treaty method might be employed in this case or in any of the cases of agreement with foreign countries which have been referred to in this memorandum, there are obvious advantages in the use of the procedure employed in this case to the extent that it gives the Congress as a whole an opportunity to pass upon a case which involves a wide range of subjects which are normally passed upon by Congress, including the construction of navigation works and power projects, the appropriation of substantial sums of money, and the authorization of an important agreement with a State government concerning a matter of vital domestic import.

Supreme Court Decisions Incorrect

The opponents, while maintaining generally the thesis that all international arrangements, except possibly some relating to administrative matters, must be entered into through the treaty procedure,[72] nevertheless note that several decisions of the Supreme Court have recognized and upheld the validity of "executive agreements" in certain types of cases as valid alternatives to the treaty method. The answer of the opponents to this is apparently that the decisions of the Supreme Court are wrong,[73] and that, according to the law as they recognize it, the treaty method is the only constitutional method of concluding agreements with foreign countries, at least in respect of any matters but

[68] Edwin Borchard, opinion, hearings before subcommittee of the Committee on Commerce on S. 1385, 77th Cong., 1st sess., November 27, 1944, pp. 103, 111–112.

[69] See Borchard, hearings, p. 186, where the witness admits that his objections are "more on the ground of policy" than "constitutionality."

[70] Hearings, p. 185.

[71] See, for example, David M. Levitan, Executive Agreements, 35 Ill. Law Rev. 365, 394, in which the writer states:

"* * * Only international issues of which the domestic counterpart is within the range of congressional authority can be dealt with satisfactorily by means of executive agreements. Executive agreements can be domestically validated as long as they deal with subjects within the legislative competence of Congress, for then Congress assures internal enforcement of the agreement. It must be remembered, however, that this is a federal state and that Congress has but limited authority. Many of the international problems are on the internal level beyond the competence of Congress to legislate; these problems can only be dealt with by treaty."

See also Henry S. Fraser, Treaties and Executive Agreements, S. Doc. 244, 78th Cong., 2d sess., in which the writer states at p. 2 that—

"Not infrequently the Congress by joint resolution has accomplished what might have been achieved by treaty. So long as the legislation is within the delegated or implied powers of Congress, there would appear no constitutional objection to this method."

[72] Borchard, hearings, p. 114.

[73] Borchard, hearings, p. 133.

those relating to routine details. It is believed that this position of the opponents indicates a tendency to overemphasize the alleged evils of international agreements as distinguished from treaties, and that if upheld in any court it would cast doubt upon the validity of innumerable international acts of the United States since the foundation of the Republic. The Altman case was decided 24 years ago; the Belmont case 9 years ago; and the Pink case 4 years ago. No Supreme Court decision has ever questioned the argument maintained in this memorandum, or impugned the validity of any agreement with a foreign country on the ground that it had not been submitted to the Senate for its advice and consent.

Congressional Authorization and Senatorial Waiver

The opponents also concede that there have been instances in which matters of importance have been handled with foreign countries other than through the treaty process. Certain of these cases are explained away on the ground that in such cases the procedure was one which "was authorized by Congress." [72] In so explaining these cases, the opponents have admitted exactly what they have devoted so much of their energies in attempting to disprove, namely, that in certain types of cases the Congress can act despite the fact that a foreign agreement is involved and consequently that the treaty process is not the only method of concluding agreements with foreign countries.

At another point, however, a different explanation is made with respect to the instances where the treaty process has not been used with respect to agreements that were allegedly appropriate only for ratification by the Senate, namely, that in these cases the Senate waived its right to have the particular agreement submitted to it for ratification.[74] Thus, in commenting upon the Canadian reciprocity legislation of 1911, Mr. Borchard states that "the Senate gave its approval by majority vote, which was itself a waiver of its treaty prerogative even if that were an issue. Besides, Congress had authorized the President to make the agreement."

As to the case of Horse Shoe Reef, Mr. Borchard pointed out that the Senate joined in an appropriation for a lighthouse and that therefore the Senate may be deemed to have waived any question of senatorial prerogative. With respect to the Root-Takahira Agreement of 1908, Mr. Borchard states that this was communicated to the Senate for its information, and received Senate acquiescence. In discussing the case of UNRRA, Mr. Borchard explains that the procedure was first discussed with a subcommittee of the Foreign Relations Committee, which consented to the agreement with a commitment to recommend to the Senate a waiver of its insistence upon a treaty. It appears, therefore, from the arguments of the opponents that the question at issue is not a legal or constitutional question in any sense but simply a question of senatorial prerogative which can be waived either by majority vote of the Senate on a bill to approve a foreign agreement, or by action of a subcommittee of one of its committees, or even by silent acquiescence of the Senate upon the communication to it of an agreement negotiated by the Executive. Thus, according to the opponents' own arguments, it would be entirely legal if the Senate desires for it to pass the legislation upon consideration regardless of the treaty issue, and, if the House should join with it, the propriety of the action could not thereafter be questioned. If the opponents' arguments are accepted this would appear to be conclusive of the whole problem which they have raised.[75]

Durability of Treaties and Agreements

That the question raised by the opponents is in fact primarily a political one is quite clear from an examination of other arguments made by them. One such political argument relates generally to the alleged weakness of executive agreements on the ground that they are subject to repeal whereas treaties are supposedly more durable.[76] It is not entirely clear whether this argument is advanced in support of the thesis that the procedure under consideration is unconstitutional—since such an argument is hardly relevant to a legal discussion—or whether it is advanced out of solicitude with respect to a supposed defect in the position of the foreign contracting party. It is not clear either whether Mr. Borchard's point is that the United States Congress might repeal the dams, powerhouses, etc., after they are built. As to the intrinsic merits in this particular of a treaty as compared to an agreement approved by legislation, the opponents do not deny that a statute of Congress may validly be enacted and enforced in this country even though such statute would result in a violation of treaty obligations.[77]

A breach of an international obligation could arise in this case, just as in the case of a treaty, if the reciprocal legislation should be enacted by the two countries and the agreement should be proclaimed in accordance with its terms, and later the Congress should adopt inconsistent legislation after Canada has expended funds in reliance upon the agreement so proclaimed.[78] As to the fears expressed by the opponents that the approval of the St. Lawrence agreement by simple legislation rather than by a two-thirds vote would leave the situation insecure and subject to continued agitation by the St. Lawrence "lobby" [79] the same argument might quite as well have been made in respect of the authorization by simple legislation of such controversial projects as the Tennessee Valley Authority, or the Boulder Dam, where important rights of the Colorado River Basin States were involved. In fact, as has been noted above, the act creating the Niagara Falls Bridge Commission specifically reserved in Congress the right to alter, amend, or repeal the legislation in question. However, although the construction of this bridge was a matter of considerable controversy in Canada, the reservation by the United States Congress of its right to repeal the legislation did not impede the conclusion of that project.

Effect of Importance of Negotiation

A substantially similar line of argument by the opponents is their claim that subjects of importance must be handled only through the treaty process and that, since the St. Lawrence agreement is such a subject, resort cannot be had to any other method of approval.[80] This again is a political rather than a legal argument since the constitutionality of a particular procedure cannot depend upon the relative importance of the particular problem with respect to which the procedure is sought to be employed. Is it to be assumed, for example, that Congress can act upon a matter involving $30,000,000, for example, as in the improvement of the Great Lakes channels referred to below—but not on a matter involving $300,000,000—and, if not, what is the limit of its authority and whence does the limitation stem? The obvious answer is that the test lies in whether or not the subject matter is within the power of Congress, and not in the importance of the subject. Few international agreements are of greater importance to the United States, for example, than the Bretton Woods agreements which have been adhered to by the United States under authority granted by Congress in the exercise of its constitutional powers. Mr. Borchard has stated that "the very magnitude of the St. Lawrence waterway and power project, involving, as it does, hundreds of millions of dollars, probably 4 years of time, a special governmental commission,

[72] Borchard, hearings, p. 114.

[74] Borchard, hearings, p. 117.

[75] In commenting upon the inconsistency of the position of the opponents (which is also contained in an article by Mr. Borchard on the subject of executive agreements, 53 Yale Law Journal 664) Messrs. Myres S. McDougal (a colleague of Mr. Borchard at Yale Law School) and Asher Lans, in their article entitled "Treaties and Congressional-Executive or Presidential Agreements," 54 Yale Law Journal 181, 223, have stated:

"There is in fact a curious, backhand recognition of this completely adequate constitutional procedure, independent of the treaty-making clause, for effecting international agreements even in the writings of those who most vigorously oppose the use of this alternative procedure. Thus Professor Borchard, after writing at great length to prove that agreements negotiated with the approval of the whole Congress are not interchangeable substitutes for the treaty and that 'there is no constitutional warrant whatever for the suggestion that the President has an option to submit his compact either to the Senate as a treaty * * * or to the Congress for majority approval,' paradoxically reverses his position and seeks to dispose of the many precedents contradictory of his point of view * * * by the suggestion that all of these agreements can be justified either by congressional statute or by senatorial waiver of the particular assumption of power."

[76] Borchard, hearings, p. 121.

[77] See Borchard, Executive Agreements, A Reply, 54 Yale Law Journal, 616, 659; "Even an act of Congress departing from the treaty does not relieve the country of its liability thereunder." As to the power of the Congress generally to pass laws inconsistent with treaties, see McDougal and Lans, op. cit. 318-348.

[78] McDougal and Lans, op. cit. 348-350; Green H. Hackworth, hearings before subcommittee of Senate Commerce Committee, November 29, 1944, pp. 220-230.

The opponents, in taking the contrary view, rely heavily upon an alleged precedent indicating that "executive agreements" entered into under legislative sanction do not create binding international obligations. This was a case involving a trade agreement with Brazil negotiated in compliance with general authority under the Tariff Act of 1890, in which the United States gave notice of immediate termination of the agreement upon the repeal of the act and claimed that it had not breached its international obligations when the underlying legislative authority was repealed. (See Foreign Relations of the United States, 1894, 76, 79-82.) But examination of the Department of State's correspondence with Brazil shows that the terms of the underlying legislative authority of the two countries was well known to each government and that Brazil was on notice from the beginning of the negotiations that the arrangement was subject to termination upon repeal of the authorizing act, and the possibility of this action was an implied condition subsequent to the agreement. This case then, to quote Messrs. McDougal and Lans, "furnishes no authority whatever for the position that a congressional-executive agreement may, as a general rule, be unilaterally abrogated by the United States without breaking international law." In any event that case is not apposite to the St. Lawrence case, in which the agreement will not come into force by its terms unless special legislation is enacted to approve the agreement.

[79] Borchard, hearings, p. 186.

[80] Borchard, hearings, p. 115.

obligations to be imposed in the future, both on the United States and on Canada" require that it be handled as a treaty. Precisely the same considerations were present in the legislation with respect to the Niagara Falls and St. Lawrence Bridge Commissions, as to which Mr. Borchard states merely that, while "Congress may of course pass an act creating, conditional upon similar authorization by Canada, the Niagara Falls Bridge Commission, and authorize it to construct and operate a bridge across the Niagara River * * *, there is nothing unusual about such an establishment."

The fact that there is nothing unusual about a matter hardly proves that it is not important. The Niagara Falls Bridge case does appear for the reasons noted above to be a close parallel to the case under study and the fact there is nothing unusual about it would appear to constitute in itself an argument for the use of the same procedure here.

Congress Cannot Approve or Amend Agreements

The opponents have laid great stress upon the claim that it is out of order for Congress to "approve" an agreement with a foreign country.[81] That the Congress may authorize an agreement or that an agreement may be entered into under the authority of existing legislation is admitted by the opponents, but if an agreement is negotiated by the Executive without prior authorization the submission of the agreement to Congress for its approval would, it is claimed, vitiate the power of Congress with respect to the subject matter of the agreement. On the other hand, if the Congress authorizes the President to negotiate an agreement and in so doing specifically enacts a requirement that the agreement must subsequently be submitted by the President to the Congress for its approval, then apparently Congress may validly retain and exercise its constitutional powers to the extent of acting upon the agreement.[82] Furthermore, instances in which the Congress has actually acted in approval of a previous agreement negotiated without prior congressional authorization may apparently be again explained, according to the opponents, on the ground that the method in question was authorized by Congress or that any objections to the procedure of approval by Congress were "waived" by the Senate.[83]

The claim that Congress cannot approve agreements negotiated by the President is not only untenable on its face but it is refuted by the precedents and is in any case entirely inconsistent with the power of Congress by majority of both Houses to pass legislation on any subject within the scope of its constitutional powers. As has already been seen, there are numerous precedents for congressional approval for particular agreements negotiated by the Executive. One of the most striking of these is the case of UNRRA where, although the agreement which had been signed by the President was not in so many words "approved" by the legislation, it was set forth in full therein and the Congress went to the extent of amending the law so as to include several reservations therein. The fact that the agreement had been previously discussed with a subcommittee of the Foreign Relations Committee does not in any sense detract from the relevance of this important case.

In the case of the Bretton Woods agreements and the Food and Agriculture Organization, the basic agreements creating the organizations were negotiated by the Executive with the other nations but were not signed until after the passage of the enabling legislation. The legislation in each case authorized the President to accept membership in the organizations provided by the respective agreements and enacted other provisions to facilitate the execution of the agreements by the United States. This action is tantamount to approval of the agreements. The Bretton Woods legislation went further and directed the executive branch to take action to amend the agreements in certain respects. It would have been equally in the power of Congress to place any other conditions upon United States adherence to the agreements or to legislate, for example, that the United States quota in the Monetary Fund could not be paid until the agreement had been amended in a given respect.

In the case of the debt-funding agreements referred to above, each of the individual agreements with the countries concerned was approved by the Congress after it had been negotiated by the Debt Funding Commission. This, as the opponents point out,[84] was done pursuant to provisions of the debt-funding legislation that the agreements should be approved by Congress after having been negotiated. The opponents appear to believe that although Congress cannot approve an agreement which has been negotiated by the President without prior congressional authorization, the Congress nevertheless can on its own initiative vote itself the right to do what it otherwise has not the power to do, namely, to approve an agreement with a foreign country.

In the case of the fur-seal legislation, as has previously been described, the action of the Congress was in a slightly different form since the legislation was passed to implement the provisions of the agreement negotiated by the Executive—and the legislation in effect enacted the terms of the agreement in full—but the effect is substantially the same as if the agreement had been approved in so many words.

The United Nations Participation Act also recognizes the right of Congress to approve agreements entered into by the Executive in the provision which authorized the President to negotiate a military agreement with the United Nations Security Council and directed that such agreement "shall be subject to the approval of the Congress by appropriate act or joint resolution." As noted above, this provision was passed by Congress after a long debate in which substantially the same contention was expressed in the Senate as has been made by Mr. Borchard, namely, that the only constitutional method by which foreign agreements negotiated by the Executive can be approved is through ratification as treaties by the Senate.

It is believed, therefore, that the contention of the opponents in this respect is entirely without substance and that whether the action of the Congress with respect to a foreign agreement takes the form of (a) authorization, (b) approval, or (c) enactment of implementing authority, the substantive result in each case is precisely the same. Whichever method may be used, the power of Congress to act in the matter rests upon its delegated powers under the Constitution.

In this connection the opponents have also stated that the procedure at issue here is faulty because Congress has no power to amend the agreement.[85] While it may be literally true that Congress cannot amend the agreement, there can be no doubt whatever as to its power to make its approval conditional upon certain changes being made in the agreement or, as is proposed to be done in the bill under reference, to withhold approval of certain separable provisions of the agreement, and suggest that the President negotiate treaties with respect to the substance thereof. There is no doubt as to the propriety of this procedure any more than there would be as to the propriety of action by the Congress, for example, to direct the President to renegotiate all or certain phases of the agreement or to take the whole thing back and negotiate it as a treaty. In commenting upon this point, Messrs. McDougal and Lans have stated:

"This same semantic confusion about what is involved in the 'making' of an agreement seems to underlie Professor Borchard's novel and repeated insistence that when an agreement is referred by the President to the Congress, the Congress has power only to consent or disapprove, but lacks the power to suggest amendments, such as the Senate possesses in the case of treaties. Professor Borchard's notion seems to be that a legislative body cannot amend an agreement unless it has a document physically before it and itself makes verbal changes on the parchment. Thus, he states: 'This is not submitted to the Senate in the form of a document which you have to consider and have the right to amend as we have amended 162 of our treaties. You have got to take this or leave it. You can't modify the thing, you can't place a comma in it.' To Senator FERGUSON'S question 'Is there anything in the law to say that we could not change it? Couldn't we draft laws as we see fit?' he replies, 'You can draft laws, but you can't draft agreements between foreign countries.'

"It should be obvious that when the legislative function is conceived as that of forming policy, rather than of pushing pens on specific pieces of parchment, there is no difficulty in the Congress making amendments to agreements. The powers of the Congress to tell the President to go back and do his job over and do it in a specific way, if he does it at all, are fully as great as those of the Senate. Senator FERGUSON'S answer to Professor Borchard on this point, illustrated by reference to the amendments made by Congress to the UNRRA agreement, would appear conclusive." [86]

Construction in Foreign Countries

Finally, the opponents have made it clear that the proposed legislation is invalid because Congress cannot authorize the expenditure of funds for construction in foreign countries.[87] This claim, of course, does not take into account the fact that the whole tenor of the agreement is that in general the work in Canada should be performed by Canada, and the work in the United States by this country, and that any work done by the United States in Canada would be entirely incidental to the construction of indivisible units, the construction of which do not lend themselves to performance by separate groups of operators. The opponents suggest that it is permissible for United States funds to be used in connection with the construction of a bridge across an international stream because the responsibility of each party would extend simply to the boundary line in the middle of the river. It is hard to visualize how construction work on a bridge could be so divided so as to provide that workmen and materials of the respective nationalities would refrain from crossing an imaginary boundary line. It is more difficult to understand how there could be any difference in principle between the two cases.

Furthermore, there does not appear to be any basis in law for the opponents' contention. There have already been listed above, in section II above, a long list of cases in which the Congress has authorized the expenditure of appropriated funds for use in construction projects in foreign countries.

[81] Borchard, hearings, p. 127.

[82] See Borchard, hearings, p. 127, where, in discussing the Canadian Reciprocity Agreement of 1911, he states: "But what invalidates the whole episode for purposes of precedent is the overlooked fact that Congress first authorized the President, by act of July 26, 1911, to negotiate a reciprocal agreement with Canada for freer trade relations, provided, however, that before such agreements become operative they should be submitted to Congress 'for ratification or rejection.'"

[83] Borchard, hearings, p. 127.

[87] Borchard, hearings, pp. 166–169.

In each of these cases the entire project was located in the foreign country unlike the case at issue in which, as has been noted, any expenditure of funds abroad would be entirely incidental to the construction of a project at an international boundary stream which will be located as much in this country as in the foreign country. The previous projects referred to include the Alaska Highway, where funds were authorized to be expended abroad and were so expended in surveys long before military considerations made necessary the building of the road under the war powers; the Inter-American Highway; the Rio Hato to Chorerra road, in Panama; and the construction of certain aids to navigation in islands in Panama near the Panama Canal. Another example is the very recent act of Congress approved February 12, 1946, authorizing the Weather Bureau to "take such action as may be necessary in the development of an international basic meteorological reporting network in the Arctic region of the Western Hemisphere, including the establishment, operation, and maintenance of such reporting stations in cooperation with the State Department * * * with the meteorological services of foreign countries and with persons engaged in air commerce" and authorizing appropriations for this purpose.

Another example which is as pertinent in many respects to the discussion in section II as it is at this point concerns the construction of certain works by the United States in Mexico in 1911. In 1907 the entire lower valley of the Colorado River and the Imperial Valley were threatened owing to a change in the course of the Colorado River. It was essential to perform construction work in Mexico in order to protect investments in the United States of millions of dollars. President Roosevelt laid the matter before Congress and simultaneously undertook negotiations with Mexico. By act of June 25, 1910,[88] the Congress appropriated $1,000,000 for the purpose of protecting American property against changes in the course of the river and authorized the President "to expend any portion of such money within the limits of the Republic of Mexico as he may deem proper in accordance with such agreements for the purpose as he may make with the Republic of Mexico."

By exchange of notes in December 1910 an agreement was reached between the two countries for the construction in Mexican territory by the United States of protective works necessary to guard the Imperial Valley against floods of the Colorado River. The agreement provided, among other things, that the Executive of Mexico propose to the Mexican Congress legislation to facilitate the work by the United States, including free entry of machinery and supplies and also provided that the United States should not acquire "by virtue of this agreement" any right of ownership over the works or any part of Mexican territory.[89]

[88] 36 Stat. 883.

[89] For full information as to this matter, including copies of the exchange of notes, see Foreign Relations of the United States, 1911, 525–565.

A similar piece of legislation is the act of October 6, 1917 (40 Stat. 374), which authorized the Secretary of Agriculture, in order to prevent the spread of bollworm in Texas and other parts of the United States, to make surveys and determine the actual distribution of bollworm in Mexico; and to cooperate with the Mexican Government in the extermination of local infestations near the border. Similarly, by the act of June 28, 1944 (58 Stat. 440), there was appropriated $2,700,000 to enable the Secretary of Agriculture to conduct operations for the control of insect pests and plant diseases "including surveys and control operations in Canada in cooperation with the Canadian Government or local Canadian authorities."

Rivers and harbors legislation has frequently made provision with respect to construction projects by the United States in international boundary streams requiring work to be performed, and appropriated funds to be expended, by the United States in foreign territory. An outstanding example of construction work carried on in foreign countries under authorization of Congress is furnished by the improvement of the channels in the mouth of the Detroit River, the greater part of which channels lie in Canada. Work upon the improvement of these channels has been authorized by various acts of Congress of which the earliest appears to have been the act of June 23, 1874 [90] which appropriated $25,000 for "removing boulders and rocks from the Detroit River, partly in Canadian waters * * *."

The act of June 13, 1902 [91] authorized further work in the channel of the Detroit River and in the Middle and West Neebish Channels, St. Mary's River, Mich., in accordance with plans furnished to the Congress,[92] which indicated that part of the work was to be performed in Canadian territory. In the River and Harbor Act approved January 21, 1927,[93] Congress made further provision for the improvement of Middle Neebish Channel, St. Marys River, in accordance with plans furnished to the Congress,[94] which again indicated that parts of the channel in question overlapped the international boundary and required work to be performed in Canadian territory. Apparently this fact did not deprive the Congress of its power in these cases. In the River and Harbor Act approved July 2, 1930,[95] Congress authorized the construction of Great Lakes connecting channels and authorized appropriations therefor of $29,266,000. The testimony in support of the legislation again indicated that the improvement of the channel in the St. Marys River, the St. Clair River, and the Detroit River as authorized by this legislation involved work in Canadian territory.[96] Again no question was raised with respect to the propriety of the action.

The only legislation which has been found which might be construed as having even a remote connection with the argument advanced by the opponents with respect to the use of appropriated funds for construction in foreign counries is section 355 of the Revised Statutes,[97] which provides that no public money shall be expended upon any site or land purchased by the United States for the purpose of erecting thereon any public building until the written opinion of the Attorney General shall be had in favor of the validity of the title nor until the consent of the legislature of the State in which the land or site may be, to such purchase, has been given. This statute at the very most relates to title to real estate and does not pose any broader issue along the lines of the contention of the opponents. Furthermore, it is merely a legislative, as distinguished from a constitutional, requirement, and therefore subject to subsequent contrary action by the Congress. In any event this provision is not applicable with respect to construction of the type involved in this project. This is clear from a decision of the Comptroller General in 1938 that it was proper for the Department of Agriculture Forest Service to expend an appropriation available to that Service for the construction of a dam a considerable portion of which lay in Canada on the boundary between Minnesota and Ontario. In so holding, the Comptroller General stated:

"While, as stated in the decision reported in 6 Comptroller's Decisions 877, referred to in your letter, certain statutory provisions referred to in said decision, including sections 355 and 1136, Revised Statutes, indicate that it is the general policy of the Congress that no public building should be erected on land not owned by the United States, the present submission does not involve a question of the erection of a public building—a dam being obviously not a public building—and in that respect differs from the cited case. It may be stated, however, as a general proposition, that in the absence of express statutory provision there is no authority to use appropriated funds for the construction or erection of improvements on property not owned by the Government.

"It appears from your letter that the portage benefited would be within the United States but that it is not possible to construct the dam wholly on land within the United States, and it is understood therefrom that the greater part of the dam is to be within the United States. The construction of a part of the dam on Canadian soil would appear from the facts as set forth in your letter to be a necessary incident to the construction and use of the portage within the United States. Under these circumstances, this Office will not be required to object to the use of an appropriation otherwise properly available for the project merely because the dam may be partly on Canadian soil, provided, of course, that appropriate consent therefor be first obtained from the Canadian Government." [98]

For the foregoing reasons the contention of the opponents that the United States cannot participate in the St. Lawrence project because it involves construction work in a foreign country appears to be wholly without substance.

Rights of navigation in St. Lawrence system

By the Treaty of Amity, Commerce, and Navigation of 1794 between the United States and Great Britain, it was provided in part as follows:

"ART. III. It is agreed that it shall at all times be free to His Majesty's subjects, and to the citizens of the United States, and also to the Indians dwelling on either side of the said boundary line, freely to pass and repass by land or inland navigation, into the respective territories and countries of the two parties, on the continent of America (the country within the limits of the Hudson's Bay Co. only excepted), and to navigate all the lakes, rivers, and waters thereof, and freely to carry on trade and commerce with each other.

* * * * *

"ART. XIV. There shall be between all the dominions of His Majesty in Europe and the territories of the United States a reciprocal and perfect liberty of commerce and navigation. The people and inhabitants of the two countries, respectively, shall have liberty freely and securely, and without hindrance and molestation, to come with their ships and cargoes to the lands, countries, cities, ports, places, and rivers within the dominions and territories aforesaid, to enter into the same, to resort there, and to remain and reside there without any limitation of time. Also to hire and possess houses and warehouses for the purposes of their commerce, and generally the merchants and traders on each side shall enjoy the most complete protection and security for their commerce; but subject always as to what

respects this article to the laws and statutes of the two countries respectively." [0]

By the Reciprocity Treaty of 1854 between the United States and Great Britain, regulating commerce and navigation between the United States and the British possessions in North America, it was provided that:

VI. EFFECT OF PREVIOUS TREATIES

All of the foregoing is concerned with establishing that the legislation in question may be justified as being within the powers of Congress under the commerce clause of the Constitution and that the fact that such legislation is related to an agreement with a foreign country does not prevent the Congress from exercising jurisdiction over the subject matter. For purposes of emphasis and clarity, that part of the memorandum has been prepared as if the United States had no treaty rights with respect to the waters of the Great Lakes-St. Lawrence system where they are wholly in Canadian territory, and as if the 1941 agreement had been negotiated, and this legislation were being presented, without any background of earlier dealings between the two countries with respect to such waters. In fact, the arrangements which have been created by previous treaties and the rights which have been brought into being thereby are of such importance as to be determining of the question at issue here. Although it could not be claimed that the United States has acquired sovereignty to or title in any part of the Great Lakes-St. Lawrence system lying outside of its boundaries, the rights which it has acquired therein by previous treaties—in recognition of its natural interest in navigation in such system by virtue of geographical considerations—are of such special character as to lift any agreement with Canada relating to construction by the United States in connection with navigation in such waters, outside of the usual class of foreign agreement. Furthermore, the procedure for special agreements prescribed in the Boundary Waters Treaty of 1909 lays a clear foundation for the conclusion of the 1941 agreement through reciprocal legislation entirely aside from considerations discussed above as to the power of Congress to legislate in connection with foreign agreements.

"ART. IV. It is agreed that the citizens and inhabitants of the United States shall have the right to navigate the river St. Lawrence, and the canals in Canada used as the means of communicating between the Great Lakes and the Atlantic Ocean, with their vessels, boats, and crafts, as fully and freely as the subjects of Her Britannic Majesty, subject only to the same tolls and other assessments as now are, or may hereafter be, exacted of Her Majesty's said subjects; it being understood, however, that the British Government retains the right of suspending this privilege on giving due notice thereof to the Government of the United States.

"It is further agreed that if at any time the British Government should exercise the said reserved right, the Government of the United States shall have the right of suspending, if it think fit, the operations of article III of the present treaty, insofar as the province of Canada is affected thereby, for so long as the suspension of the free navigation of the river St. Lawrence or the canals may continue." [1]

By the Treaty of Washington, 1871, it was provided that:

"ART. XXVI. The navigation of the river St. Lawrence, ascending and descending, from the forty-fifth parallel of north latitude, where it ceases to form the boundary between the two countries, from, to, and into the sea, shall forever remain free and open for the purposes of commerce to the citizens of the United States, subject to any laws and regulations of Great Britain, or of the Dominion of Canada, not inconsistent with such privilege of free navigation.

"The navigation of the rivers Yukon, Porcupine, and Stikine, ascending and descending, from, to, and into the sea, shall forever remain free and open for the purposes of commerce to the subjects of Her Britannic Majesty and to the citizens of the United States, subject to any laws and regulations of either country within its own territory, not inconsistent with such privilege of free navigation.

"ART. XXVII. The Government of Her Britannic Majesty engages to urge upon the Government of the Dominion of Canada to secure to the citizens of the United States the use of the Welland, St. Lawrence, and other canals in the Dominion on terms of equality with the inhabitants of the Dominion; and the Government of the United States engages that the subjects of Her Brittanic Majesty shall enjoy the use of the St. Clair Flats Canal on terms of equality with the inhabitants of the United States, and further engages to urge upon the State governments to secure to the subjects of Her Britannic Majesty the use of the several State canals connected with the navigation of the lakes or rivers traversed by or contiguous to the boundary line between the possessions of the high contracting parties, on terms of equality with the inhabitants of the United States." [2]

By the Boundary Waters Treaty of 1909 between the United States and Great Britain it was provided that:

"ARTICLE I. The High Contracting Parties agree that the navigation of all navigable boundary waters shall forever continue free and open for the purpose of commerce to the inhabitants and to the ships, vessels, and boats of both countries equally, subject, however, to any laws and regulations of either country, within its own territory, not inconsistent with such privilege of free navigation and applying equally and without discrimination to the inhabitants, ships, vessels, and boats of both countries.[3]

"It is further agreed that so long as this treaty shall remain in force, this same right of navigation shall extend to the waters of Lake Michigan and to all canals connecting boundary waters and now existing or which may hereafter be constructed on either side of the line. Either of the High Contracting Parties may adopt rules and regulations governing the use of such canals within its own territory and may charge tolls for the use thereof, but all such rules and regulations and all tolls charged shall apply alike to the subjects or citizens of the High Contracting Parties and the ships, vessels, and boats of both of the High Contracting Parties, and they shall be placed on terms of equality in the uses thereof."

The effect of these treaties has been to vest important rights in the United States with respect to the waters affected by the 1941 agreement, even where said waters are wholly in Canadian territory. Thus Assistant Secretary of State Adee in 1913, in discussing the difference between the status of the Welland Canal, in Canadian territory, and the Panama Canal, stated:

"The cases are quite distinct and parity between them is almost wholly lacking. In the case of the Welland Canal it must be remembered that from the signature of the treaty of peace with Great Britain down to the conclusion of the Treaty of Washington in 1870 [sic] the coterminous waters between the United States and Canada and their outlet to the sea were a joint waterway of the two countries, the citizens and commerce of each having equal rights in the waters common to both countries. The Welland Canal is not an independent waterway but is part of the coterminous water system, being merely a loop around an unnavigable portion of the common waterway. Its common use by citizens and commerce of the two countries is just as necessary to the fulfillment of the convention compact as the common use of the Sault Ste. Marie Canal, which passes in American territory. None of these conditions are discernible in the case of the Panama Canal." [4]

Similarly, Senator Townsend, of Michigan, in introducing an amendment with respect to the construction of the St. Lawrence seaway during the debate in the Senate on the Canadian Reciprocity Act of 1911, stated that "it is well known that one of the objects of the treaty of 1854 was the improvement of the St. Lawrence River." [5]

There is considerable legal authority in support of the view expressed by Assistant Secretary Adee. Thus in the case of *Canada Malting Co.* v. *Paterson Steamships,* the Court stated:

"On this motion for rehearing proctors for respondent point out that by treaty relations between Great Britain and the United States the boundary waters of the Great Lakes, meaning thereby the entire body of water comprising lakes, rivers, and waterways separating the two countries, with respect to navigation have become international waterways and equally free to citizens of Canada and citizens of the United States. (See Root-Bryce Treaty of 1909, and President's proclamation of May 13, 1910 [36 Stat. 2448]; Moore's Digest of International Law, vol. I, p. 674.)

"In view of this treaty, there exists, it seems to me, additional reason for declining jurisdiction and relegating the parties to pursue their remedies and rights in the country of which they are citizens and subjects, in the place where the contract of carriage was made and performed, and, further, where the witnesses reside." [6]

Similarly, in the act approved February 8, 1895, regulating navigation on the Great Lakes and their connecting tributary waters, the Congress specifically stated that "the following rules for preventing collisions shall be followed in the navigation of all public and private vessels of the United States upon the Great Lakes and their connecting and tributary waters as far east as Montreal." [7]

These treaties, then, have vested in the United States reciprocal rights to navigation in boundary waters and in those waters of

[0] 8 Stat. 116, 117.

[1] 10 Stat. 1089, 1091.

[2] 17 Stat. 863, 872.

[3] 36 Stat. 2448, 2449.

[4] II Hackworth, Digest of International Law, 770.

[5] The amendment of Senator Townsend was to add a new section to the Reciprocity Act providing that "for the purpose of improving the St. Lawrence River from the Great Lakes to the Atlantic Ocean, and waterways connecting the Great Lakes, the President of the United States is authorized and directed to enter into an agreement with the Dominion of Canada which shall provide * * * for a waterway * * * for the common use and benefit of both countries and in furtherance of reciprocal trade relations between them: *Provided, however,* That said agreement before becoming operative shall be submitted to the Congress of the United States for ratification or rejection." Although the amendment was rejected, the discussion disclosed no doubts as to the propriety of proceeding in the manner suggested in the amendment, namely, through agreement with Canada to be submitted to the Congress for approval (47 CONGRESSIONAL RECORD, pt. 4, 3136).

[6] 49 F. (2d) 805, 806, aff'd 285 U. S. 413.

[7] 28 Stat. 645.

the Great Lakes-St. Lawrence system which are wholly located in Canadian territory. The only question that remains, therefore, is the method of further developing the usefulness of these rights through reciprocal improvements. For this purpose the parties agreed upon such a method in the 1909 treaty whereby special agreements may be entered into to improve the navigation of the system on the basis of reciprocal legislation.

Procedure for agreement in 1909 treaty

The preamble of the Boundary Waters Treaty of 1909 stated that its purpose was "to prevent disputes regarding the use of boundary waters and to settle all questions which are now pending between the United States and the Dominion of Canada involving the rights, obligations, or interests of either in relation to the other or to the inhabitants of the other, along their common frontier and to make provision for the adjustment and settlement of all such questions as may hereafter arise."

Article III of the treaty provides as follows:

"It is agreed that, in addition to the uses, obstructions, and diversions heretofore permitted or hereafter provided for by special agreement between the parties hereto, no further or other uses or obstructions or diversions, whether temporary or permanent, of boundary waters on either side of the line, affecting the natural level or flow of boundary waters on the other side of the line, shall be made except by authority of the United States or the Dominion of Canada within their respective jurisdictions and with the approval, as hereinafter provided, of a joint commission, to be known as the International Joint Commission.

"The foregoing provisions are not intended to limit or interfere with the existing rights of the Government of the United States on the one side and the Government of the Dominion of Canada on the other, to undertake and carry on governmental works in boundary waters for the deepening of channels, the construction of breakwaters, the improvement of harbors, and other governmental works for the benefit of commerce and navigation, provided that such works are wholly on its own side of the line and do not materially affect the level or flow of the boundary waters on the other, nor are such provisions intended to interfere with the ordinary use of such waters for domestic and sanitary purposes."

Article IV provides in part as follows:

"The High Contracting Parties agree that, except in cases provided for by special agreement between them, they will not permit the construction or maintenance on their respective sides of the boundary of any remedial or protective works or any dams or other obstructions in waters flowing from boundary waters or in waters at a lower level than the boundary in rivers flowing across the boundary, the effect of which is to raise the natural level of waters on the other side of the boundary unless the construction or maintenance thereof is approved by the aforesaid International Joint Commission."

Article VIII provides in part as follows:

"The following order of precedence shall be observed among the various uses enumerated hereinafter for these waters, and no use shall be permitted which tends materially to conflict with or restrain any other use which is given preference over it in this order of precedence: (1) Uses for domestic and sanitary purposes; (2) Uses for navigation, including the service of canals for the purposes of navigation; (3) Uses for power and for irrigation purposes."

Article XIII provides as follows:

"In all cases where special agreements between the high contracting parties hereto are referred to in the foregoing articles, such agreements are understood and intended to include not only direct agreements between the high contracting parties, but also any mutual arrangement between the United States and the Dominion of Canada expressed by concurrent or reciprocal legislation on the part of Congress and the Parliament of the Dominion."

The term "boundary waters" is defined in a preliminary article to the treaty as follows:

"For the purposes of this treaty boundary waters are defined as the waters from main shore to main shore of the lakes and rivers and connecting waterways, or the portions thereof, along which the international boundary between the United States and the Dominion of Canada passes, including all bays, arms, and inlets thereof, but not including tributary waters which in their natural channels would flow into such lakes, rivers, and waterways, or waters flowing from such lakes, rivers, and waterways, or the waters of rivers flowing across the boundary."

It seems entirely clear that the 1941 agreement with Canada is a special agreement within the meaning of article XIII of the 1909 treaty—being a mutual arrangement between the United States and Canada to be approved by concurrent or reciprocal legislation on the part of the Congress of the United States and the Parliament of Canada—which falls within the provisions of articles III and VIII of the 1909 treaty since it (the 1941 agreement) provides for uses, obstructions, and diversions of boundary waters or affecting the flow of boundary waters—which uses, obstructions, and diversions are within the purposes referred to in article VIII of the 1909 treaty. Consequently, the 1941 agreement may be appropriately brought into force as to the two countries through concurrent or reciprocal action of their legislative bodies.

Various objections have been raised by the opponents of the St. Lawrence project to this interpretation during the hearings before the subcommittee of the Senate Commerce Committee in December 1944. One objection is that construction of the kind to which the 1941 agreement refers is not contemplated by the procedure prescribed in the 1909 treaty. It would seem impossible to sustain this contention. It is entirely beyond argument that ship canals and power dams are "uses, obstructions, or diversions" for purposes referred to in article VIII, namely "navigation and power." Another objection is that since the 1909 treaty is by its terms terminable upon 1 year's notice, special agreements entered into pursuant to the procedure prescribed in such treaty are insecure. Even though this were a valid legal reason against resort to the procedure under the 1909 treaty, which it does not appear to be, the argument does not in any event seem sound. The termination of the 1909 treaty could not conceivably be held to invalidate an agreement which had become operative under the procedure prescribed in the 1909 treaty while said treaty was in effect between the parties. Such a contention if sustained might invalidate a whole series of fully executed, partially executed, or executory undertakings between the two countries in entire contravention of the purposes of the 1909 treaty. Any agreements under such procedure, once they have become binding, must be deemed to stand on their own feet and to be legally terminable only in accordance with their own respective terms.

The objection has also been made that the 1941 agreement goes beyond the scope of the provisions of the 1909 treaty on the ground that the 1941 agreement purports to grant perpetual navigation rights to Canada in the waters of Lake Michigan, which, it was claimed, could not be considered as falling within the definition of boundary waters included in the 1909 treaty. Although these claims on the part of the opponents of the 1941 agreement are open to question, this particular aspect of the matter is now academic since the pending legislation would specifically except from the approval of the Congress, article VII of the 1941 agreement having to do with navigation rights, and expresses the sense of the Congress that a separate treaty should be entered into in respect of this matter. Similarly, with respect to the questions raised by the opponents that the provisions of article IX of the 1941 agreement could not be based upon the special agreement procedure of the 1909 treaty insofar as such article IX purported to amend the provisions of the treaty with reference to diversion of waters, this point is likewise academic in view of the exception from approval of the provisions of article IX.

Objection was also raised by the opponents of the St. Lawrence project that the provisions of the 1909 treaty could not be used as a basis for the 1941 agreement since such agreement affects waters of the St. Lawrence River from the International Rapids section as far as Montreal, which waters again are not "boundary waters" within the definition contained in the 1909 treaty. This argument does not take into account the fact that the effect of the agreement upon this particular section of the river is entirely incidental to the main purpose of the agreement which is to provide for the construction of works in the International Rapids Section, a purpose clearly within the purview of the special agreement procedure. Paragraph (d) of article IV of the agreement provides that during the construction and upon the completion of the works provided for in the International Rapids Section, the flow of waters out of Lake Ontario into the St. Lawrence River shall be controlled and the flow of waters through the International Rapids Section shall be regulated so that the navigable depth of waters for shipping in the harbor of Montreal and throughout the navigable channel of the St. Lawrence River below Montreal shall not be injuriously affected by the construction or operation of such works and so that existing power developments in the Canadian section of the river shall not be adversely affected. The fact that, in order to facilitate the construction and operation of the projects agreed upon in the agreement, provision is incidentally made with reference to the water level in the wholly Canadian portion of the river is entirely subsidiary to the principal purpose of the agreement and amounts to no more than the traditional recognition under Anglo-American law of the rights of downstream users. To hold that the provisions of the 1909 treaty would be inapplicable to an agreement to construct works in the International Rapids Section simply because such works have an indirect consequential effect upon waters in other portions of the system, would be to render entirely meaningless the procedure prescribed in the 1909 treaty and to ignore the geographical realities of the situation.

It is inconceivable that there would be any substantial use, obstruction, or diversion of the waters of any part of the Great Lakes-St. Lawrence system which would not affect in some direct or indirect manner the flow of waters in other sections of the system and require in some manner adjustment of rights between the two countries in relation thereto. If the availability of the special agreement procedure as a basis for reciprocal legislation with respect to construction projects were to depend upon proof that each such project had no direct or indirect effect upon waters lying wholly in either country, an impossible situation would be created that clearly could not have been intended when the 1909 treaty was drafted. The same considerations apply to article VIII of the agreement concerning the preservation of the levels of the Great Lakes system and the regulation of diversions by each party therefrom. This provision is intimately related

to the successful operation of the uses, obstructions, and diversions of boundary waters provided for in the agreement and like the provisions of article IV (d) is entirely ancillary to the main purpose of the agreement.[8]

It is also of importance in connection with article IV (d) that the 1941 agreement does not deal with any waters that are not covered by the 1909 treaty and the previous treaties referred to above. As has been noted, the waters of the Great Lakes-St. Lawrence system covered by such treaties may be deemed to be a continuous waterway in which the rights of the United States and Canada are clearly fixed by treaty. With the omission from approval of article VII of the 1941 agreement, this agreement does not purport to alter the rights of either country in such waters as established by previous treaties.

The provisions of the 1909 treaty have been discussed only once by the Supreme Court of the United States, and although the case concerns the adjustment of private rights, it is of interest to the problem here under consideration. The case in question is that of *Pigeon River Improvement, Slide & Boom Co.* v. *Charles W. Cox, Ltd.*[9] The Pigeon River is a boundary stream between the State of Minnesota and the Province of Ontario which flows along the boundary for about 40 miles, discharging into Lake Superior. The boundary is approximately midstream. The Pigeon River Co., a Minnesota corporation, entered into an agreement with a Canadian corporation under which each improved the river on its side of the boundary, the improvements constituting complements to each other and making possible the driving of logs. The Court found that the construction of improvements on the United States side had been authorized by an act of Congress approved March 3, 1901,[10] which authorized the improvement of the Pigeon River by the Pigeon River Co. but did not refer to cooperation with Canadian interests or authorization by Canadian authorities. The question at issue in the case involved the right of the Minnesota corporation to collect tolls from the Cox Co. for using the improved section of the river. In holding that the American company did possess such rights, the Court stated in part as follows:

"Further, in 1909, for the purpose of settling all questions pending between the United States and the Dominion of Canada, 'involving the rights, obligations, or interests of either in relation to the other or to the inhabitants of the other, along their common frontier,' the United States and Great Britain entered into a treaty concerning the boundary waters. By article I of this treaty the parties formulated their agreement 'that the navigation of all navigable boundary waters shall forever continue free and open for the purposes of commerce to the inhabitants and to ships, vessels, and boats of both countries equally.' The treaty expressly refers to uses and obstructions of boundary waters which had theretofore been permitted, and sets up an International Joint Commission with jurisdiction to deal with future uses and obstructions as stated. Article III of the treaty thus provides: 'It is agreed that, in addition to the uses, obstructions, and diversions heretofore permitted or hereafter provided for by special agreement between the parties hereto, no further or other uses or obstructions or diversions, whether temporary or permanent, of boundary waters on either side of the line affecting the natural level or flow of boundary waters on the other side of the line, shall be made except by authority of the United States or the Dominion of Canada within their respective jurisdictions and with the approval, as hereinafter provided, of a joint commission to be known as the International Joint Commission.'

"We think it may fairly be said that the improvements here in question on the Pigeon River constituted structures and uses which had been permitted by the parties prior to the treaty of 1909 and were recognized by that treaty. It does not appear that any action has been taken by either Government or by the International Joint Commission inconsistent with this view."

If the Congress can authorize a private corporation to enter into a contract with another private corporation in Canada to construct cooperative works of this nature in boundary waters, the Congress can certainly authorize the Government of the United States to contract with the Government of Canada with respect to a similar matter. If for any reason the 1941 agreement should not come into force, it is submitted that in the light of the foregoing decisions of the Supreme Court there would exist no impediment under the Constitution or laws of the United States to the conclusion, under the procedure prescribed in the 1909 treaty, of a contract between private corporations in the United States and Canada to build the same projects for profit, provided that the necessary legislative authority could be obtained under the procedure prescribed in the 1909 treaty. In considering any such proposed legislation, the treaty issue would not be involved so that the only question for decision would be the economic merits of the project. In other words, the contention of the opponents would result in the conclusion that while the Congress could not authorize the construction of these projects by the Federal Government in agreement with the Canadian Government, it could nevertheless exercise such powers to authorize the execution of a private contract with respect to the subject matter.

It is for this reason among others that it has been contended elsewhere in this memorandum that the issues in this case are unlike those which are present in the usual case of a foreign treaty or agreement. The average foreign negotiation relates to matters which are the proper subject for agreement only between governments. That the construction provided for in the 1941 agreement is not exclusively of such character is sharply highlighted by the foregoing discussion as to the availability of the 1909 treaty procedure as a basis for private construction projects. It was doubtless, in part at least, because of the possibility of "uses obstructions, or diversions" being made either by the two Governments or by private interests that the special-agreement procedure was prescribed in the 1909 treaty and it seems clear that such procedure was intended to be available in respect of governmental as well as private negotiations and agreements.

It has been urged by the opponents of the seaway that resort cannot be had to the provisions of the 1909 treaty as a justification for handling this matter through agreement because no reference to the 1909 treaty is made in the 1941 agreement. It is pointed out in this connection that, in his testimony before the Rivers and Harbors Committee in 1941, Assistant Secretary of State Berle stated that "we did not relate this agreement directly to article XIII" although he did say that the provisions of the 1909 treaty constituted "an expression of policy employed in a formal treaty between the two countries on which we could appropriately rely in suggesting or choosing this method as against the treaty method." [11]

The provisions of the 1909 treaty do not specifically require any recitation in a later special agreement of its relation to these provisions and the liberal construction given to these provisions in the Pigeon River case should put an end to any such claim.

The opponents of the St. Lawrence rely heavily upon a memorandum dated March 12, 1941, of Mr. J. E. Read, then legal adviser of the Canadian Department of External Affairs, expressing the view that article XIII of the Boundary Waters Treaty of 1909 could not be relied upon for proceeding on the basis of an agreement subject to approval by reciprocal legislation.[12] Whatever the view of the Canadian authorities may be on this point, those views would not affect the right of the Congress of the United States to interpret the 1909 treaty as it sees fit, and if it so desires, to rest its approval of the 1941 agreement on the basis of the procedure provided for in the 1909 treaty. If the Congress should determine to proceed on such basis, a binding international agreement with Canada would be concluded upon fulfillment by Canada of the requirement of action on its part under the 1909 treaty procedure, namely, the enactment of legislation approving the 1941 agreement corresponding in terms to the United States legislation. The fact that the Canadian legislation might not rest either explicitly or otherwise upon the 1909 treaty would be immaterial to the validity of the procedure so far as concerns either (a) compliance with United States constitutional requirements or (b) the creation of a valid international obligation in accordance with the terms of article XI of the 1941 agreement stipulating that the agreement shall be subject to approval by the legislative bodies of the two countries. So far as concerns the constitutional procedures of the United States, the Congress may with full propriety base its action upon the procedure set forth in the 1909 treaty regardless of the basis of the concurrent Canadian legislation in terms of Canadian constitutional requirements, and the action of the Congress of the United States in so doing would be conclusive on this point.

It is furthermore of interest that in an explanatory opinion dated December 5, 1944, commenting upon his earlier opinion Mr. Read stated as follows:

"Looking at the matter from the United States point of view, it is more difficult for me to express an opinion. I was, however, satisfied that the procedure contemplated, either under the 1932 treaty or under the 1941 agreement, was in conformity with the provisions of the Boundary Waters Treaty and would give rise to a valid obligation which would be recognized as legally effective in the United States and which would create a valid international obligation. I had in contemplation, insofar as the 1941 agreement was concerned, not merely the agreement itself, but appropriate legislation by Congress.

"It is, I think, clear that the Boundary Waters Treaty looked forward to the conclusion of special agreements and arrange-

[8] Recognition of the relationship of diversions from the Great Lakes system to boundary waters as defined in the 1909 treaty is found in the important Supreme Court case of *Sanitary District of Chicago* v. *United States*. The Court held in this case that the United States had a proper basis to complain of excessive diversions from Lake Michigan under the provisions of the 1909 treaty concerning regulation by the two countries of uses "affecting the natural level or flow of boundary waters" (266 U. S. 405, 425).

[9] 291 U. S. 138.

[10] 31 Stat. 1455.

[11] Hearings before House Rivers and Harbors Committee on H. R. 4927, 77th Cong., 1st sess., pt. I, p. 56.

[12] A copy of the opinion is contained at p. 275, hearings, subcommittee of Senate Commerce Committee on S. 1385, 78th Cong., 1st sess. The opinion goes on to maintain that the agreement may validly be concluded through reciprocal legislation without reference to the 1909 treaty, and that such procedure could be based in the case of the United States upon the legislative authority of Congress.

ments of this sort. The treaty did not contemplate that the exceptions in articles III and IV would necessarily take the form of 'treaties' in the strict sense of the term. It contemplated that there would be special agreements and arrangements based upon concurrent or reciprocal legislation and that they would be contracted in such a manner that they would be binding on both the United States and Canada. * * *

"If this view is accepted it is clear that procedure by agreement implemented by legislation results in a legally effective arrangement which comes within the scope of article XI and dispenses with the necessity of obtaining the approval of the International Joint Commission under article III of the Boundary Waters Treaty 1909."

A complete copy of his supplementary opinion is attached hereto as annex I.

For all of the foregoing reasons it seems clear that the 1941 agreement may be appropriately entered into, at least so far as concerns United States legislation, under the procedure set forth in the 1909 treaty.

VII. SUMMARY

In summary it is submitted that the foregoing discussion establishes without question that—

1. Congress is vested under the Constitution with power to regulate commerce with foreign nations and among the several States. These powers have been exercised by the Congress to authorize the construction of important navigation and power projects.

2. Throughout this country's history Congress has exercised its delegated powers in matters affecting the foreign relations of the United States and to bring about agreement with foreign countries on matters relating to its delegated powers in such fields as control of foreign commerce, financial and monetary affairs, and the annexation of territory.

3. In particular Congress has on numerous occasions enacted legislation to bring about agreement with Canada on matters of mutual interest to the economic relations of the two countries, which agreements have been brought into force in Canada through concurrent legislation of that country. In this regard Congress has legislated concerning such matters as the construction of international bridges, the improvement of international streams, and the construction of international roads.

4. The Supreme Court has recognized the validity of agreements entered into with foreign nations by the Executive either with or without congressional action, and without resort to the treaty procedure. The Court has never held such an agreement invalid.

5. The arguments of the opponents of the St. Lawrence project do not successfully refute the foregoing conditions. In fact, many of the opponents' arguments appear to admit that Congress has the power to legislate with respect to foreign agreements covering matters within the field of congressional responsibility.

6. The Congress therefore may validly exercise its power under the commerce clause to approve the St. Lawrence agreement with Canada.

7. The United States has acquired special rights by treaties in the waters of the Great Lakes-St. Lawrence system which form an additional basis for the legislation here concerned.

8. The 1941 agreement with Canada is a "special agreement" within the meaning of the Boundary Waters Treaty of 1909 and consequently may be approved by reciprocal legislation of the United States and Canada in accordance with the procedure set forth in that treaty.

9. For all of the foregoing reasons there can be no question whatsoever as to the constitutionality of Senate Joint Resolution 104.

DEAN ACHESON,
Under Secretary of State.

Mr. WILEY. Mr. President, at this time I wish to make a brief announcement. As I understand the program, the Senate is to take a recess until Friday. When we recess from Friday until Monday, I shall ask that we continue through next week with daily sessions, until we have completed consideration of the pending measure.

Mr. President, I expect to reply at length to the very able argument of my distinguished friend from Massachusetts, but not at this time. I merely wish to say that everything he has said reminds me, when I consider the distinguished men who have stood for this project, of the story of the mother who saw marching down the street the regiment in which her son was out of step, and she said, "Everyone is out of step but my boy."

I do not see how the Senator can make his argument when one of his great friends, Herbert Hoover, has stated definitely that the seaway would pay. Every Secretary of State, Republican and Democrat, has said, in substance, the same. When the Senator talks about national defense in the way he has, he has forgotten, I think, that for a hundred years we have never needed a soldier across the entire line between Canada and the United States. If the time shall ever come when there shall be need for national defense, the soldiers will not simply be our boys, but the Canadian boys also. We have a defense treaty. General Marshall said it was important to supplement the defense treaty with Canada. The Defense Commission said the same thing. But not my dear friend from Massachusetts.

I call his attention to another statement. He said something regarding fog. The fog is not on the St. Lawrence River; the fog is in the mind of my distinguished friend. The records of the Canadian Department of Rivers and Canals show that the fog conditions on the Great Lakes and on the St. Lawrence River during the navigation season are more favorable than those at New York. For example, Montreal had 4 days of fog per year as compared with 44 days in New York Harbor. Montreal is the second largest city on the American Continent, as far as tonnage is concerned.

The best indication of the hazards of navigation is the accident record on the St. Lawrence, which compares favorably with that on the Panama Canal. During the 5-year period from 1935 to 1939 a total of 116 accidents was reported, of which 65 resulted in damage amounting to only $419,000. Thirty-four involved no damage, and in 17 cases the amount of damage was unknown. This record should be viewed in relation to the number of vessels passing over the St. Lawrence River, which was approximately 60,000, carrying 40,000,000 tons of freight. Accordingly, the accident rate was less than one-fourth of 1 percent. That would not indicate a very great hazard to navigation. Radar development, which has already been successfully employed on a number of Great Lakes vessels, should reduce the accident rate even further.

Mr. President, I was very much interested—and I want to get it in today's RECORD—in the so-called statistics produced in relation to the iron ore exhaustion in the Middle West. It is strange that we can get testimony on any proposion, and, apparently, letters or statements, when persons are not under oath.

I am not producing a witness in my favor; I am producing the New England Newsletter, in which one of the subheadings is "Mesabi Range running out." That is the range which has given to the Nation 2,000,000,000 tons of ore which has helped to build the railroads and steamships of the country.

At the eighty-eighth quarterly meeting of the New England Council, held at the Wentworth-by-the-Sea, Portsmouth, N. H., September 12–13, Council President Richard L. Bowditch announced that the Econometric Institute of New York had been retained under council sponsorship to study the possibilities for the establishment of a steel industry in New England. Mr. Bowditch's remarks are followed by a summary of the institute's proposed study.

One subheading is "Mesabi Range running out," and the other is "Other ore deposits." There referred to is what was mentioned in our argument regarding Canadian ore and ore from Sweden, Venezuela, and other places, sustaining the position which I took on Monday.

I shall not be diverted by a very able argument which veneers the real issue in the case; and I trust that no Member of the Senate will be overpersuaded by all the colored propaganda which has come in purporting to speak the mind of the railroad men. When I take the floor again to continue my argument I shall put into the RECORD the testimony of former Senators, men like the late Senator Walsh of Massachusetts, and the late Senator Walsh of Montana, governors of Middle Western States, the Governor of Ohio, the Governor of Montana, saying that the railroad men themselves are not against this project. We have seen the multicolored paper slips which have been passed around containing a picture of men being put out of work by this project. It is argued that it will be successful so far as tonnage is concerned, but the Senator from Massachusetts argues that it will not be successful.

The Senator from Maryland [Mr. TYDINGS] is fearful that it will take considerable tonnage from Baltimore; and the Senator from Louisiana [Mr. OVERTON] will argue that New Orleans will suffer.

Mr. OVERTON. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. OVERTON. The Senator is mistaken. I shall not make that argument.

Mr. WILEY. That is the argument which was previously made. Perhaps he will argue the question of constitutionality.

Mr. TYDINGS. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. TYDINGS. Neither am I intending to make the argument which the Senator has suggested, because I think the arguments already made are sufficient to sink the project without that argument.

Mr. WILEY. Mr. President, I have a little faith to the contrary. I believe that we must have courage. We have to remember the pressure we experienced when the Taft-Hartley bill was being debated, and when courage was demonstrated. But now, when an election is approaching, there are those who feel that they can make men inadequate.

I stated, Mr. President, that a poll had been taken. I want to put that poll into the RECORD. It comes from a periodical entitled "Modern Industry Magazine." It contains a poll of business opinion conducted with the following results:

Should modern industry favor the St. Lawrence seaway project?

New England, 54 percent yes; 46 percent no.

Mid-Atlantic, 55.1 yes; 44 percent no.

North central, 75.1 yes; 24 percent no.

South—

God bless the South—

South, 55.5 percent yes; 44.5 percent no.

Midwest, 73.8 percent yes; 26.2 percent no.

Mountain and Pacific, 62.1 percent yes; 37.9 percent no.

Average for the United States the country over, 63.7 percent yes; 36.3 percent no.

Mr. IVES. Mr. President, will the Senator yield?

Mr. WILEY. Let me read just one paragraph:

Other polls of public opinion show overwhelming approval by the general public. National leaders over the past 25 years have without exception recommended the construction of this project.

I yield to the Senator from New York.

Mr. IVES. I merely wanted to ask the Senator under whose auspices that poll was taken. Is that a Gallup poll?

Mr. WILEY. No. It is a poll conducted by the Modern Industry magazine, and the question was, "Should modern industry favor the St. Lawrence seaway project?"

Mr. AIKEN. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. SPARKMAN in the chair). Does the Senator from Wisconsin yield to the Senator from Vermont?

Mr. WILEY. I yield.

Mr. AIKEN. I understand that the magazine has a circulation of approximately 50,000 or 55,000, and the poll was taken among those who subscribe to the magazine.

Mr. WILEY. I have just a few moments more, Mr. President.

Mr. AIKEN. Mr. President, will the Senator yield further?

Mr. WILEY. I yield.

Mr. AIKEN. The Senator from Nebraska [Mr. WHERRY] asked regarding the comparative costs of shipping wheat to Chicago. I made inquiry of the Interstate Commerce Commission, and have received a reply from the Chief of the Rate Branch of the Commission advising me that the all-rail rate on wheat from Omaha to Chicago is $3.20 a ton, in car lots, with a minimum of 80,000 pounds.

The water rate from Omaha to Chicago, with a minimum of 1,000 pounds, is $2.80 per ton.

The barge rate on wheat from Omaha to New Orleans, minimum 400 net tons, is $3.60 a ton.

The rate from Kansas City to Chicago by rail is $2.50 a ton.

From Kansas City to Chicago, by barge, the rate is $2.20 a ton.

From Kansas City to New Orleans, by barge, the rate is $2.90 a ton.

Therefore it is evident that all grain originating in the Missouri Basin, north of St. Louis, will be shipped to Chicago at somewhat less cost that it can be shipped to New Orleans; and, of course, it could go to New Orleans only by barge; and there would be the cost of transferring it from the barge to the ocean-going vessel, in either case. These figures come from the Interstate Commerce Commission.

Mr. WHERRY. Mr. President, will the Senator yield, so that I may ask a question of the Senator from Vermont?

Mr. WILEY. I yield.

Mr. WHERRY. I was very much interested in learning the freight rates; and when I asked about that matter on Monday, I was requesting information. I thought possibly the distinguished Senator from Wisconsin had it.

When I returned to my office, I also inquired about the freight rates, because I think that matter is vital to all the Great Plains States.

Today I have received certain figures, which I shall place in the RECORD; and then I wish the distinguished Senator from Vermont would try to clarify them.

Mr. AIKEN. Let me ask what they are.

Mr. WHERRY. They are both maritime figures and railroad figures. For instance, the rate on wheat, in cents per bushel from Omaha to Liverpool—which is the first route I asked about, is stated as follows:

Omaha to New Orleans via rail, 20.52 cents a bushel.

New Orleans to Liverpool (based upon advices from U. S. Maritime Commission) that rate is 13 shillings per quarter (8 bushels or 480 pounds) (20.15 cents per shilling) 32.74 cents a bushel. Total, 53.26 cents a bushel.

Mr. AIKEN. The figure I have is that from Omaha to New Orleans by rail, the rate is $7.50 a ton.

Mr. WHERRY. If that figure is comparable, then I point out that according to the information I have received, the rate from Omaha to Liverpool via New Orleans is a total of 53.26 cents a bushel, whereas the rate from Omaha to Chicago by rail transportation and then via the Lakes to Montreal, and then from Montreal to Liverpool, according to the United States Maritime Commission, is a total of 56.03 cents a bushel.

Mr. AIKEN. I agree with the Senator in that, and we must also bear in mind the added cost of unloading the grain at Chicago from the railroad car, loading it on the ship, transporting it by lake ship to Buffalo, unloading it at Buffalo, transporting it by rail to New York or Baltimore, and then reloading it on ship for transportation to Liverpool. So we find that it costs as much to ship by rail from Buffalo to New York as it would cost to ship from Chicago to Liverpool if we had an all-water route available.

Mr. WHERRY. Of course, I do not wish to dispute in any way the figures presented by the Senator. I simply wish to have the figures harmonize, because the ones I have received, to which I have referred, show, according to this authority, that the rate for shipment from Omaha to Chicago by rail, and then by water on the Lakes to Montreal, and then to Liverpool, is 56.03 cents a bushel, whereas the freight rate for shipment from Omaha to New Orleans by rail and from New Orleans to Liverpool by ship is 53.26 cents a bushel.

Mr. President, I ask that these figures be placed in the RECORD at this point, so that all Senators may have the benefit of them.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

Wheat, in cents per bushel, Omaha to Liverpool

Omaha to New Orleans via rail	20.52
New Orleans to Liverpool (based upon advices from U. S. Maritime Commission that rate is 13 shillings per quarter (8 bushels or 480 pounds) (20.15 cents per shilling))	32.74
Total	53.26
Omaha to Chicago via rail	13.32
Via lakes to Montreal	15.00
Montreal to Liverpool (from U. S. Maritime Commission)	27.71
Total	56.03
Omaha to Duluth via rail	14.40
Lakes to Montreal	15.40
Montreal to Liverpool (from U. S. Maritime Commission)	27.71
Total	57.11

Mr. AIKEN. Mr. President, perhaps we should also have printed in the RECORD the letter giving complete information, which I have received from the Interstate Commerce Commission. Probably the figures given in it are based on different material, as compared with the figures presented just now by the Senator from Nebraska.

Mr. WHERRY. Of course, I am glad to have that letter printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

INTERSTATE COMMERCE COMMISSION,
Washington, January 28, 1948.

Hon. GEORGE D. AIKEN,
United States Senate,
Washington, D. C.

DEAR SIR: Responsive to your telephone request that certain rates on wheat, carloads, given to your Mr. Hall, by telephone on January 27, be confirmed in writing, the following statement of the said rates is submitted as follows:

Present all-rail rates in cents per 100 pounds on wheat, carloads.

From—	To—	Proper	Proportional
Omaha, Nebr	Chicago, Ill.	29	18½
Kansas City, Mo	do	29	18½

PRESENT BARGE RATES ON WHEAT, CARLOADS

From Omaha, Nebr., to Chicago, Ill., 16 cents per 100 pounds in packages. Minimum weight, 80,000 pounds.

From Kansas City, Mo., to Chicago, Ill., 12½ cents per 100 pounds in packages. Minimum weight 80,000 pounds.

PRESENT BARGE RATES ON WHEAT IN BULK—MINIMUM, 400 NET TONS

From Omaha, Nebr., to Chicago, Ill., 330 cents per net ton.

From Kansas City, Mo., to Chicago, Ill., 250 cents per net ton.

MINIMUM 1,000 NET TONS

From Omaha, Nebr., to Chicago, Ill., 280 cents per net ton.

From Kansas City, Mo., to Chicago, Ill., 220 cents per net ton.

Present all-rail rates on wheat (carloads), for export, in cents per 100 pounds

From—	To—	Proper	Proportional
Omaha, Nebr.	New Orleans, La.	37½	28½
Kansas City, Mo.	do	35½	26½

PRESENT BARGE RATES ON WHEAT, CARLOADS (FOR EXPORT)

From Omaha, Nebr., to New Orleans, La., 360 cents per net ton.

From Kansas City, Mo., to New Orleans, La., 290 cents per net ton.

Minimum, 400 net tons.

From Omaha, Nebr., to New Orleans, La., 480 cents per net ton.

From Kansas City, Mo., to New Orleans, La., 410 cents per net ton.

Minimum, 200 net tons.

From Omaha, Nebr., to New Orleans, La., 500 cents per net ton.

From Kansas City, Mo., to New Orleans, La., 440 cents per net ton.

Minimum, 140 net tons.

From Omaha, Nebr., to New Orleans, La., 27½ cents per 100 pounds, plus tollage at New Orleans.

From Kansas City, Mo., to New Orleans, La., 24 cents per 100 pounds, plus tollage at New Orleans.

In packages.

Present all-rail rates on wheat (carloads), for export, in cents per 100 pounds

From—	To—	Proper	Proportional
Chicago, Ill.	New York, N. Y.	27	20
Do	Baltimore, Md.	25½	18½

Effective January 15, 1948, all shipments moving under the foregoing rates are subject to a 20-percent surcharge which is added to the total freight charge.

Respectfully,

A. F. CLOW,
Chief, Rate Branch.

Attention Mr. Hall.

Mr. AIKEN. Mr. President, it should furthermore be stated that if we could load grain on ocean-going vessels at Chicago, it could be delivered at Liverpool for several cents a bushel less than it can be delivered there now by any existing route whatsoever. By water, Detroit is just a little nearer to Liverpool than Baltimore is. Of course, that is hard to realize, but the mapmakers tell me that is the fact.

So I have asked to have the letter from Mr. Clow printed in the RECORD. It gives all the rates to which I have referred, as well as others.

Mr. WILEY. Mr. President, Mr. Paul M. Zeis, Acting Chief of the Transportation Division of the Department of Commerce, at my request has furnished very clear and, I think, detailed information on the subject, and I ask that it be printed at this point in the RECORD.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

Transportation from Omaha to London

Water via Chicago:	*Ton*
Omaha to Chicago (large load lots)	$2.80
Estimated total handling costs	1.00
Chicago to Montreal	2.00
Montreal to London	9.24
Total	15.04
Water via New Orleans:	
Omaha to New Orleans	3.60
Estimated handling costs	1.00
New Orleans to London	10.91
Total	15.51

Difference in rate approximately 47 cents a ton or $1.41 a bushel.

Rail via Chicago:	*Ton*
Omaha to Chicago	$4.40
Chicago to Montreal	2.00
Montreal to London	9.24
Total	15.64
Rail via New Orleans:	
Omaha to New Orleans	6.80
New Orleans to London (berth rates)	10.91
Total	17.71

Difference in rate approximately $2 a ton or about 6 cents a bushel.

NOTE.—Very little traffic moves over water from Omaha. If shipments are to be made from other points in Nebraska, they would include the cost of rail shipment.

Source: Paul M. Zeis, Acting Chief, Transportation Division, Department of Commerce, January 27, 1948.

Mr. WILEY. Much was said today about costs. I am sure that when we take into consideration the $6,000,000,000 or $7,000,000,000 authorization bill which the Senators from Massachusetts are going to support in the way of the foreign-aid program for 1 year, and for which we expect to get nothing back, it is obvious that they might well consider authorizing and possibly appropriating from $50,000,000 to $70,000,000 a year over a period of 6 or 7 years—in short, to see that the cost of the seaway is paid and that this utility on our own soil is made operative, in view of the fact that much of the money which will go into foreign aid is to be used for the building of canals and electricity-producing plants on foreign soil.

Mr. LODGE. Will the Senator yield?

Mr. WILEY. I yield.

Mr. LODGE. I wish to say to the Senator from Wisconsin that he is correct in saying that I plan to vote for the giving of foreign aid. But the Senator is not correct when he says that I expect that we shall get nothing back for it. I expect that every foreign-aid measure I vote for will bring a great deal back to the United States. Otherwise I would not vote for it.

Mr. WILEY. I think I follow the Senator's reasoning, and logic. But I think he is blind in not being able to see the value of such an investment as is proposed in the great natural resources of his own country, although he can see the green pastures of Europe more productive than our own.

THE INCREASED COSTS OF LIVING

Mr. PEPPER. Mr. President, in this morning's Washington Post there is an interesting article by Miss Mary Spargo. I wish to read several paragraphs from it:

Congress heard plain speaking from a plain citizen yesterday on just what it means to try to support a family on $40 a week, with prices of food as they are.

Cyrus J. Waud, 36, a soup-factory worker, father of six children, settled into the witness chair before the Senate Banking and Currency Committee, and said his children were undernourished and "you fellows have got to help me out."

With him were his blonde wife, Pauline, and his two eldest daughters, Lois, 11, and Ruth, 9, who turned grave young eyes toward the Senators as their father unfolded his story.

* * * * *

The short, thin, prematurely bald young factory hand stumbled a bit as he tried to tell the Senators about what it means to have no orange juice, insufficient milk, and six meatless and poultryless days a week.

Mr. President, I ask that the entire article to which I have adverted be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FORTY-DOLLAR-A-WEEK FATHER OF SIX TELLS SENATORS ABOUT LIVING COSTS

(By Mary Spargo)

Congress heard plain speaking from a plain citizen yesterday on just what it means to try to support a family on $40 a week, with prices of food as they are.

Cyrus J. Waud, 36, a soup-factory worker, father of six children, settled into the witness chair before the Senate Banking and Currency Committee, and said his children were undernourished and "you fellows have got to help me out."

With him were his blonde wife, Pauline, and his two eldest daughters, Lois, 11, and Ruth, 9, who turned grave young eyes toward the Senators as their father unfolded his story.

Waud, who works in the Campbell Soup factory at Camden, N. J., was sent here by his union, the Food, Tobacco, Agricultural, and Allied Workers of America (CIO), which paid expenses of the trip.

The short, thin, prematurely bald young factory hand stumbled a bit as he tried to tell the Senators about what it means to have no orange juice, insufficient milk, and six meatless and poultryless days a week.

Committee Chairman CHARLES W. TOBEY, Republican, New Hampshire, helped him out.

"Our job here is to have an understanding heart of human needs," he said.

And a little later, after Waud had gone into all the details of his family budget, including no movies and no bus fare for the youngsters, TOBEY called Lois, a thin little sprite in pigtails, to his side, and slipped a $5 bill into her hand.

TOBEY also arranged to have a car put at the family's disposal so the youngsters could see Washington.

But what Waud was asking for was some action by Congress to bring prices down, a question now before the committee.

Angered at the contrast between the soup worker's meager existence and the skyrocketing prices of food, TOBEY announced that he is sending telegrams to representative firms in the food industry asking them to be ready to produce evidence next week to justify their present high prices.

With six children under 11, Waud told the Senators, the family should have 28

quarts of milk a week—an allowance most nutrition experts would say is too low. But on a $40-a-week salary, Waud can afford only 12 quarts. Two quarts cost 45 cents.

Last week the family's one meat day found 2 pounds of hamburger on the table. It cost 65 cents. Company dropped in, so they even had to skimp on the hamburger.

For meat substitutes they use 4 dozen eggs a week.

Food is what crimps the budget most, Waud explained, but clothes are a problem—clothes for the kids, that is. The older Wauds haven't bought any clothes for 4 years. But school means shoes and socks and clothes to be decent in.

The Wauds don't budget anything for recreation—there's nothing left by the time they get around to that. They don't smoke or drink, they said, and as for movies, "They are away out of our reach." The youngsters walk to school because they can't afford bus fare and there's no school bus.

"How often does Mrs. Waud buy a dress?" inquired TOBEY gently.

"Never," said Mrs. Waud softly.

"Once in a while," Waud commented, "Mrs. Waud's sister gives her a dress."

"We have $20 in savings," Waud said, "but it isn't ours. We owe about $300 for medical bills, doctors, the hospital, so it really belongs to them."

Waud said if the committee would roll prices back to 1946 levels maybe he could get along. Then he was paying $10 or $12 a week for food which now costs $18 to $20.

Senator HOMER E. CAPEHART (Republican, of Indiana) wanted to know what Waud thought about rolling back wages as well as prices.

"Can't you see we're underfed?" replied Waud. "What good would that do us?"

Mr. PEPPER. I also wish to read from the Gallup poll, dated January 27, appearing in the Washington Post of January 28 of this year, the first paragraph of which reads as follows:

With political implications of high living costs much in the minds of Senators and Congressmen, the weight of voter opinion today favors a return to rationing and price control.

I ask that the whole poll, as I present it, may appear at this point in the RECORD.

There being no objection, the Gallup poll was ordered to be printed in the RECORD as follows:

THE GALLUP POLL—MAJORITY OF VOTERS FAVOR RETURN TO CONTROLS, RATIONING

(By George Gallup, director, American Institute of Public Opinion)

PRINCETON, N. J., January 27—With political implications of high living costs much in the minds of all Senators and Congressmen, the weight of voter opinion today favors a return to rationing and price control.

Throughout the country representative voters were interviewed by institute reporters who asked:

"Do you think the Government should or should not put rationing and price controls on some products?"

The national averages:

	Percent
Approval	48
Qualified approval	3
Disapproval	41
No opinion	8

On Friday the institute will report what products the public thinks should be placed under price controls.

Qualifications reported by field reporters are significant, and, in general, represent the major blocks to congressional action on prices. The biggest "if" in the minds of voters who qualify their approval is: If we can have price control without rationing.

Other qualifications are: If the black market can be eliminated; if the law can be impartially and honestly administered; and if controls are placed on all items, not just some.

This being a Presidential-election year when Washington's ears are attuned to votes, the opinion of farmers has an important bearing on the fate of price-control legislation. And farmers, in contrast to the rest of the population, oppose both rationing and controls by a vote of almost 2 to 1.

On the other hand, manual workers on whom candidates also must keep a wary eye, favor new control legislation almost as strongly as farmers oppose it.

Votes by occupational groups are shown in the following tables:

Occupation	Approve rationing and controls	Qualified approval	Disapprove	No opinion
	Pct.	Pct.	Pct.	Pct.
Professional and business	47	2	47	4
White-collar	49	3	41	7
Farmers	31	1	56	12
Manual workers	53	3	34	10

The same divergence of viewpoint exists between people in the smaller communities in the country and the larger cities:

Size of town	Approve	Qualified approval	Disapprove	No opinion
	Percent	Percent	Percent	Percent
Farmers	31	1	56	12
Under 10,000	45	3	43	9
10,000 to 100,000	52	3	37	8
100,000 and over	55	3	35	7

As in past surveys of voter opinion on price controls, the present poll reveals strong disagreement between Democrats and Republicans, as follows:

	Approval	Qualified approval	Disapproval	No opinion
	Pct.	Pct.	Pct.	Pct.
Democrats	57	2	32	9
Republicans	37	3	54	6

Historically, the people of this country have been ready to submit to price controls long before their representatives voted the necessary legislation. Two months before Canada adopted a price-wage control program in 1941, and more than a year before the United States took similar steps, the majority of American voters were ready to see similar curbs put into effect in this country.

Mr. PEPPER. Mr. President, I have before me the consumer price index for December 15, 1941, which is 110.5; for June 15, 1946, it is 133.3; and for December 15, 1947, it is 167. In short, the last index is 11 percent above that of June 15, 1920, 69 percent above that of August 15, 1939, 51 percent above that of December 15, 1941, and 25 percent above that of June 15, 1946.

I ask that a table showing a steadily increasing scale of wholesale prices since 1939, which I send to the desk, appear at this point in my remarks.

The PRESIDING OFFICER. Is there objection?

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Wholesale prices index (weekly)

(1926=100)

Dec. 20, 1941	94.0
June 15, 1946	111.8
Jan. 18, 1947	140.8
Dec. 20, 1947	162.5
Week ended Jan. 17, 1948	165.5

1.8 percent above Dec. 29, 1947.
17.5 percent above Jan. 18, 1947.
48 percent above June 15, 1946.
76.1 percent above Dec. 20, 1941.

Mr. PEPPER. Mr. President, I send to the desk and ask to have appear at this point in the RECORD statistics showing net weekly pay, after deductions for taxes, and net pay adjusted for increase in cost of living, since 1939.

The PRESIDING OFFICER. Is there objection?

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Net weekly pay (after deductions for taxes) and net pay adjusted for increase in cost of living since 1939

	Net pay after taxes		Net pay adjusted for cost of living in 1939	
	Single worker	Head of family of 4	Single worker	Head of family of 4
November 1947	$43.85	$49.33	$26.43	$29.74
June 1946	37.30	42.78	27.81	31.90
March 1945	39.32	45.09	[1] 30.82	[1] 35.35
December 1941	30.39	31.86	27.34	28.66
August 1939	23.50	23.53	23.69	23.72

[1] Peak month.

Mr. PEPPER. Mr. President, I ask that there appear at this point in the RECORD a statement showing savings and spending of the American people.

The PRESIDING OFFICER. Is there objection?

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

SAVINGS AND SPENDING

1. Percent of disposable income (income after taxes, etc.) used for spending:

	Percent
1941	89.4
1944	75.6
1946	90.7
1947	93.3

2. Percent of disposable income saved:

	Percent
1941	10.6
1944	24.4
1946	9.3
1947	6.7

3. Families with incomes under $3,000 equal 65 percent of total in 1946 and saved only 4 percent of total savings, and in 1945 were 70 percent of total families and saved 24 percent. Families with incomes between $3,000 and $5,000 constituted 25 percent of total and saved 36 percent of total savings. Families with incomes over $5,000 in 1946 were 10 percent of total and saved 61 percent of total savings, and in 1945 were 8 percent of total and saved 40 percent of total savings.

4. The cost of maintaining a typical family of four in the middle of 1947 on a modest standard of living, ranged from $3,004 in New Orleans to $3,458 in Washington, D. C., which

rose respectively from $2,573 in New Orleans in March 1946 and from $2,985 in Washington, D. C., in March 1946.

5. The net weekly spendable earning adjusted for the cost of living between 1939 and 1947 was at a peak of $35.35 in March 1945 and $29.74 in November 1947 for a family of four and for a single worker $30.82 in March 1945 and $26.43 in November 1947.

6. Rising living costs have swelled our relief rolls. Over 1,000,000 children are now on our relief rolls. In 2 years 350,000 have been added to our relief rolls.

7. Almost one-half of the families and single individuals with incomes under $2,000 had no liquid cash assets in 1947.

Mr. PEPPER. Mr. President, I ask that there appear at this point in the RECORD also a statement appearing in the Florida Labor Advocate, the issue of January 23, 1948, entitled "Food Cost for Family of Three at $670 Record High in 1947."

The PRESIDING OFFICER. Is there objection?

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

FOOD COST FOR FAMILY OF THREE AT $670 RECORD HIGH IN 1947

WASHINGTON.—The yearly cost of food for a worker's family of three hit a new all-time high of $670, calculated on the basis of prices prevailing in December, the Bureau of Agricultural Economics reported.

This figure compares with $340.47 in the 5 years, 1935–39, and $528.28 in 1946, the Bureau said.

Each month for more than 40 years BAE has figured the cost of feeding an average family of three consumed in the 5 years, 1935–39.

Thus, the $670 cost last month may be less than actually is being spent, because BAE has reported several times that the average food consumption last year was considerably higher than prewar.

These foods fall into six classifications, in turn broken down into separate items. The classifications are:

1. Meat products (three items, beef, lamb, and pork).
2. Dairy products (four items, butter, cheese, fluid milk, and evaporated milk).
3. Poultry and eggs.
4. Cereals, including bakery products (four items) and other cereal products (eight items).
5. Fruits and vegetables (23 items, including fresh fruits and vegetables and canned fruits and vegetables).
6. Miscellaneous products (seven items, such as sirup, margarine, cooking oils, sugar, peanut butter, and shortenings).

Since November 1946, soon after price controls and consumer subsidies were lifted, the cost of the family market basket has been steadily rising.

In that month it reached a new all-time high of $635—the previous high having been $615 in June 1920.

Out of the $664 spent at the retail store at the October figures, the farmer got $366.92, or 55 cents out of each dollar. The grower's share varied with each type of food. For meat products he got 72 cents out of each dollar; for poultry and eggs, 68 cents; for dairy products, 62 cents. But he only got 29 cents out of each dollar spent for bakery products and 22 cents out of each consumer dollar spent for canned goods.

In 1935–39 the farmers got only 41 cents out of each dollar spent for food at retail.

"Prices of farm products probably will average as high in 1948 as in 1947," BAE predicted.

Mr. PEPPER. Mr. President, I send to the desk, to appear at this point in the RECORD, a statement showing the recipients of public-welfare benefits and the payments per family received, showing especially the number of children upon public assistance in the United States, and the benefits received per family for such children.

The PRESIDING OFFICER. Is there objection?

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

Public welfare

	Children on public assistance	Average monthly payment per family
November 1947 (50 State programs)	1,046,028 children in 410,862 families	$62.64
September 1947 (50 State programs)	1,037,094 children in 407,561 families getting assistance	62.50
June 1946 (50 State programs)	799,325 children in 311,250 families	53.71
March 1945 (49 State programs)	645,942 children in 255,970 families	46.49
December 1941 (47 State programs)	934,980 children in 387,159 families	33.63
August 1939 (42 State programs)	721 232 children in 299,264 families	31.20

Mr. PEPPER. Mr. President, I send to the desk, to appear at this point in the RECORD, a statement appearing in the October 28, 1947, issue of the Miami Herald, with the headline "Rising living costs swell child relief," and with another headline "Million get aid—Florida adds 15,000." I read from the article:

High prices have been a chief cause for adding 15,000 children to relief rolls in Florida, 8,000 in Illinois, 6,000 in Ohio—350,000 throughout the Nation in 2 years.

I ask that the whole article appear at this point in the RECORD.

The PRESIDING OFFICER. Is there objection?

There being no objection, the article was ordered to be printed in the RECORD, as follows:

RISING LIVING COSTS SWELL CHILD RELIEF—MILLION GET AID—FLORIDA ADDS 15,000; FIXED INCOME GROUP ARE NEW POOR

(By James M. Haswell)

WASHINGTON.—News that a million children now are living on public aid in America high lights one of the most pitiful aspects of rising prices.

People living on small incomes and on fixed incomes are caught in a terrific price squeeze.

FIFTEEN THOUSAND IN FLORIDA

High prices have been a chief cause for adding 15,000 children to relief rolls in Florida, 8,000 in Illinois, 6,000 in Ohio—350,000 throughout the Nation in 2 years.

Other reasons for this sensational increase in aid-to-dependent-children cases have been lay-offs of mothers from war jobs and loss of servicemen's dependent allowances, according to Federal Security Administrator Oscar R. Ewing.

For every family driven to seek public aid because of rising prices during the past 2 years there are other persons—children, elders, widows, pensioners—who have maintained their self-supporting status.

LIVING LESS WELL

These people, rich and poor, have had to economize. Some have eaten less, some have gone without new clothes, some have passed up vacation trips. But regardless of their places in the economic scale, all fixed-income folk have lived more poorly.

Widows once well provided for by insurance, pensioners and retired folk, people living on bond interest and preferred stock dividends, school teachers, Government workers and thousands of similarly placed persons are suffering from the rise in living costs since VJ-day.

Just how, for instance, are the 126,500 old folk in Illinois getting by on their $39.57 a month old-age assistance checks? Or the 121,600 in Ohio who get an average of $39.56 a month? Or the 52,600 in Florida who get $36.59 a month.

Food costs have nearly doubled since 1939, and other living costs have gone up 40 percent.

Price rises don't bear too heavily on wage earners, businessmen or manufacturers, whose incomes more or less keep pace with prices.

A competent economist explains it this way:

"One part of our population has been made the object of an arbitrary capital levy. We have had what amounts to a vast transfer of real wealth from those who own savings accounts, life insurance, Government bonds and accrued social security to those who receive their income in the form of prices, profits, and flexible salaries and wages."

The big money taken in by business, industry, farmers, and organized labor has not all been "an endowment of heaven." Much of it has been paid over by people who own fixed income-bearing assets or who live on fixed incomes.

The 150,000 families driven to seek public assistance for their 350,000 children since the war are the most visible victims of high prices. But there are many others.

Mr. PEPPER. Mr. President, I send to the desk data to appear at this point in the RECORD, showing juvenile delinquency in the United States, and a further statement showing commitment of juvenile offenders to Federal prisons.

The PRESIDING OFFICER. Is there objection?

There being no objection, the statements were ordered to be printed in the RECORD, as follows:

Juvenile delinquency—Total number of juvenile defenders whose cases were disposed of in Federal courts

Six months ended Dec. 31, 1947	1,040
For year ending:	
June 30, 1947	2,670
June 30, 1946	3,891
June 30, 1945	3,411
June 30, 1941	1,843

Commitments of juvenile offenders to Bureau of Prisons

First 3 months of fiscal year (July, August, September 1947)	141
First 3 months of fiscal year (July, August, September 1946)	213

Mr. PEPPER. Mr. President, just one further word. If the United States were invaded by a public enemy, which day by day was destroying our people and wasting our resources, the American Congress would not stand inertly by without exerting every effort it could to

mobilize resistance to such an invasion. If a public enemy were strangling the American family and lowering the level of living in the American home all over the land, the American Congress would not be callous to such an assault. Yet, Mr. President, day by day the high cost of living is wrecking the American family and destroying the American economy. With all that today threatens us, I say that nothing is so dangerous to American welfare, to American security, and to American democracy, as the present and the continuing high cost of living, the present and continuing inflation. What is Congress doing to stop it? According to the records, nothing. The condition is getting worse instead of better.

So, Mr. President, all over the land people are looking to Congress, wanting to know what we propose to do to save them from ruin, and to save our prosperity from loss. Again I say, the record of the Congress is, nothing.

The time has come for the alarm to be sounded and for the American Congress to act, if we are to act before it is eternally too late. Already any competent observer must report that the foundations of the prosperity we now have are collapsing. There is more crime, there are more people on relief rolls, there is more unemployment, there is more juvenile delinquency, there is a lower level of living in the American home, there is an exhaustion of the people's savings. A bank director tells us that every time his board meets there are more notes that are overdue. A collector of internal revenue says that more taxpayers were delinquent in December 1947 in paying their income taxes. Lawyers in three cities of my State say, "For the first time in years my law office is beginning to foreclose mortgages on homes."

Mr. President, if the Congress does not, before it is too late, meet this emergency and save our country, nothing under the sun can prevent the United States from having another disastrous depression that will literally threaten the very democracy that is personified in our American institutions, as well as the security of our country itself.

LEGISLATIVE PROGRAM

Mr. WHERRY. Mr. President, in reply to the request of the senior Senator from Wisconsin [Mr. WILEY] relative to sessions of the Senate next week, I suggest that it is the intention to recess at the conclusion of business today until Friday, and at that time announcement will be made as to whether or not the Senate will be convened daily next week. I think the suggestion that came from the Senator was in answer to a query made earlier. It is my opinion that the Senate should hold itself in readiness to continue daily sessions starting Monday, until the debate on the pending measure is concluded. A definite announcement will be made Friday relative to the procedure for the week following.

Mr. President, I ask unanimous consent that when the Senate convenes on Friday next the distinguished senior Senator from Louisiana [Mr. OVERTON] be recognized, to present his argument.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. OVERTON. I thank the Senator.

FRANKIE STALNAKER

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 1100) for the relief of Frankie Stalnaker, which was, in line 6, to strike out "$2,000" and insert "$1,500."

Mr. TYDINGS. Mr. President, I move that the Senate concur in the amendment of the House.

The motion was agreed to.

EXECUTIVE SESSION

Mr. WHERRY. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGES REFERRED

The PRESIDING OFFICER (Mr. SPARKMAN in the chair) laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORTS OF COMMITTEES

The following favorable reports of nominations were submitted:

By Mr. LANGER, from the Committee on Post Office and Civil Service:

Vincent C. Burke, of Kentucky, to be First Assistant Postmaster General, Post Office Department, vice Jesse M. Donaldson.

Mr. TOBEY. Mr. President, from the Committee on Interstate and Foreign Commerc, I report favorably the nominations of Wayne Coy, of Indiana, to be a member of the Federal Communications Commission; of George E. Sterling, of Maine, to be a member of the Federal Communications Commission; of John R. Alison, of Florida, now holding recess appointment, to be Assistant Secretary of Commerce; Walter M. W. Splawn, of Texas, to be an Interstate Commerce Commissioner; Ward A. Kemp, to be ensign in the Coast and Geodetic Survey; Eugene W. Richards, and several other citizens to be ensigns in the Coast and Geodetic Survey; and Jack Senior, and sundry other employees of the Coast and Geodetic Survey to ranks of captain, commander, and lieutenant commander, in the Coast and Geodetic Survey.

The PRESIDING OFFICER. The reports will be received, and the nominations will be placed on the Executive Calendar.

NOMINATIONS IN THE COAST GUARD

Mr. TOBEY. Mr. President, yesterday there were ordered reported favorably from the Committee on Interstate and Foreign Commerce approximately 1,400 nominations in the Coast Guard. These are the nominations that were received by the Senate on January 16, 1948, and the complete list appears in the CONGRESSIONAL RECORD of that date at pages 283, 284, 285, and 286.

I desire to give notice at this time that it is my intention to report these nominations on Friday, January 30, and ask for their immediate consideration.

My only purpose in handling the nominations in this manner is to save the Government some money. If I were to report the nominations today they would have to be printed in the RECORD and in the calendar, and I am told that the cost would be several hundred dollars. Handling the matter as I have indicated will eliminate that extra printing.

It is a small amount, but I think it is a healthy sign when we do something to cut down the expenses of Government, even to a limited extent. "Mony a mickle makes a muckle."

The PRESIDING OFFICER. If there be no further reports of committees, the clerk will proceed to state the nominations on the executive calendar.

COMMISSIONER OF THE DISTRICT OF COLUMBIA

The Chief Clerk read the nomination of Guy Mason, of the District of Columbia, to be Commissioner of the District of Columbia.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. WHERRY. I ask that the President be immediately notified of the confirmation of this nomination.

The PRESIDING OFFICER. Without objection, the President will be notified forthwith.

RECESS TO FRIDAY

Mr. WHERRY. As in legislative session, if there is no further business to come before the Senate, I move that the Senate recess until Friday next at noon.

The motion was agreed to; and (at 5 o'clock and 10 minutes p. m.) the Senate took a recess until Friday, January 30, 1948, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate January 28 (legislative day of January 26), 1948:

MISSISSIPPI RIVER COMMISSION

DeWitt L. Pyburn, of Louisiana, to be a member of the Mississippi River Commission.

IN THE AIR FORCE

Maj. Gen. Hubert Reilly Harmon, Air Force of the United States (colonel, U. S. Air Force), for appointment to the position of senior Air Force member of the Military and Naval Staff Committee of the United Nations, with the rank of lieutenant general, under the provisions of section 504 of the Officer Personnel Act of 1947.

APPOINTMENTS IN THE UNITED STATES AIR FORCE

To be major generals

Maj. Gen. William E. Kepner (brigadier general, U. S. Air Force), Air Force of the United States.

Maj. Gen. St. Clair Streett (brigadier general, U. S. Air Force), Air Force of the United States.

Maj. Gen. Muir Stephen Fairchild (brigadier general, U. S. Air Force), Air Force of the United States.

Lt. Gen. Ennis Clement Whitehead (brigadier general, U S. Air Force), Air Force of the United States.

Lt. Gen. Nathan Farragut Twining (brigadier general, U. S. Air Force), Air Force of the United States.

Lt. Gen. Idwal Hubert Edwards (brigadier general, U. S. Air Force), Air Force of the United States.

Maj. Gen. Grandison Gardner (brigadier general, U. S. Air Force), Air Force of the United States.

Maj. Gen. Franklin Otis Carroll (brigadier general, U. S. Air Force), Air Force of the United States.

Maj. Gen. Charles Carl Chauncey (brigadier general, U. S. Air Force), Air Force of the United States.

Maj. Gen. Kenneth Bonner Wolfe (brigadier general, U. S. Air Force), Air Force of the United States.

Maj. Gen. Clements McMullen (brigadier general, U. S. Air Force), Air Force of the United States.

Lt. Gen. Howard Arnold Craig (brigadier general, U. S. Air Force), Air Force of the United States.

Maj. Gen. Hubert Reilly Harmon (colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Willis Henry Hale (colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. James Pratt Hodges (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Robert Morris Webster (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Thomas Dresser White (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Lt. Gen. Benjamin Wiley Chidlaw (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Frederick William Evans (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Paul Langdon Williams (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Lt. Gen. Lauris Norstad (brigadier general, U. S. Air Force), Air Force of the United States.

Lt. Gen. Curtis Emerson LeMay (brigadier general, U. S. Air Force), Air Force of the United States.

Maj. Gen. Edward Michael Powers (brigadier general, U. S. Air Force), Air Force of the United States.

To be brigadier generals

Brig. Gen. Edwin Bowman Lyon (colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Adlai Howard Gilkeson (colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Harold Mark McClelland (colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Thomas James Hanley, Jr. (colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Robert LeGrow Walsh (colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Eugene Lowry Eubank (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Caleb Vance Haynes (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Fred Sidney Borum (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Frederick Mercer Hopkins, Jr. (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Orvil Arson Anderson (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Robert Wilkins Douglass, Jr. (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Leo Andrew Walton (colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Gordon Philip Saville (major, U. S. Air Force), Air Force of the United States.

Brig. Gen. John Edwin Upston (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Earle Everard Partridge (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Lyman Ferley Whitten (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Lt. Gen. Elwood Richard Quesada (major, U. S. Air Force), Air Force of the United States.

Brig. Gen. Alvan Cleveland Kincaid (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Bob Edward Nowland (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. William Donald Old (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Robert Wells Harper (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Glen Clifford Jamison (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Earl Seeley Hoag (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Richard Emmel Nugent (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Ralph Francis Stearley (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Albert Francis Hegenberger (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Laurence Carbee Craigie (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. David Myron Schlatter (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Otto Paul Weyland (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Orval Ray Cook (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Alden Rudyard Crawford (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Charles Trovilla Myers (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Carl Brown McDaniel (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Charles Bertody Stone 3d (major, U. S. Air Force), Air Force of the United States.

Brig. Gen. Earl Walter Barnes (major, U. S. Air Force), Air Force of the United States.

Brig. Gen. Arthur Thomas (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. George Clement McDonald (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Charles Pearré Cabell (major, U. S. Air Force), Air Force of the United States.

Brig. Gen. John DeForest Barker (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Charles White Lawrence (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. James Somers Stowell (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Maj. Gen. Howard McMath Turner (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Tom Christopher Rives (colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Hugo Peoples Rush (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Fay Roscoe Upthegrove (major, U. S. Air Force), Air Force of the United States.

Brig. Gen. Edmund Clayton Lynch (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. James Frederick Phillips (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Frederick von Harten Kimble (lieutenant colonel, U. S. Air Force), Air Force of the United States.

Brig. Gen. Dale Vincent Gaffney (lieutenant colonel, U. S. Air Force), Air Force of the United States.

TEMPORARY APPOINTMENTS IN THE AIR FORCE OF THE UNITED STATES

To be major generals

Brig. Gen. Edwin Bowman Lyon, Air Force of the United States (colonel, U. S. Air Force).

Brig. Gen. Leo Andrew Walton, Air Force of the United States (colonel, U. S. Air Force).

Brig. Gen. Alvan Cleveland Kincaid, Air Force of the United States (lieutenant colonel, U. S. Air Force).

Brig. Gen. Earl Seeley Hoag, Air Force of the United States (lieutenant colonel, U. S. Air Force).

Brig. Gen. Fred Sidney Borum, Air Force of the United States (lieutenant colonel, U. S. Air Force).

Brig. Gen. John Edwin Upston, Air Force of the United States (lieutenant colonel, U. S. Air Force).

Brig. Gen. Bob Edward Nowland, Air Force of the United States (lieutenant colonel, U. S. Air Force).

Brig. Gen. Caleb Vance Haynes, Air Force of the United States (lieutenant colonel, U. S. Air Force).

Brig. Gen. Lucas Victor Beau, Air Force of the United States (lieutenant colonel, U. S. Air Force).

Brig. Gen. Frederick Mercer Hopkins, Jr., Air Force of the United States (lieutenant colonel, U. S. Air Force).

Brig. Gen. John DeForest Barker, Air Force of the United States (lieutenant colonel, U. S. Air Force).

Brig. Gen. Lyman Perley Whitten, Air Force of the United States (lieutenant colonel, U. S. Air Force).

Brig. Gen. Patrick Weston Timberlake, Air Force of the United States (lieutenant colonel, U. S. Air Force).

Brig. Gen. Charles White Lawrence, Air Force of the United States (lieutenant colonel, U. S. Air Force).

Brig. Gen. Alden Rudyard Crawford, Air Force of the United States (lieutenant colonel, U. S. Air Force).

Brig. Gen. Charles Trovilla Myers, Air Force of the United States (lieutenant colonel, U. S. Air Force).

Brig. Gen. John Maurice Weikert, Air Force of the United States (lieutenant colonel, U. S. Air Force).

Brig. Gen. Richard Emmel Nugent, Air Force of the United States (lieutenant colonel, U. S. Air Force).

Brig. Gen. James Somers Stowell, Air Force of the United States (lieutenant colonel, U. S. Air Force).

Brig. Gen. Charles Pearre Cabell, Air Force of the United States (major, U. S. Air Force).

Brig. Gen. Earl Walter Barnes, Air Force of the United States (major, U. S. Air Force).

Brig. Gen. Glenn Oscar Barcus, Air Force of the United States (major, U. S. Air Force).

Brig. Gen. Francis LeRoy Ankenbrandt, Air Force of the United States (major, U. S. Air Force).

Brig. Gen. Leon William Johnson, Air Force of the United States (major, U. S. Air Force).

Brig. Gen. Gordon Philip Saville, Air Force of the United States (major, U. S. Air Force).

Brig. Gen. Walter Edwin Todd, Air Force of the United States (major, U. S. Air Force).

Brig. Gen. Roger Maxwell Ramey, Air Force of the United States (major, U. S. Air Force).

Brig. Gen. Frederic Harrison Smith, Jr., Air Force of the United States (major, U. S. Air Force).

Brig. Gen. William Fulton McKee, Air Force of the United States (major, U. S. Air Force).

Brig. Gen. Richard Clark Lindsay, Air Force of the United States (major, U. S. Air Force).

Brig. Gen. Robert Merrill Lee, Air Force of the United States (captain, U. S. Air Force).

APPOINTMENTS IN THE UNITED STATES AIR FORCE RESERVE OF THE AIR FORCE OF THE UNITED STATES

To be brigadier generals

Brig. Gen. Erik Henning Nelson, Air Force of the United States.

Col. Henry Lee Badham, Jr., United States Air Force Reserve, Air Force of the United States.

Col. John Mirza Bennett, Jr., United States Air Force Reserve, Air Force of the United States.

Col. Joseph Francis Carroll, United States Air Force Reserve, Air Force of the United States.

Col. Robert Emmet Condon, United States Air Force Reserve, Air Force of the United States.

Col. Everett Richard Cook, United States Air Force Reserve, Air Force of the United States.

Col. Robert Lynn Copsey, United States Air Force Reserve, Air Force of the United States.

Col. Bradley Johnson Gaylord, United States Air Force Reserve, Air Force of the United States.

Col. John Philip Henebry, United States Air Force Reserve, Air Force of the United States.

Col. Theron Baldwin Herndon, United States Air Force Reserve, Air Force of the United States.

Col. James Howell Howard, United States Air Force Reserve, Air Force of the United States.

Col. William Chesley Lewis, United States Air Force Reserve, Air Force of the United States.

Col. Chester E. McCarty, United States Air Force Reserve, Air Force of the United States.

Col. Arthur Lee McCullough, United States Air Force Reserve, Air Force of the United States.

Col. Dick Royal Petty (captain, U. S. Air Force Reserve) Air Force of the United States.

Col. William Leroy Plummer, United States Air Force Reserve, Air Force of the United States.

Col. Franklin Rose, United States Air Force Reserve, Air Force of the United States.

Col. Robert James Smith, United States Air Force Reserve, Air Force of the United States.

Col. Ray James Stecker, United States Air Force Reserve, Air Force of the United States.

Col. Luther Wallace Sweetser, Jr., United States Air Force Reserve, Air Force of the United States.

Col. Joseph Lafeton Whitney, United States Air Force Reserve, Air Force of the United States.

APPOINTMENTS IN THE NATIONAL GUARD OF THE UNITED STATES OF THE ARMY OF THE UNITED STATES

To be brigadier generals of the line

Brig. Gen. Frank Allen, Illinois National Guard, to date from November 7, 1947.

Brig. Gen. George Griffin Finch, Georgia National Guard, to date from April 22, 1947.

Brig. Gen. Leonard Ewing Thomas, California National Guard, to date from April 22, 1947.

IN THE NAVY

The following-named midshipmen (aviation) to be ensigns in the Navy:

Robert P. Armstrong, June 4, 1948.
Rex R. Berglund, June 4, 1948.
Eugene Bezore, June 4, 1948.
Richard C. Boyd, June 4, 1948.
John M. Brozena, June 4, 1948.
Donald A. Cook, June 4, 1948.
Murray C. Cook, June 4, 1948.
George D. Cryan, June 4, 1948.
Arnold F. Deichelman, June 4, 1948.
Lawrence H. Dickens, June 4, 1948.
Delmar H. Evans, Jr., June 4, 1948.
Edward V. Fineran, June 4, 1948.
Emerson P. Kendall, June 4, 1948.
Benjamin W. Martin, June 4, 1948.
William T. Mitchell, Jr., June 4, 1948.
Beverly R. Molony, June 4, 1948.
Clarence E. Parker, Jr., June 4, 1948.
Patrick D. Rotramel, June 4, 1948.
Don LeR. Southworth, June 4, 1948.
John P. Sundberg, June 4, 1948.
Charles E. Waring, Jr., June 4, 1948.
Peter A. Williams, June 4, 1948.
Stanley Williams, June 4, 1948.
Robert D. Wilroy, June 4, 1948.

The following-named (naval ROTC) to be ensigns in the Navy:

Lowry M. Miller, June 4, 1948.
John G. Wissler, June 4, 1948.

George D. Tracy (civilian college graduate) to be an ensign in the Supply Corps of the Navy.

Robert W. Radcliffe (civilian college graduate) to be a lieutenant (junior grade) in the Chaplain Corps of the Navy.

The following-named (civilian college graduates) to be ensigns in the Civil Engineer Corps of the Navy:

John W. Murdock
Robert P. Woodworth

The following-named to be ensigns in the Nurse Corps of the Navy:

Willis J. Allender	May E. Knudson
Elizabeth G. Anderson	Bertha A. Krumming
Vivian Blasingame	Patricia R. Laisure
Marie M. Boatman	June L. Lunde
Ambia L. Buckner	Katherine A. Massey
Anna V. Bush	Elaine J. Matthews
Sarah V. Callebs	Estelle Morrison
Patricia M. Doherty	Frances K. Oliver
Dorothy L. Gero	Anna M. Reed
Josephine M. Glod	Adah D. Sander
Elsa A. Griswold	Jane E. Steinbrink
Melba L. Haggerty	Juanita J. Strayhorn
Eileen M. Hubbell	Shirley A. Zuelke
Catharine B. Jones	

The following-named officers to the grades indicated in the Medical Corps of the Navy:

LIEUTENANT COMMANDER

LeRoy E. Wible

LIEUTENANTS

John T. Egan, Jr.
Paul H. Pettit

LIEUTENANTS (JUNIOR GRADE)

Robert E. Baker	Lewis G. Richards, Jr.
Raymond L. Bradley, Jr.	George F. Sager
	Myron E. Samuelson
Robert J. Evoy	Julius H. Spence
James H. Lee, Jr.	James I. Thorn
John R. Lindsay	Theodore H. Wilson, Jr.
Lyle D. Litton	
Harry S. McGaughey	Clayton E. Wood
William S. Markham	

The following-named officer to the grade indicated in the Supply Corps of the Navy:

LIEUTENANT

Robert M. Kehoe

The following-named officers to the grades indicated in the Dental Corps of the Navy:

LIEUTENANT COMMANDERS

Gwenn M. Loomer
Clare C. Marshall

LIEUTENANTS

Arthur C. Boughton
Miles W. Cheatham, Jr.
James G. Rogers, Jr.

LIEUTENANTS (JUNIOR GRADE)

Edwin "R" Black	Wilbur R. McKibben
Harold S. Dexter, Jr.	Jack W. Robinson
Loren F. Enke	Vincent R. Van Eenenaam
Ira Goldstein	
Chester S. McCoy	

The following-named officers to the grade indicated in the Medical Service Corps of the Navy:

LIEUTENANTS

Paul R. Kent
Ralph B. Lopez
Ralph L. Vasa

The following-named officers to the grades indicated in the Nurse Corps of the Navy:

LIEUTENANT

Noma V. Foster

LIEUTENANTS (JUNIOR GRADE)

Loretta F. Bielecki
Mary E. Kelly

CONFIRMATIONS

Executive nominations confirmed by the Senate January 28 (legislative day of January 26), 1948:

COMMISSIONER OF THE DISTRICT OF COLUMBIA

Guy Mason to be Commissioner of the District of Columbia, term of 3 years, and until his successor is appointed and qualified.

IN THE ARMY

Gen. Omar Nelson Bradley to be Chief of Staff, United States Army, effective on date of appointment.

HOUSE OF REPRESENTATIVES

THURSDAY, JANUARY 29, 1948

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Almighty God, Father of all mankind, be merciful unto us, for our souls wait upon Thee. Allow no indolence of mind or indifference of spirit to becloud our understanding in the crucial times that await us. We praise Thee that Thou art on the side of free and generous service, in which no untruth or falsehood can defeat.

Deliver us, O God, from all that divides us—from arbitrary love of power, from national complacency, and from fear that enervates and stultifies. Preserve us from all revolutionary passions and continue to be the anchor of our Nation's thoughts and the guardian of its soul. In this testing time, help us by our acts to speak with a voice that may be heard around the world, telling of the hope, the faith, and the nobility of the heart of America. In the name of the Saviour of men. Amen.

The Journal of the proceedings of Tuesday, January 27, 1948, was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Miller, one of his secretaries, who also informed the

House that on the following dates the President approved and signed a bill and joint resolution of the House of the following titles:

January 27, 1948:

H. R. 3342. An act to promote the better understanding of the United States among the peoples of the world and to strengthen cooperative international relations; and

January 28, 1948:

H. J. Res. 232. Joint resolution providing for membership and participation by the United States in the South Pacific Commission and authorizing an appropriation therefor.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Frazier, its legislative clerk, announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. J. Res. 179. Joint resolution to change the date for filing the report of the Joint Committee on the Economic Report.

The message also announced that the Senate agrees to the amendment of the House to a bill of the Senate of the following title:

S. 1100. An act for the relief of Frankie Stalnaker.

EXTENSION OF REMARKS

Mr. HOEVEN asked and was given permission to extend his remarks in the RECORD and include a letter.

DEFINITION OF "BILLION"

Mr. TWYMAN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. TWYMAN. Mr. Speaker, I should like to strike the word "billion" out of the English language. It is a very confusing word and is being carelessly used. I prefer the actual statement of a thousand million. On January 19, I stated that the deficit on domestic air mail was $19,000,000. Some newspapers carried the story and substituted the word billion for million. I do not blame the newspapers, because even Treasury officials in appearing before committees of Congress frequently have to have their attention called to the fact that they say "million" where they mean "billion," and vice versa.

A billion dollars is a thousand million dollars. Why slur over this tremendous amount? Why not say what we mean?

Webster's Dictionary gives the following definition for the word "billion": "In French and American numeration, a thousand million; in English and German numeration, a million million." What confusion! Let us get rid of the word "billion."

EXTENSION OF REMARKS

Mr. BUFFETT asked and was given permission to extend his remarks in the RECORD and include some editorial material and tables.

Mr. ROBERTSON asked and was given permission to extend his remarks in the RECORD.

Mrs. ST. GEORGE asked and was given permission to extend her remarks in the RECORD and include her complete address before the Women's Patriotic Conference on National Defense, held in Washington, D. C., January 17, 1948.

SPECIAL ORDER GRANTED

Mr. HESELTON. Mr. Speaker, I ask unanimous consent that today, at the conclusion of the legislative program and following any special orders heretofore entered, I may be permitted to address the House for 20 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

FUEL SHORTAGE

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Speaker, I am back on the old question, what we are going to do about this difficult fuel-oil situation.

Monday afternoon Mr. Foster, Under Secretary of Commerce, appearing for Mr. Harriman, testified before our committee. He did an excellent job, insofar as he could, to justify the Government's policy in terms of the export quota of petroleum and petroleum products during the first quarter of this year. I said at the conclusion of the hearings certain things which I intend to extend fully later in the RECORD, but I should like to quote them in part:

If I did not share your same concern as to the possible effect—

Referring to the full embargo—

I would have introduced such a bill a long time ago, because of the situation that confronts us. But now I think it is about time that I should weigh the known effect on the people in New England and New Jersey and other areas of this country against the possible effect on the people in some of these other countries.

I requested the legislative counsel to prepare two alternate bills. They are not ready yet. They will be filed as soon as they are ready.

I want to make it perfectly clear that I support the action of our friends in Canada. I maintain that the other countries can join and do likewise with us.

CONSTRUCTION MACHINERY

Mr. GRIFFITHS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. GRIFFITHS. Mr. Speaker, I have before me an advertisement from the Journal of Commerce of New York of Tuesday, January 27, 1948. It is too bad, I believe, that this advertisement is not headed "Attention, suckers," but what it does say is this:

FORTY MILLION DOLLARS OF SURPLUS CONSTRUCTION MACHINERY

Representative just arrived to dispose of an enormous quantity of construction equipment recently turned over to a Pacific government by the United States.

Over 30,000 items of every make and model of Army engineering equipment, including 800 tractors and bulldozers (Caterpillar, International, Allis-Chalmers, etc.); 600 cranes and shovels (Northwest, Koehring, P. & H., Lorraine, Bucyrus-Erie, Lima, Buckeye, Link-Belt, Michigan, Unit, etc.); 400 road graders (Caterpillar, Adams, Gallion, etc.); 3,000 heavy trucks (International, Federal, Reo, White, Mack, Diamond T, etc.); and hundreds of each of the following: Truck tractors and trailers, ditch diggers, milling machines, asphalt machines and mixers, road rollers, cement mixers, boilers, electric welders, air compressors, rock crushers, crushing and screening plants, scrapers, turnapulls, weapons carriers, cargo and dump trucks, etc.; also, electrical communications and telephone equipment, chemicals, medical equipment, marine engines, refrigeration units, etc.

Inquiries from governmental purchasing agencies and large dealers or contractors invited.

All inquiries will be given immediate and careful attention. State credit references in first letter.

BOX AA 4402, JOURNAL OF COMMERCE.

I guess this Pacific government has heard about the Marshall plan, and now expect us to buy this material which we gave to them, and send it to the other side of the earth at a still further cost to the American taxpayer.

PHILIP C. JESSUP

Mr. LATHAM. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. LATHAM. Mr. Speaker, it appears that President Truman has done it again.

He has named as deputy United States representative in the Interim Committee of the General Assembly of the United Nations one Philip C. Jessup, a professor of international law at Columbia University.

Professor Jessup will be the principal spokesman in this world forum for the American people, as Senator Austin will be absent most of the time.

Let us look at the record of this man who speaks for America in this world body:

He appears as a member of the board of sponsors of the National Emergency Council for Democratic Rights, a Communist-front organization, cited by the House Committee on Un-American Activities in its Report 1311, dated March 29, 1944.

He wrote an article on lifting the arms embargo to Spain, published by the Coordinating Committee To Lift the Embargo, a Communist-front organization, cited by the Un-American Activities Committee in the same report.

In 1939 and 1940 he was chairman of the American Council of the Institute of

Pacific Relations, and from 1938 to 1942 chairman of its international governing group. Although the Un-American Activities Committee has not yet investigated this group, in an article which appeared in Newsweek on May 5, 1947, page 29, entitled "One Man's Crusade," one of the members of the institute resigned from the organization because it refused to investigate his charges that it was dominated by Communists.

In 1946 Professor Jessup publicly urged the United States to stop producing atomic bombs.

This is a matter of tremendous importance. The American people are entitled to know who recommended this man. Did General Marshall approve him? Why did President Truman appoint him? Is the President trying to fight communism with one hand and appease with the other?

The American people are entitled to a full explanation from their President.

RIVER AND HARBOR PROJECTS

Mr. ANGELL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. ANGELL. Mr. Speaker, as chairman of the Subcommittee on Rivers and Harbors of the Public Works Committee of the House, I give public notice that hearings will be held before the subcommittee in room 1304, New House Office Building, at 10 a. m. on February 11, 12, and 13 to consider river and harbor projects which have been favorably reported by the Corps of Army Engineers for rivers and harbors.

All Members who are interested in any of these projects and other persons who desire to be heard should notify Robert F. McConnell, clerk of the Public Works Committee.

EXTENSION OF REMARKS

Mr. TWYMAN asked and was given permission to revise and extend his remarks in the Appendix of the RECORD and include a radio address.

Mr. MASON asked and was given permission to extend his remarks in the RECORD and include an editorial on the subject of his remarks.

Mr. SEELY-BROWN asked and was given permission to extend his remarks in the Appendix of the RECORD and include an article by Walter Lippmann.

Mr. DEVITT asked and was given permission to extend his remarks in the RECORD and include therein a proposed solution to the housing problem.

Mr. COLE of Missouri asked and was given permission to extend his remarks in the RECORD and include an editorial entitled "Money," by Frank C. Waldrop, from today's Washington Times-Herald.

SHORTAGES IN AMERICA AND OUR FOREIGN POLICY

Mr. RICH. Mr. Speaker. I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. RICH. Mr. Speaker, it would be laughable if it were not so tragic to think that people in this country are running out of fuel oil and their homes are cold while we are shipping millions and millions of gallons of oil abroad, and to think that the American people need steel to build their homes and other buildings when we are shipping so much of it abroad; when the people of this country are clamoring for lower prices and we are shipping one-third of our wheat abroad making a scarcity in foodstuffs; when we think of the things that we are doing now for other people; and when I see the letters coming into my office from old people—75, 80, and 85 years of age—who are asking for this Government to give them something to help them from poverty; and when I think that the people of this country are talking about giving $17,000,000,000 more to foreign countries to try to buy them off from being Communists, I think sometimes that many of our people are rather "screwy." I think we ought to see where we are going and take care of the American people before the American people go communistic. That is your duty and my duty. It is high time that we get busy and give more time and money to the American people and their Government. I tell you that this business of trying to give to foreign countries all they want and everything they ask for will drive us into bankruptcy. It will wreck our economy and weaken our Government. Since the war we have given $22,000,000,000 and since we started lend-lease we have given to foreign countries $68,000,000,000. Our people are being taxed to the limit right now and if you want to give them some relief from taxation, it is time that you looked to that before you wreck this country and its people by giving it away to the world. Before the era of the New Deal was anyone so bold as to suggest giving $500,000,000 of the taxpayers' money away and then ask your taxpayers to pay for your generosity with their money? Would they object to such a procedure? I will say they would. Now the Marshall plan calls for $17,000,000,000 to be given away in 4 years. That is 34 times $500,000,000—an unheard of sum 15 years ago in Government operation. In 1930, that would have paid all bills of our own Government for 4 years. Now Congress, through the recommendation of our State Department and the President, recommends that we make the appropriation and tax our people to pay the bill. I want it understood that will mean $500 to every family of four people in the United States. How many families want that burden added to their now high cost of Government, their high cost of living, their high taxation? Without my people expressing themselves on this point by the hundreds, I would not add the burden to their tax bill, and to unborn grandchildren who will be old people before it is paid. I want to take care of the old people who need assistance in our own country: our soldiers, the sick, those who need help in America. Our foreign policy is too foreign for me.

Seventeen billion dollars to give away
And tax our people every day;
She's too big for me,
She's too big for me,
You can have her,
I don't want her,
She's too big for me.

EXTENSION OF REMARKS

Mr. O'HARA asked and was given permission to extend his remarks in the Appendix of the RECORD.

Mr. PRICE of Illinois asked and was given permission to extend his remarks in the RECORD and include an editorial from the New York Times.

Mr. LANE asked and was given permission to extend his remarks in the RECORD and include a letter from the commissioner of public works of the State of Massachusetts.

RESTRICTING USE OF GRAIN FOR ALCOHOLIC BEVERAGES

Mr. BRYSON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. BRYSON. Mr. Speaker, I again call the House's attention to the fact that the present provisions of law providing for the restriction or allocation of grain to be used in the manufacture of alcoholic drinks expires January 31, 1948, which is day after tomorrow. The other body has already passed a resolution extending this allocating authority. I have a resolution pending before the Committee on Banking and Currency which would continue the controls until January 31, 1949. The courts have held that this questioned authority is legal. I sincerely trust that the Committee on Banking and Currency will give further consideration to this vital subject and favorably report the same to the House for action without delay.

The present law expires January 31, 1948—next Saturday—thus it is imperative that action be taken at once to extend the Secretary's authority to decide just how much of the grain so sorely needed for food may be allocated to the Nation's distillers.

The Secretary has asked the Congress for a continuation of this authority, and I am convinced that his request is not unreasonable. I am hopeful that the authority may be extended over a longer period than that contemplated by S. 1842. My own resolution would accomplish that purpose. Obviously, a 29-day extension of this authority would not be sufficient to accomplish the purpose desired.

In the discussion of this matter, many side issues undoubtedly will be raised. But it appears to me that the issue is quite simple.

We need additional grain for food. The manufacture of intoxicating beverages is nonessential. The distillers have refused to cooperate on a volun-

tary basis in an effort to conserve grain. Therefore, it is essential that their supply of grain must be allocated.

Mr. Speaker, I am astounded to hear one ask why the distilling industry has been singled out for compulsory allocation. Surely a man of reasonable intelligence would not place the producers of intoxicating liquors in the same category as millers or bakers or the producers of livestock.

It has been said that a bushel of wheat would keep a person alive for 1 month. If that be true, then it is criminal to waste wheat or other grains by pouring it down the hoppers of the distilleries for the production of a product which not only is useless, but is harmful.

We are told that very little wheat is used by the distillers. But whether the grain used by distilleries is wheat, rye, corn, or barley seems immaterial since the total bread and feed grain supply, for practical purposes, is interchangeable.

This clearly was demonstrated by the fact that the food effect of a bumper wheat crop in the United States last year was offset by a reduction of 800,000,000 bushels in the corn crop.

A hue and cry has been raised by the opponents of grain allocation to distilleries about the grain that is being shipped out of this country and then returned in the form of liquors. I favor legislation to put a stop to this practice. I do not believe that we should import liquors from countries to which we have sent grain. If American importations of such products were stopped the foreign distillers would be required to curtail production thus diverting still more grain to food.

But regardless of the situation with respect to the production of foreign liquors, I can see no justification for allowing our own distilleries to use grains which are needed for food and for livestock feeding.

It is indeed a strange commentary on the times in which we live when we are called upon to debate on whether grain is to be fed to human beings, fed to livestock, or made into hard liquor.

EXTENSION OF REMARKS

Mr. LYLE asked and was given permission to extend his remarks in the RECORD and include an editorial.

SOIL-CONSERVATION PAYMENTS

Mr. GATHINGS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas [Mr. GATHINGS]?

There was no objection.

Mr. GATHINGS. Mr. Speaker, I believe that this Government should always act as you would expect any honest man to act. The Government at all times should move in good faith and meet any obligation which it assumes.

The farmers of this country are in grave danger of being let down by their Government. In all good faith, thousands of hard-working farmers last year undertook practices for the conservation of their soil. The Government encouraged this and the farmers did this under a "gentlemen's agreement" with their Government that in return for their worthy efforts they would be repaid.

It now appears that many of these farmers cannot be paid in full for their soil-conservation practices during the crop year of 1947. The reason: There is not sufficient money left for this purpose.

It is my opinion that if the Government fails to make adequate provisions for repaying the Nation's farmers for their soil-conservation practices—practices which the Government rightly encouraged—it will be a deplorable failure to live up to a moral obligation which it assumed and with which farmers cooperated in all good faith.

This is the situation of which I speak: Early in the calendar year of 1946, the Soil Conservation Service of the Department of Agriculture conducted its annual survey to determine what were the soil-conservation needs which should be included in the 1947 budget. The Government has encouraged in every way—and properly so—the preservation of the fertility and productivity of the soil of the farms of this country.

In this survey, in which the farmers were consulted and polled personally, the Government was given the promise that a certain amount of soil conservation would be practiced by the farmers. The financial experts figured that the program would cost $300,000,000 Accordingly, that sum was marked up in the 1947 appropriation bill for soil conservation. Farmers, meanwhile, began to execute their end of the bargain, believing that their estimates which the Congress had tentatively accepted would be appropriated for the crop year of 1948.

But such was not the case. When the 1947 appropriation emerged in its final form, the $300,000,000 allocation for soil conservation had been slashed to $267,000,000. By the time this fact developed, however, the farmers were too far launched into their programs of conservation to suspend operations.

Budget cuts have plagued the Soil Conservation Service before. And they have been met by the commendable practice of transferring funds that are unused by one State for this purpose to another State whose practices exceeded the amount which had been allocated to it.

This could not be done in 1947. There were, it developed, no funds to borrow. Practically every State used the full amount of its allowance. Around 30 States were therefore left short of funds to meet in full these payments to the farmer.

Now, what is the position of the Government in this situation?

I think the Government should pay up. It should make a special deficiency appropriation for this purpose.

It does not matter at this point whether you are in favor of increasing the appropriation for soil conservation in the new fiscal year, or whether you voted to cut the appropriation the last time. That is immaterial. What matters now is this: The claims which these farmers hold are just. The Government owes this money. It is not only the moral question that the Nation owes these funds to its farmers that is involved here. These claims represent the fundamental faith of the people in their elected Representatives in Congress.

My State of Arkansas is one of the many States affected by this unfortunate situation. Other great States include Oklahoma, North Dakota, Georgia, Florida, Illinois, Minnesota, Vermont, Massachusetts, New York, Ohio, Wisconsin, Iowa, Michigan, Virginia, North Carolina, Kentucky, Tennessee, California, Oregon, Washington, Nevada, Arizona, New Mexico, Colorado, Wyoming, Montana, Idaho, Utah, South Dakota.

I sincerely trust that the Congress of the United States will see fit to allocate to these States the funds that are necessary to meet in full the obligation for which it is morally responsible to thousands of farmers.

FOREIGN RELIEF EXPENDITURES

Mr. COX. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Georgia [Mr. COX]?

There was no objection.

Mr. COX. Mr. Speaker, it is not often that I find myself in disagreement with my very good friend from Pennsylvania [Mr. RICH], but I feel I must take at least some little exception to the statement which he made a few moments ago.

I have not approved of everything that has been done heretofore by those representing our Government and our people in international affairs, but I am compelled to say that it is my belief that not one penny that is being sent abroad at the moment is being wasted; that is, insofar as the effort to stop Russia is concerned. It is something that is being used as water to extinguish a flame that threatens to consume the world. It pains me inexpressibly that so many right-motived, high-intentioned, and correct-visioned people do not understand or appreciate the fact that what has taken place heretofore has brought our country to the very brink of disaster, and that we must have the cooperation, the confidence, and support of other peoples or else be pushed over the brink by Russia. If, in order to make possible the fulfillment of our solemn engagements and to do that dictated by enlightened self-interest it is necessary for us to make some sacrifice, then let us make them and do as little quarreling about it as possible.

EXTENSION OF REMARKS

Mr. MULTER asked and was granted permission to extend his remarks in the RECORD and include an editorial on Palestine.

Mr. ENGLE of California asked and was granted permission to extend his remarks in the RECORD and include an editorial.

Mr. HOLIFIELD asked and was granted permission to extend his remarks in the RECORD in two instances,

one on veterans' subsistence, in the second instance on the European recovery plan, and to include therein a letter and a resolution.

THE AUTHORITY OF THE UNITED NATIONS IN THE PALESTINE EDICT MUST BE IMPLEMENTED

Mr. HOLIFIELD. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from California [Mr. HOLIFIELD]?

There was no objection.

Mr. HOLIFIELD. Mr. Speaker, on November 29, 1947, the General Assembly of the United Nations, by a vote of 33 to 13, endorsed the resolution which partitioned Palestine into two separate states—one for the Jews and one for the Arabs.

This action came as a result of 7 months debate before a special committee on Palestine, composed of 11 small nations. It came also, as a result of the moral indignation of the people of the world against the manner in which the British mandate has administered the Palestine area since its inception after World War I.

Under the terms of the committee's resolution, Great Britain is supposed to withdraw from Palestine by August 1, 1948. Also, according to the terms of the resolution a Jewish militia is supposed to be established in the Jewish part of Palestine for the preservation of law and order, and the protection of its citizens. A similar arrangement is projected for the Arab portion of Palestine.

Pending the establishment of these two militias, the United Kingdom is responsible before the world for the preservation of law and order.

Their record in fulfilling this obligation, in my opinion, has been a complete failure. Up to now, they have refused to allow a United Nations Commission to form the Jewish militia and they have refused to allow the Jews to protect themselves against Arabic armed bands.

Our State Department has declared an embargo on the shipment of arms to several of the Arabic nations surrounding Palestine, but they have allowed Pakistan and Turkey to remain outside of the embargo group.

The net effect of this is to provide an Arabic corridor for the furnishing of weapons and munitions of war to the Arab aggressors, while preventing the helpless Jews from receiving arms to defend themselves.

Not only are the lives of countless Jews jeopardized, but the authority of the United Nations is being flouted by armed bands of Arab gangsters.

I demand that our State Department take steps to correct this situation, and I respectfully request the President of the United States through our delegate to the United Nations, to immediately take steps to see that the edict of the United Nations is upheld by an international police force to be established on a voluntary basis by the signatory nations of the United Nations, as provided for in the United Nations Charter.

EXTENSION OF REMARKS

Mr. CELLER. Mr. Speaker, I ask unanimous consent to extend my remarks in the Appendix of the RECORD and include a statement by the National Jewish Welfare Board. The Public Printer informs me it will cost $177.50.

The SPEAKER. Notwithstanding the cost, without objection, the extension may be made.

There was no objection.

Mr. BROOKS asked and was given permission to extend his remarks in the RECORD and include certain items and newspaper excerpts.

Mr. BONNER asked and was given permission to extend his remarks in the Appendix of the RECORD and include an editorial entitled "Gambling With Peace."

Mr. PHILBIN asked and was given permission to extend his remarks in the RECORD and include an article from the New York Times.

Mr. CURTIS asked and was given permission to extend his remarks in the Appendix of the RECORD in two instances, in one to include a resolution and in the other a letter.

Mr. NODAR asked and was given permission to extend his remarks in the RECORD and include a resolution from the Steuben Society of America.

Mr. BUTLER asked and was given permission to extend his remarks in the Appendix of the RECORD on the St. Lawrence seaway.

Mr. O'KONSKI asked and was given permission to extend his remarks in the Appendix on the St. Lawrence seaway, and to extend his remarks in the Appendix on another subject and include a newspaper article.

SPECIAL ORDERS GRANTED

Mr. CELLER. Mr. Speaker, I ask unanimous consent to address the House for 1 hour on Tuesday next following the disposition of the legislative program for the day and any special orders heretofore entered for that day.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. JOHNSON of California. Mr. Speaker, I ask unanimous consent to address the House for 1 hour on Monday, February 2, following the legislative business of the day and such special orders as have heretofore been entered for that day.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

PERMISSION TO ADDRESS THE HOUSE

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

[Mr. HESELTON addressed the House. His remarks appear in the Appendix.]

THE ASSOCIATION OF WOMEN BROADCASTERS

Mrs. BOLTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

Mrs. BOLTON. Mr. Speaker, the Association of Women Broadcasters of the National Association of Broadcasters is holding its fifth annual convention here in Washington beginning today through February 1. They have come from almost every State in the Union to this their first meeting in Washington, and are finding at first hand how their Congress and their Government works. We are happy to have them in the gallery this morning.

The members of the association for the most part conduct daily radio programs of interest to women. The objects of the association are to promote the interest of women broadcasters and executives and to increase their opportunities for service. The Association of Women Broadcasters collaborates with some 125 major national organizations, participates in college and university conferences, cooperates with radio councils, and is becoming the feminine voice which serves the larger purpose. A very fine field for women, in which they can use their capacities in the building of the future.

There are many concrete evidences of the value of the Association of Women Broadcasters to its members and to the radio industry. It has brought inspiration and help through united effort toward common objectives, through the exchange of ideas for the improvement of program service, through a broader knowledge of radio's over-all purposes and problems, through the interpretation of the changing function of the women broadcasters and through the recognition accorded the association by national, State, civic, and private agencies for important help rendered during the war and since.

There are also many signs of the value of the Association of Women Broadcasters to the industry. Important information is channeled from Government agencies and national women's organizations. The group has developed patterns for the celebration of National Radio Week. It has been cited in a ceremony at the White House for its significant role in the success of the food emergency campaign. It is the channel through which association members may implement their interest, their talents, and their experience, thereby giving greater significance to their contribution to the American system of broadcasting.

INSIDE INFORMATION

Mr. MACKINNON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. MACKINNON. Mr. Speaker—

Inside information?
We never heard of that.
So say those in Government,
Who make the budget fat.
Oh, tell me someone here—
If you believe that's so,
How can they do their job
If there's nothing that they know?

EXTENSION OF REMARKS

Mr. PRICE of Florida. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD and include a speech I made on the floor of the House in June of 1946.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

GENERAL LEAVE TO EXTEND REMARKS

Mr. KNUTSON. Mr. Speaker, I ask unanimous consent that all Members of the House may have five legislative days in which to revise and extend their remarks on the tax bill.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

THE TAX-REDUCTION BILL

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. WHITTEN. Mr. Speaker, we will have brought up shortly the so-called tax-reduction bill of 1948. Discussion of the public debt is certainly appropriate to the consideration of that bill.

Mr. Speaker, there is only one way to get rid of the huge $250,000,000,000 debt, and that is to pay it. There is only one way that we can convince the American people that we are going to pay it, and that is to provide by law that a percentage of our national revenue is applied to its payment.

Mr. Speaker, it is my belief that now is the time to make substantial payments of the national debt. I further believe that the American people are going to know that the Republican Party is more interested in reducing taxes for the high-income persons than they are in reducing the huge national debt. Certainly the Treasury Department experts say there will be practically nothing left to apply on the national debt if the Knutson bill as now written becomes the law.

I believe certainly that by all means we must begin to pay that debt. While the American people will not believe the Republicans are as much interested in reducing the public debt by payment, on the other hand they are not going to believe that the Democrats are voting against the tax reduction provided in the Knutson bill because they intend to take the money collected and apply it on the national debt.

I have now pending before the Ways and Means Committee H. R. 5072, which provides that 10 percent of all revenue collected each year shall be applied to payment of the principal of the national debt. That provision should be an amendment to any tax bill considered. We cannot bring it up in consideration of the Knutson bill, for it comes up under a closed rule, and the Republicans who could bring it up will not do so. There is only one way for the provisions of that bill to be considered, and that is for the Democrats in their motion to recommit the Knutson bill, to provide in the bill included in such motion a provision that 10 percent of the revenue collected shall be applied to payment on the principal of the national debt. That is a simple and practical approach, and is the only way that the American people will believe that a vote against tax reduction was really for the purpose of taking the revenue and applying it to debt retirement. Actually that is the only basis for maintaining high taxes.

The American people have for years seen the Congress pass its appropriation bills and if anything is left, then apply that on the national debt. They know that is what will be done again and they are not going to believe that the Democratic leaders are going to have any considerable amount left, even if the present rates of taxation are retained, for application on the national debt.

I say to the Democratic leaders of the House that by all means you should include in the motion to recommit the provision that 10 percent of revenues collected should be set aside by law each year and applied to the payment on the principal of the national debt. All give lip service to such a provision. It is sensible. It is what an individual would do and it is the only way the Democratic Party will ever be able to persuade the American people that they are opposing tax reduction for the purpose of making payments on the national debt.

During the last fiscal year the United States collected something over $42,000,000,000 in revenue. Under this bill, if it had been law, $4,200,000,000 would have been committed to application on the national debt. It may be said that a larger amount was applied on the national debt last year and perhaps more will be so applied this year. This bill does not prohibit such larger payments but merely fixes a minimum payment that must be made each year. By fixing a percentage we would be required to apply more during times of high income, less in time of low income.

I have introduced this bill because from my observation it is the only way we will ever pay the national debt. We are a political country. All parties promise more and more in each campaign. This takes more and more money to meet these promises. Thus each succeeding Congress and each party in the White House comes in committed to spending more and more money. I have been a member of the Appropriations Committee for 5 years and the requests for appropriations made of that committee always exceed the annual revenue of the Nation. When one group holds down appropriations usually some other group increases them and the tendency to spend all we take in is just as great as in the case of the individual American. Money left over, if any, is then applied to the national debt. Such a practice is thoroughly unsound.

In the last Congress I voted on two different occasions against tax reductions partly because of the unfair provisions of the bill which were weighted in favor of the person with the extremely large income and partly because I thought that in this time of large national income we should collect taxes and apply such money on the national debt. I find that such is not to be and that more and more is being spent at home and abroad.

If the bill I have introduced becomes the law we, as a Nation, will then have to live on 90 percent of our revenue. In view of the serious situation we find ourselves in, certainly we should not only be willing to do that but we should see the absolute necessity for it. If we have to then live on 90 percent of our revenue, more care will be taken to see that appropriations are made for the more essential needs of our own people and greater care taken before decisions are made to send of our own to the governments of the world.

I believe I have offered a sensible approach to this problem. I believe the Congress should see to it that this bill is enacted into law. If it should not, then the only course for me and others who see as I do is to vote for tax reduction with exemptions raised and community-property provisions, for the only way then to save money is not to collect it. I know from experience here if money is collected, it is mighty likely to be spent and the $250,000,000,000 debt will most likely be carried forward to face many future generations yet unborn.

I plead with the Democratic leadership to include this provision in any motion to recommit. We owe it to our country to do so, and I feel that is the only way you can give the American people the assurance that as a party we mean to meet our obligations and really to pay the debt.

I would plead with Republicans but I know my plea would in no way deter them in their efforts to go their way regardless of the public debt.

WILLIAM McKINLEY

Mr. JENKINS of Ohio. Mr. Speaker, I ask unanimous consent to address the House for 5 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. JENKINS of Ohio. Mr. Speaker, today is former President McKinley's birthday. Heretofore for a number of years the Ohio delegation in Congress has requested time of the Speaker and the House so that we might discuss the character and achievements of this great statesman. Today we are only asking for a few minutes, because we appreciate the fact that the tax-reduction bill is the next thing on the calendar.

You will notice that we have again this year the flowers, as we have had year by year, the red carnation, which was Mr. McKinley's favorite flower and the favorite flower of many of the people in Ohio.

Mr. Speaker, while Ohio has given to the Nation a number of great Presidents, all of whom were men of great ability, one of these Presidents achieved his principal distinction on the floor of this House. It was because of his activities on the floor of this House that he was elected Governor of Ohio and President of the United States. We respect McKinley as a Governor and as a President, but his services here in this House were

transcendent, as will be attested to by those who served with him and by those who served after him.

Mr. CHURCH. Mr. Speaker, will the gentleman yield?

Mr. JENKINS of Ohio. I yield to the gentleman from Illinois.

Mr. CHURCH. I want to commend the gentleman for his statement and wish to insert at this point in the RECORD an editorial by the Chicago Daily Tribune entitled "Yardstick for Statesmen," which refers to William McKinley.

This editorial is as follows:

YARDSTICK FOR STATESMEN

It is 105 years today since William McKinley was born in Niles, Ohio. His life, until it was cut short by an assassin in 1901, was the typical American success story of the nineteenth century, a story of honesty, courage, and ability rewarded by increasing public trust.

To many in a generation that has been led to associate chicanery and demagogy with political success, these may seem stodgy virtues. It is unfortunate for the Nation that the lessons of William McKinley's life have not been studied more closely by some of the would-be statesmen of today.

President McKinley found the country in the grip of a war fever when he entered the White House in 1897. A savage insurrection in Cuba had provoked equally savage repression by the Spanish government. The island was in chaos, its trade with the United States disrupted. The fighting and resultant starvation and disease cost, in the end, some 200,000 Cuban lives.

It was unnecessary for McKinley to make any public protestations of his hatred of war. He had entered the Civil War as a private of 18 and finished it, at 22, a major with a distinguished field record. His whole course of action over Cuba, however, was designed to avoid a war, even in the face of protests by leaders of his party that he was damaging his popularity by flouting the public will.

For a year he worked patiently (as President Cleveland had before him) to induce the Spaniards to remedy their treatment of the Cubans. His efforts were unavailing. In retrospect it seems that the Spanish Government suffered less from malevolence than procrastination. Its concessions always came too late to satisfy American opinion.

The *Maine* was sunk and the war became inevitable. In a final effort to save Spanish rule in Cuba, six European powers joined in a representation to the United States. Austria-Hungary, Germany, Italy, France, and Russia were, in effect, seeking a revival of the Holy alliance that had tried to freeze the political geography of the world after Napoleon. The British joined in, but played both sides by insisting that the United States be told in advance of the contents of the European protest.

President McKinley had every reason to be brusk with the Ambassadors who called on him. The Spanish Ambassador had a short time before written a letter, which became public, in which he berated McKinley as a puppet of public opinion at the very time that the President was doing his utmost to prevent war. The Ambassadors were courting a rebuke. Instead, McKinley had waiting for them a reply as suave as their own message.

"The Government of the United States," he said, "appreciates the humanitarian and disinterested character of the communication now made on behalf of the powers named and, for its part, is confident that equal appreciation will be shown for its own earnest and unselfish endeavors to fulfill a duty to humanity by ending a situation the indefinite prolongation of which has become insufferable."

The last serious effort of the European concert to interfere in the Western Hemisphere was thus quietly squelched. McKinley could, of course, have said more, and with justice. The European nations were all guilty of the same colonial oppressions that had brought the Spaniards to ruin in Cuba. In the polite society of Europe, Americans were regarded as upstart barbarians, and individual Americans were berated and insulted, because their Nation presumed to question this characteristic European morality.

The language which McKinley chose was more effective than any rebuke because it was sincere. He knew war and genuinely desired to avoid it. At the same time, he saw at the doorstep of the Nation a wrong which he conceived it our duty to correct. The key to his action was a deep and lifelong religious belief. He was a Christian, not for show but for the guidance of his life. He was one of our greater Presidents.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. JENKINS of Ohio. I yield with pleasure to the distinguished gentleman from Massachusetts, a former majority leader of this House and always a highly intelligent gentleman.

Mr. McCORMACK. It is well and proper that the House pause today in its consideration and in its deliberations to pay respect to a great American, and I compliment the gentleman from Ohio for his efforts in this direction. No matter what our affiliation might be, we honor and respect the previous Presidents of the United States and the office of President of the United States. No matter what our party angle may be, we, as Americans, we on our side of the House, the Democrats—and I think I can speak the sentiment of all Democrats—join with the gentleman from Ohio and our Republican colleagues in honoring the memory of one of our great Americans—one of our former Presidents.

Mr. JENKINS of Ohio. I appreciate the remarks made by the gentleman tremendously and profoundly, and we from Ohio especially wish to thank the minority Members for the fairness and nonpolitical attitude which they manifest each year as we make these yearly observations. They have entered into these observances with us most sincerely, and we appreciate it fully.

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. JENKINS of Ohio. I yield to the gentleman from Mississippi.

Mr. RANKIN. Mr. Speaker, of course, I join in what the gentleman says about President McKinley. He was one of our greatest Americans, and the last President who ever served in this House.

In those days we not only had President William McKinley, but we had William Jennings Bryan in the House. While they did not always agree, they were able and sincere advocates of their respective views.

They knew something about the money question. Today we are in a spiral of inflation that is more dangerous to this Nation than the atomic bomb. What a pity that we do not have McKinley and Bryan here today. God give us more such men.

Mr. JENKINS of Ohio. I thank the gentleman. He always makes timely observations.

Mr. COX. Mr. Speaker, will the gentleman yield?

Mr. JENKINS of Ohio. I yield to my esteemed friend the able gentleman from Georgia.

Mr. COX. I would like to say to the gentleman that President McKinley was, for many years, a part-time resident of my district. He maintained a home in Thomasville for a great many years. He was known by the people in that vicinity as a very kind, wise, and very cooperative vistor or part-time resident. It was in that home where it was generally understood that the powers in the Republican Party at that time determined that he should be the party's candidate for the Presidency.

Mr. JENKINS of Ohio. I thank the gentleman very much. It was proof of the magnanimity of this great man that many of his most stanch friends were the men who served on the Democratic side of the aisle contemporaneously with him.

Mr. Speaker, I yield the balance of my time to my colleague the gentleman from Ohio [Mr. BURKE], who will speak of the statesmanship of Mr. McKinley.

Mr. BURKE. Mr. Speaker, we celebrate today the birthday anniversary of a great Ohioan and a great American—William McKinley. While we had been interested as a nation in foreign affairs before his time, it was during his legislative and administrative work that we first heard of reciprocity treaties with other nations; and definitely became one of the great powers with far-flung world commitments. How different was the approach of McKinley and Hay to world problems then, than that of today. Then we were introducing very actively our way of life to the rest of the world on a mutual basis; today we seem to be somewhat of an Atlas with a large part of the burdens of the world upon our shoulders.

McKinley was tremendously interested in world problems as well as domestic affairs. He understood the nature of geographic influences on the course and history of nations. He knew these immutable forces and also the effects of expanding populations on nations. If California had 48,000,000 people, as have the British Isles of similar area, and Texas had 68,000,000 people as had prewar Germany of similar area, he would have understood something of the problems involved.

Perhaps the following passage from the last speech made by William McKinley prior to his death expresses his point of view on the position of our country then. He saw what the transoceanic cable and fast steamship had already done. His words are as appropriate today as when they were spoken:

Geographic and political divisions will continue to exist, but distances have been effaced. Isolation is no longer possible or desirable. God and men have linked the nations together. No nation can longer be indifferent to any other. And as we are brought more and more in touch with each other, the less occasion is there for misunderstandings, and the stronger the disposition, when we have differences, to adjust them in the court of arbitration, which is the noblest forum for the settlement of international disputes. We have a vast and intricate business built up through years of toil and struggle, in which every part of

the country has its stake, which will not permit of either neglect or undue selfishness. Our capacity to produce has developed so enormously and our products have so multiplied that the problem of more markets requires our urgent and immediate attention. Only a broad and enlightened policy will keep what we have. No other policy will get more. By sensible trade arrangements which will not interrupt our home productions, we shall extend the outlets for our increasing surplus. Reciprocity is the natural outgrowth of our wonderful industrial development under the domestic policy now firmly established. The period of exclusiveness is past.

Let us ever remember that our interest is in concord, not conflict, and that our real eminence rests in the victories of peace, not those of war. Our earnest prayer is that God will graciously vouchsafe prosperity, happiness, and peace to all our neighbors and like blessings to all the peoples and the powers of earth.

Mr. CARSON. Mr. Speaker, as the Representative of the Sixteenth District of Ohio, a native Ohioan, and a resident of the city of Canton, the home of the late President William McKinley, I am proud to have the honor of paying tribute to one of our country's great men on the one hundred and fifth anniversary of the birth of our beloved martyred war President.

President McKinley is recorded in history as a President who met the crisis of his day and steered the ship of state to safety. It is well that we pause as Americans to honor this great man and his contribution to our country and to pay tribute to his memory. I hope and pray that, when Americans of this generation are gone, if a future generation of Americans is faced with a dangerous crisis there will be in the White House on that occasion, regardless of what party elects him, what his name may be, or what his religion may be, a man of vision, a man of courage, a man of judgment—the type of man we honor today.

I join with the Ohio delegation in everything that has been said about this great man in honoring his outstanding contributions to the progress of our country.

Mr. RAMEY. Mr. Speaker, to different persons words have different meanings. The word "great" is an example. To some a certain person is greatest of all, while to others he is a demagog. One visits an inauguration and sees in the man all the regal look of a king—to some he is even God's anointed. Another sees in him self-will in action. All of us are inclined to call the man great whom we like; yet, at the same time, we are unable to see the good qualities in anyone whom we do not like.

Today the test of a true statesman is to have an open mind—to give up his preconceived prejudices. Then, in the words of Henry Van Dyke, and then only do we "think without confusion clearly." In every walk of life there is a distressingly large number of individuals who will go to great lengths to avoid mental exercise. Even greater numbers are hindered by their emotions or self-will, and even self-pity, from thinking unselfishly.

I have been seeking to find the acid test for true greatness. For a score of years, scholars have endeavored to define it. Not long since, a group of eminent scholars and philosophers of the world, including Dr. H. G. Wells, sought to name the seven greatest persons in the world. A former member of this distinguished body, Bruce Barton, discussed it at length in one of his books. It is not of so much interest as to the names of the persons chosen as it is that a definition of greatness can be wrought from the list of names. The real test is this: "That life is the greatest which costs the world the least and gives to the world the most in return."

One thousand names of men and women, great and near great, are on a list and all eliminated but seven. Remember, now, they were chosen not because of religious standing or faith, but by using this test given. Here are the names and the reasons:

First on the list was the man Jesus. He was chosen, not because He was the most religious man, but by reason of the fact that He cost the world nothing and gave to the world everything, even what was mortal in His own life, for the redemption of the world.

Second on the list was an old man, who could have been the ruler of his subdivisions had he chosen to be a handshaker or a honeyfugler and sought to be popular. But he dared to speak the truth—yes, the truth—in order that man may be free. Yes; he, too, cost the world nothing, but gave his all—his life—that men might know the truth. I refer to Socrates, of course, who was compelled to drink the poisonous hemlock.

Third on the list was the only American in the group. A man born as lowly as the Son of God. His first meal was a little goose grease off the end of a string which Mrs. Sparrow placed in his mouth, at the same time saying, "It would be better if Nancy's baby could only die, because he ain't got no chance." We know his life. He had nothing but sorrow and suffering. Yes; Abraham Lincoln cost the world very little, but gave his own life to save this greatest of nations and for the freedom of a race.

Fourth on the list is a lady. Her prayers resulted in visions, then convictions; and with the aid of divine providence she conquered mighty enemies and was betrayed by those whom she saved. Joan of Arc cost the world so little, but gave her all; and in the end, like Bruno, went heavenward in the chariot of fire.

The fifth was Asoka. He was placed on this list as the most unselfish man who ever walked the globe and who not only gave himself but completely forgot himself.

Sixth on the list we have a man who did not suffer martyrdom but suffered much worse—banishment. He saved the people of Austria-Hungary and was banished by those whom he saved. I refer to Louis Kossuth. He loved those who in the world's terms said they were his enemies, and in his famous speech at Birmingham, after suffering, he said, "I did not save the people of Austria-Hungary. They saved me." It has been said that the three greatest orations ever delivered were Christ's Sermon on the Mount, Kossuth's speech at Birmingham, and the speech which John Brown made to the judge who sentenced him to death.

The seventh, and last but not least, on the list is Savonarola, priest and prophet, who likewise cost the world practically nothing, but in the end was compelled to forfeit his life because he loved the lowly and the weak.

Why do I mention these names in discussing the life of William McKinley? I think it better illustrated this way:

I must tell you of a little girl. She was compelled to listen to a crank deliver an address on a street corner. The crank was ranting, "I tell you there is no heaven. I tell you there is no heaven. I can prove there is no heaven." The little girl looked to the face of her father and said, "Daddy, then why doesn't he go to h—— and quit making so much fuss about it?"

I think we have one of the greatest in the person of William McKinley, who demonstrated more love for his fellow men than any citizen of this country—without making a fuss about it.

William McKinley, twenty-fifth President of the United States, was born in Niles, Ohio, in 1843. He was educated at Poland Academy and Allegheny College, though he never finished his course in the latter institution. In 1861 he volunteered in the Union Army and entered the Ohio Infantry as a private. He served 4 years, rising by merit to the captaincy of his company and to the rank of major when mustered out in 1865.

Entering politics as a Republican, he was elected to Congress in 1876, and was reelected for six successive terms. In 1882 his election was contested and he was unseated, but he was returned at the next election. In 1890 a Democratic legislature grossly gerrymandered his district, making it easy to defeat him for reelection.

His reputation in Congress rests chiefly on the tariff bill that bears his name. This bill and his able advocacy of it before the House distinguished him as the leader of the Republican Party on the tariff question.

In 1891 McKinley was elected Governor of Ohio by a large plurality and was reelected in 1893. In 1895 a systematic canvass in McKinley's behalf for the Presidential nomination was instituted by his supporters and was continued until the convention of 1896. He was nominated, and, after an extremely bitter campaign on the issue of the gold standard versus free coinage of silver, was elected as champion of the gold standard.

President McKinley's first term is memorable chiefly for the occurrence of the Spanish-American War. That his policy during 1896–1900 was acceptable was shown by his unanimous renomination and by his reelection in 1900 by an electoral majority of 137. His second term began most auspiciously but ended tragically. On September 5, 1901, he visited the Pan-American Exposition in Buffalo, that day having been set apart in his honor and called the President's day. On the afternoon of the following day, while holding a public reception in the Temple of Music, he was shot twice by Leon Czolgosz. The wounded President was removed to the residence of John G. Milburn, president of the exposition, and he died there September 14.

One time while a Member of this Congress of these United States of America, friends from the district which he had the honor to represent reported to Congressman McKinley that enemies back in the district were circulating malicious gossip about him and that he had better make a public reply. He answered, "I have no enemies. My constituents have a right to express what they claim to be their opinions. I need criticism and I love those who criticize me. They help me most."

Conciliatory and gracious, respectful of his opponent's point of view, he never would consent to belittle those who did not see eye to eye with him. He would have been shocked, and his great heart would have recoiled in horror at a "smear" campaign. Never pugnacious, never profane or vulgar, never self-assertive, he sought no quarrels, he put on no airs, he cherished no ambition to be the master of anyone, he refused to indulge in personalities.

Members of Congress, might this not be a charter of action for all of us? If we love our enemies, we lose them. The man who indulges in personalities or gossip is talking about himself. The man who smears, either by public utterance or by use of the printed page, exposes his own cheap biography to public view and places his asininity on parade.

Selfish groups did not intimidate Congressman McKinley. He never followed a personality. He stood for principle. His only concern was, Is it right? And to those who could not share his convictions he was so affable and genial, so friendly and sincere, so kind and generous, so humble and genuine that people who differed with his policies did not for an instant distrust him. People believed him, consequently they believed in him.

One day in this great body a Member, who was temporarily under domination of self-righteousness, endeavored to coin a phrase "Midwest isolationist." We do not know how the other Midwestern States reacted to the remark, but we of Ohio followed the example of William McKinley. We hold no resentment. Never reply to an untruth. Let me direct your attention to his last address setting forth his views on the future of America:

Geographic and political divisions will continue to exist, but distances have been effaced. Isolation is no longer possible or desirable. God and men have linked the nations together. No nation can longer be indifferent to any other. And as we are brought more and more in touch with each other, the less occasion is there for misunderstandings, and the stronger the disposition, when we have differences, to adjust them in the court of arbitration, which is the noblest forum for the settlement of international disputes. We have a vast and intricate business built up through years of toil and struggle, in which every part of the country has its stake, which will not permit of either neglect or undue selfishness. Our capacity to produce has developed so enormously and our products have so multiplied that the problem of more markets requires our urgent and immediate attention. Only a broad and enlightened policy will keep what we have. No other policy will get more. By sensible trade arrangements which will not interrupt our home production, we shall extend the outlets for our increasing surplus. Reciprocity is the natural outgrowth of our wonderful industrial development under the domestic policy now firmly established. The period of exclusiveness is past. Gentlemen, let us ever remember that our interest is in concord, not conflict; and that our real eminence rests in the victories of peace, not those of war.

Post mortem eulogy is only back pay. For our living great we have only epithets; only for our dead, epitaphs.

Long before men, who were too lazy to think, were calling others whom they wished to discredit such names as "Communists," "isolationists," "Fascists," "visionary daydreamers," "pink professors," our beloved McKinley from the then forward Midwest—as it always has been and it is now—reflected his beloved Ohio as one of the first internationalist Congressmen and later as one of its first internationalist Presidents.

The leader of the minority side of this great deliberative body, the distinguished gentleman from Massachusetts [Mr. McCORMACK], once said, "To me a philosopher is a man who seeks the truth." A man unselfishly guided seeking the truth soon lives the truth. Many of us will need that this week. May we have that guidance which McKinley had while we are adjudicating this great question we will be debating this week. May we have this courage which will automatically guide the truth-seekers to refrain from any statement unless we are led by that truth in these critical hours. If millions of men have courage over there, surely we can have the moral courage to do what is right in the great issues debated this week as well as the great issues which will follow regardless of consequences to ourselves. Is the issue on which we are asked to vote this week imperative and needed, or is it one which if adopted will place free men in shackles and chains? Rightly guided like the great martyred McKinley and thoroughly garrisoned with this truth which guided him, we will have the courage to do right as He gives us to see it right. The harvest of right action needs no word of explanation.

SPECIAL ORDERS GRANTED

Mrs. DOUGLAS. Mr. Speaker, I ask unanimous consent that on Monday next, at the conclusion of the legislative program of the day and following any special orders heretofore entered, the gentleman from New York [Mr. KLEIN] may be permitted to address the House for 30 minutes.

The SPEAKER. Is there objection to the request of the gentlewoman from California?

There was no objection.

Mr. BYRNES of Wisconsin. Mr. Speaker, I ask unanimous consent that today, following any special orders heretofore entered, I may be permitted to address the House for 10 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

EXTENSION OF REMARKS

Mr. JENKINS of Ohio. Mr. Speaker, I ask unanimous consent that my colleague the gentleman from Missouri [Mr. BENNETT] may be permitted to extend his remarks in the RECORD and include an address which he made in Missouri on January 27 on the life of William McKinley.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

CONSERVATION OF GRAIN—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 512)

The SPEAKER laid before the House the following message from the President of the United States, which was read, and, together with accompanying papers, referred to the Committee on Banking and Currency and ordered to be printed:

To the Congress of the United States:

Section 6 (a) of Public Law 395, Eightieth Congress, first session, provides that whenever the President shall determine that there is or threatens to be a critical shortage of any raw material, commodity, or product which jeopardizes the health or safety of the people of the United States or its national security or welfare and that there is no prospect that such critical shortage may soon be remedied by an increase in the available supply without additional governmental action and that the situation cannot be solved by voluntary agreement under the provisions of that act, the President may prepare proposed measures for conserving such raw material, commodity, or product which he shall submit to the Congress.

Upon the basis of information furnished by the Secretary of Agriculture, I have determined that there is at present a critical shortage of grain, which threatens to become even more serious during the next few months; that such shortage jeopardizes the national security and welfare of the United States; that there is no prospect that such critical shortage may soon be remedied by an increase in the available supply without additional governmental action; and that the situation cannot be solved by voluntary agreements under the provisions of Public Law 395. Therefore, pursuant to section 6 (a) of that act, I am submitting a proposed measure for the conservation of grain. This proposed measure relates to the use of grain for the production of ethyl alcohol, including but not limited to distilled spirits and neutral spirits.

As a result of the devastation brought about by the war and extremely unfavorable weather conditions, the grain situation of most European countries is extremely grave. Careful studies have indicated that the United States should endeavor to export at least 500 million bushels of wheat from the crop harvested in 1947.

The available grain supplies in the United States in relation to essential domestic and export requirements indicate a real need for conserving as much grain as possible, especially between now and the harvest of the wheat crop this summer and the corn crop this fall. There is attached hereto a table, prepared by the Department of Agriculture, which summarizes the current grain situation. Although the domestic wheat crop in 1947 was 212 million bushels greater than the domestic wheat crop in 1946, the current domestic and foreign demands are so

great that the Congress included a provision in the Foreign Aid Act of 1947 requiring a carry-over of reserve stocks of wheat as of June 30, 1948, of 150 million bushels. It is now estimated that taking into consideration essential domestic needs and the carry-over required by law, approximately 450 million bushels of wheat will be available for export. As indicated above, this is considerably below the minimum amount necessary to meet pressing needs in other countries.

In 1947 the crop of corn, which is the chief feed grain in the United States, was only 2,401 million bushels as compared with 3,250 million bushels in 1946. Production of oats was 282 million bushels less in 1947 than in 1946. Changes in the production of barley, grain sorghum and rye about offset each other. As a result the supply of feed grains is extremely short.

The grain situation can best be summarized by saying that every bushel of grain which can be saved between now and the harvest of the new crops this summer and fall will exert an immediate and direct influence either on grain supplies available for feed and use in this country or on the amount of wheat which can be exported. The feed situation is so acute that a saving of corn will be in effect the equivalent of a saving of wheat. The amount of wheat which can be secured for export will depend considerably upon whether there are sufficient supplies of other grains available for feed. If other grains are not available for feed, farmers may find it necessary to feed greater quantities of wheat to livestock.

Under these circumstances, definite steps to conserve grain and reduce all nonessential uses of grain in the United States were, and are, required in the national interest. The Citizens Food Committee, which I appointed on September 25, 1947, to bring about voluntary food conservation, developed a number of voluntary grain conservation agreements with industry, agricultural groups, and others.

In this connection, I am informed that brewers agreed to make a reduction of 25 percent in the quantity of corn used per barrel of beer, to use no wheat, table grade rice, or feeding barley, and to make other economies for a 90-day period ending January 31, 1948; that the distilling industry agreed to close down for 60 days beginning at midnight October 25, 1947; that bakers were urged to discontinue consignment selling and to practice other economies; that wet and dry corn millers agreed to conserve by making maximum use of perishable high-moisture corn; that the mixed feed industry was requested to substitute, wherever possible nonfood grains for wheat; that poultry producers agreed to cull flocks and to reduce the production of baby chicks and turkey poults; that farmers in general cooperated with the Government in grain conservation by feeding hogs to lighter weights, putting less finish on beef cattle, and culling dairy herds; and that restaurants and hotels agreed to make savings in the use of scarce commodities.

After the voluntary shut-down of the distilling industry became effective on October 25, 1947, it became apparent that a program for a continuing reduction in the use of grain by the distilling industry would be necessary to meet the critical emergency with respect to the supply of grain for authorized foreign aid programs and essential domestic uses. Consequently, exhaustive efforts were made to effectuate a voluntary agreement with the distilling industry for the conservation of grain.

During the period of the voluntary shut-down of the industry, meetings of the distillers' coordinating committee, the membership being composed of representatives of the industry, labor, and the Department of Agriculture, were held in an endeavor to work out a voluntary program which could be made effective after December 24, the termination date of the voluntary shut-down. The last of these meetings was held on December 9, 1947. At this meeting, it became apparent that it was impossible to reach an agreement on any effective program which would result in the saving of grain.

Therefore, the Department of Agriculture prepared a program proposing the allocation of two and one-half million bushels of grain for the period to January 31, 1948, and monthly thereafter based upon a formula giving weight both to historical use and capacity. A public meeting to consider this program was held on December 17. Notice of this meeting and the proposal to be considered was given through the press and by individual telegrams to every distilling plant. This meeting was presided over by the Secretary of Agriculture and all members of the distilling industry were afforded an opportunity to express their views as to the desirability of a voluntary program, the form that such program should take, if initiated, and the feasibility or practicability of the program suggested by the Government. The industry representatives present, after considering a variety of proposals including that suggested by the Government, were unable to reach agreement on any effective proposal for the conservation of grain by the industry, although they were informed by the Secretary of Agriculture that, in the absence of some voluntary agreement, he would feel called upon to recommend to the Congress the granting of authority for mandatory control.

Upon being informed by the Secretary of Agriculture of the impossibility of effecting a voluntary agreement to conserve grain by the distilling industry, I instructed him to recommend to the Congress the granting of authority to exercise mandatory control over the use of grain by distillers for beverage purposes. Thereafter, authority for the allocation of grain for the production of distilled or neutral spirits for beverage purposes was granted by section 4 (b) of Public Law 395. This authority was delegated to the Secretary of Agriculture by Executive Order No. 9915, and the Secretary of Agriculture issued under such authority on December 30, 1947, an order, a copy of which is attached hereto, allocating grain to distillers for the period ending January 31, 1948.

Throughout all negotiations with the distilling industry, various factions of the industry have advocated different methods of allocation and there is apparently no possibility of reconciling their views and solving the situation by voluntary agreement. Therefore, further action will be required by the Congress to conserve grain and to reduce its nonessential use.

The attached order is self-explanatory. It sets forth a formula, by means of which the quota of each distilling plant is determined, together with the specific quota for each plant, and it also indicates the detailed procedure for administration. It is contemplated that if the present power to allocate grain is continued beyond January 31, 1948, substantially the same procedure as that provided for in the present order will be used, with such modifications as may be required should the Congress enlarge the grant of authority to include the control of additional uses as recommended in this proposal.

If the allocation powers with reference to grain are continued through October 31, 1948, the Department of Agriculture estimates that the sum of $52,000 will be required for administrative expenses, including the salaries of additional personnel. Of this amount $26,000 will be required for the fiscal year ending June 30, 1948, and $26,000 will be required for the following fiscal year.

The present order allocating grain to distillers contemplates the use of approximately 2,500,000 bushels of grain by the distilling industry for beverage purposes during the period ending January 31, 1948. If the allocation controls are extended by the Congress, it is now contemplated that the use permitted will be at the rate of 2,500,000 bushels of grain per month. However, the total amount to be allocated monthly will depend upon the amount determined to be available after considering all demand and supply factors.

During the 1947 fiscal year approximately 59 million bushels of grain were used for beverage purposes by the distilling industry. However, a considerable portion of this amount was utilized by the industry to build up depleted stocks. The distilling industry was under control, as to the total amount of grain to be used, during the war and until November 30, 1946. As a result of this, stocks of whiskey on hand were necessarily depleted below the average yearly stocks of 475 million gallons which prevailed in the 5 years preceding the war. The total stocks reached a low point on June 30, 1945, of 307 million gallons. These stocks were increased during the 1946 fiscal year by 67 million gallons so that on June 30, 1946, the stocks were 374 million gallons. During the fiscal year 1947 the stocks were further increased by 90 million gallons to 464 million gallons as of June 30, 1947. This increase took place at a time when the sales of bottled whiskey were the highest in the history of the industry. The production of distilled spirits and neutral spirits during that year was the highest in the last 10 years.

The average stocks of whiskeys of 475 million gallons which prevailed during the years preceding the war constituted a 4-year supply. The stocks of whiskey on hand now are approximately equal in quantity to the stocks which

were normally on hand prior to the war, but due to the greatly increased sale of blended whiskey at the present time the stocks represent a 6-year supply even at the present high rate of consumption. No additional build-up in stocks, therefore, is justified and the industry can withstand a substantial depletion of its present stocks without undue hardship.

In determining the amount of grain used in the normal production of distilled spirits and neutral spirits for beverage purposes during the fiscal year 1947, the amount of grain used in producing the 90 million gallons of whiskey which were added to the stocks on hand should be deducted from the total use of grain. Upon this basis, allowing for the full replacement of the gallonage depleted by the extremely high sales, the average monthly use during 1947 fiscal year would have been 3,250,000 bushels. Thus, the reduction in the average normal monthly grain consumption by the distilling industry as a whole brought about by this order, for all practical purposes, amounts to only 23 percent on a replacement basis. However, it should be recognized that, if there are no controls, it would be quite possible that the distilling industry would use an amount of grain equal to or even in excess of the amount used in the 1947 fiscal year.

The formula used in determining quotas for each distiller is set forth in paragraph (c) of the order. This formula is based two thirds upon the use of grain by distilling plants during a base period and one third upon the capacity of the plants, with a specific minimum provided for each distilling plant.

Various formulas have been suggested as a basis for allocating grain to distillers. Some have advocated distribution based entirely on use during a base period, others have advocated distribution entirely on a capacity basis, others have advocated a formula giving weight to both of these factors, and still others have advocated distribution based upon sales of bottled goods during a base period. In all past programs the formula for distribution has been based either upon the usage of grain by distilling plants during some past period or the capacity of the distilling plants for the use of grain based upon past operations, or a combination of both. The sale of bottled goods has never been used as a standard of allocation. In view of the diversified character of the industry, it has been considered that the use of bottled sales as a basis for allocation would result in an unworkable, unfair, and inequitable method of allocation.

The formula contained in the order of December 30, 1947, was arrived at after thorough consideration of all proposals and of the experience gained under previous allocation orders. It was considered to be the most equitable formula which could be used under the circumstances. It is contemplated that if the Congress continues the allocation authority beyond January 31, 1948, a formula substantially in conformity with that contained in the present order will be used.

Public Law 395 revives and reenacts title III of the Second War Powers Act, 1942, with respect "to the use of grain for the production of distilled spirits or neutral spirits for beverage purposes." If the allocation authority is continued beyond January 31, 1948, it would be desirable for the legislation to grant such authority with respect to the production of ethyl alcohol from grain rather than use the language of the present act.

The same manufacturing process is required in connection with the production of distilled spirits or neutral spirits for beverage purposes and some kinds of industrial alcohol. Because of the nature of the industry it would be desirable to have an integrated control over the production of ethyl alcohol from grain regardless of the use to which the product is to be put.

In view of the fact that the authority granted by Public Law 395 was for a period of only 1 month, and that the practice of the industry is to make purchases of grain weeks ahead, it was impracticable to provide for inventory controls. However, if the allocation controls are continued beyond January 31, 1948, provision should be made for inventory controls.

Upon the basis of the foregoing information, I recommend that the Congress provide for the exercise, at least until October 31, 1948, of the powers, authority, and discretion conferred upon the President by title III of the Second War Powers Act, 1942, with respect to allocation and inventory control of grain for the production of ethyl alcohol regardless of the use to which the product is to be put.

HARRY S. TRUMAN.

THE WHITE HOUSE, *January 29, 1948.*

EXTENSION OF REMARKS

Mr. ELSAESSER (at the request of Mr. ARENDS) was given permission to extend his remarks in the RECORD in two instances and include two articles.

Mr. SMITH of Wisconsin asked and was given permission to extend his remarks in the Appendix of the RECORD in two instances and include extraneous matter.

REVENUE ACT OF 1948

Mr. ALLEN of Illinois. Mr. Speaker, I call up House Resolution 450 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 4790) to reduce individual income tax payments, and for other purposes, and all points of order against said bill are hereby waived. That after general debate, which shall be confined to the bill, and shall continue not to exceed 2 days, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Ways and Means, the bill shall be considered as having been read for amendment. No amendment shall be in order to said bill except amendments offered by direction of the Committee on Ways and Means, and said amendments shall be in order, any rule of the House to the contrary notwithstanding. Amendments offered by direction of the Committee on Ways and Means may be offered to any section of the bill at the conclusion of the general debate, but said amendments shall not be subject to amendment. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion, except one motion to recommit.

Mr. ALLEN of Illinois. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, this resolution provides for the immediate consideration of H. R. 4790, a bill to reduce individual income-tax payments, and for other purposes.

This is a closed rule, providing 2 days of general debate on the tax bill. We can expect the same hue and cry that they always send up when a closed rule is reported on a tax bill. The Democrats know as well as I do that a tax bill cannot be brought up under any other kind of rule, but they are committed to a policy of obstruction to Republican-sponsored measures. All of you know that a closed rule is necessary, so I will not try selling it to you. And all of you know that a tax reduction is necessary now, so I will not try selling that to you, either. But I would like to give you just a few of my thoughts on the tax-reduction bill.

For the past half decade, the American people have borne a tax burden of such proportions that it would have crushed the individual initiative of a less patriotic people. During the war and subsequently, taxes have consumed nearly one-third of our national income—but the principal reason for high taxes was eliminated with the cessation of hostilities. The proponents of continuing the present high rate of income tax are therefore left with no reason, and they are grasping vainly for an excuse.

The excuse generally offered by those who would keep taxes on wage earners at the present high level, is that an income-tax reduction would contribute to the inflationary spiral. In almost every instance, I find that the proponents of continuing the high rate of taxes are those who also advocate huge Government-spending programs. It is these huge spending programs which are inflationary—and not an income-tax reduction.

By reducing taxes, we merely make it possible for the people to offset part of the increased cost of living. Federal and State Governments are now taking one-third of the national income in taxes. And what does the Government put into the market for all of this money? Absolutely nothing. In other words, the Federal and State Governments are putting $65,000,000,000—more or less—into circulation and they produce no goods or services on which the money can be spent. That is one of the principal factors in the present high cost of living. The way to combat it is to reduce Government spending, but prices cannot be reduced by keeping taxes high.

Another excuse offered for maintaining the present income-tax rate is that any reduction would result in an insufficiency of funds for the operation of the Federal Government. Simple arith-

metic contradicts this excuse. The cost of operating the Government will be $39,700,000,000 this year, according to the President's budget. The Republican Congress will reduce this figure by $3,000,000,000, simply by removing the padding. And we will trim the remaining $36,700,000,000 figure by eliminating some of the superfluous Government functions, and actual expenditures will be around $35,500,000,000. Now, assuming that our national income continues to be $200,000,000,000, $44,500,000,000 would be produced under present tax laws.

The bill contemplates a reduction in individual income taxes of $5,800,000,000. That means that the Government would still have $38,700,000,000 to finance its operations. After judicial pruning by the Congress, the national budget will be $35,500,000,000—leaving $3,200,000,000 to apply toward reducing the national debt after the income-tax reduction provided in this bill.

The Republican Congress recognized the need for a tax reduction last year, but our efforts to enact it were stopped by the President. Now, even the President recognizes the need for reducing the tax burden on individuals. His change of mind was, no doubt, brought about by a changed condition. Last year was not an election year—and this year is. The President's tax-reduction proposal was made for just one reason—to get votes—and I doubt that it will be successful even in that respect. But nevertheless, it is obvious that every thinking person is now aware of the necessity for reducing the income tax for individuals.

This year, at the present rate of taxation, the Government will have a surplus of between four and nine billions of dollars—depending upon the cooperation Congress receives from the administration in reducing Government spending. It is now for Congress to decide how this surplus can best be used to advance the welfare of the people and of the Nation. Three courses are open to us: First, we can apply the entire surplus toward retiring the national debt; second, we can reduce taxes by the entire amount; and, third, we can apply a portion of the surplus toward retiring the national debt and return the remainder to the people. I think the latter course is in the best interests of our national economy.

Do not misunderstand me. It is vitally important that we start now to reduce the national debt—and a portion of our surplus should be applied to that purpose. But the national economy also needs increased production to cope with high prices—and the keyword to increased production is increased incentive to work. A tax reduction now will give wage earners that incentive—and increasing the incentive of workers to produce is the primary purpose of this tax bill.

For one reason or another, a number of prominent individuals have found it appropriate to propose an income-tax reduction recently. One theory advanced is that we should establish a tax system to redistribute the income of individuals. Another proposal would exempt the first $2,500 of income for a married couple. Most of these proposals served the purpose for which they were intended—which is too obvious to those with even a slight knowledge of politics. But, to date, nearly every proposal has fallen short of the mark. On the other hand, the tax-reduction plan incorporated in H. R. 4790 meets every test of a sound tax policy.

Now allow me just a moment to summarize the Republican conception of a tax policy. First of all, the Republican Party believes that the purpose of taxation is to raise revenue to support the Government and its operation. We do not agree with those foreign ideologies which would levy taxes for the purpose of redistributing the wealth. It is only common sense that a sheep can be fleeced many times, but it can only be skinned once.

Most of the "me too" tax-reduction proposals fail to meet even this first test. Sufficient revenue to support the operations of the Government would not be possible if the exemption for individuals was increased by amounts which have been proposed. Proposals to redistribute the wealth would also be eliminated by this test.

The Republican Party also believes that income taxes should be levied according to the individual ability to pay, while preserving a margin to promote initiative. This margin for incentive is provided in the present bill.

Now let us test the income-tax reduction reported Tuesday by the Ways and Means Committee against the standard for a sound tax policy.

First, will this bill raise sufficient revenue to operate the Government? I have already answered that question in the affirmative.

Secondly, does this bill distribute the tax burden according to the ability to pay? Again the answer is yes. This bill raises the personal and dependency exemptions from $500 provided in the present bill to $600. Tax reductions are graduated from 30 percent for persons having $1,000 of taxable income or less down to 10 percent on the portion of an individual's income in excess of $4,000.

A community property provision has also been included in this bill to permit married couples to file a joint return, each paying taxes on the rate charged for one-half of their total income. Persons over 65 years of age and the blind would be given an increased exemption. In every respect this bill meets the requirement that taxes should be levied according to the ability to pay.

Now, I have said that taxes should be levied according to the ability to pay while preserving incentive. By incentive I mean not only the reward for personal services rendered, but also the anticipated reward which attracts venture capital into our industrial machine. During the next 10 years this country will require an additional $50,000,000,000 in risk capital to meet the demands for production. The President's income-tax proposal would increase the income tax on corporations and thereby diminish the incentive for risk capital. In making this proposal the President would like to have the American people believe that he is shifting the tax from the individual to the corporation. On that point it should be remembered that corporations are nothing more than joint business ventures of the stockholders. The stockholders make the investment and the stockholders take the profits or the losses of the corporation. And who are the stockholders? The stockholders are the American people. Therefore, the President would shift the taxes from the people to the people. It should also be remembered that under the President's proposal no income-tax payer—large or small—would receive as much relief as this bill has afforded them.

On every point this bill meets the requirements of a sound tax policy. It provides sufficient revenue for the operations of the Federal Government, and it distributes the tax burden according to the ability to pay while still providing the incentives to increase production. It is an excellent bill, and I hope it receives your impartial and unbiased consideration and your ultimate support.

Mr. Speaker, I yield 30 minutes to the gentleman from Illinois [Mr. SABATH].

Mr. SABATH. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include certain tables and figures.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. SABATH. Mr. Speaker, my colleague the gentleman from Illinois [Mr. ALLEN] chairman of the Committee on Rules, stated, in justifying the bringing in of this most vicious "gag" rule that we, in past years, had done likewise. It is true that we have from time to time brought in so-called closed rules on measures, but in such cases they were on highly complicated and technical tariff and revenue bills and I direct attention to the fact that the one before us is not a complicated revenue or tariff bill. It is to be regretted that the bill has been designated as the "Revenue Act of 1948." To cite it as such is misleading. Its proper title should be "A bill to reduce taxes of the wealthy and to preclude the reduction of our national debt."

The bill proposes to reduce the income taxes, not of the needy persons as my colleague stated, but those of the wealthy people of our Nation who will be benefited to about 80 percent of the reduction, and the lower-income groups to the extent of about one-fifth. I shall later insert the figures on which I base my statement.

To my mind, this is the most drastic and unjustifiable gag rule that could possibly be brought in. In the first place, the rule waives points of order against the bill. It then provides that the bill shall be considered as having been read for amendment, precluding it being read, after the debate, but no amendment shall be in order to the bill except amendments offered by the committee, and even the amendments offered by the committee are not subject to amendment.

Mr. GEARHART. Mr. Speaker, will the gentleman yield?

Mr. SABATH. I would prefer not to yield at this time.

Mr. GEARHART. I just wanted to point out that the gentleman has brought in similar resolutions many times.

Mr. SABATH. I am mindful of that fact, but, as I stated a moment ago, they were on complicated and technical tariff and revenue bills.

The gentleman from Indiana [Mr. HALLECK] in his statement yesterday to the country said that ample opportunity under this gag rule would be given the Members to speak on the bill. He did not say they would be prevented and deprived of the right to offer any amendments or to vote on any amendments or provisions of the bill. They must take the bill as it is. Yes; 2 days have been set aside for talk. Talk is always cheap on that side, and that is the only cheap thing the country has received and is receiving from the Republican Party.

I feel that the vast majority of the American people are not asking for a reduction in taxes when the country is in as prosperous condition as it is. The demand comes from the owners of large corporations such as United States Steel and other steels—not "steals"—who made 11½ percent in dividends in 1946, twice as much as they did in 1936; and this also applies to the poor packers such of Armour, Swift, Wilson, and other corporations who have doubled profits. Yes, the demand for tax reductions come from these corporations who acquired over $17,000,000,000 in profits after taxes, who put aside an additional 10 billions of dollars in reserves, and whose profits enabled them to expend millions for plant expansion and improvements. The demand for relief does not come from the rank and file of the American people, because they are patriotic, yet they are the people who are entitled to the reduction because of the tremendous increase in the cost of living brought about by the Republican Party when it forced the repeal of the OPA. Since that time the cost of living has gone up over 40 percent, and the people with low incomes find it is impossible to provide decently for their families. So, if there is need for a reduction, it is for those people who are earning less than $3,000 and who are unable to cope with the ever-increasing cost of living.

I realize that all the people dislike paying taxes. I myself would prefer to pay less than I am paying. But all those who have the interest of the country at heart should realize that we owe certain obligations to the 85,000,000 people who upon our recommendation bought savings stamps and bonds and are holding billions of our bonds. They should be protected. Consequently I feel that the first duty we owe to them and to the country is to reduce our bonded indebtedness and our liabilities. As it is today, we are obliged to pay over $5,200,000,000 in interest. By reducing the indebtedness we can also reduce the interest which will materially help the holders and owners of these Government securities. Mr. Speaker, I firmly believe that if a fair submission of the question was made to the American people, the vast majority, while they might be interested in reducing their taxes, would vote in the first place to reduce our indebtedness. We owe it to the country. We owe it to ourselves. Under this bill it will be impossible to pay anything toward the national debt. In fact, after a careful examination by those in a position to know and who have studied the matter, they believe that there will be a deficit because in addition to the cuts that will be provided in the bill by the adoption of a principle which we all favor, the community-property provision, there will be a reduction of $880,000,000 in revenue and again 97½ percent of that amount will go to the wealthy in the upper brackets who do not need a reduction in tax.

In this connection, I wish to point out to those who have voiced criticism of the President's budget recommendation that 79 percent of the proposed budget is allocated for the Army, Navy, Air Corps, veterans' compensation and subsistence, payment of debt interest, and appropriations for relief purposes under the Marshall plan.

Mr. ALLEN of Illinois. Mr. Speaker, will the gentleman yield?

Mr. SABATH. I yield to my colleague.

Mr. ALLEN of Illinois. The gentleman is greatly disturbed about this tax bill. The gentleman knows that under the rules, in the motion to recommit, the gentleman from Illinois and my good friend, the minority leader, the gentleman from Texas [Mr. RAYBURN], and the gentleman from North Carolina [Mr. DOUGHTON], can write a tax bill of your own in that motion. Therefore I suggest to the gentleman that Mr. DOUGHTON and the minority leader and you get together on that motion to recommit and write a tax bill in that motion.

Mr. MICHENER. Mr. Speaker, will the gentleman yield?

Mr. SABATH. I yield.

Mr. MICHENER. I take it, of course, that the gentleman is a great administration leader as well as follower and that if he does have such a motion to recommit, it will embody that which the President has asked for; is that correct?

Mr. SABATH. That is right. You are right, sir, but unfortunately, you and my colleague, the gentleman from Illinois, know that the motion to recommit is the only motion that can be made. What I want is that the membership on your side as well as on our side be given an opportunity to offer an amendment to make this unfair, vicious, yes, dishonest bill, as the gentleman from Texas [Mr. RAYBURN] has stated, acceptable to the rank and file of the American people. We know that while a motion to recommit is possible under the rules in all cases, it never really has succeeded and during my 42 years of service, I think in only one instance has a motion to recommit on an important measure prevailed.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. SABATH. I yield.

Mr. McCORMACK. The statement of the gentleman from Illinois [Mr. ALLEN] really is overwhelming with its admitted kindness. The gentleman from Illinois [Mr. ALLEN] admits that he takes away from the minority every right under the rules; that under the rules they could not take away from us the right of a motion to recommit. So that in this rule they have ruthlessly taken away from the minority every legislative right that the general rules provide for, and when the gentleman refers to a motion to recommit, he knows that the Rules Committee, under the rules of the House, could not take that right away from the minority. So they have taken away everything they could from the minority party in the consideration of this bill, under the general parliamentary procedure.

Mr. SABATH. Not only have they taken away from the minority the right, but they have taken it from their own membership. They have deprived them of the opportunity to offer amendments to try to make the bill less objectionable. There are many Members on that side that I know do not approve of this bill, but, due to the powerful forces behind the Republican Party, they are compelled to go along, and they are whipped into line, so that each and every one of them will have to vote "yea" on the bill, it matters not how vicious, how bad, how dishonest the bill is, and in view of your majority of 60 Members, no doubt, you will be able to force it through the House.

Mr. MICHENER. Mr. Speaker, will the gentleman yield?

Mr. SABATH. I yield.

Mr. MICHENER. I served for many years on the Rules Committee under the leadership of the distinguished gentleman from Illinois [Mr. SABATH], who is now addressing the House, during a Democratic Congress, and when the gentleman from Massachusetts [Mr. McCORMACK] was the majority leader. I believed at that time, and had the courage to come onto the floor and say so and vote with the gentleman from Massachusetts and the gentleman from Illinois in granting a closed rule exactly like this on every tax bill but one, and at that time we let down the bars. I insisted, with others, and we had an open rule; and after 7 days' debate in the House, the House adjourned, and the Ways and Means Committee came before the Rules Committee and we who had voted for an open rule under Democratic leadership's insistence and crack of the whip, admitted we were wrong, and we voted a closed rule. I will ask the gentleman from Massachusetts [Mr. McCORMACK] if that is not true.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. SABATH. I yield.

Mr. McCORMACK. My distinguished friend overlooks the fact that there was never a closed rule during the 6 years that I was majority leader——

Mr. MICHENER. On taxes?

Mr. McCORMACK. Yes; on taxes, unless the Ways and Means Committee, both Democrats and Republicans, came before the Rules Committee and unanimously asked for it.

Mr. MICHENER. I do not have such memory.

Mr. SABATH. I wish to say to the gentleman from Michigan, and I again repeat, those closed rules that were brought in were on highly complicated

and technical tariff and revenue bills. This is not a tariff bill or a revenue bill. This is a tax-reduction bill, for the rich and the wealthy, and, surely, due to our great prosperity they have accumulated millions and millions in profits, and are continuing to accumulate additional millions.

PENNIES VERSUS DOLLARS

Mr. Speaker, unfortunately the Republican majority, for political reasons and, I presume, to obtain additional contributions from those whom this bill will relieve of taxes, will vote unanimously for the rule as well as for the bill. My complaint is that it is not only an unfair bill but an inequitable one because it reduces the taxes of those in the lower earning brackets by pennies while giving reductions to those in the higher income and salaried brackets by thousands of dollars. If the Republican Party aimed to do the right thing by the people they would bring in a bill that would be fair and afford relief to those that need it most instead of to those that need it the least.

I believe the President's recommendation of a $40 reduction to all taxpayers is eminently fair. It would afford a tax reduction of $160 a year for a family of four and surely those wage earners receiving a wage of less than $3,000 a year are desperately in need of relief in view of the high cost of living. That cannot be said of those persons whose incomes are above $10,000 and to the wealthy whose incomes range up to a million dollars. I insert at this point a small table showing what the Knutson-National Association of Manufacturers' bill will do and what relief the President's recommendation, if enacted into law, would bring about:

Income	Present tax	Reduction under Knutson bill	Reduction under President's proposal
$3,000	$190	$110	$160
$10,000	1,862	652	160
$100,000	62,301	18,077	160
$1,000,000	838,880	105,914	160

The Knutson bill would reduce the tax of the individual with a $100,000 income by $18,077 compared with a $160 reduction under the Truman plan—those with a millon income would obtain a reduction of $105,914 compared with $160 under the Truman plan.

Mr. Speaker, I call attention to the testimony of a $2,500-a-year New Jersey cannery worker before a committee in the other Chamber who testified that under the prevailing high prices of food stuffs he was only able to provide his family of eight children with 60 cents' worth of meat a week and could not buy more than 14 quarts of milk weekly while the minimum requirement for proper nourishment called for 28 quarts. I feel that anyone who read that evidence could not conscientiously vote for the measure before us but would be in honor bound obliged to vote for a bill carrying the President's recommendation that will actually give relief to people of small earnings.

OUR NATIONAL DEBT MUST BE REDUCED

You Republicans maintain that our national income in the next fiscal year will be $209,000,000,000. It is conceded by the Treasury Department and those in position to know that our national income will be over $200,000,000,000, which will be five times greater than our national income in 1932. In consideration of these figures, I ask whether you want to hold off paying our national debt until such time when the incomes of all persons will be reduced? Is not this the time to start reducing our debt when we are enjoying the greatest prosperity in the history of our Nation?

REDUCE TAXES OF THOSE IN THE $3,000, EVEN $4,000 INCOME BRACKETS

Mr. Speaker, I repeat, if we must have income-tax reductions, let us grant it to the average American whose earnings are at least $3,000 or even $4,000 a year, the white-collar workers, the retired Government, State, county, and municipal employees, and persons of low fixed incomes who, due to the high cost of living, find it impossible to decently provide for their families or to sustain themselves. I insert as a part of my remarks, a table giving the 1939, 1946, and 1947 comparative consumer retail prices as charged in my home city of Chicago during the years in question, as follows:

Comparative consumer retail prices, Chicago, Ill.

Commodities	Unit	1939	July 1946 range	October 1947 range
MEATS		*Cents*	*Cents*	*Cents*
Round steak	Pound	35	62-89	79- 98
Rib roast	do	30	51-75	67- 89
Chuck	do	25	43-69	60- 75
Veal cutlets	do	43	57-79	83-130
Pork chops	do	30	50-75	81- 95
Bacon	do	36	48-65	69- 88
Leg lamb	do	28	48-75	61- 79
Roasting chickens	do	29	52-69	52- 65
DAIRY PRODUCTS				
Butter	do	31	77-95	78- 98
Cheese	do	25	47-69	58- 79
Milk	Quart	12	18-29	21- 22
Eggs	Dozen	29	53-63	76- 89
FRUITS AND VEGETABLES				
Apples	Pound	5	14-19	12- 21
Bananas	do	6	11-20	15- 22
Oranges	Dozen	33	59-92	51- 72
Beans, green	Pound	11	16-27	22- 35
Onions	do	3½	6-12	7- 12
Cabbage	do	3½	4-10	5- 10
Sugar	do	5½	7-10	10- 12
Flour	do	3½	4- 4½	5- 6

The above table shows that the cost of living has gone up from 100 percent to 200 percent and over in some items, and I am for tax relief for those in the lower income brackets. While it is true that there are a considerable number of workers belonging to organized labor and have obtained increases in their wages, yet on account of working reduced number of hours their increased wage has amounted to only 22½ percent, while the cost of living has advanced over 100 percent.

The gentleman from New York [Mr. REED] states that there were some business failures last week. I am sure they did not involve any of the large concerns who will derive the greatest benefits under this bill. I am sure they consisted of failures of small manufacturers and businessmen whom the big boys prevented from obtaining steel and other material to continue in production.

Mr. Speaker, on the whole, I repeat, the country has never been as prosperous as it is now. I hold in my hand a report showing that all banks in the United States had on deposit as of December 31, 1947, the sum of $143,000,000,000. Surely those deposits are not those of the low-earning groups who are obliged to borrow money and go in debt to maintain themselves because of the high cost of living. Yet the demand and clamor for tax reductions are loudest from financial and investments groups who do not need it, nor is it needed by the officers and stockholders of our 12 insurance companies who have increased their assets from $20,000,000,000 in 1938 to $35,000,000,000 in 1946, with the probability that today figures would show assets close onto $40,000,000,000, or nearly double the amount of same in 10 years.

Mr. Speaker, I have consumed nearly 20 minutes and I must conclude to yield some time to other members of the committee. In conclusion, I am satisfied that the Democratic members of the Committee on Ways and Means during the course of general debate in the next 2 days will more thoroughly explain than I the iniquities and unfairness of the provisions of the Knutson bill to the taxpayers of the low-income groups.

I now yield 5 minutes to the gentleman from Georgia [Mr. COX].

Mr. COX. Mr. Speaker, I do not believe I know how to dissemble, and I am glad it is so. I do not want the good opinion of my fellows if it can only be had at the cost of deception, misinformation, or misimpression.

I wish that we might at some time reach the point where a bill of this character could be considered wholly upon its merits. I am not interested in laying the basis for a political contest to come this fall. I want to cooperate with the right-intentioned people of this body in the adoption of a bill that will give some reasonable relief to the taxpayers of this country. It is believed that the revenues of the Government are sufficient to authorize a reasonable tax reduction and certainly the people of the country are expecting some reduction. My colleague the gentleman from Illinois said it was his impression that the motion to recommit the bill would embody the recommendations of the President contained in his recent message. I hope that is not so because such a motion would meet with certain defeat. What we want and the country expects is legislation.

Mr. ALLEN of Illinois. Mr. Speaker, will the gentleman yield?

Mr. COX. I yield.

Mr. ALLEN of Illinois. What gentleman from Illinois is the gentleman from Georgia speaking about?

Mr. COX. I am not talking about the gentleman from Illinois [Mr. ALLEN]. I refer to the gentleman from Illinois [Mr. SABATH].

So far as I am concerned I do not find myself too critical of the formula for the reduction in taxes which is set up in the Knutson bill. If we are going to pass tax-reduction legislation it ought to be fair and honest legislation. If we are to make a cut it ought to be a cut entirely across the board. I know that the low-income people contribute to the full extent, possibly, of their ability; and yet I cannot take the position that the entire burden should be imposed upon the larger producers, because in the higher brackets of the tax law we have, the point of confiscation is closely approached.

For many years as a Member of this body I have as regards tax matters, found it pleasing to me personally to follow the leadership of that great American, that man of fine understanding, our colleague from North Carolina, BOB DOUGHTON. When he was before the Rules Committee, and with the view of having him develop his views about this whole proposition many questions were propounded to him. On the question of amount he very honestly and very forcibly presented the view that it was his opinion that $7,000,000,000 was more than the revenues of the Government would stand.

The SPEAKER pro tempore (Mr. HALLECK). The time of the gentleman from Georgia has expired.

Mr. SABATH. Mr. Speaker, I yield the gentleman three additional minutes.

Mr. COX. Mr. Speaker, the gentleman from North Carolina [Mr. DOUGHTON] further made the observation that the provision of the bill which increases exemptions—and the title which treats with the community property question—should be in any bill that this House might adopt. He further said, as I got the impression, that if you will cut the percentage reductions provided for in the Knutson bill in half you would reach a conclusion that would be equitable, fair and just, and it would not go beyond the point that the anticipated revenues can stand.

Mr. Speaker, I wish it were possible for gentlemen on both sides of the aisle to forget politics in this case and come together in an earnest endeavor to reach an equitable compromise. I trust that before the debate is ended the gentleman from North Carolina [Mr. DOUGHTON] will present his views to this House and that the views expressed by him before the Rules Committee when application for the rule was made will be embodied in a motion to recommit, because that kind of a motion to recommit will give the House an opportunity to adopt legislation which could stand some chance of being accepted by the President.

Mr. KNUTSON. Mr. Speaker, will the gentleman yield?

Mr. COX. I yield to the gentleman from Minnesota.

Mr. KNUTSON. Does the gentleman from Georgia wish the House to believe that he has thrown overboard the President's tax proposal?

Mr. COX. The gentleman persists in bringing politics into this question.

Mr. KNUTSON. No.

Mr. COX. The gentleman knows something of my fondness for him.

Mr. KNUTSON. I am very fond of the gentleman too.

Mr. COX. He ought to know that I know he understands this whole tax question and I trust that the gentleman will be sufficiently impressed by the appeal of the gentleman from North Carolina, if he does take the floor, to be willing to meet him on halfway ground and split percentage reduction in half, thereby giving the President something that he can sign and giving the country something that the anticipated revenues of the Government will stand and that which the people have a right to expect.

The SPEAKER pro tempore. The time of the gentleman from Georgia has again expired.

Mr. ALLEN of Illinois. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER pro tempore. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. KNUTSON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 4790) to reduce individual income-tax payments, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 4790, with Mr. HOEVEN in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. KNUTSON. Mr. Chairman, I yield myself such time as I may need.

Mr. Chairman and Members of the House, as usual, the gentleman from Illinois [Mr. SABATH] embraced this opportunity to play politics, and he referred to the resolution that was just agreed to as the most vicious ever adopted by this House. I think that is the term he used. The gentleman from Illinois has a very convenient, forgetful memory. I would like to remind the House that on October 11, 1945—CONGRESSIONAL RECORD, page 9603—the gentleman from Illinois [Mr. SABATH], as chairman of the Committee on Rules, brought in an identical rule for the consideration of the legislation that later eventuated into the Revenue Act of 1945. The gentleman from Illinois not only brought the resolution to the House, but he spoke in favor of it, notwithstanding the fact that the bill that he then advocated gave $4,000,000,000 in relief to the corporations of America and $2,000,000,000 in relief to individuals in the face of a deficit of $21,000,000,000. And they call that statesmanship.

Mr. COOPER. Mr. Chairman, will the gentleman yield?

Mr. KNUTSON. I yield to the gentleman from Tennessee.

Mr. COOPER. Did the gentleman vote for that bill?

Mr. KNUTSON. I certainly did, and I did not criticize it. I do not criticize this bill, and neither do I criticize the bill that the gentleman refers to. The Republicans on the committee unanimously supported the bill, and so did the gentleman from Tennessee. He voted for the bill as the roll call here indicates.

Now, the Bible says something about straining at a gnat and swallowing a camel. I may not have the words exactly correct, but that is it in substance, and if I am wrong, Dr. Montgomery, who is sitting in front of me, will correct me. But here they are gagging at this bill, while they swallowed a bill wholeheartedly that gave $6,000,000,000 relief to the taxpayers of America back in 1945, $4,000,000,000 of which went to corporations.

Mr. COLE of Missouri. Mr. Chairman, will the gentleman yield?

Mr. KNUTSON. I yield to the gentleman from Missouri.

Mr. COLE of Missouri. That was a straight 5-percent cut clear across the board.

Mr. KNUTSON. Straight across the board, and when we proposed such a cut 2 years later they were horrified. They said it ought to be done according to ability to pay, or I have forgotten just what. But I will say one thing about the minority, they are never at a loss for an issue, and they have no difficulty in weaving the material at hand into a plausible presentation. But enough of that.

Mr. Chairman, I wish to discuss the provisions of H. R. 4790, which were reported to the House by the Committee on Ways and Means on Tuesday, January 20, 1948.

This bill is both an individual income-tax reduction bill and a tax equalization bill. Under existing law, there are 55,000,000 taxpayers. All of the 55,000,000 taxpayers will receive a tax reduction under H. R. 4790. About 7,400,000 will be relieved from the individual income tax entirely. Of the total reduction provided by the bill, approximately 72 percent will go to taxpayers with net incomes under $5,000 and only 28 percent to taxpayers with net incomes above $5,000.

The bill provides the following relief:

First. It raises the $500 per capita exemption to $600. Thus each taxpayer will receive a $600 exemption for himself, a $600 exemption for his spouse, and a $600 exemption for each of his dependents. This will benefit all taxpayers, but over 90 percent of the benefit will accrue to those whose net incomes are $5,000 or less. By virtue of this change, over 6,000,000 taxpayers will be relieved of their entire income-tax liability.

Second. The bill provides for reductions in the amount of tax payable by each taxpayer. These are as follows:

First. Taxpayers whose incomes, after deductions and exemptions, are $1,000 or less, receive a reduction of 30 percent in the amount of tax payable under existing law, after taking into account the increase in the per capita exemption from $500 to $600. There are 25,000,000 taxpayers in this group, excluding the 6,000,000 taxpayers eliminated from the rolls by raising the per capita exemption from $500 to $600. This group includes single persons earning up to $1,778 per year, married persons earning up to $2,444, and married persons with two de-

pendents earning up to $3,778. This group pays approximately 14 percent of the tax under present law and receives approximately 21 percent of the tax reduction.

In my statement last year on H. R. 1 I pointed out that this group suffered most severely as a result of the rise in the cost of living during recent years. The need of these people for tax relief is even greater today. They received no tax reduction last year and living costs have since increased by an additional 9 percent. In addition to the 30-percent tax reduction this group obtains substantial relief by the increase in the exemptions from $500 to $600.

Second. Taxpayers with incomes, after deductions and exemptions, between $1,000 and $1,396, receive, in addition to the increase in the per capita exemption, a reduction ranging from 30 percent to 20 percent in their tax computed after taking into account the increase in the per capita exemption from $500 to $600. There are approximately 13,000,000 taxpayers in this group.

Third. Taxpayers with incomes, after deductions and exemptions, over $1,396 and not over $4,000 receive, in addition to the increased per capita exemption, a reduction of 20 percent in the amount of their tax. There are approximately 7,000,000 taxpayers in this group.

Fourth. Taxpayers with incomes, after deductions and exemptions, in excess of $4,000, will also receive substantial tax reductions. On the tax computed on the first $4,000 of their taxable income, after giving effect to the increase in the per capita exemption from $500 to $600, they will receive a reduction of 20 percent. On the balance of their tax they will receive a reduction of 10 percent. There are approximately 2,000,000 taxpayers in this group. As a group they pay approximately 44 percent of the total individual income tax and receive approximately 28 percent of the reduction.

In the group with incomes in excess of $4,000 we find the greatest source of risk and venture capital. I cannot emphasize too strongly that if we are really concerned with the welfare of the low-income groups, we must not confine relief to the bottom brackets. By reducing the income tax in the middle and higher brackets, income is released for investment in new and expanding businesses and the managerial group is stimulated to greater efforts. A larger volume of output results, more jobs are created, prices are reduced, and the cost of living is lowered. The primary beneficiaries of these changes are persons in the lower income brackets.

The real answer to inflation is more production. We cannot have more production unless there is sufficient capital to finance it and enough incentive to make people assume the risks and managerial effort which an expanded and improved output involves.

The present high taxes leave too small a reward to guarantee the desired results. Taxes take a bite of 50 percent or more out of each dollar over $16,000, and the bite goes deeper as the income rises. It amounts to 86.5 percent on incomes in excess of $200,000.

Primarily, because of these high tax rates it is becoming increasingly difficult to find the venture capital needed to finance business expansion, development, and replacement. Faced with these tax rates, investors hesitate to take the risks involved in supplying equity capital. They insist on gilt-edged securities. Corporations are forced to sell bonds instead of stocks in order to provide the necessary capital. The task of raising new capital in the capital markets is a tremendous challenge to business and to all sources from which capital is derived. In fact, as many business economists have said: "It is an impossible task under the present tax system."

New and small businesses are finding it increasingly difficult to obtain risk capital. Large, well-established enterprises with good credit ratings have much less difficulty in floating new securities. This additional advantage, enjoyed by large firms, strengthens the tendency toward monopoly and concentration. Evidence of the increasing financial difficulties encountered by small manufacturers is found in the statistics of business failures. Records of the first 10 months of 1947 show that there were 2,846 failures among small manufacturers as compared with 885 in a like period of 1946—an increase of 222 percent. This condition must be corrected.

The President's proposal of levying an excess-profits tax will make matters worse by reducing what is today almost the sole source of equity capital, namely, the undistributed profits of corporations. In this connection, I wish to quote from an editorial in the New York Times of January 21, 1948, in reference to Secretary of Commerce Harriman's testimony before our committee:

CAPITAL AND MR. HARRIMAN

Testifying before the House Ways and Means Committee in opposition to Republican tax-reduction plans, W. Averell Harriman, Secretary of Commerce, argued that it would be economically dangerous at present to divert capital into private investment at a rate higher than that now prevailing. To increase that rate, said he, would necessitate a painful readjustment later.

Now, it may well be true that industry can raise funds to cover the replacement and expansion needs regarded as desirable under present inflationary conditions. It is by no means as clear that it can raise such funds on terms which are consistent with the needs of a stable economy. In 1946, security issues floated in the investment market for purposes of raising new capital amounted to $3,500,000,000. The total included $2,000,000,000 in common and preferred shares. That is a fairly healthy ratio of debt to equity capital. But in the first 9 months of 1947, while the rate of financing was almost identical with that of 1946, the pattern showed a pronounced change. In the latter period $2,500,000,000 of the new issues took the form of borrowing and only $1,000,000,000 equity financing. In other words, where corporations had found it necessary to raise but 57 percent of their new capital through borrowing, in the first 9 months of 1947 the percentage had risen to around 71 percent.

What do these figures suggest? They suggest, first, that in boom times, such as the present, corporations do not cease expanding because of a shortage of risk capital; they merely shift to less desirable methods—methods which, if long continued, would almost certainly make the "painful adjustment" of which Mr. Harriman speaks vastly more serious than otherwise. They suggest, second, that we have already reached the saturation point so far as financing through equity capital is concerned. Mr. Harriman, as a matter of fact, admits that the trend toward financing through credit is an unhealthy one, but observes that it has "not yet reached the danger point."

Very well. Let us agree, for purposes of argument, with Mr. Harriman's diagnosis that although the patient is sick, its condition is not yet critical. What is to be said, then, for Mr. Harriman's going beyond the point of defending the present tax structure and supporting the President's proposal to add $3,200,000,000 to the corporate tax burden?

On the face of figures which he himself presented before the Ways and Means Committee, this is a preposterous suggestion. These figures are an analysis of the methods by which corporations financed their expenditures in 1947. The expenditures included $14,500,000,000 for plant and equipment, $7,000,000,000 for inventory enlargement, and $5,000,000,000 for added trade receivables, a total of $26,500,000,000. Of this $26,500,000,000, no less than $15,000,000,000 was met out of retained profits. Of the remainder, $4,000,000,000 was raised through new issues, $3,500,000,000 through bank loans, and $3,000,000,000 through trade and other payables. In other words, the chief source of financing—and almost the only source of legitimate risk capital—was retained profits. Yet, while he himself admits that too much risk investment is already being financed through the medium of nonrisk securities and other forms of borrowing, the Secretary of Commerce blandly approves the President's plan to soak corporate profits, and thus deal a crippling blow to what is today almost the sole source of business capital. It simply doesn't make sense.

Fifth. Husbands and wives are permitted to split their income for tax purposes. Those who avail themselves of this opportunity file joint returns, divide their net income and exemptions by 2, compute their tax on this basis, and multiply the result by 2. Since this automatically increases the maximum standard deduction for married couples to $1,000, the maximum standard deduction for single persons is also increased to $1,000. The purpose of this provision is to permit husbands and wives, whether they live in a community-property State or a common-law State, to pay the same tax on similar amounts of income. At the present time, husbands and wives living in a community-property State pay less Federal tax on the same amount of income than husbands and wives living in non-community-property States. The provision will permit uniform treatment for husbands and wives regardless of the State in which they reside.

Husbands and wives living in the community-property States will receive a substantial benefit from this provision, since they will be able to split their income from separate property as well as their income from community property. Under existing law, the only income which they can split for Federal tax purposes is the income from community property.

There are approximately 12,000,000 married persons in the country who will receive additional benefits under the income-splitting provision.

At this point I am inserting a table which compares the tax under present law in a community-property State with

that in a common-law State for a married couple with no dependents:

Difference in amount and percentage of income tax in community-property and common-law States (for a married couple with no dependents)

Net income before personal exemption	Tax payable in—		Excess of tax in common-law States over tax in community-property States	Percent by which tax in common-law States exceeds that in community-property States
	Community-property States	Common-law States [1]		
$1,000				
$1,200	$38.00	$38.00		
$1,500	95.00	95.00		
$2,000	190.00	190.00		
$2,500	285.00	285.00		
$3,000	380.00	380.00		
$4,000	570.00	589.00	$19.00	3.33
$5,000	760.00	798.00	38.00	5.00
$6,000	969.00	1,045.00	76.00	7.84
$7,000	1,178.00	1,292.00	114.00	9.68
$8,000	1,387.00	1,577.00	190.00	13.70
$9,000	1,596.00	1,862.00	266.00	16.67
$10,000	1,843.00	2,185.00	342.00	18.56
$15,000	3,154.00	4,047.00	893.00	28.31
$25,000	6,460.00	9,082.00	2,622.00	40.59
$50,000	18,724.50	24,795.00	6,070.50	32.42
$100,000	50,274.00	63,127.50	12,853.50	25.57
$150,000	86,953.50	105,383.50	18,430.00	21.20
$200,000	127,081.50	148,124.00	21,042.50	16.56
$250,000	169,337.50	191,339.50	22,002.00	12.99
$500,000	383,543.50	407,464.50	23,921.00	6.24
$750,000	599,668.50	623,589.50	23,921.00	3.99
$1,000,000	815,793.50	839,714.50	23,921.00	2.93
$2,000,000	1,680,293.50	1,704,214.50	23,921.00	1.42
$5,000,000	4,273,793.50	4,275,000.00	1,206.50	.03

[1] Entire income reported by husband on joint return.

Sixth. An additional exemption is granted to taxpayers who are 65 or over. If both husband and wife have attained the age of 65, the $600 exemption is granted for each spouse. This will benefit about 3,700,000 taxpayers, of which 1,400,000 will be taken off the tax rolls. This provision will be of particular benefit to retired school teachers, municipal workers, and others who have retired from private industry, and who have as their sole source of livelihood the small amount which they receive as a pension, annuity, or retirement pay. The incomes of such persons will not, in the large majority of cases, increase in an expanding economy, since a vast majority are unable to engage in a gainful occupation.

Seventh. An additional $600 exemption is granted to taxpayers who are blind, in lieu of the present $500 deduction. If both husband and wife are blind, the $600 exemption is granted to each spouse. These exemptions are given to the blind irrespective of their age. The blind also receive the additional exemption granted to persons of 65 or over when they reach that age.

The blind will be materially benefited by this provision. There are approximately 250,000 blind persons in this country and all who pay income taxes under existing law will receive substantial relief under this bill, either in being taken off the tax rolls or in having their income taxes substantially reduced.

By treating this allowance as an exemption instead of a deduction, the bill permits blind persons to receive this allowance and also to use the standard deduction or compute their tax under the tax tables. Under existing law blind people lose the $500 deduction unless they itemize all of their deductions. Furthermore, under the bill, blind persons will be able to get an immediate benefit from their allowance in the form of increased take-home pay. The allowance will be taken into account in the withholding tables. Under existing law, blind persons whose tax is withheld at the source must wait for over a year to get a refund based on this allowance.

I will insert at this point a table showing the number of taxpayers by States who are relieved of income taxes entirely as a result of the exemption features of this bill:

Estimated distribution by States of the taxpayers relieved of all tax liability by increasing the present $500 per capita exemptions to $600 and by allowing an additional exemption of $600 to those persons 65 years of age and over

State:	*Number of taxpayers relieved*
Alabama	92,240
Arizona	27,280
Arkansas	50,100
California	589,400
Colorado	58,800
Connecticut	129,360
Delaware	15,680
District of Columbia	54,720
Florida	97,680
Georgia	107,040
Hawaii	23,380
Idaho	26,360
Illinois	513,660
Indiana	206,720
Iowa	136,760
Kansas	96,120
Kentucky	102,480
Louisiana	93,840
Maine	47,380
Maryland	134,520
Massachusetts	293,180
Michigan	331,700
Minnesota	153,400
Mississippi	46,280
Missouri	203,160
Montana	28,080
Nebraska	69,820
Nevada	10,860
New Hampshire	30,400
New Jersey	284,680
New Mexico	17,760
New York	876,920

JANUARY 27, 1948.

I wish to insert at this point a table showing the percentage distribution of the tax relief afforded by this bill to persons in various net-income classes:

Estimated distribution of the individual income-tax liability and taxpayers under present law compared with estimated distribution of total tax reduction under H. R. 4790

Net income class	Percentage distribution of—		
	Total taxpayers	Total tax paid under present law	Total reduction under H. R. 4790
	Percent	*Percent*	*Percent*
$0 to $3,000	69.5	32.4	44.3
$3,000 to $5,000	26.1	23.8	27.3
Total under $5,000	95.6	56.2	71.6
$5,000 to $10,000	2.9	8.0	6.9
$10,000 to $25,000	1.2	12.3	8.8
$25,000 and over	.3	23.5	12.7
Total over $5,000	4.4	43.8	28.4
Grand total	100.0	100.0	100.0

Source: Staff of the Joint Committee on Internal Revenue Taxation.

This table shows that under H. R. 4790 taxpayers with incomes under $5,000 pay approximately 56 percent of the total tax. These taxpayers will receive about 72 percent of the total relief under this bill. Taxpayers with incomes over $5,000 pay about 44 percent of the present tax and receive approximately 28 percent of the relief.

Eighth. The bill also applies the principle of splitting to the estate and gift taxes. The 1942 amendments, which refused to recognize equal division of community property between husband and wife for estate and gift tax purposes, are repealed. A new provision is being prepared by our draftsmen which will permit the splitting of property between husbands and wives for estate and gift tax purposes in all States. The result is a new national system for taxing estates and gifts. These provisions, including the repeal of the 1942 amendments, are made effective with respect to decedents dying after the date of enactment of the bill.

Husbands and wives in the community-property States will not only benefit from the repeal of the 1942 amendments but also from the provision permitting the splitting of their separate property. If action were limited to the repeal of the 1942 amendments, only community property could be split for estate and gift tax purposes.

The chief argument made against H. R. 4790 is the claim that it gives too large a reduction. Those who make this claim quote the Treasury to the effect that the bill will result in a deficit for the fiscal year 1949 of $2,100,000,000. But, my colleagues, the Treasury deficit is arrived at by using a $200,000,000,000-level of personal income in estimating receipts of $45,000,000,000, and also by assuming that there would be no decrease in the budget estimate of expenditures in the fiscal year ending June 30, 1949.

As the committee report shows, personal incomes during the last quarter of 1947 were running at an annual rate

of $205,300,000,000. Moreover, there is rising trend.

The Treasury admitted in testimony before the Committee on Ways and Means that if a personal income figure of $205,000,000,000 had been used instead of $200,000,000,000, receipts for the fiscal year 1949 would have been increased by $1,100,000,000.

This is the same Treasury which estimated a $4,500,000,000 deficit for the fiscal year ending June 30, 1947. We had an actual surplus for that year of $754,000,000. It is the same Treasury which estimated revenue receipts for the fiscal year 1948 at $38,800,000,000 and refused to revise these figures until August 1947, after the tax bills had been vetoed and the Congress had adjourned. In August the Treasury estimated that the 1948 receipts would be $41,700,000,000.

I wonder how many of my colleagues refused to vote to override the Presidential vetoes, and thereby denied taxpayers in their States sorely needed income-tax relief, because they relied on the Treasury estimate of $38,800,000,000.

Now, in the budget for the fiscal year 1949, the Treasury has revised even its August estimate of receipts. It now says that receipts for the fiscal year 1948 will be $45,210,000,000. This is an increase of $6,000,000,000 over the estimate of $38,800,000, made last year when the tax bill was being considered by Congress.

The amounts by which the Treasury underestimated the revenues for the fiscal year 1948 would have been sufficient to provide the relief contained in the two tax-reduction bills of last year, and still leave ample surplus for debt retirement. At the rate receipts are running now even the most recent budget figures are too low.

My colleagues, do not again be misled. We are faced with the same situation now. The Treasury estimate of receipts for the fiscal year ending June 30, 1949, is again on the low side.

According to conservative estimates made by the staff of the Joint Committee on Internal Revenue Taxation, our receipts for the fiscal years 1948 and 1949 are $46,490,000,000 and $47,317,000,000, respectively. These figures do not take into account the fact that the passage of this bill may result in a substantial increase in the flow of income during the fiscal year 1949 which would produce large additional revenues. Let us take the staff estimates of receipts and see what effect they have on the budget for the fiscal years ending June 30, 1948, and June 30, 1949, as presented by the President:

FISCAL YEAR ENDING JUNE 30, 1948

Net receipts, $46,490,000,000.

Expenditures (budget estimate), $37,728,000,000.

Surplus (existing law), $8,762,000,000.

Effect of H. R. 4790 on budget, $1,000,000,000.

Surplus after tax reduction, $7,762,000,000.

FISCAL YEAR ENDING JUNE 30, 1949

Net receipts, $47,300,000,000.

Expenditures (budget estimate), $39,700,000,000.

Surplus (existing law), $7,600,000,000.

Effect of H. R. 4790 on budget, $7,100,000,000.

Surplus after tax reduction, $500,000,000.

These figures show conclusively that after providing for the tax cut under H. R. 4790, we will have to reduce the President's budget for the fiscal year 1949 by only $2,000,000,000 to have a surplus of $2,500,000,000 to apply against the national debt. This amount, combined with the surplus after tax reduction for 1948 will provide $10,262,000,000 for debt retirement. For every additional billion we cut from expenditures for the fiscal year 1949 we will have an additional billion dollars to apply against the national debt.

I feel certain that we can reduce governmental expenditures for the fiscal year 1949 by at least $3,000,000,000. Why, even the President in his August revision of the 1948 budget gave the Congress credit for reducing expenditures in that year by over $1,500,000,000. A substantially larger reduction can be expected in 1949. No less than $5,000,000,000 in the 1949 budget is merely proposed legislation, as contrasted with $484,000,000 in the 1948 budget.

Mr. CRAWFORD. Mr. Chairman, will the gentleman yield?

Mr. KNUTSON. I yield to the gentleman from Michigan.

Mr. CRAWFORD. Will the gentleman tell us what some of those larger payments are? Is universal military training one of them?

Mr. KNUTSON. It is.

Mr. CRAWFORD. Would the Marshall plan be in there in any form?

Mr. KNUTSON. Yes; it is.

Mr. MASON. It is covered in the budget without these extra figures.

Mr. KNUTSON. The Marshall plan is in the budget.

Mr. CRAWFORD. Then the five billion one hundred million is in the budget in the form of proposed legislation and all in excess of whatever you enter for the Marshall plan; is that right?

Mr. KNUTSON. That is right.

Mr. Chairman, since expenditures based on proposed legislation are easier to reject, we have reason to expect that the cuts in the 1949 budget will be much greater than in 1948. This is especially true because of the fact that the President's budget is the largest peacetime budget in the history of the country.

A $3,000,000,000 reduction will provide a surplus for debt retirement of $3,500,000,000 in the fiscal year 1949, and a total surplus for debt retirement for the two fiscal years 1948 and 1949 taken together of $11,262,000,000.

In his budget message for 1949, the President made the following statement:

The public debt on June 30, 1947, was $258,000,000,000. Budget surpluses of over $7,000,000,000 in the current fiscal year and nearly $5,000,000,000 next year should permit further reduction to $246,000,000,000 by June 30, 1949.

In other words, gentlemen, the President was setting up for you a target of $12,000,000,000 debt reduction in these two fiscal years. The figures which I have just given you show that we are substantially meeting that target.

If you use the figures which the President submitted to you, and the tax program which he suggested, you will not be able to see a debt reduction of $12,000,000,000 in the two fiscal years 1948 and 1949. The President's budget speech is amazingly inconsistent with his tax proposal. In his testimony before the Committee on Ways and Means, Secretary Snyder admitted that the President's tax proposal would actually reduce his estimated surplus for the fiscal years June 30, 1948 and 1949 by $3,000,000,000 and that $2,400,000,000 of the reduction would be attributable to the fiscal year June 30, 1949, reducing his estimated surplus for the fiscal year 1949 from four billion eight hundred million to two billion four hundred million. Therefore, if the President's tax plan were adopted it would be impossible, according to his own figures, to reduce the debt to $246,000,000,000 by June 30, 1949.

My colleagues, what a different picture we had when we passed the tax-reduction bill of 1945 in the face of a $21,000,000,000 deficit. That bill was before the Congress in October 1945. It was sponsored by the party on the other side of the aisle, and we Republicans were happy to assist in its enactment. When that bill was being debated on the floor, I made the following statement:

Mr. Chairman, the tax bill now before us marks an innovation that will be welcomed by the country. Since the New Deal came into power in 1933 we have had 17 tax bills, all of them imposing new and increased burdens in the form of additional taxes. This is the first tax bill in 13 long years that is designed to lighten the tax burden of the American people and as such will be hailed with varying degrees of satisfaction by those who foot the bills.

In 1945 the Federal Government had a deficit of $54,000,000,000, the deficit for the fiscal year 1946 was to be $21,000,000,000, and the Treasury indicated that there would be a deficit ranging from $5,000,000,000 to $8,000,000,000 for the fiscal year 1947. At that time Government economists were predicting a major recession with 8,000,000 unemployed.

I know my good friend the gentleman from North Carolina [Mr. DOUGHTON] and the gentleman from Tennessee [Mr. COOPER] will remember when the President sent a message up here and asked us to authorize and appropriate $300,000,000 to carry over the 8,000,000 that would be unemployed in the transition from war to peace. Well, under the able guidance of my good friend from North Carolina we put the request in the pigeonhole and saved the American taxpayers $300,000,000, just as we saved them $300,000,000 right after Pearl Harbor when a similar request was made by President Roosevelt, who said that there would be 8,000,000 unemployed in the transition from peace to war. We also stuck that request in the pigeonhole. So, under the able guidance of my good friend from North Carolina the Committee on Ways and Means in those two instances was instrumental in saving the Federal Treasury $600,000,000. I merely mention that to show how much dependence can be placed on estimates made by Government economists.

I applaud my friends on the other side of the aisle for sponsoring the 1945 bill under those conditions. That bill, provided, among other things, for a repeal of the excess-profits tax, a reduction of

the corporate income tax, and some reduction in the individual income-tax rates, including the 5 percent straight-across-the-board cut proposed by Senator BARKLEY. The purpose of the 1945 bill is explained in the following paragraph of the House Ways and Means Committee report:

The bill has been designed to aid both individuals and businesses in the difficult period of transition from war to peace. To accomplish this your committee believes that it is necessary to reduce the high wartime tax rates to provide incentives for business to expand and to increase consumer purchasing power. Certain expenditures necessary after the end of a war, however, will keep Federal revenue requirements at a high level during 1946 if a large deficit is to be avoided. Federal expenditures for the fiscal year 1946 have been estimated by the Bureau of the Budget at $66,400,000,000, and the deficit for fiscal year 1946 at $30,400,000,000. Federal expenditures for calendar year 1946 are expected to be much lower, but it is anticipated that the deficit will still be sizable. In view of the probable extent of the deficit in 1946, it is necessary to limit the over-all reduction in taxes.

The loss in revenue from that bill was estimated at $6,000,000,000. At present levels of income the reductions would have cost around $12,000,000,000.

The effects of the bill were startling. We had no recession, we had no unemployment, and instead of a deficit for the fiscal year 1947 there was an actual surplus of $754,000,000.

We who were then in the minority were glad to join with the majority in enacting the revenue bill of 1945. We hope that you, who are now in the minority, will join with us in enacting H. R. 4790.

I do not see how those who voted for the Revenue Act of 1945 with an estimated deficit for 1946 of $21,000,000,000 can vote against this bill with the present large surplus. If there ever was need to encourage production to combat inflation it is today. If there ever was a need to provide relief to the individual income taxpayer from the oppressive war income taxes which are stifling initiative and preventing business expansion, it is today.

Our taxpayers who have received only one reduction since the war ended will look to the north to see how Canada has treated her taxpayers since the war. Canada has made at least three major cuts in its individual income tax to relieve its citizens. The last of these is fully effective in 1948 and provides an average reduction of 29 percent in the tax due. This is over and above the reductions made in 1945 and 1946.

I am inserting at this point a statement from the Winnipeg Free Press comparing individual income taxes in Canada and the United States. The Winnipeg Free Press is one of the ablest-edited and most reliable papers in the Dominion of Canada.

HOW TAXES VARY

Those who pay Canadian income tax, and feel themselves hard done by, will be interested in a comparative table on income taxes payable in this country, and the United States. The rates shown are those effective in the latter part of 1947 and are applicable to earned income, as distinct from investment income.

In the case of the United States, the compiled Federal and New York State tax is shown. Canada and the United Kingdom have no State income taxes. In the United States case also the tax payable was calculated after making the standard deduction of 10 percent from gross income up to $5,000, in lieu of contributions to nonprofit organizations, interest paid, State and local taxes, and medical and other personal expenditures exempt. For gross incomes over $5,000 there was also deducted the New York State income tax in excess of the amount of such a tax on a $5,000 gross income.

No similar deductions from gross income were made in calculating the Canadian tax.

For the purposes of comparison the family allowance received by a Canadian taxpayer with children is deducted from the income tax payable by him, since for income taxpayers the family allowance takes the place, in part, of the former income-tax exemptions for children. This accounts for the negative income tax equal to the family allowances shown at low incomes in the following tables:

Gross income	Single person		Married person without children		Married person with 2 children	
	Canada	United States	Canada	United States	Canada	United States
$600	-------	$8	-------	-------	−$144	-------
$750	-------	33	-------	-------	−144	-------
$1,000	$29	76	-------	-------	−144	-------
$1,250	70	121	-------	$24	−144	-------
$1,500	120	167	-------	66	−144	-------
$1,750	170	212	$29	109	−139	-------
$2,000	220	257	70	152	−108	-------
$2,250	270	304	120	195	−64	$5
$2,500	320	350	170	238	−14	48
$3,000	420	447	270	328	86	133
$3,500	520	548	370	421	186	221
$4,000	620	650	470	523	286	311
$5,000	835	858	670	726	486	505
$7,500	1,465	1,536	1,260	1,367	1,064	1,108
$10,000	2,253	2,333	1,990	2,141	1,786	1,824
$20,000	6,515	6,692	6,140	6,414	5,896	5,922
$35,000	14,478	15,416	14,065	15,088	13,811	14,471
$50,000	22,728	25,338	22,315	24,980	22,061	24,287
$75,000	37,690	43,706	37,240	43,310	36,976	42,534
$100,000	53,903	63,757	53,415	63,334	53,141	62,503

Mr. SHORT. Mr. Chairman, will the gentleman yield?

Mr. KNUTSON. I yield.

Mr. SHORT. The very distinguished and able gentleman from Minnesota has served a long time in the House. I wish to ask if in all your 30 years here, have you heard from your constituents and others all over the Nation a more determined demand and request to reduce taxes and to give particularly the middle class and white-collar worker a little relief.

Mr. KNUTSON. May I say to my friend from Missouri that the demand that we cut out needless and useless spending in the Government is just as strong. The two go hand in hand.

Mr. SHORT. The greatest cause of inflation is spending money that you do not have and a nation or a corporation is no different from an individual. You cannot go on spending more money than you take in without getting into serious difficulty.

Mr. KNUTSON. Well, the New Dealers have found out how, apparently.

I want to read a news story. Canada wants fourth tax cut in fourth year. They have had three. Now they want another one.

Let me read this:

Ottawa, Canada, January 22.

I want my good friend from North Carolina to hear this. They are asking for a fourth tax reduction in the fourth consecutive year.

Mr. DINGELL. Mr. Chairman, will the gentleman yield?

Mr. KNUTSON. If the gentleman will excuse me, I prefer not to.

Mr. DINGELL. I could shed some light on that point.

Mr. KNUTSON. Oh, I dare say the gentleman could. I never knew him to fail.

This newspaper article reads as follows:

CANADA WAITS FOURTH TAX CUT IN 4 YEARS—SURPLUS GROWS; DOLLARS VANISH

(By Eugene Griffin)

OTTAWA, January 22.—Already paying lower income taxes than Americans in all income brackets, Canadians expect to receive another tax cut this spring for the fourth consecutive year.

Reductions last July gave 9 out of 10 Canadian taxpayers a savings of 29 percent below their 1946 tax rates. More than half of all Canadians with incomes pay no income tax. Exemptions here are much higher than exemptions allowed American taxpayers by the United States Government.

REDUCED 51 PERCENT

Finance Minister Douglas C. Abbott estimated in his last budget that Canadian income taxes have been cut back 51 percent from the wartime peak rates fixed by the 1942 budget. Partly to halt Canadian emigration to the United States, where incomes are higher, the Canadian Government purposely lowered Canadian income taxes below American scales.

A growing surplus in the Canadian Treasury encourages belief in many Ottawa quarters that Canadian income taxes will be cut again in the budget which the Government will propose in Parliament in March. In the first 9 months of this fiscal year—April 1, 1947, through December 31—the treasury reported a surplus of $646,230,921, almost twice as much as the total surplus for the last full fiscal year.

Despite the treasury surplus and demands for reduced taxes, Canada is suffering from a shortage of American dollars. The huge American dollar reserve acquired as a result of the 1941 Hyde Park agreement between Prime Minister Mackenzie King and the late President Roosevelt is being exhausted on Canadian purchases of American goods, many of which are in short supply in the United States.

H. R. 4790, like the two previous bills, which passed the Congress last year but failed to become law because of the Presidential vetoes, seeks to provide relief to the individual income-tax payers from the burdensome income taxes which our citizens so cheerfully and patriotically bore during the war. We are now entering the third year of peace and the country is demanding tax relief. Our taxpayers are suffering from a rise in the cost of living due to the inability of production to keep pace with demand.

To those who complain about the high cost of living, let me point out that the individual income tax is a vital factor in living costs. The income tax must be paid before the worker can provide for his food, clothing, and shelter. In fact, the worker's take-home pay is reduced by the income tax. He can only provide for his family out of what he has left.

Why should we not have some relief? Canadians are getting their fourth tax reduction. Last year alone Canadians received an average reduction of 29 per-

cent, but when we ask for a tax reduction for our citizens, the administration says "No. We have got to feed the world. We have got to rehabilitate the world." In other words, keep your noses to the grindstone and work for the Government. We know better how to spend your money than you do yourselves.

Mr. SHORT. Mr. Chairman, will the gentleman yield?

Mr. KNUTSON. I yield.

Mr. SHORT. There is a lot of propaganda about the country that the high cost of living and inflation is due to the canceling of OPA and price control. The gentleman knows it is due to deficit spending and to the increase in the circulating medium of exchange. In 1940 we had about $7,000,000,000 of this lettuce, greenbacks. Now we have got $28,500,000,000, which dollar is worth about 50 cents, and, if we keep on spending, it will be worth about a dime. The gentleman knows that since the New Deal came into power in 1933, until last year when we had a Republican Congress, we ended every year in the red, with a debt of $258,000,000,000 on our backs now.

Mr. KNUTSON. That is true, but of course the increase in the currency is not alone responsible. The fact that the Government has repeatedly gone into the markets in this country through the Commodity Credit Corporation and paid premium prices on grain——

Mr. SHORT. They bid up cotton and wheat and corn and everything else.

Mr. KNUTSON. Of course. Then, our domestic users had to meet that price, and then the Government hiked the price again. It was just a spiral that seemed to have no end. Oh, there are so many things that contribute to high prices. We are shipping too much abroad. We are finding that out now when we are told that we cannot build a pipe line from the Texas gas fields to Chicago and Milwaukee because the steel that should have gone into that project was shipped abroad.

Mr. SHORT. If the gentleman will yield, Mr. Chairman, my farmers want tractors, but we are shipping them to France. They want fertilizer, but we are shipping fertilizer to Italy. They want grain to feed their families and livestock, but it goes to Austria. And now we are going to send $20,000,000,000 more in addition to the $20,000,000,000 we have already sent since VJ-day.

Mr. KNUTSON. I do not want to discuss the Marshall plan although I realize it plays a very large part.

I observe that my good friend, the chairman of the Committee on Appropriations, the gentleman from New York [Mr. TABER], is in the room. I should like to ask the gentleman from New York at this point, if I may, just how much he thinks we can cut the President's budget without impairing any necessary function of government.

Mr. TABER. To begin with, there are $1,590,000,000 of items in that budget to be spent in 1949 that are not yet authorized by law.

Mr. KNUTSON. Yes; I have called attention to that.

Mr. TABER. If the Congress is at all alert we could start with that before we get to cutting the departments. On top of that the departments' budgets are padded.

Mr. KNUTSON. Did the gentleman say "padded?"

Mr. TABER. Yes, "padded," although I think perhaps we could better say "bloated."

Mr. KNUTSON. I believe Senator BYRD uses the term "padded."

Mr. TABER. I think bloated is better. And they are still hanging on to a lot of wartime employees who failed to take the civil-service examinations when they had a chance, or who tried the examination and failed to pass it. They are still on the pay rolls and they are absolutely totally incompetent almost by their own admission, at least as shown by the result of the examinations. There is an enormous saving to be made there, if we go after it right.

Mr. KNUTSON. Could we save $3,000,000,000?

Mr. TABER. I think there is no question but what we could save $3,000,000,000; and we could add on top of that the billion and a half, if the Congress would stand up and go down the line and do what it should do. I think we could do that easily.

Mr. DOUGHTON. Mr. Chairman, will my colleague yield?

Mr. KNUTSON. I yield.

Mr. DOUGHTON. I am very much interested in what the distinguished chairman of the Committee on Appropriations has to say, and he is a very consistent advocate of economy; but judged by what the budget committee directed and the cut in the budget at the first session of this Congress and by the action of the Congress it seems to me that the gentleman's prediction now is the substance of things hoped for, and that the things hoped for will never be seen. We had this experience once before.

Mr. TABER. That is not exactly the picture because there was a direct cut of $3,000,000,000 in the request for appropriations; and there was a saving further of $1,400,000,000 in cut-backs of appropriations that had already been made. The only way they got as high as they did this year on expenditures was because of the backlog of appropriations that were hanging over before the Republican majority came into power in this Congress.

Mr. RAYBURN. Mr. Chairman, will the gentleman from Minnesota yield?

Mr. KNUTSON. Briefly.

Mr. RAYBURN. It will be brief. I just wonder if the gentleman's $3,000,000,000 figure is as far away as was his $6,000,000,000 figure a year ago?

Mr. TABER. The $6,000,000,000 figure was, and the $3,000,000,000 figure is, entirely possible if the Congress had stood up and does stand up and make the cuts it should make.

Mr. DOUGHTON. If the gentleman will yield further, that is the great difficulty. Can cuts be made that will stand up in the future?

Mr. TABER. I think they will. I do not think the Congress is going to fail to take advantage of the lesson of experience. I do not believe the Congress is that dumb.

Mr. DOUGHTON. Will the gentleman give us an itemized statement on where these cuts are going to be made?

Mr. TABER. The gentleman is asking a great deal. He will see them when the bills come out, and I hope we will have the support of gentlemen on that side of the House to sustain those cuts.

Mr. DOUGHTON. Is the gentleman certain he will have the unanimous support of all the gentlemen on his side?

Mr. TABER. We will have the support of the biggest part of them. I am sure of that because we had the support of men over on that side too.

Mr. DOUGHTON. I pledge the gentleman my support so long as his request is consistent with the needs of the Government.

Mr. KNUTSON. There is no necessity for the gentleman from North Carolina defending his record.

The following table will show how H. R. 4790 will increase the take-home pay of workers at certain income levels:

Married persons, two dependents:	
Annual wage	$2,400
Increase in take-home pay	35
Annual wage	2,600
Increase in take-home pay	67
Annual wage	3,000
Increase in take-home pay	94
Annual wage	3,500
Increase in take-home pay	119

Assuming that the average family consists of a man, his wife, and two children, that the breadwinner works 40 hours a week and earns $3,500 a year, H. R. 4790 is the equivalent of a 6-cent-an-hour wage increase.

I will insert at this point a table showing the relief granted taxpayers in the various States under H. R. 4790:

Estimated distribution of the tax reduction provided by H. R. 4790 (Knutson bill) by States in calendar year 1948

[Millions of dollars]

States and Territories:	*Estimated distribution of reduction*
Alabama	51.7
Arizona	21.0
Arkansas	26.2
California	677.2
Colorado	53.0
Connecticut	132.3
Delaware	24.2
District of Columbia	60.9
Florida	93.2
Georgia	72.0
Hawaii	32.7
Idaho	15.7
Illinois	520.7
Indiana	155.9
Iowa	80.6
Kansas	66.1
Kentucky	55.7
Louisiana	66.1
Maine	28.2
Maryland	115.9
Massachusetts	256.1
Michigan	307.8
Minnesota	108.7
Mississippi	26.2
Missouri	145.4
Montana	19.0
Nebraska	47.8
Nevada	11.8
New Hampshire	18.3
New Jersey	283.6
New Mexico	13.1
New York	1,051.8
North Carolina	69.4
North Dakota	14.4
Ohio	388.4
Oklahoma	53.0
Oregon	76.6

[Millions of dollars]

States and Territories—Con.	Estimated distribution of reduction
Pennsylvania	488.6
Rhode Island	41.9
South Carolina	30.1
South Dakota	13.1
Tennessee	69.4
Texas	233.2
Utah	19.6
Vermont	9.2
Virginia	88.4
Washington	126.4
West Virginia	43.9
Wisconsin	129.7
Wyoming	9.8
Total	6,549.3

Source: Staff of the Joint Committee on Internal Revenue Taxation.
JANUARY 27, 1948.

I hope that every Member of the House will study this table and see how the bill affects the people of his State. I also hope that he will find his way clear to vote for this bill and give his constituents the tax relief they need and deserve.

We must reduce taxes; and not increase them as advocated by the President. The President is advocating the imposition of an excess-profits tax on corporations with a rate as high as 75 percent. We must reduce Federal expenditures; and not increase them as advocated by the President. The President is advocating an increase in Federal expenditures for 1949 over 1948 of almost $2,000,000,000. It is only through tax reduction and retrenchment in Federal spending that we can hope to combat inflation and preserve the American system.

Mr. DOUGHTON. Mr. Chairman, I yield such time as he may care to consume to the gentleman from Tennessee [Mr. COOPER].

(Mr. COOPER asked and was given permission to revise and extend his remarks and include such tables and excerpts to which he might refer.)

Mr. COOPER. Mr. Chairman, I appreciate the courtesy of my good friend and distinguished colleague the gentleman from North Carolina in yielding to me at this time because I have some very prominent constituents here and I may have to be out of the Chamber for a while later this afternoon.

Mr. Chairman, "An act to borrow money and reduce taxes" should be the title given to the Knutson bill, H. R. 4790, because that will be the effect of this bill if enacted into law. It is with regret that I find I am unable to agree with the majority of the members of the Committee on Ways and Means in their support of this measure. All 10 of the Democratic members on the committee voted against reporting this bill and have joined in a minority report stating their reasons for this position. It is my conviction that the maintenance of a sound fiscal policy is one of the greatest obligations of the Congress to the American people. I do not know of any way that money can come into the Treasury of the United States without an act of Congress providing revenue legislation for that money. I do not know of any way that money can come out of the Treasury of the United States without an act of Congress appropriating those funds. So the obligation rests upon the Congress to maintain a sound fiscal policy for this Government, and under the pending bill that will not be done.

The gentleman from New York was convenient in his presence while the gentleman from Minnesota was addressing the House, but he is conspicuous by his absence now. It was prearranged, I suppose, that he would be here in a position to help out the gentleman from Minnesota in the course of his speech. The gentleman from New York, the distinguished chairman of the Committee on Appropriations, says that the reason that the $6,000,000,000 was not saved from the President's budget last year, or the $4,500,000,000, as suggested by the other body, was because Congress would not stand up and vote for that reduction. His own party was in control during all last year, and still is in control, so he condemns his own colleagues on his side of the aisle when he says that Congress would not stand up and vote for the reductions necessary to reduce the President's budget.

The estimate of the Secretary of the Treasury is that the enactment of this bill will result in a deficit next year of $2,100,000,000 and will require an increase in the public debt by that amount. With the national income the highest in all history, and at a time when we are enjoying the greatest prosperity we have ever known, this would mean that we will borrow money to pay the expenses of the Government because we have reduced taxes. How anybody can take the position that that is sound fiscal policy is more than I can understand.

Now, a great deal has been said here about the estimates that have been presented by the distinguished chairman of the Committee on Ways and Means. By their own record, by their own report, it is shown that if the national income or the personal income continues for next year at the rate of $200,000,000,000, about where it is now, under their own figures and their own estimates, in their own report, there will be a deficit of $400,000,000 next year. Now, they have to assume that there will be an increase in personal income before they can even arrive at the point of insisting that there will be a balanced budget next year; in other words, they have to resolve every doubt in their favor before they can reach the point of insisting that there will even be a balanced budget next year. And under their own assumption that there will be personal income of $209,000,000,000, after indulging in that degree of speculation, even then their own report claims only that there will be a surplus of $500,000,000—half a billion—to pay on the national debt at the period of greatest prosperity we have ever known in the history of the country, and when that national debt is now more than $257,000,000,000.

I insist that their estimates cannot be sustained by the experience we have had, and when they take the position by their own figures that they have to assume something that has not thus far happened before they can even reach the point of claiming that there will be a balanced budget next year, that is certainly an untenable position upon which to rest their case.

Let us bear in mind that last year the House of Representatives passed a resolution providing that there should be a reduction of $6,000,000,000 in the President's budget. The other body took the position there should be a reduction of only $4,500,000,000. What actually happened? They were unable to get together. No final action was ever taken. But by the record as it stands now, there has not been any reduction of any consequence, and supplemental requests for appropriation of about $1,300,000,000 are now pending in the Appropriations Committee, much of which will have to be appropriated. Included in that item is the largest reduction in appropriations that was claimed when the measures were before the House, and that is the $800,000,000 for the payment of tax refunds. Nobody can question for a moment that that $800,000,000 will have to be provided, just as was insisted by many of us on this side of the aisle at the time. When the taxpayers of this country overpay their taxes, under the law they are entitled to a refund of that money, and the debt has to be paid.

It is fair to assume here now, as was true last year, that there will not be any substantial, if any, reduction in the budget submitted by the President of the United States. Under the tables presented here in the majority report in support of this bill, they have to assume that there will be a reduction of $2,000,000,000 in the President's budget before they can claim any reasonable payment on the national debt.

I invite your attention to just a few figures that were of interest to me and may be of interest to you in connection with the budget. After all, that is one of the most important phases of the question here under consideration, whether under the budget necessary to provide for the expenses of this Government of ours we can now safely reduce taxes and thereby reduce the revenue so that we may not be able to balance this budget in the next fiscal year.

I have heard over the years claims from this side of the aisle about the great dangers of deficit financing. By your action on this occasion, you are inviting a return to deficit financing.

I invite your attention to some figures which I received from the testimony of the Director of the Bureau of the Budget when he appeared before the Committee on Ways and Means. In passing, I might say that he made a splendid presentation of the question there. He was invited by the chairman of the committee to appear before the committee and respond to certain questions that the chairman had presented to him in a letter. He came and gave the explanations in a very clear and forceful manner, and I think made one of the best witnesses that I have heard during my period of service on the committee.

He called attention to the fact that there were five items in the budget that accounted for 79 percent of the total

amount of the budget. I was interested by those figures. I asked him to enumerate those five items and give the amount for each one of them. I ask your indulgence that I may give them to you now because it was interesting to me to see these figures that were given on these five items which cover about four-fifths of the entire Federal budget. I requested those figures for the fiscal years 1948 and 1949, and asked him then to give the figures for 10 years before that, namely, for 1939, so that we might compare the Federal budget for the next fiscal year with that of 10 years ago, in the belief that it would shed considerable light on this important question.

The first item of the five is national defense. In the fiscal year 1948, the budget provided $10,746,000,000. In 1949, the figure is $11,026,000,000.

Ten years ago in 1939 it was $1,074,000,000.

The next item is international affairs. That includes the United Nations, the Marshall plan and programs of that type. In 1948 the budget provided $5,533,000,000 for this item. In 1949 it provided $7,009,000,000. Ten years ago in 1939 that item was $19,000,000.

The third of the five items is veterans affairs. In 1948 the budget provided $6,632,000,000. In 1949 the budget provides $6,102,000,000.

In 1939 it was $559,000,000, substantially half a billion dollars 10 years ago; and now it is more than $6,000,000,000.

The fourth item is interest. In the 1948 fiscal year this item was $5,200,000,000. In 1949, it is $5,250,000,000.

Ten years ago, in 1939, it was $941,000,000.

The last of these five items is tax refunds. In 1948 it was $2,049,000,000. In 1949 it is $1,990,000,000.

Ten years ago in 1939 it was $68,000,000.

Those five items cover substantially four-fifths of the budget for the next fiscal year, 1949.

I submit to you, as a practical proposition, How are you going to substantially reduce any one of those five items?

Mr. MASON. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield with pleasure.

Mr. MASON. In my opinion, the one for international relief can and should be reduced at least $2,000,000,000.

Mr. COOPER. Well, I appreciate the gentleman's answer. Judging by his record in the past, I would expect him to take that position. But that has not been the position taken by a majority of the House or by the Congress throughout the years of the past. I do not believe there is any encouragement now that the gentleman's position will be followed by the House or by the Congress. I have observed that a distinguished and great American of the distinguished gentleman's party, a former President, has taken a position something like that—that there should be a reduction in the Marshall plan.

I sat here for 4 years during Mr. Hoover's administration. I saw the country almost wrecked, and the Republican Party wrecked. It has not recovered from it yet. So I do not know that even your own party is going to follow his leadership now, after the disastrous experience you had in the past.

But I submit to you that, for every dollar you take off international affairs, you will have to put on national defense. If you reduce national affairs by any substantial amount, the part of prudence and wisdom dictates that you must increase your expense for national defense by that amount, or even more. Only recently we have seen the report of the President's Air Policy Commission, and some gentlemen on this side of the aisle have introduced bills to provide for carrying out the recommendations of that report, to provide for the air defense of this country of ours against attacks by atomic weapons. As I recall the figures, that amounts to something like $2,000,000,000. Who knows but what that will have to be provided for? Certainly, unless you can establish some degree of permanent and lasting peace in this world of ours, you are going to have to take steps necessary for the protection of this country of ours and our people. You know that as well as I do. When you reduce these programs for international affairs, you will find yourselves having to increase your appropriations for national defense to provide for the protection of this country and our people.

That is the only point to which any gentleman has arisen and said there could be a reduction. I think you will readily understand there cannot be any substantial reduction there. There cannot be any substantial reduction in national defense. Can you expect any substantial reduction for veterans' affairs—the care of the sick and the disabled and wounded, and the hospitalization of the defenders of our country? The distinguished chairman of the Rules Committee, who spoke in favor of this bill while the rule was under consideration, is quoted in the newspapers in the last day or so as favoring legislation providing additional benefits of several hundred million dollars for the veterans of the country. I have no doubt that, if the rule is brought out of the gentleman's committee, making the legislation in order, as it has already been favorably reported by the legislative committee having jurisdiction, that it will pass. Other similar measures could also be passed. You cannot, with any degree of certainty or any degree of confidence, take the position that there will be a substantial reduction in the cost of caring for the veterans of this country.

Then comes the question of interest on the national debt. Certainly that is fixed. You are not going to be able to reduce that.

The fifth and last item to which I have invited attention is that of tax refunds of about $2,000,000,000. You are not going to be able to reduce that because, when the taxpayers of this country overpay their taxes, under the law they are entitled to a refund and the money has to be paid. That brings you down to the 21 percent of the Federal budget for all the other expenses of Government, for aid to the States, for building roads, for your veterans' hospital program, flood control, reclamation, and all the various projects that have been going on. My recollection of the budget figures is that the public-works program, where some have said there might be a reduction made, amounts to about $2,800,000,000; and all of that except about $183,000,000 is for works already started and already under way.

So, when you examine this budget you have to be an extreme optimist if you figure you are going to be able to make any substantial reduction unless you get into one of these five items to which I have invited attention; and I submit you are not going to be able to reduce any of them to any considerable degree.

Mr. MASON. Mr. Chairman, will the gentleman yield again at that point?

Mr. COOPER. With pleasure.

Mr. MASON. I would suggest that there is another item that we could, if we would, make a real reduction, and that is in the pay roll of $7,000,000,000 in the President's budget which could and should be cut to $5,000,000,000 at least.

Mr. COOPER. Does the gentleman mean the pay roll of Federal employees?

Mr. MASON. Yes; that is the pay roll.

Mr. COOPER. I have been reading in the newspapers where there is a bill under active consideration in the other body intended to increase Federal workers' pay. I have been reading about that in the newspapers. I certainly think there is more indication from what I have been reading and hearing that there may be an increase in the pay of Federal employees rather than a reduction. I know I am hearing a great deal about the requests of postal employees, that they need an increase in their pay rather than a decrease, and they submit some very strong evidence, based on the increased cost of living and the increase in their expenses. So there is some indication that, rather than reducing the pay of Federal employees, consideration may be given to increasing it.

Mr. MASON. Mr. Chairman, will the gentleman yield there?

Mr. COOPER. With pleasure.

Mr. MASON. I agree with the gentleman that the postal employees and, perhaps, some other Government employees should be increased, but I am not talking about salaries now, I am talking about the number of people on the pay roll, and that is over 2,000,000 right now when normally and naturally the number should be down to 1,000,000.

Mr. COOPER. As I remember the figure, we have reduced it about half a million already. I agree with the gentleman that there are too many employees on the Federal pay roll. I hope there may be some further reduction in the number of Federal employees, but how many of the little stenographers and the little clerks are you going to have to reduce before you get it into the billions of dollars that is being talked about here? You can reduce right and left, and you will wind up with a small total in comparison with the billions of dollars that are being discussed here. And remember that in your own report on the pending bill you took the position that there will have to be a reduction of $2,000,000,000 in the budget before there

will be any considerable payment made on the national debt. So you are going to have to scratch deep and long to get enough stenographers and clerks off the pay roll to make up the $2,000,000,000 that you say you must have.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield to the gentleman from Pennsylvania.

Mr. SIMPSON of Pennsylvania. In the light of the extremely dark and dismal picture the gentleman is now presenting of the finances of the Government that confronts its administrators and the taxpayers of the Nation, does the gentleman see any hope whatever for any tax reduction in the foreseeable future?

Mr. COOPER. I would like to see tax reduction, and the sooner it comes the better. I am presenting here facts taken from the pages of the RECORD. Does the gentleman disagree with any of these figures?

Mr. SIMPSON of Pennsylvania. Very materially, and I will explain my reasons for disagreeing a bit later.

May I ask the gentleman whether he is opposing any tax reduction at this time?

Mr. COOPER. No; I am not opposing all tax reductions.

Mr. SIMPSON of Pennsylvania. Would the gentleman care to elaborate?

Mr. COOPER. I will try to elaborate, but I am not sure that the gentleman really wants me to. I appreciate my good friend's effort to try to embarrass me.

I voted for amendments in the committee, as the gentleman well knows, that would have resulted in some reduction of taxes. I can conceive of conditions that would justify some reduction in taxes. Above all things, there ought to be some adjustments made. Consideration ought to be given to some other taxes now on the statute books. Certain of the excise taxes need attention. You should not rush in here with a bill designed primarily and principally by the gentleman's party to give relief to the high income-tax group.

Mr. SIMPSON of Pennsylvania. The gentleman states that when I inquired as to whether he has a recommendation for the American people with respect to hopes for tax reduction I attempted to embarrass him personally.

Mr. COOPER. That is true.

Mr. SIMPSON of Pennsylvania. I assure the gentleman that was not my purpose any more than to assume he has been seeking to embarrass me personally because I see fit to support this bill. I did not bring the personal matter into it. I again ask, without any attempt of embarrassment, whether he believes the American people can have a tax reduction in the foreseeable future?

Mr. COOPER. I do not know just when we can reach the point where we can have a tax reduction. I hope it will come soon. I certainly would like to see the taxes reduced. I would like to have my taxes reduced as much as anybody here. I am in favor of tax reduction as soon as the sound fiscal policy of this country will permit it. As to just the day or the hour that that time will arrive, I am unable to say now and I know the gentleman cannot say, because from the figures taken from the majority report on this bill the whole case is based upon a reduction of $2,000,000,000 in the Federal budget before there can be any surplus in any substantial amount to apply on the Federal debt.

Mr. CRAWFORD. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield to the gentleman from Michigan.

Mr. CRAWFORD. If the gentleman will refer to page 7 of the report I would like to have his views on two questions I should like to raise here.

Mr. COOPER. Yes.

Mr. CRAWFORD. Under (b), fiscal year 1949, as I understand that table, the committee is first assuming that the national income will flow at a rate of $209,000,000,000 per annum.

Mr. COOPER. That is right.

Mr. CRAWFORD. Which, as the gentleman pointed out, is something like nine billion over the present flow.

Mr. COOPER. Yes; that is higher than it has ever reached. Some claim two hundred and four, two hundred and four and one-half, or two hundred and five, but the estimates are two hundred.

Mr. CRAWFORD. Yes; and we have an assumption that the $39,700,000,000 budget will be cut $2,000,000,000.

Mr. COOPER. Yes.

Mr. CRAWFORD. On the assumption that the budget is not cut, the surplus will only be $500,000,000, that the gentleman has referred to.

Mr. COOPER. That is right. Is that not what I said?

Mr. CRAWFORD. Yes.

Mr. COOPER. I meant to say that.

Mr. CRAWFORD. Then, following on, there you have the assumption of a $3,000,000,000 cut, which would give a $3,500,000,000 surplus. Now, I want to ask this question, because you gentlemen have a chance to get into the details of this: Assuming that this Congress approves the supplemental requests before the Committee on Appropriations, which the gentleman referred to, of, roughly, $1,500,000,000, will that not affect the $2,500,000,000 and the $3,500,000,000 adversely?

Mr. COOPER. Certainly, it will; to the extent that such items have to be taken into account in fiscal year 1949.

Mr. CRAWFORD. So, then, we might, in the event there is no cut in the budget of $39,700,000,000, and assuming a $209,000,000,000 flow, wind up with a considerable deficit under A and just about a break-even under B.

Mr. COOPER. Exactly. There is no question about that. The gentleman is exactly right about that. And, bear in mind this, too: Another point that might be mentioned, which is brought out in our minority views, under an amendment that will be offered to this bill affecting the estate and gift taxes, there may be a considerable loss of revenue, so that it is just about an even break, according to their own figures and under their own assumption.

Mr. CRAWFORD. Mr. Chairman, will the gentleman yield further?

Mr. COOPER. With pleasure.

Mr. CRAWFORD. Let us go one step further. In this budget of $39,700,000,000, I understand the President has included $400,000,000 for European aid, or, let us say, a 12 months' request instead of 15 months.

Mr. COOPER. I think that is correct. The figure is given in the RECORD.

Mr. CRAWFORD. In the joint committee study, I believe, is where the figures are cited.

Mr. COOPER. I think so.

Mr. CRAWFORD. So then we have that provided for to that extent in the $39,700,000,000. Now, any additional supplemental appropriation that might come in in the fiscal year ending June 30, 1949, would likewise affect these figures adversely.

Mr. COOPER. That is right; certainly.

Mr. CRAWFORD. Now, will the gentleman tell us then what he thinks would be available for an application of the reduction of the debt in the event the estimated income materializes and these cuts are made in the budget in the light of the supplemental appropriations, if I make myself clear?

Mr. COOPER. I think I understand the gentleman and I give it to you as my best judgment. I might say, in passing, that I have been working with these things for some time. It has been my privilege to serve on the Committee on Ways and Means longer than any other man on it except my distinguished friend the gentleman from North Carolina [Mr. DOUGHTON]. I have been trying to give the best attention to these things that I could. It is my best judgment, that you will be doing extremely well if you come out even. You see, this happened last year: In January, the President submitted a budget of $37,500,000,000. Well, now, the last supplemental estimates up to now increased that $200,000,000, raising it to $37,700,000,000. I asked the Director of the Budget when he was before the committee, and you will find it in the hearings, what his best judgment was, what the best guess was that he could give me. I was seeking light and information; I wanted to be as nearly accurate as I could. I asked him what his best guess was as to how we would finally wind up at the end of this fiscal year with respect to saving any amount under the President's budget. He said, "All indications are that there won't be any saving under that budget."

I do not think the facts or our experience or the situation would justify anybody in assuming that you are going to have any substantial reduction in the budget.

Mr. CURTIS. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield to the gentleman from Nebraska.

Mr. CURTIS. Is it not true that the President's recent economic report estimated the national income for the last quarter of 1947 at a rate in excess of $205,000,000,000?

Mr. COOPER. I know what the gentleman is talking about. Of course, the gentleman and his assistants have tried to break it up in every way they could to try to present a more favorable picture.

I agree with the gentleman from Michigan in his question. A more favorable picture is just not there.

Mr. LYNCH. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield to the gentleman from New York.

Mr. LYNCH. Is it not a fact that the national income for the first half of the calendar year 1948 of $212,000,000,000 will gradually decrease to $205,000,000,000 for the second half, and $195,000,000,000 for the first half of 1949, with the result that with every loss of $3,000,000,000 of national income there will be a loss of $1,000,000,000 of revenue to the Government?

Mr. COOPER. That is my recollection of the figures about that.

Mr. CURTIS. If the gentleman will yield further, has the gentleman changed his position in regard to fiscal policy since the Revenue Act of 1945?

Mr. COOPER. I assumed the gentleman would try to get back to something like that. It has no relation to this at all.

Mr. CURTIS. I am seeking enlightenment, just as the gentleman was seeking it in the committee.

Mr. COOPER. It has no relation to this at all. The chairman of the committee referred at great length to what happened in 1945. That has no relation to this at all. The gentleman voted for that bill just as I did.

Mr. CURTIS. Sure, and I am for this one.

Mr. KEAN. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield to the gentleman from New Jersey.

Mr. KEAN. To clear up the question asked by the gentleman from Michigan, the supplemental appropriations of $1,500,000,000 to which he referred are already in the President's budget?

Mr. COOPER. Yes; that is correct, certainly, the supplemental requests.

Mr. CRAWFORD. If the gentleman will yield, that is not the essence of my question.

Mr. COOPER. I did not understand that was the essence of the gentleman's question.

Mr. CRAWFORD. My question is, If the $1,500,000,000 is appropriated in addition to what has gone before, the $1,500,000,000 must be raised somewhere.

Mr. COOPER. Absolutely.

Mr. CRAWFORD. Either it has to come out of the forthcoming revenue or you have to deficit-finance it.

Mr. COOPER. That is true.

Mr. CRAWFORD. Can the members of the committee agree on where that money is to come from? If they cannot, I will have to draw my own conclusion about it.

Mr. COOPER. If you pass this bill, you are going to have a deficit of $2,100,000,000 the next fiscal year. That is exactly what is going to happen. You cannot take the majority report on this bill and prove anything different than that. You cannot take what the Republican members of the committee themselves say in their own report and prove anything any different than that.

Mr. LYNCH. That deficit of $2,100,000,000 is over and above the $1,500,000,000 that would be added in the event of the supplemental appropriations; is not that correct?

Mr. COOPER. Yes; certainly. The $1,500,000,000, however, is intended largely for the fiscal year 1948.

Mr. EBERHARTER. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield to the gentleman from Pennsylvania.

Mr. EBERHARTER. On the subject of cutting the budget estimates at present, I understand that the departmental requests have already been cut as deeply as it is possible to cut them without hampering the necessary and essential services to the public.

Mr. COOPER. The testimony of the Bureau of the Budget in the hearings shows that the President reduced the requests of the various departments and agencies of the Government $7,000,000,000 before he made up his 1949 budget.

Mr. COLE of Missouri. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield to the gentleman from Missouri.

Mr. COLE of Missouri. Was not the same statement made the last fiscal year by those same people, that they had reduced the budget before it was brought in here; yet we reduced it some $4,500,000,000?

Mr. COOPER. You may think you did. You have not reduced it anything like that. You cannot point out where you have, nor anything resembling that.

Mr. NICHOLSON. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield to the gentleman from Massachusetts.

Mr. NICHOLSON. May I ask if the gentleman believes in deficit financing?

Mr. COOPER. No, I do not.

Mr. NICHOLSON. Have we not been doing that for the last 14 or 15 years?

Mr. COOPER. That is true, yes.

Mr. NICHOLSON. I am asking if the gentleman has had a change of heart.

Mr. COOPER. No. Was the gentleman in favor of levying all the taxes needed to pay for the war as it was being fought?

Mr. NICHOLSON. No.

Mr. COOPER. All right; there you are. Some people seem to forget the fact that we had to fight the most destructive and expensive war in all human history. We won the war, but we have not yet paid for it, and we will not pay for it until we reduce this national debt of ours, and you cannot do that under the pending bill. Is the gentleman for the bill? Are you supporting this bill?

Mr. NICHOLSON. Yes.

Mr. COOPER. I thought so. Well, you cannot pay off the national debt by passing this bill.

Mr. NICHOLSON. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield.

Mr. NICHOLSON. You asked me about the war in 1941. We have had deficit spending here since 1932.

Mr. COOPER. That is true.

Mr. NICHOLSON. And we kept going deeper and deeper.

Mr. COOPER. Yes.

Mr. NICHOLSON. So do not bring up the matter of the war to me.

Mr. COOPER. We had some, yes, but considerably over $200,000,000,000 of the present national debt is the cost of this war. That is the big thing.

Mr. BATES of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. COOPER. I yield.

Mr. BATES of Massachusetts. I presume the gentleman bases his contention on the inability to reduce the debt on the basis of income and outgo. The debt has been reduced in the last 2 years I think something like $20,000,000,000 or more.

Mr. COOPER. To answer the gentleman's question, the public debt has been reduced by $23,000,000,000 since 1946.

Mr. BATES of Massachusetts. Where did the larger part of that reduction come from? What was the source of the revenue? It was not current revenue, was it?

Mr. COOPER. Of course, there was a rescission of appropriations. Something like $60,000,000,000 of appropriations were rescinded by act of Congress. Then, as explained by the Secretary of the Treasury, and I cannot undertake to quote him from memory here, he explains how the $23,000,000,000 has been paid on the public debt since 1946. As I recall, a large part came from a reduction in the cash balance of the Treasury.

Mr. Chairman, I shall not ask your indulgence much longer. I simply want to invite attention to the fact that we have 85,000,000 individual bondholders in this country. We went out during the war and made the patriotic appeal to the people of this country, even to the school children, to buy war stamps and war bonds. They responded to a remarkable degree. Those bonds are outstanding. Unless you and I assume our responsibility here of providing the revenue to finance this Government of ours and make a substantial payment on the national debt, we are not keeping faith with the 85,000,000 people of this country who responded and invested their money in war bonds and war stamps. I believe we owe a responsibility to them. I believe we should meet the obligations of maintaining a sound fiscal policy for this country, and then we will have a right to feel proud of the efforts we have exerted.

Mr. REED of New York. Mr. Chairman, I yield myself such time as I may desire to use.

Mr. Chairman, I have listened with a great deal of interest to the gentleman from Tennessee. I think this is the first time since 1933 that I have known him to get excited over the question of deficit financing. In fact, it is the first time since 1933 that I have known of any of the New Deal leaders becoming alarmed about running into huge deficits. Their whole philosophy has been "tax and spend." They have not worried about deficits. I want to make just a few comments now because I see a great many carnations being worn by Members on both sides of the aisle. I am very glad to see that, because it is in honor and in memory of a man who believed in sound currency, in sound fiscal policies. I refer to Hon. William McKinley. He was not an advocate of rag money, and he carried on a great campaign in order to put us on

a safe fiscal basis and on a sound money basis. You remember he was gerrymandered out of power when he was chairman of the Ways and Means Committee of the House. After the election in which he had been defeated and the Republican Party had lost, a newspaper editor of his own town went to Major McKinley and said:

What have you got to say, Major McKinley, with reference to this election and the defeat of the Republican Party?

He had gone down to defeat under a smear campaign, and the country later revived under the very legislation that was condemned by the Democrats at that time. This is what he said to the editor to send out to the country:

The Republican Party values its principles no less in defeat than in victory. It holds to them after a reverse, as before, because it believes in them, and believing in them is ready to battle for them. They are not espoused for mere policy, nor to serve in a single contest. They are set deep and strong in the hearts of the people, and are interwoven with its struggles, its life, and its history. Without discouragement our great party reaffirms its allegiance to Republican doctrine, and with unshaken confidence seeks again the public judgment through public discussion.

That was his answer, and it sent a thrill through the American public, and eventually he was reelected to put this country on its feet after a disastrous Democratic administration.

Mr. JENKINS of Ohio. Mr. Chairman, will the gentleman yield?

Mr. REED of New York. I gladly yield to the gentleman from Ohio, the home State of William McKinley.

Mr. JENKINS of Ohio. I am glad the gentleman has taken time to speak about this great apostle of sound money. I want to say to him that the people of Ohio, after he was gerrymandered out, indicated their faith in him by nominating him for Governor of Ohio, without any opposition, and he had very little opposition in the election, indicating that the sensible men in both parties realized his honest, sincere stand, and rewarded him in that respect.

Mr. REED of New York. I thank the gentleman.

I was here following the first war. In looking about the room I see no other Member who was serving in the Congress at the close of that war.

Mr. ROBSION. The gentleman is referring to 1919?

Mr. REED of New York. I beg the gentleman's pardon. I did not see him. The distinguished gentleman from Kentucky, Representative ROBSION, was here.

Following that war we were faced with a tremendous debt, so considered those days, of $26,000,000,000. The country was staggering under that load. People had the highest taxes they had ever had in the history of the country at that time. Democratic taxes, of course. I heard the same arguments then when it was proposed to reduce taxes. The Democrats said, "What will become of our bonds?" Almost the same words were used then as now. "We have sold them to the children and to the people. Speakers stood on the back end of trains and told the purchasers how safe the bonds were." What was the proposal? To reduce taxes. In spite of the lugubrious howls that went up from the Democratic side, which created the debt, we received more revenue as a result of the reduction in the tax. Then, we started to pay on the naitonal debt, which the Democratic side said we could not do. It was just folly to attempt it. We reduced taxes again, and more revenue came in, and we did that four times. Each year for 10 straight years we reduced the national debt by $1,000,000,000.

Mr. CURTIS. Mr. Chairman, will the gentleman yield?

Mr. REED of New York. I yield to the gentleman from Nebraska.

Mr. CURTIS. I have taken occasion to check a little on this matter of the reduction of the national debt. Since the turn of the century, from 1901 to 1911, that is, the Fifty-seventh to the Sixty-first Congresses, inclusive, the Republicans controlled the Congress and there was continuous debt reduction in each Congress. In the Sixty-second Congress the Democrats controlled the House. They continued to control the Congress, and by March 1917, all of which time was peacetime, they had doubled the national debt. The Sixty-fifth Congress, of course, was a war Congress, and the debt rose almost 10 times. From 1921 to 1931 the Republicans controlled the Congress and they reduced the national debt by 44 percent. In 1931 the Democratic Party captured this House where appropriations and tax bills must start. They continued to control the entire Congress and the debt rose, and by the end of 1940 the national debt had more than doubled. The national debt increased by two and seven-tenths times in the prewar years of the New Deal.

In the last 30 years there has never been a bond paid off by surplus financing at any time when the Democrats have controlled the Congress.

Mr. REED of New York. I thank the gentleman for his contribution; and in order to verify his figures, I shall ask unanimous consent just a little later to insert a table which will cover the question. Here it is:

Roosevelt's peacetime expenditures

1936	$9,000,000,000
1937	8,000,000,000
1938	7,000,000,000
1939	9,000,000,000

Truman's peacetime expenditures

1946	$64,000,000,000
1947	43,000,000,000
1948	38,000,000,000
1949	40,000,000,000

Mr. JENKINS of Ohio. Mr. Chairman, will the gentleman yield?

Mr. REED of New York. I yield.

Mr. JENKINS of Ohio. Let us not forget that during the time we were reducing the debt by $1,000,000,000 a year our national income was way down to probably not more than $35,000,000,000 as compared with a national income now of $209,000,000,000.

Mr. REED of New York. Yes; and you remember that during that time, coupled with the sound fiscal policy which we were pursuing, we were cutting expenditures and we were cutting them to the bone. There was not this great New Deal propaganda agency that for surpasses anything Hitler ever dreamed of, pouring out its international boondoggling propaganda to spend, spend, spend. Nobody in New Deal cares where in the world we spend just so long as we spend.

Mr. LYNCH. Mr. Chairman, will the gentleman yield?

Mr. REED of New York. I yield.

Mr. LYNCH. Will the gentleman recall that during the Hoover administration when you had this sound fiscal policy that we had the greatest unemployment we ever had in the history of the country?

Mr. KNUTSON. Mr. Chairman, will the gentleman yield?

Mr. REED of New York. I yield.

Mr. KNUTSON. Of course, that is true, but it was after——

Mr. LYNCH. I am glad to know it is true.

Mr. KNUTSON. It was after the Democratic war that you folks promised to keep us out of in 1916.

Mr. LYNCH. Mr. Chairman, will the gentleman yield for just a moment?

Mr. REED of New York. I have but a limited time and I do not want to have it all used up in colloquy between other gentlemen.

Mr. LYNCH. The chairman states that he will grant the gentleman more time.

Mr. REED of New York. I yield.

Mr. LYNCH. The gentleman from Minnesota ties the unemployment of the Hoover administration in 1930 back with the war in 1917, World War I. If that is the best explanation the distinguished chairman of our committee can give, I am sorry for the Republican Party.

Mr. REED of New York. The gentleman will remember that between 1931 and 1940 the gentleman's party had 10,000,000 unemployed, estimated by the Department of Labor.

Mr. LYNCH. There is no question about it.

Mr. REED of New York. After having spent more than double the national debt that existed prior to that time.

Mr. KNUTSON. After having spent $68,000,000,000 on relief they still had 10,000,000 unemployed. The gentleman from New York [Mr. LYNCH] very conveniently forgot that the so-called Hoover depression started in Germany in 1926, swept all over Europe, came to Canada, and then came down here in the latter part of 1929. I suppose Mr. Hoover was responsible for the depression in Germany just like the Irish are responsible for all the good things they have here in the United States.

Mr. LYNCH. There is no question about the Irish being responsible for the good things and there is no doubt but what Mr. Hoover and the Republican Party were responsible for the unemployment in 1930.

Mr. KNUTSON. The gentleman lets his blind partisanship overcome him. Now, will the gentleman yield to me further?

Mr. REED of New York. I yield to the gentleman from Minnesota.

Mr. KNUTSON. I have gone through the minority report and I find to my dismay there is no reference whatever to the President's plan to give everybody

$40, 40 acres, and a mule. Why was that left out? Are you ashamed of your Commander in Chief? Have you repudiated your great leader or what is the matter?

Mr. LYNCH. Mr. Chairman, will the gentleman yield?

Mr. REED of New York. I shall have to do so out of courtesy. This is a matter of repartee between members of my committee, which I fear is not adding to the information of the Members.

Mr. LYNCH. I appreciate the fact the gentleman has yielded because I want to make response and reply to the 40-acre-and-mule proposition. As far as I know, Mr. Chairman, there has been no reference to any 40 acres and a mule. There has been reference made to a $40 credit which the Republicans just do not like because it goes primarily to people with incomes under $3,000.

Mr. REED of New York. I will answer that question. You know the bill that the President wanted you to sponsor and which you did not mention in your minority report was one which you felt you could not present to the House unless you brought it in with a disinfectant which you apparently did not want to do. The thing that worried you was the fact that President Truman entitled his proposal as a "Cost-of-living credit bill," but he forgot about the 19,000,000 people who were so poor and so destitute they could not even pay an income tax. Of course, under the vote-getting formula of the New Deal the 19,000,000 destitute did not need $40 each, but the other people had more votes, provided, of course, their votes could be bought for $40 each.

Mr. LYNCH. Let me ask the gentleman another question.

Mr. REED of New York. I want to say another thing, too, about the mule business. You will remember you tried to fake the people with 40 acres and a mule in foal. You remember that?

Mr. LYNCH. I am not so good on agriculture, but let me ask you this: Is there anything in your bill that puts back those 19,000,000 people who are trying, as the gentleman claims, to get back on the tax rolls?

Mr. REED of New York. Certainly there is.

Mr. LYNCH. We would like to know what it is.

Mr. REED of New York. Every item in the bill will stimulate industry and the growth of it, income pay rolls, create more property to tax; so instead of their being down in the lower level, the 19,000,000 persons under the prosperity that will follow this bill will be paying an income tax because of their property under H. R. 4790. There is no question about that.

Mr. LYNCH. That will be a great improvement when under a Republican bill you can add taxpayers to the tax rolls.

Mr. REED of New York. Certainly. They will be happy to get on the tax rolls. They will never be able to under the gentleman's administration.

Now, I will discuss the bill a little bit.

Mr. Chairman, H. R. 4790, a tax-reduction and tax-equalization bill, is designed to relieve three serious problems. I refer to the high cost of living, the lack of incentives to increase production, and the inequality of the tax burdens in common-law and community-property States.

The burden the present high cost of living has placed on our citizens is all too obvious. For the average taxpayer, income after taxes expressed in terms of 1947 prices, has decreased almost $100 in the past year. Your committee's bill recognizes this fact and proposes a $100 increase in the per capita exemptions. At present a married man with two dependents receives exemptions amounting to $2,000. Under the bill this will be increased to $2,400. Furthermore, because of deductions such a man will not be taxable until his income reaches the level of almost $2,700.

Your committee's bill also recognizes that the present high prices have placed a special hardship on both persons of advanced age and the blind. For this reason, it provides an additional exemption of $600 for those 65 years of age and over. It also provides an exemption of $600 for the blind in lieu of the present $500 deduction. These groups have been particularly hard hit by the increase in the cost of living. They have been less able than the average taxpayer to obtain the high paying jobs which it is necessary to have in order to offset the increase in the prices of the goods and services they must buy.

To a large extent they are dependent upon small pensions or other fixed incomes for their living. These incomes have by no means kept pace with rising prices.

The need for incentives to increase production should be apparent to everyone. The current demand for goods and services is clearly in excess of the volume that can be produced today at anything like normal prices. The most obvious indication of this is the upward trend of prices since the war. Thus, it seems apparent to me that greater production is the key to the solution of our present inflationary problem. This greater production can be supplied by increasing the productivity of labor, by stimulating the incentive of managers to break the bottlenecks which are stopping the flow of industrial products, and by increasing the willingness of investors to assume the risks necessary for the expansion of our business enterprise.

The present wartime tax rates are not designed to provide these necessary incentives to produce. They are a relic of the war period, when it was possible to depend upon stronger patriotic motives for production incentives. Today if we are to obtain this increased production, we must see to it that our tax system leaves sufficient income after taxes for the taxpayer to be willing to put forth the required effort.

Abundant evidence of the discouraging effect of the present tax rates on the American taxpayer in all walks of life is shown by the relatively small amount of income he has left after paying his taxes. It must be remembered that out of this remaining income he must provide not only for the necessities of life, but also for his security in the future. Furthermore, the portion of this income which he is able to save represents the only real source of risk capital in our economy today. Let us take as an example a married man with two dependents. If he has income of $4,000 a year after deductions, he has only 90 percent of his income left after paying his taxes. If his income is $8,000 after deductions, he has only 84 percent of his income left after taxes. A business manager with an income of $25,000 after deductions has only 66 percent of his income left after taxes, and a man with an income of $60,000 after deductions may actually have less than half of his income left after paying taxes. It seems obvious to me that with tax rates such as these it is impossible to expect labor, management, or investors to put forth the necessary effort or to assume the risks which must be taken if we are to increase production in the immediate future, or if we are to maintain the American standard of living in the future.

H. R. 4790 reduces these obstructions to increased production. It increases the income after taxes at all income levels. To use the examples just given, H. R. 4790 makes it possible for a man with an income of $4,000 after deductions to retain 95 percent of his income after taxes. For the taxpayer with an income of $8,000 after taxes, nearly 90 percent remains after taxes. For the business manager with an income of $25,000, nearly 80 percent is available after taxes, and for the man with a $60,000 income, 65 percent is left after paying his taxes. I do not contend that this represents a sufficient increase in the spendable income for these taxpayers, but I do believe that it certainly represents a step in the right direction.

Mr. COLE of Missouri. Mr. Chairman, will the gentleman yield?

Mr. REED of New York. I yield to the gentleman from Missouri.

Mr. COLE of Missouri. I understand that the bill as originally drawn provided for $600 additional exemption for the blind, but when they reached 65 years of age it was to be discontinued because of the $600 exemption after 65.

Mr. REED of New York. They will now get $1,800 individually.

Mr. COLE of Missouri. That has been changed in the bill as reported out, and they will get it as long as they live.

Mr. REED of New York. That has been taken care of.

This increase in the spendable income of all of our taxpayers is accomplished through the combination of several provisions in your committee's bill. The principal provision in this respect is the percentage-rate reduction. For those taxpayers in the lowest tax bracket a 30-percent reduction is provided. For those with incomes between $1,400 and $4,000 after deductions and exemptions, a 20-percent reduction is provided. Income above $4,000 receives a 10-percent reduction in tax. However, this is not the only feature of your committee's tax bill which will increase the incentives to produce. For labor the increased exemptions are particularly significant. For those with incomes above about $5,000, the so-called income-splitting provision which I shall describe later, will be a stimulant to production.

The third major provision of your committee's bill equalizes the tax burdens of

our citizens in community property and common-law States. It is a well known fact by now that given the same income, a family unit in a community-property State is apt to pay less taxes than is true in a common-law State. This arises from the fact that one-half of the income earned in community-property States belongs to the husband and one-half to the wife. The same is true with respect to income from community assets. In the common-law State, where the husband earns most of the income, the entire amount is taxed to him. Because of our highly progressive rates, this means a higher tax in the common-law State where the family income is taxed as one unit than in the community-property State where it is taxed as two separate, smaller units.

This is a particularly pressing problem at the present time because of the rush of many States to change their property laws to a community-property basis. In the past 2 years the number of States shifting to a community-property system has increased by one-third. Furthermore, there is evidence that many other States, including my own State of New York, may well shift over to a community-property system if this Congress does not provide for an equalization in tax burdens between common-law and community property States. The common-law States cannot afford to permit their residents to pay a disproportionately heavy part of the tax burden.

The Tax Commission of New York has recently made a careful study of the desirability of adopting a community-property system. The commission recommended that this system be adopted. This recommendation was made reluctantly because to quote the commission a "near catastrophic disturbance of property rights would result from the adoption of a community-law system." However, the tax commission estimated that married couples in New York were paying $170,000,000 in income taxes each year which would not have to be paid if New York had a community-property system. This difference in tax burdens is so great that the commission considered the adoption of a community-property system desirable despite the serious confusion which would result with respect to property values.

Governor Dewey in releasing this report of the New York State Tax Commission emphasized the difficulties involved in a community-property system when he said:

> Adoption of a community-property statute in New York would not only disrupt the whole foundation of our legal system, but would also involve the question of constitutionality which might severely limit the adequacy of such a statute.

It seems apparent to me that the failure of Congress to equalize the tax burden in community-property and common-law States can only result in ill-advised and hurried changes to community-property systems by most of our common-law States. Chaos in State property laws would be the inevitable result. Furthermore, the Federal Government will lose a substantial proportion of the revenue from this differential, even if no income-splitting provision is adopted.

Your committee's bill provides for this problem by permitting husbands and wives to file a joint return and split their income between them. The effect of this is to provide the same tax burden in common-law States as is imposed upon a married couple with a similar community income in a community-property State. There are, however, also advantages to be derived for community-property States from this income-splitting provision. It will be possible under this provision for couples in community-property States to split, not only their community income as at present, but also their separate income.

In order to completely equalize the tax burden between community-property and common-law States it is also necessary to amend the estate and gift-tax provisions. In 1942 an attempt was made to equalize tax burdens under the estate and gift taxes. Unfortunately, however, these amendments rather than equalizing the burden resulted in discrimination against community-property States. Therefore, your committee's bill provides for the repeal of these amendments.

Repeal of the 1942 amendments alone, however, is not sufficient. Estate- and gift-tax splitting is also necessary in much the same fashion as H. R. 4790 provides under the income tax. Your committee intends to offer a floor amendment to accomplish this. The amendment provides that if one-half of the estate of a husband is left to the wife, this portion of the estate will not be included in the estate-tax base of the husband. Under the gift tax, one-half of all gifts made by married couples are considered to be made by the wife and one-half by the husband. This provision will aid community-property States as well as common-law States, since separate property in these States will benefit from this splitting provision.

I believe the summary of the provisions of H. R. 4790 which I have just presented, show that this is the right kind of tax reduction. I also believe that this is the right time for a tax reduction. The reduction will leave an adequate surplus for debt retirement, can be made without increasing inflationary pressures, and is necessary to offset the present shortage of risk capital.

EFFECT OF H. R. 4790 ON EXPENDITURES

The charge has been made that if we pass H. R. 4790 we shall have a deficit in the fiscal year 1949. Nothing can be further from the actual facts. The estimates made by the administration on which this deficit is forecast seriously misrepresent the fiscal picture for 1949.

Revenue forecasts of the President have been based on an estimate considerably below the current level, despite the fact that the administration says it fears the continuation of inflationary pressures. Expenditure estimates have been based upon the assumption that Congress will not be able to make any reduction whatsoever in the President's budget.

Your committee has attempted to use only the most conservative assumptions regarding both the income level and the reduction in expenditures which Congress will make. On this basis the minimum surplus forecast for the fiscal year 1948, after making provision for the tax reduction provided in your committee's bill, is $2,500,000,000. This is based upon the very conservative assumption that Congress will reduce the President's expenditure budget by only $2,000,000,000. For every $1,000,000,000 of additional reduction in expenditures which it is possible to make, the surplus available for debt reduction will be increased by a like amount.

In this connection it is worth noting that a surplus of $2,500,000,000 is larger than that which the administration itself would provide in the fiscal year 1949 under its own calculations. The President reported that the surplus in the fiscal year 1949 would be $4,800,000,000. However, the Secretary of the Treasury indicated that the President's tax proposal would reduce this surplus in the fiscal year 1948 to $2,400,000,000, or a surplus of $100,000,000 less than your committee provides after the tax reduction under its minimum assumptions as to expenditure cuts and the income level.

In concluding my remarks on receipts and expenditures I should like to point out that with the tax reduction proposed, of $7,100,000,000 it still will be possible to reduce the debt by at least $10,000,000,000 in the two fiscal years 1948 and 1949.

TAX REDUCTION AND INFLATION

Critics of your committee's bill have contended that it was inflationary. The President's proposal presumably was not, because it provided for an increase in the taxations levied on corporations. Incidentally, the minority evidently thinks so little of the President's tax proposal that not even a reference to it can be found in the minority report.

Anyone who assumes that the President's proposal will not reduce taxes in the fiscal years 1948 and 1949 is laboring under a misapprehension. The Secretary of the Treasury admitted in the hearings before your committee that the President's proposal would reduce receipts in the fiscal years 1948 and 1949 by $3,000,000,000. This results from the fact that much of the President's proposed excess-profits-tax collections will not affect receipts until the fiscal years 1950 or even 1951—a period when deflationary pressures might well not be desirable.

Your committee makes no attempt to hide the fact that its bill provides a tax reduction in the fiscal years 1948 and 1949. However, it is my opinion that Congress will reduce the President's expenditure proposals to offset much, if not all, of the reduction in taxes proposed by your committee. To the extent that this is true, the tax reduction provided by H. R. 4790 will result in no increase whatsoever in inflationary pressures.

The real effect of the President's budget upon consumer and business demand is shown by the amount of the cash taken from the public through taxation and the cash restored to them through expenditures. The President's Economic Report indicates that on this basis there was a cash surplus in the calendar year

1947 of $5,600,000,000, and it is estimated that in the calendar year 1948 there will be a cash surplus of $8,800,000,000. After your committee's tax reduction is made and even if expenditures are decreased by no more than $2,000,000,000 in the next fiscal year, the cash surplus in 1948 will be substantially higher than it was in 1947. This indicates that the Federal Budget in 1948 will be less inflationary than it was in 1947. Moreover, this is based on very conservative estimates of receipts and expenditures.

I have already pointed out that H. R. 4790 will be a stimulus to increased production. This means that H. R. 4790, rather than increasing inflationary pressures, actually will reduce them.

It seems safe to me to conclude from this that the decreases in expenditures which Congress will make plus the stimulus to production resulting from the tax reduction proposed will decrease rather than increase inflationary pressures in the near future.

I have given some study to the question of venture capital. This subject of venture capital has been discussed in the magazines recently and in the leading financial newspapers. It is a subject that we must not lose sight of if we are going to increase the pay rolls of this country, if we are going to increase new property to tax by stimulating new industries, which is of great importance to our veterans and others who want to go into business for themselves.

Here is a survey, The Market for Risk Capital, that is edited by Jules I. Bogen. There are comments about it by Mr. Hazlitt, of New York, a great student of finance, a publisher, and editor. Here is a very startling statement:

Available statistics show that American industry requires huge amounts of new capital to maintain and expand its capacity and to increase its efficiency. The Department of Commerce has estimated that "gross capital formation" amounted to $17,600,000,000 in 1929 and to $19,000,000,000 in 1941. Even in the depression year—1932—private gross capital formation aggregated $2,200,000,000.

Production of consumer goods and services—at least for several years to come—is generally expected to be at a rate 50 percent or more over the prewar level. An expansion of the output of goods and services of such magnitude cannot be attained without huge capital outlays exceeding any prewar level. A study by the Twentieth Century Fund estimates that aggregate investment of new capital in commerce and industry, transportation, urban development, and rural development may exceed $280,000,000,000 over the next 15 years, exceeding $18,000,000,000 annually.

Then I want to read a survey. Any person can make the same kind of a survey in his own community.

The Chamber of Commerce of Gastonia, N. C., and the Chamber of Commerce of the United States recently cooperated in a case study of the "investment per job." This is something to which the businessmen of this country ought to give some attention. The survey revealed an average investment in fixed and working capital per worker in Gastonia manufacturing industries of $8,000 in food processing, $3,941 in apparel and finished products, $3,850 in beverage bottling, and $2,179 in textile mills. In distribution and service industries, the investment per job varied from $45,762 for cotton merchants, $9,000 in warehouses, $8,385 in furniture, and $7,200 in automobile repair to $2,357 in barber shops and $1,567 in cleaning shops.

I happen to know of a case at home where, if a company can get the capital which they need, they will have to invest $133,000 per job for 300 well-paid workers, and you can go through the country and multiply that many times. That is what has built up this country. This bill, I will admit, does not go as far in the matter of tax reduction as I would like to go in those brackets from which venture capital comes. It just cannot come from below, where there is not enough take-home pay to permit savings to be made.

Some day labor is going to realize this fact and they are going to urge a tax bill that will supply venture capital to give them jobs. That is the one thing that will prevent unemployment.

THE SCARCITY OF VENTURE CAPITAL

This production is also necessary for the welfare of our economy in the long run. One phase of this problem has particular significance—namely, the availability of risk capital. Your committee, recognizing the importance of this risk capital, asked the Secretary of Commerce to testify on this subject. The Secretary took the position that ample funds were available to meet business needs. However, he spoke only of the over-all needs for business funds and did not mention the need for venture capital, the true source of increased production. In spite of this, his testimony gave abundant evidence of the shortage of these risk-taking funds. Let me give you a few examples:

First. Retained corporate profits in 1947 represented an unusually large proportion of total business investment. This heavy dependence on retained profits indicates the difficulty corporations have been having in floating new security issues.

Second. Of the new security issues actually issued in 1947, an unusually large proportion took the form of bonds or notes. An unusually small percentage represented new issues of common stocks. This heavy reliance on debt financing and reduced emphasis on common stocks also reflects the difficulty of obtaining risk capital.

Third. Life-insurance companies and banks which cannot afford to invest their funds in risk-taking ventures represented the chief source of funds for the new securities issued in both 1946 and 1947.

Fourth. New securities issued by manufacturing and similar concerns dropped in 1947, while the safer issues of utilities increased substantially.

If any further evidence is needed of the scarcity of venture capital, attention need only be turned to the unprecedented existence of a sluggish stock market in an inflationary period.

The present high steeply progressive tax rates must be substantially reduced if we are to obtain the necessary funds for the expansion of business enterprise. H. R. 4790 takes the first step in this direction. It should be emphasized that this is proposed not for the benefit of the well to do, but is necessary for the entire American economy. Consumers cannot have more goods and services if they are not produced. Moreover, sufficient jobs will not be available in the long run if business enterprise is not expanded.

Mr. DINGELL. Mr. Chairman, before I proceed with my prepared statement, I would like to comment very briefly and make some observations on what has transpired heretofore. My good friend from Minnesota so frequently refers to Canada, which he cites as an example of a good tax system. Of course, the situation in Canada is vastly different from that of the United States. Prices are pretty well under control in Canada. I do not have the schedules of food prices here with me, but one of these days I intend to answer his list of facts and tables as regards taxes which was inserted in the RECORD at one time in order to show the relatively low food prices prevailing there. The Canadian Government has held inflation in check.

Mr. Chairman, at this juncture I want to state that Canada not only has excused one-half of the total income taxpayers in that country, but also pays those who are not on the income-tax rolls a child bonus, the amount of which I do not recall at the moment, but I believe it amounts to something like $160. That is a significant fact. This is $160 a year bonus for each child of a family up to 16 years of age. The gentleman from Minnesota failed to disclose that fact in his discourse about the taxpayers in Canada.

Mr. KNUTSON. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from Minnesota.

Mr. KNUTSON All I did was to read this article from the Winnipeg Free Press. I had no further information.

Mr. DINGELL. I grant the gentleman that.

Mr. KNUTSON. I was not trying to cover up anything.

Mr. DINGELL. I grant the gentleman that. I would not imply even remotely that the gentleman was trying to conceal anything. I merely state that it is a significant fact that Canada also goes a long way in the direction of helping the people in the lower brackets by paying them a child bonus which in America we do not do and we seem to find fault with the President's proposal of a $40 cost of living credit.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from Pennsylvania.

Mr. SIMPSON of Pennsylvania. Would not the very fact that the Government can afford to pay $165 to a family with children seem to prove that their tax system with its reductions must be a good system?

Mr. DINGELL. I concede it is a good system. What I am trying to defend here is the President's position of trying to give a cost-of-living credit of $40, which, to a family of five, means a total

of $200 per annum. That seems to have stuck in the craw of some people.

Mr. FORAND. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from Rhode Island.

Mr. FORAND. Can the gentleman reconcile the two points made by our friends on the other side? They seem to gloat in the fact that in Canada less than 50 percent pay taxes, yet they have been howling and howling that we should maintain a very wide tax base so that everybody in this country will be tax conscious. I cannot see how the two points are consistent.

Mr. DINGELL. The gentleman has taken the words out of my mouth. I have a little scratch memorandum here which indicates that under my proposal, which I introduced on behalf of the President, the total number to be taken off the tax rolls would have been about 10,300,000, and under the Knutson proposal—which, by the way, contains two important items of Democratic origin, increasing exemptions and income splitting between husband and wife, which we proposed in the consideration of H. R. 1 and H. R. 3950, both of which were killed by veto and sustained by the House or the Senate—the Knutson bill excludes 6,300,000 income taxpayers. So, the President's proposal is more liberal by 4,000,000. When the gentleman from Minnesota cites that in Canada about half of the people are exempt from income tax under that same argument he ought to go along with the President's proposal. But, his views are that it is all right in Canada and that it is all wrong in this country. He stood on this floor time and again in favor of making people tax conscious, and derided and opposed the views of the Democrats in striking from the tax rolls those who needed tax relief most.

Mr. Chairman, I want to make one or two other comments and to say, in congratulating my good friend, the gentleman from Tennessee [Mr. COOPER], that I doubt whether anybody will ever be able to answer the factual data which he presented. They were cold, merciless, implacable figures that were presented to the House, and I do not care what your arithmetic is, or how you manipulate figures, you cannot get away from the fact that five principal irreducible items constitute 79 to 80 percent of the budget. When the time comes to make savings, remember you are going to have to make them very largely out of the 21 percent which covers expenditures for dams, roads, for trails and forests, for drainage and flood control, and all of the other things which are so essential throughout the great West and the South. Now, after some of you men went home to your districts after the last attempt to cut the heart out of the irrigation and reclamation projects, you came back, and as I recall, there was a clamor for the reinstitution of some of the cuts that had previously been made. And if I am correct in my assumption, I believe that more money was appropriated than the President originally asked for.

As was stated by my good friend from Tennessee, the chairman of the Committee on Appropriations was conveniently here to answer questions about the amount of cuts that could properly be made. I believe he stuttered some when he approached the $3,000,000,000 figure, and as I recall he limited his commitment here on the floor to about $2,000,000,000.

Let me read to you what he said, according to the Times-Herald, on Monday, January 26:

> The Congressman continued—

So says the paper, referring to Mr. TABER's ideas about budget cuts—

> Three billion is not enough. I won't be satisfied with four billions. I'm sure we can cut five billions. I think we can cut six billions from the budget. We might even be able to cut seven billions. That, however, depends on a number of things that we'll have to look into.

Evidently at that point, before he reached the ten- or twenty-billion-dollar figure, the distinguished chairman of the committee was awakened. Today he speaks of a possible two or three billion dollars.

Reverting to the remarks of my good friend from Minnesota, the distinguished chairman of our committee, in which he makes reference to the bill H. R. 4790 and how much it means toward the relief of the small taxpayer, I believe that a person with two dependents under his bill, with an annual wage of $2,400, would have an increase in take-home pay of $35. A man with a $2,600 income would have $67. In the $3,000 classification the take-home pay increase would amount to $94. A small taxpayer with a $3,500 income would enjoy an increase of $119 in his annual take-home pay.

After all of these calculations, if you will take the President's proposal you will find without any strained calculation whatsoever that the President's proposal for a married person with two dependents amounts to a $160 increase in take-home pay.

Mr. KNUTSON. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from Minnesota.

Mr. KNUTSON. If the President's tax proposal is so meritorious, why is it not mentioned in the minority report?

Mr. DINGELL. The minority report deals with the bill, and my friend should know that. I do not think he would willingly want to mislead anybody, because I think he knows that the report deals with the bill which was reported by the committee and not with the bill that did not get the approval of the committee.

Now we are going into why the President's bill was not adopted. The first reason is that there are 15 Republicans and 10 Democrats on the committee. The second reason is that some Democrats disagreed, like the gentleman from Minnesota, with the idea of $40. But if the $40 is reduced to its proper basis of calculation, it is the equivalent of about a $200 additional exemption, which is twice as much or a little more than the exemptions in the bill introduced by the gentleman who is now making the inquiry.

Further, some of the gentlemen on the committee, both Republicans and Democrats, do not like the idea of an excess-profits tax. That is their lookout, and that is something they are going to have to answer for by themselves. But I will say this to my friend, that I think there are a lot of good Republicans on this floor that like this idea of a limited reimposition of excess-profits taxes in order to skim off the unconscionable profits that are salted away in the coffers of some of our corporations.

Mr. KNUTSON. It would look to me as though common decency would have dictated that at least a paragraph should be devoted to the President's tax plan. I really feel hurt to think that my Commander in Chief was so ignobly ignored.

Mr. DINGELL. The gentleman is dripping with tears. I can see his ducts now.

Mr. KNUTSON. I do not know about that.

Mr. DINGELL. His ducts are turned inside out, or are those your tonsils that I see?

Mr. KNUTSON. I regret to see that the gentleman's own party is running out on his Commander in Chief.

Mr. DINGELL. Let us get away from the crocodile tears so that I can proceed with my statement. Maybe I can make myself clear.

Mr. Chairman, I joined in the unanimous report of all the Democratic members of the committee in protest against enactment of H. R. 4790, the dishonest, iniquitous Knutson bill. Although H. R. 4790 should not be enacted for the reasons fully expressed in our minority report, I believe that the excessively high cost of living makes mandatory an immediate adjustment of the tax burden of the lowest-income people. As the President said in his message to Congress on the State of the Union:

> Certain adjustments should be made within our existing tax structure that will not affect total receipts, yet will adjust the tax burden so that those least able to pay will have their burden lessened by the transfer of a portion of it to those best able to pay.

President Truman's tax program, which I have had the honor to introduce in the House as H. R. 4968, provides a cost-of-living credit of $40 per person—$160 reduction in taxes for the average American family of four. Unlike the Knutson 10–20–30 tax-cut plan, it gives an honest across-the-board tax cut of the same dollar amount to all taxpayers. Just because a person is in a higher-income bracket should not give him a higher priority for tax relief than his neighbor at the bottom of the scale, who is scraping to pay the butcher, the baker, and the landlord.

My bill would drop 10,300,000 taxpayers with lowest incomes from the income-tax rolls. Ninety-three percent of the total tax relief would go to taxpayers with net incomes under $5,000.

The $40 cost-of-living credit is roughly the equivalent of a $200 increase in personal exemptions for taxpayers earning $5,000 or below. Since the President proposes a tax adjustment on the basis of need and not a tax-reduction program, the taxpayers above $5,000

receive $200,000,000 reduction in taxes, in contrast with the $2,100,000,000—10 times as much as they would receive in added take-home pay under the Knutson bill. No wonder the spokesmen for Wall Street cry "demagogery." Their investment in the Republican Eightieth Congress is in issue.

No sooner had the President delivered his message on the state of the Union, than the gentleman from Minnesota, Chairman KNUTSON, issued a statement to the press complaining because the $40 credit "is the most extreme of the available devices for concentrating relief in the lowest income brackets. It is more extreme in this sense than an exemption increase would be."

Mr. KNUTSON. Can the gentleman give me the source of that quotation?

Mr. DINGELL. Yes; that appeared in the public press.

Mr. KNUTSON. It appeared in the public press?

Mr. DINGELL. That appeared in the public press.

Mr. KNUTSON. The chairman has no recollection of ever having made that statement.

Mr. DINGELL. I am sorry for that.

Mr. KNUTSON. Would the gentleman tell us in just what paper that was supposed to have been printed?

Mr. DINGELL. I will give that to the gentleman.

Mr. KNUTSON. I do not want it in secret, but I would like to have it read in the RECORD.

Mr. DINGELL. I will give it to the gentleman for the RECORD. I told the gentleman I will present it to him and I will do that.

Mr. KNUTSON. I do not want it in secret, but put it in the RECORD.

Mr. DINGELL. Very well.

Yet this same Republican tax authority—Chairman KNUTSON—now has the audacity to claim that his bill, and not the President's program, really has at heart the interests of the vast majority of working people.

The CHAIRMAN. The time of the gentleman from Michigan [Mr. DINGELL] has expired.

Mr. DOUGHTON. Mr. Chairman, I yield the gentleman 15 additional minutes.

Mr. DINGELL. The undeniable truth is that my bill, H. R. 4968, provides greater relief to the average American family of four earning up to $4,300, and it does this without booty for the favored few.

The President is concerned with the low-income groups who are suffering most under the dangerous pressures of inflation. These people are paying taxes at the expense of their health and that of their dependents.

From June 1946 to November 1947, consumer food prices rose 39 percent; all consumer prices rose 24 percent. The consumers' price index has risen about 66 percent above the 1939 level. Meanwhile, personal exemptions under the individual income tax law have been reduced from $1,000 for a single person and $2,500 for a married couple to a $500 per capita level. If the equivalent of the 1939 income-tax exemption for a family of four were to be allowed, it would have to be almost $5,500 exemption under the prices prevailing today.

We cannot raise the exemption to this level in view of the pressing needs for tax revenues to meet essential budgetary requirements. We should, however, concentrate the maximum possible tax relief in the low-income areas under present conditions. This is accomplished most directly by the $40 per capita cost-of-living credit in H. R. 4968.

The majority still are trying to sell their original across-the-board tax plan pledged in the 1946 campaign. They have been forced to make vital modifications in their 20 percent across-the-board promise. The result, however, still is a discriminatory patchwork of political expediency. For example, a family of four with a net income of $100,000 receives a tax decrease of $18,076 under H. R. 4790, or 180 times the $99 tax reduction for the $2,800 family. H. R. 4968, on the other hand, is an honest across-the-board tax reduction—it gives the same amount of tax relief at every income level.

As the President said in his message to Congress on the State of the Union:

> During this period in which the high cost of living is bearing down on so many of our families, tax adjustment should be made to ease their burden. The low-income group particularly is being pressed very hard. To this group a tax adjustment would result in a saving that could be used to buy the necessities of life.

As emphasized by the President, Secretary of the Treasury, and the eminent elder statesman, Mr. Bernard Baruch, however, Government revenues must be maintained at substantially present levels. The gross public debt is still at the enormously high level of $257,000,000,000, and we have just begun making real reductions of this debt from surplus tax revenues. The maintenance of Government receipts at or near present levels would enable us to provide for adequate debt retirement and, moreover, it would maintain a wholesome pressure against inflation. The moderate excess-profits tax incorporated in H. R. 4968 is the most equitable and effective method of doing this.

The proposed reimposition of an excess-profits tax would be applicable to only 22,000 of the highest profit-making corporations. Smaller corporations would be exempt by a specific exemption covering the first $50,000 of excess profits.

Corporations whose earnings are not excessive would pay no excess-profits tax, inasmuch as the standard for the wartime credits under either the average-earnings or invested-capital methods would be increased by 35 percent. Furthermore, the rate of the excess-profits tax would be reduced from 85.5 percent—the 1945 rate—to 75 percent. Corporations which would be subject to this tax are the ones with the largest profits and the greatest capacity to pay. These modifications in the wartime excess-profits tax would be equitable because they would exempt completely the hundreds of thousands of corporations with moderate profits and would present few of the difficult problems of administration and compliance encountered under the wartime tax.

If, during the war, when the excess-profits tax was considered an integral part of the anti-inflation, antiprofiteering programs, why should it not be used now? Corporation profits after taxes for 1947 were at an annual rate of $17,000,000,000, or more than 67 percent above the peak profit level of the war year 1943. Profiteering in peace can be as dangerous to the economy as is profiteering in war. The Nation needs protection now from profiteering just as it did during the war.

H. R. 4790 threatens deficit spending in fiscal year 1949 and provides the greatest tax reduction to those who need it the least. Its predominant character is the presentation of tax windfalls to the wealthy. In contrast, H. R. 4968 combines the recommendations of the President for a cost-of-living credit to those whose need is greatest and maintains the strength of our revenue system in order to permit effective use of fiscal measures in the fight against inflation. H. R. 4968 would make it possible for the Committee on Ways and Means to continue its systematic study of the most pressing needs for reform, while H. R. 4790 precludes a safe, sane, and sensible approach toward revision of the wartime tax structure into a sound, permanent peacetime tax system.

In conclusion, the President's program grants tax relief to those who need it the most. It is a realistic recognition of what Republican NAM high prices have done to the lowest income groups. It also recognizes the responsibility of certain corporations for charging the highest possible prices out of which greater excessive profits are now being made than during the peak war years. It would discourage these corporations from charging all that the traffic will bear.

It grants the same tax relief to everybody without jeopardizing the financial soundness, or the international responsibilities, of the Nation.

Now I will be glad to yield to my friend the gentleman from Minnesota if he wants to present any questions.

Mr. KNUTSON. I am glad to see that the gentleman has come over to our side. I recall that a year ago when we first proposed an across-the-board cut in taxes the gentleman and a few of his associates who are on the more liberal side raised their hands to high heaven that we were giving the same reduction to John D. Rockefeller that we gave to the shoemaker or the ditch digger.

Mr. DINGELL. No, no; let me correct the gentleman. He is making a speech instead of asking a queston.

Mr. KNUTSON. Yes; and I shall confront the gentleman with his remarks tomorrow. Now, the gentleman wants to give John D. Rockefeller a $40 reduction.

Mr. DINGELL. That is right.

Mr. KNUTSON. And also John Smith.

Mr. DINGELL. We are willing to give John D. Rockefeller a $40 reduction and we are willing to give the same amount to Pete Klutch on the lowest rung of the

ladder. But the gentleman's idea about an across-the-board reduction in taxes goes something like this, and it is in the bill only in worse form now.

The CHAIRMAN. The time of the gentleman from Michigan has again expired.

Mr. DOUGHTON. Mr. Chairman, I yield the gentleman five additional minutes.

Mr. DINGELL. Mr. Chairman, here is what happens on this across-the-board proposition. H. R. 1 and H. R. 3790 are now resting in peace, vetoed, the vetoes sustained by the House or the Senate. Those bills proposed a cut that worked out something like this: The little fellow in the lowermost brackets got 54 cents a week.

Mr. KNUTSON. How much did he pay in taxes?

Mr. DINGELL. That does not make any difference. Suppose he paid $50, and let us say he got a cut of $25. That only amounted to 50 cents a week. Now, the gentleman's bills proposed a 10½ percent cut in the upper brackets. He did not dare go above that percentage, because the rich would have been paying less under his proposal than they paid before the war in 1939. So you made it as high as you could without reducing them below what they were paying before the war. Here is the way it would work out: The 10½ percent would have amounted to over $100,000 for the big fellow, or $2,000 a week. That was our objection to the across-the-board cut. It amounted to 50 cents a week for the little fellow, and it was $2,000 a week for the big fellow. That was our objection. We were willing to go across the board; we are willing to go across the board now at $40 for each taxpayer, for his dependent wife, and for his hungry dependent children. That is the kind of an across-the-board I can go for. I am willing to give the man in the upper brackets a cut, too, as I said on this floor, on the basis of take it off as we put it on, but not to cut 10 percent for a man who pays on a million-dollar income. You are going to give him $100,000 in this bill. When we add the advantage of the split income it will be even higher than it was in H. R. 1 or H. R. 3790. It is even worse, it smells worse, than the two previous bills which were massacred by the President and buried by the House or Senate. That is what will happen to this bill. I wager that this bill will never see the light of day. It cannot, because in the first place the Republican-controlled Senate will not permit it. So it will not be a Knutson bill. At least, he will not recognize it when it comes out of conference.

Mr. ROONEY. Mr. Chairman, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from New York.

Mr. ROONEY. What effect will this Knutson bill have on contributions to the Republican National Committee?

Mr. DINGELL. I have an idea it might play a very, very encouraging part. As a matter of fact, that is where most of the cut will go—that is, the attractive cuts.

Mr. Chairman, let me say one thing more about incentive investments. Here is an ad taken from the Washington Post of Wednesday, the 28th:

> Bendix Corp. advertises 399,990 shares of common stock, par value $5 a share, price $28 a share.

That is nearly six times the par value. Why does not the corporation venture some of its surplus into this expansion? From what we hear on this floor all of these profits go into the corporation coffers, then they are plowed back into the business. Yes; they are plowed back into the business if there is no risk involved. If there is any risk involved, they advertise it, and the public is expected to take the risk. The risk capital will come only from those to whom we can give a tax reduction in the lower brackets. Then they will go out and buy stock in all corporations.

The CHAIRMAN. The time of the gentleman from Michigan has again expired.

Mr. KNUTSON. Mr. Chairman, the zeal for tax equalization as displayed by the gentleman who has just taken his seat reminds me of the liberal butcher who believed in giving the horns and the hoofs to the poor.

I now yield such time as he may desire to the gentleman from Pennsylvania [Mr. SIMPSON].

Mr. SIMPSON of Pennsylvania. Mr. Chairman, I believe there is no Member of this body but who wants tax reduction. There are a number who question the manner of giving the tax reduction, and there are others who question the wisdom of tax reduction at this time. I would like, first of all, to speak with respect to those who question the wisdom of tax reduction at the moment and to give one of the principal reasons why we on this side of the House believe that this bill is proper and that the economy of our country will this year allow the tax-reduction bill we have brought in.

I am informed that in the past 20 years when the Treasury Department came before the Committee on Ways and Means with its estimate of receipts for the ensuing year that they were wrong 17 times out of 20; that is to say, they have underestimated the receipts when the amounts were actually collected. In 1944, when the original estimates for that year were made, they amounted to $33,000,000,000, and when the collections were made they totaled $44,000,000,000. In 1945 the estimates were $40,000,000,000 and the collections were $46,000,000,000. In 1946 the estimates were $41,000,000,000 and the collections were $43,000,000,000. In 1947 the estimates were $31,000,000,000—now mark this, gentlemen—and the collections were $43,000,000,000. In 1948, the year in which we are now operating, the original estimates made by the Treasury Department were $38,860,000,000. The date of that estimate compares with the date of the estimate which is applicable to the tax reduction bill we are now considering. That estimate was $38,860,000,000 and the estimated receipts for the current year are $45,210,000,000. Thus each of you will see that the Committee on Ways and Means is justified in questioning the accuracy of those figures presented by the Treasury Department in its presentation of estimates for each year, for in those five instances they have been wrong 100 percent of the time, not wrong by a few hundred million, but wrong by billions of dollars.

Anyone with a reasonable approach to this taxing problem, anyone who seriously is determined to give the taxpayers some relief, will certainly justify the majority of the Committee on Ways and Means when we assume in the face of present-day facts and figures that the estimate of income for 1949 fiscal year will exceed the actual personal income for the year 1948. Indeed, since Mr. Snyder appeared before our committee and stated he was basing his estimates upon the figure of $200,000,000,000, the Department of Commerce has advised the Congress that at the moment it seems as though our estimates for personal income in 1949 will be $205,000,000,000. Our committee, under the expert guidance of our joint committee staff, headed by Mr. Stam, have adopted as our basis a most reasonable amount of but $209,000,000,000. Based on that $209,000,000,000 we recommend and present to the Congress a tax-reduction bill, a bill I emphasize, that provides tax relief. Unlike the bill my distinguished colleague who just preceded me described in detail, which he further described as President Truman's bill, our bill is a tax-reduction bill. It does not promise tax reduction and conceal a new tax on the same persons promised relief. They this year with one hand promise tax relief and with the other hand impose another tax. That is exactly what President Truman has proposed.

If it were possible to give tax relief to one group and collect the taxes from another group there might perchance be some justification for such a proposal. I hope to demonstrate that the proposal submitted by President Truman—and incidentally that proposal must be your recommittal plan, unless you are willing to disregard the President—but promises relief and then at the same moment reimposes another tax. Under his proposal a credit of $40 is to be provided to each income taxpayer for himself, and an additional $40 for each of his dependents, making a total amount of $3,200,000,000, which when divided by $40 indicates that some 80,000,000 people are to receive that $40 credit for themselves or for their dependents. The $3,200,000,000 is not to represent a tax reduction; it is to represent a transfer of tax. Consequently, a brand new tax is being imposed, a tax of $3,200,000,000. Thus the minority group change their position from that of 2 years ago, when they were the party in the majority, which lifted the particular tax now again recommended.

They propose to collect this $3,200,000,000 by levying an excess-profits tax, a tax which it is stated will apply to only some 22,000 corporations in the country. These 22,000 corporations are the corporations which, according to the formula stated in that bill, are described as earning too large profits. Assuming that condition does exist, then those 22,000 corporations are under the type of management which will take all the

money the traffic will bear. Consequently, they will be the very corporations to add that $3,200,000,000 to their selling price. Once they add that $3,200,000,000 to their selling price, every consumer in this country will pay that tax.

Who are those consumers? Why of course they are the 80,000,000 who are getting back $40 apiece. In addition to this 80,000,000, there are 65,000,000 people in this country who are too poor to pay any kind of income tax. They will not get the $40. They have had living costs increase on their shoulders day after day just as much as have the people who can pay income tax. They are consumers, and they will be forced to pay part of this $3,200,000,000 which is being levied against corporations. Everyone in this Chamber knows that the only source of money that a corporation has to pay taxes is from the consumer of its products. In a seller's market the new tax is certain to be passed on. So I repeat, all we are doing in this proposal of President Truman's is to promise tax reduction to needy people, to those people for whom the cost of living presents the real problem of the day and then on the other hand levy a new tax applying to those very people. It is entirely wrong in principle. I cannot conceive that the great Democratic Party would present such a proposal as its position when the time comes, to recommit the bill which the Republican Party is here presenting. Rather I would think the gentlemen of that party would choose to follow the man who is known as your great tax authority, the former chairman of the Committee on Ways and Means [Mr. DOUGHTON] who without ever having told me so, has by his past record in this body given every indication that he could not accept the proposal of the President. I would suggest that he is the man who knows that what the people want today is a real tax reduction within the limits that he in his conscience believes the country can afford.

Mr. KEAN. Mr. Chairman, will the gentleman yield?

Mr. SIMPSON of Pennsylvania. I yield to the gentleman from New Jersey.

Mr. KEAN. Did the gentleman hear the radio broadcast the other day when that same question was asked and Mr. Leon Keyserling of the President's Economic Committee answered that the reason higher taxes would not be levied was that the President had recommended price controls and that price controls would stop the corporations from putting the prices up.

Mr. SIMPSON of Pennsylvania. I thank the gentleman for his contribution. He is correct. Further, this Congress a month or more ago passed a bill asking for voluntary agreements on the part of industry in order to maintain the price levels. Now I understand the President himself proposes that a new tax be levied against industry. Certainly every industrialist in this country and every man who provides jobs for others must be worried lest this Congress determines upon imposing new taxes upon all business. How is it possible to hold prices on a level basis when we impose new taxes? How can business cooperate through voluntary agreements under such uncertainties?

I yield to the gentleman from Pennsylvania [Mr. EBERHARTER].

Mr. EBERHARTER. Of course, any corporation is allowed a profit, first of 135 percent of what they made in the period from 1936 to 1939, and also about $50,000 additional exemption. Anything they make over that, if the Government took 75 percent of that in taxation, do you think that we are not taking away their incentive to increase their prices when the Government would take 75 percent of that money in taxation? If that be not true, why is it that the corporations are the ones who are fighting against this excessive profits tax, and that the people of the lower income groups and workingmen are for it? It seems strange to me that if the corporations are not affected by the excess-profits tax and that they can simply pass the additional tax on to the consumer, they would not be concerned at all over it. They certainly are concerned about it. Therefore, I think the gentleman's premise is entirely wrong.

Mr. SIMPSON of Pennsylvania. I did not say that they are not affected by a tax. I say they are affected. They are affected by having to increase their prices and once having increased their prices, sales resistance increases and these hard-headed businessmen can see that with increased prices, they are going to have less production rather than more production without which we can never lick the inflation problem.

Mr. RICH. Mr. Chairman, will the gentleman yield?

Mr. SIMPSON of Pennsylvania. I yield.

Mr. RICH. When the gentleman from Pennsylvania [Mr. EBERHARTER] speaks about corporations making great profits, does he not realize that corporations are not just a few individuals, but there are millions of stockholders in this country; that they comprise millions and millions of workers in this country who get their livelihood from the corporations. Suppose the big corporations were wrecked, what would happen to the millions of workers and stockholders?

Mr. SIMPSON of Pennsylvania. I am sure the gentleman does know that.

Mr. EBERHARTER. Will the gentleman yield?

Mr. SIMPSON of Pennsylvania. I yield.

Mr. EBERHARTER. The gentleman said if this excess profits tax was enacted, it would increase the consumers' sales resistance. If we increase sales resistance, will that not tend to hold the inflationary pressures? The more sales resistance you have, the more tendency there is to retard inflation.

Mr. SIMPSON of Pennsylvania. I would point out to the gentleman the President's plan is recognition of the fact that our income taxpayers do not have enough money with which to live. That is why he has this cost-of-living plan. He wants to get $40 into the hands of each one of them. Consequently, I do not think the gentleman is right in his point.

Mr. DINGELL. Will the gentleman yield for an observation so that I may correct the RECORD?

Mr. SIMPSON of Pennsylvania. If it is not too long.

Mr. DINGELL. The gentleman from Minnesota questioned the reference made to a quotation which I gave. I hope I will not have to reread it into the RECORD, but it comes from a press release which is headed, "For immediate release by Representative HAROLD KNUTSON, chairman, Ways and Means Committee, House of Representatives, January 7."

I am informed the gentleman had prereleases of the President's speech. I do not know. Does the gentleman confess that he never heard of it? If he does, it may have emanated from the Republican National Committee and not from his office, but, at any rate, it is labeled with the gentleman's name appearing.

Mr. KNUTSON. If the gentleman's name appears there, he assumes full responsibility for it.

Mr. DINGELL. I thought he would.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, in summing up, I simply want to repeat my support of this legislation and my belief that the economy of the country can this year properly withstand this proposed tax-reduction bill. I believe it will be of great advantage to every individual taxpayer. It will benefit those who do not earn enough money in order to be liable to pay taxes, by providing them with better earning opportunities through greater efficiency and modern improvements in industry, with increased production, so necessary to defeat inflation.

The Republican bill will give relief to the taxpayer.

The CHAIRMAN. The time of the gentleman from Pennsylvania has again expired.

Mr. DOUGHTON. We do not seem to have anyone else to speak just now.

Mr. KNUTSON. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. RICH].

Mr. RICH. Mr. Chairman, I realize that the people of this country and the Congress want tax reduction. I think the bill that is presented here is about the kind of bill that the Ways and Means Committee has figured out would be the right thing for the people, if it were enacted into law. It gives the lowest taxpayer the most, 30-percent deduction; then the medium taxpayer gets 20-percent deduction, and the large taxpayer only gets 10-percent deduction. Everybody gets $100 deduction.

I have been wondering very very much ever since this session of Congress convened what we could do and what we would do if we did the thing that was right. We would have no difficulty whatever enacting this bill into law if the Chief Executive of the United States and the Congress decided they were going to economize in the operation of government. To be wise we must economize.

The people of the country want tax reduction more and more, but even so the people of this country want less and less spending. If we have less spending, we will not have any trouble keeping

within the budget after this tax reduction, and we could give the people a lot more reduction and pay billions on our debt. It is just because of inefficiency in the President and Congress during the last 15 years that this extravagant spending has been possible.

The thing that burns me up is the fact that the Chief Executive of this Nation comes here and addresses us on the State of the Union, and all we hear throughout that long, long speech is spending and more spending, greater opportunity for building bigger and better bureaucracies and governmental institutions than we now have for spending, but he did not say anything on the subject of how we could stop spending. What a pyramid we would have if we enacted into law all the things he asked for in the state-of-the-Union address. He wanted socialized medicine, which right away would add another eight or nine hundred million dollars to the cost of government annually. Then he wants Government aid to education to the extent of between half a billion and a billion a year. He would have every school teacher in the United States in politics, and then would we not have a fine situation in our educational system with all the school teachers in the country in politics. I am for education, and I believe that every State in the Union ought to make every effort possible to give a good education to the boys and girls of the country; but, for goodness' sake, keep politics out.

Then the President asked for universal military training. I grant that it may be necessary to have a somewhat larger Military Establishment than we used to think was necessary, but by no means do we need as many more men in the Army as would be brought in by universal military training. What we need today is not mass induction of men into the military system, but the proper number of men scientifically trained. We have the atom bomb, we have the airplane, we have the technical skills and experience gained in the last war. These show us that we do not need 15,000,000 men. UMT is going to cost inside of 3 years $3,000,000,000 annually. What a large expense to be absorbed by taxation.

The President asked for all these additional things, but he did not say a word about cutting down expenses in his own department of Government. Now he says he is going to scatter around $40 bills. Of all the proposals ever made for a tax-reduction bill that is about the silliest thing I ever heard of in all my life.

Mr. DINGELL. Mr. Chairman, will the gentleman yield?

Mr. RICH. Does the gentleman want to answer my statement that it is a silly thing?

Mr. DINGELL. Yes.

Mr. RICH. All right. It is about the silliest proposal I ever heard of. If the gentleman will not take all my time and wants to answer that one proposition, then I will yield to him.

Mr. DINGELL. I have not said a word about it yet.

Mr. RICH. I yield.

Mr. DINGELL. The proposal under the gentleman's bill would give about $20 to the little fellow. Measured by that standard, I suppose the President's proposal of $40 could be called, in the gentleman's words, twice as silly as his own proposal.

Mr. RICH. We want to give relief all the way down the line from the top to the bottom. We propose a 30-percent decrease in taxes to the low-income brackets, besides giving them $100 more exemption. Suppose we reduced the cost of Government 30 percent. If that were done, the rates in this bill could be increased by 40 or 50 percent. The gentleman and his associates who say they are opposed to this 30, 20, and 10 proposition would be just as opposed to the proposition submitted by the gentleman from North Carolina [Mr. DOUGHTON], who would have Congress reduce the taxes by 15, 10, and 5, because the same argument applies equally to each. Are you also going to be against the inclusion of community-property rights under which a husband and wife can share the salary of the husband or the combined salaries of both, and thus reduce their taxation? There are 12 States now enjoying this privilege, and all should have it. Is the gentleman going to object to making that uniform in all the States, putting the people of all the States on a comparable basis with those of the 12 that now enjoy community-property rights in the matter of taxation?

This waste and extravagance in government that are the cause and necessity for these high taxes just burn me up. The gentleman says the President would not have a bill like this. I say go ahead and pass it—pass it quickly—and let us see what he does. If he does not stop spending but keeps on taxing, the people will rebel, and rightfully so.

Then we have the President's proposal of the Marshall plan—aid for the rest of the world. I think it is about time we think of America. We went abroad to lick Germany and Japan. We had allies who we fought with and for during the war. Today it seems we are at loggerheads with some and financing the others, and, in fact, trying to run their countries—telling them what kind of government they shall have; also, our war enemies, under the Marshall plan, are to get $6,000,000,000—Germany, Italy, and Austria. We gave them much already. Where are you going to get all this money? Why, the American taxpayers must foot the bill or our country goes broke. With a $257,000,000,000 debt, how much more can we stand? I want to help the starving and needy, but the Marshall plan goes way beyond that. It just goes too far for me and my people. I am not here to wreck the people who elected me to serve them; I am more considerate and grateful to them. The propaganda for the plan is great. Who furnishes that money? They pay it over to our propagandists, but, Mr. Taxpayer, it is your money in the end.

We gave them sixty-eight billions since lend-lease—a law I am glad I did not vote for. We gave those countries twenty-two billions since the war. What an amount to give away. We gave Britain $4,400,000,000 to put them on their feet—same as the Marshall plan proposes. We did so in 1945; it was to last 5 years; it is all gone now, and they want $5,348,000,000. Under the Marshall plan, that makes, to Britain, $9,748,000,000. What for? To buy their coal mines, railroads, utilities—with your money—socializing Britain. It is a sin and a shame to do such a thing. Britain and other countries pay their monarchs fabulous sums for being their rulers. You pay the bill. You tax your people to do it. Wake up, America, before it is too late.

The Marshall plan gives three and one-half billions to Holland, Denmark, and Ireland. Ireland was not in the war. Why? Why pay them? Portugal was not in the war. Why help them to the tune of $150,000,000 with your taxpayers' money? Sweden and Switzerland were not in the war. Why give them millions? I ask, Why all this gratuity? You say communism. Oh, bosh! You cannot buy people to stop communism; you must educate them. I say to you: Get a new President; then a new State Department; then less spending; then less taxes; then lower prices; then more happiness and a safer America. Waste, inefficiency, Communist trickery would drain America. Let us feed the starving, help rebuild Europe, without inviting economic collapse here. Save America or we bust.

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. KNUTSON. Mr. Chairman, I yield 6 minutes to the gentleman from Connecticut [Mr. SEELY-BROWN].

Mr. SEELY-BROWN. Mr. Chairman, taxes today are higher than ever before in the peacetime history of our country. Do you know that for every dollar you earn, you pay out 31 cents for taxes? Do you know that the average American citizen spends almost 4 months out of every year working to support his Federal, State, and local governments. The American people are entitled to intelligent tax relief now.

Nineteen hundred and forty-eight brings a grim reminder of a certain significant centennial. One hundred years ago Karl Marx and Friedrich Engels announced a program for the destruction of the capitalistic system. One of the key planks advocated by them was a heavy and steeply graduated income tax. As the first of the original planners, they knew full well that "the power to tax is the power to destroy." Their present-day Communist followers are making every effort to destroy our American system of free initiative and enterprise.

As a people, we have not always been quick to learn from the experience of history, even though we may have seen certain of these events take place before our own eyes. Let me give you a brief example.

First—and I must add in direct contrast to the traditional American system—the British industrialists have long tended to draw down their profits without plowing back any substantial part of these profits in order to provide for the expansion and modernization of their business plants.

In addition to this lack of private foresight, the British Government adopted a confiscatory income-tax policy following World War I. This policy drained off the most important reservoirs of

wealth—reservoirs which might have furnished the new capital for their much-needed industrial improvement and expansion.

Having thus killed the goose that laid the golden egg, the Government of Britain was forced to turn to the American Government—which means the American taxpayer—for help in reestablishing her industries.

We cannot, we must not, make that same mistake. If this same trend in this same direction is not reversed—and reversed immediately—here in America, we will find ourselves likewise in need of help. And to whom shall we turn for aid?

We must benefit by our century of experience with the fabulously successful American way of creating wealth, based as it is on the cornerstone of venture capital for an ever-expanding production.

The whole matter of tax relief has been drawn into the arena of partisan politics by the approach of the 1948 election. I think you will agree with me that political arenas are not always the healthiest of places for a fair consideration of tax proposals.

I have definite responsibilities in this matter. I must do all within my power to bring tax relief to those in need—to bring tax relief to those in the low-income groups who are fighting such a desperate battle against inflation—to bring tax relief to those whose advancing age makes further full-time work impossible.

I also have a responsibility to the person who is willing to invest his own money in creating new jobs and new goods for others. Every new job created by private industry in the Second Congressional District of Connecticut requires that someone invest a sum of approximately $6,000 in order that a worker by holding the job thus created may support his own family.

With these responsibilities firmly in mind, I shall vote in favor of the Republican tax-relief program.

Our goal must be to preserve the American system. Once that goal is seen, we must adhere to the maintenance and functioning of those principles which will guide us in the formation and administration of a sound fiscal policy. Political freedom and economic freedom go hand in hand. We cannot have one without the other.

Mr. KNUTSON. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. HOEVEN, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 4790) to reduce individual income tax payments, and for other purposes, had come to no resolution thereon.

MASSMAN CONTRUCTION CO.

Mr. BYRNES of Wisconsin. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill H. R. 2192, an act for the relief of the Massman Construction Co., with a Senate amendment thereto, disagree to the Senate amendment, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin? [After a pause.] The Chair hears none, and appoints the following conferees: Messrs. JENNINGS, REEVES, and CRAVENS.

EXTENSION OF REMARKS

Mr. MILLER of Connecticut asked and was given permission to extend his remarks in the RECORD and include a letter from a constituent.

Mr. THOMPSON (at the request of Mr. HAYS) was given permission to extend his remarks in the RECORD and include a statement.

Mr. HAYS asked and was given permission to extend his remarks in the RECORD in two instances.

Mr. KLEIN (at the request of Mr. BUCHANAN) was given permission to extend his remarks in the RECORD in five instances.

Mr. MANSFIELD asked and was given permission to extend his remarks in the RECORD and include an address entitled "Rose Ellen Speaks for Democracy."

Mr. BECKWORTH asked and was given permission to extend his remarks in the RECORD and include a newspaper article.

JOINT COMMITTEE ON THE ECONOMIC REPORT

Mr. HALLECK. Mr. Speaker, I ask unanimous consent for the immediate consideration of Senate Joint Resolution 179.

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There being no objection, the Clerk read the joint resolution, as follows:

Resolved, etc., That section 5 (b) (3) of the Employment Act of 1946, as amended, is amended by striking out "February 1" and inserting in lieu thereof "March 1."

The joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONSENT CALENDAR

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that the call of the Consent Calendar in order on Monday next be transferred to Tuesday next.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

CALENDAR WEDNESDAY

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that the call of the committees in order on Wednesday next may be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. MACKINNON, for Friday, January 30, on account of official business.

The SPEAKER. Under previous order of the House, the gentleman from Massachusetts [Mr. HESELTON] is recognized for 20 minutes.

THE FUEL-OIL SITUATION IN THE UNITED STATES

Mr. HESELTON. Mr. Speaker, I hope to make clear in what I shall say the proposals I have introduced today, but before proceeding to discuss them briefly I want to read at this point the headlines in the Boston Post of Wednesday, January 28, generally regarded as the great Democratic newspaper of New England:

Free heavy oil for 17 hospitals. One hundred thousand barrels also go to schools and to other buildings.

The list of hospitals includes such well-known New England and Boston hospitals as Boston City, Boston Children's, Carney, Beth Israel, Massachusetts Memorial, New England Baptist, New England Deaconess, and Framingham Union.

The schools are located in Malden, Newton, Braintree, and Wellesley. Some of the laundries are located in Brockton, Lynn, Somerville, Quincy, and Salem. The list also includes a public utility plant in Boston and other plants in Lowell, Lawrence, and Weymouth.

I also want to read a brief editorial from that edition of that paper. It bears upon the problem which concerns so many of us in New England. The editorial is entitled "Petroleum Products":

It seems strange that exports of petroleum products should continue in the face of existing shortages to the extent that the House Interstate Commerce Committee should deem it necessary to ask Congress to put an immediate ban on all such exports.

The committee decided on this course of action after a study of the petroleum situation and the ban on exports was suggested "until it can be determined whether further exports are damaging to the economy of this country."

There have been statements from several authoritative sources that oil shortages are likely to continue for a while, and in some instances the predictions have been that this shortage may last for several years. Consumers, therefore, may well ask why action was not taken when the indicated shortage first became known.

Mr. Speaker, just before I came to the floor a colleague from the Detroit area of Michigan informed me that not only are 200,000 people in that State out of work today but, apparently upon latest reports, there is every indication that they will remain out of work for a long time, until we meet this crisis which faces us.

Earlier today I reported that I had requested the office of the Legislative Counsel to prepare two joint resolutions which I proposed to introduce as soon as they were ready.

I stated that in my later remarks I would include a statement I made to Hon. William C. Foster, Under Secretary of Commerce, who testified during the day Monday with reference to the Department's announced export program of petroleum and petroleum products for the first quarter of 1948.

Because I inserted the Department of Commerce press release of January 16 as to the details of the allocations to

countries and types of petroleum products, I shall not repeat it here. You will find it at page 329 of the RECORD, January 19.

My full statement to Mr. Foster is as follows:

I want to read to you from your testimony in July, and I have reference particularly to the question the chairman asked about the wisdom of an embargo by Mr. SADOWSKI and others of us who have had to seriously consider it in terms of our own critical domestic situation.

I have in mind your insistence throughout the day on the possible results and the hardship to the other nations which you said would be extreme. I think that I quote you accurately on that point. It strikes me that it was an important point.

I have in mind your statement that even as of this date, you do not believe that there can be any essential change made in your quota program for the first quarter of this year.

I assume that it might be possible to recoup some of the reserves set up there in the press release. I do not know what they are for, but perhaps we could get some heating and industrial oil from that source.

But upon the assumption that you do not see any constructive method of having a single gallon of this oil going to other countries diverted to domestic use, although you are willing to have the review committee examine it thoroughly, I do want to reemphasize Mr. HALE'S questions and your answers as far back as last July, and I think it was on July 7.

Mr. HALE said, "I was struck by this paragraph on page 3 of your statement that the concern over the domestic supply does not lead us to the belief that exports of petroleum and petroleum products should be prohibited or drastically curtailed. To do this should upset the world system of distribution and make petroleum a source of international friction."

Mr. HALE said, "There must certainly be some limitations on that, Mr. Foster."

You replied, "Yes, that is right."

Mr. HALE then said, "There must be some point where you would be opposed to any export at all." You said, "Yes, but we do not feel, so far, that that point has yet been reached where we should completely prohibit. We think we might, as a matter of fact, lose more than we gained at the present, now that conditions may change in the next 60 to 90 or 120 days."

This afternoon is more than 6 months from the time you made that statement.

You continued:

"We are currently studying the problem, and as we obtain from countries to whom we are exporting their figures on requirements and their figures on urgency and we relate those to our own domestic needs, that statement may have to be changed. However, as of today we do not feel it would be wise to prohibit or even drastically curtail those shipments."

It is true, of course, that those shipments were not curtailed during the ensuing months, and it is true also that this committee made a very vigorous recommendation on December 19 which I know reached your attention, or at least reached the attention of the Department. If the assumptions you have made today, on the basis of which you have given us certain other information, are correct, and I submit to you, Mr. Foster, that many of your answers have been based on assumptions which are not provable by any information we have, or you have, or anyone has in this country, then I think it will be proven beyond any doubt that in terms of licenses and in terms of military requirements as against the first quarter of 1947, something like 29,595,000 barrels of petroleum and petroleum products were shipped to other countries. It will also become clear that under the announced program this year 29,885,000 barrels will go to other countries.

In other words, it seems to me that it is a very unfortunate situation, one that should be corrected, and if there is any recapture possible, you should not lose 24 hours in setting the machinery in motion.

Now, because of our deep interest in this, which must be evident to you, and has been evident all through the year, I cannot let this day pass without stating with all possible emphasis to you officially as a representative of the Secretary of the Department which has the full power to take the action which some of us think is necessary if we are going to solve this problem, that it is the only method possible of immediately helping these people who need your assistance. I call your attention again to the paragraph in the full statement submitted by the chairman on behalf of the committee yesterday, and I call your attention to the fact that it is printed in full in the CONGRESSIONAL RECORD at pages 545 and 546. I want to read that paragraph:

"The committee does not believe that we are forced to accept the panaceas which so far have been offered to us by Government and by industry—namely, the cheerful acceptance by the consuming public of the inevitability of these tight situations. The leaving to industry to work out without governmental interference this problem which for some time now they have assured us would not arise, and the solution to which they so manifestly so far have seemed unable to reach. Our question goes to the superficial remedy suggested of allocating or rationing"—I refer to your frequent references to Mr. Krug's testimony—"available supplies without maximum effort to effectuate a real cure through bringing supplies and demand in line."

I do not believe that it has been demonstrated to any member of this committee today that we do not have enough fuel oil in this country to take care of these shortages at once if you use the ingenuity I know exists in the Department.

I am sorry that you stress so repeatedly that you do not find it possible to act because it is only permissive. So frequently departments tell us that they do not want us to tie their hands; that they want some flexibility.

You must have anticipated this when you were before us in July. Certainly you know it has been increasing all through the fall.

I can assure you it is desperate in certain areas in our districts. Speaking personally, I want you to know that if you cannot give us a more specific assurance of prompt, vigorous, and effectual action through your review committee and under the laws the Congress has passed, I shall be compelled to introduce a bill somewhat along the line that the chairman has suggested, and to urge its immediate adoption. I feel rather confident that the people and the Members of Congress who represent these people to whom we have a moral responsibility are going to give a great deal of attention to it. I hope that you will not force us to that point. But surely if the Department cannot devise the means of helping us you are laying it right in our laps. We must recognize the heavy responsibility we have toward those now in need of assistance now—not next month or next year.

I appreciate your consideration of the possible hardships in other countries. I have expressed myself more emphatically, perhaps, than I need to, because I realize that you are an honorable American, deeply interested in what is going on here in this country; but you do not have to listen to and read about, day in and day out, as we do, some pretty tragic stories in our districts.

You do not have to hear of industries being shut down, the possibility of schools being shut down. You do not have to read telegrams from the heads of hospitals, begging us to do all we can individually so that they do not have to limit their services. You do not have to read accounts in the newspapers of people standing in line for a gallon of kerosene.

I do, and the rest of the Members of Congress do. Unless you can come up within a very short time—and I do not mean within a matter of a week; I mean within a matter of hours—unless you can come up with something better than has been suggested today, I repeat I shall feel compelled to introduce a bill of some nature, such as the chairman suggested, not necessarily along the lines of the Senate bill, but which will indicate with a great deal of definiteness that Congress insists the American people have a standing in this world, too.

Mr. FOSTER. May I speak very briefly to Congressman HESELTON'S statement?

I do think it was a question.

Mr. HESELTON. It was an emphatic warning.

Mr. FOSTER. Briefly, I have exactly the same concern you do. The reason I have taken here the attitude that I have is that I am still fearful that the action contemplated is that proposed legislation will lead rather to more trouble than a solution of the problem.

I can assure you that with the powers we now have, we are taking steps, and we have taken steps to the effect of cutting down the amount that is going out. I am still unconvinced that an embargo is the method to use to accomplish the results that both you and I are interested in obtaining.

I am interested in giving you the benefit of what I hope is the experience we have had in this, and I hope the decision you ultimately reach will be a wise decision.

Mr. HESELTON. If I did not share your same concern as to the possible effect, I would have introduced such a bill a long time ago, because of the situation that confronts us. But now I think it is about time that I should weigh the known effect on the people in New England and New Jersey and other areas of this country against the possible effect on the people in some of these other countries.

I am sure that you will agree with me that there is no campaign on throughout Canada to our knowledge, asking individual householders to reduce their heating. I am sure that you will agree that it cannot be true in South Africa, and in Central American countries, and in New Zealand, and in Australia.

In other words, unless you can give a better explanation than you have been able to give today, speaking individually, unfortunately the lack of the explanation is going to force me to take this action. I shall do so with a great deal of reluctance recognizing the possibility of its creating difficulties in the administration of disclosed and, perhaps, undisclosed foreign policies.

Mr. FOSTER. I am sorry that I have not been competent to answer those questions. I again commend to you the question of whether the solution you propose is adequate to meet the conditions you have outlined. There is where I think you and I differ in the conclusions.

May I just comment on the last statement concerning Canada. They cut off the installation of oil burners last May by action of the Canadian Government so that there is an attempt to meet this in Canada, at least, and there is a definite attempt to cut down that consumption.

Mr. HESELTON. That is encouraging.

Mr. Speaker, the resolutions were given to me by the legislative counsel during midafternoon and I have introduced them.

I ask unanimous consent, Mr. Speaker, that the first of these resolutions may be printed at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

(The resolution is as follows:)

Resolution to place temporary restrictions on the exportation of certain petroleum products

Whereas there are current and anticipated shortages in the United States of petroleum products essential to satisfy fuel needs; and

Whereas while such shortages continue the health, safety, and welfare of the American people are threatened; and industry is severely handicapped in the effort to attain production of commodities necessary (1) to the economic welfare of the United States, and (2) to insure the success of such program as may be adopted for aiding in the economic recovery of Europe; and

Whereas this critical situation requires the temporary exercise of emergency powers for the purpose of relieving such shortages: Therefore be it

Resolved, etc., That during the period of 60 days beginning with the day after the date of the enactment of this joint resolution, and notwithstanding commitments heretofore made, it shall be unlawful to export kerosene, gas oil, distillate fuel oil, or residual fuel oil from the United States to any foreign country, except that—

(1) exports of any such product necessary for use by the armed forces of the United States may be made.

(2) there may be exported to any foreign country during such 60-day period an amount of any such product not in excess of 50 percent of the amount thereof allocated to such country under the quota allotments made by the Secretary of Commerce for the first quarter of 1948; and

(3) this joint resolution shall not require reduction of exports so as to reduce the imports into the Dominion of Canada from the United States below amounts conforming with the voluntary import-reduction program heretofore undertaken by Canadian authorities and Canadian industry.

SEC. 2. Whoever violates the provisions of section 1 of this joint resolution shall, upon conviction, be punished by a fine of not more than $10,000 or by imprisonment for not more than 2 years, or by both such fine and imprisonment.

SEC. 3. As used in this joint resolution the term "United States" includes the Territories and possessions of the United States.

Mrs. BOLTON. Mr. Speaker, will the gentleman yield?

Mr. HESELTON. I yield.

Mrs. BOLTON. I have been reading a little about this subject of oil and about this matter of our not exporting oil. We are now importing oil. If we stop exporting oil, will it not cut down on some of these very necessary imports of oil which we must have?

Mr. HESELTON. May I say to the gentlewoman that I have heard that argument repeatedly before our committee in the hearings in July and the hearings in December and in our current hearings. I think it probably would have that effect if we enacted legislation calling for a complete embargo. I hope to address myself to that very point in terms of what I believe to be a constructive suggestion to help our people in New England, New York, Ohio, and Illinois, and Michigan, because they have been suffering and if the people in authority in the executive department are correct, they will continue to suffer until we provide some means to help them. If I may proceed I will try to answer the gentlewoman further.

Mrs. BOLTON. I thank the gentleman very much.

Mr. HESELTON. The second resolution reads as follows:

Resolution to place temporary restrictions on the exportation of certain petroleum products

Whereas there are current and anticipated shortages in the United States of petroleum products essential to satisfy fuel needs; and

Whereas, while such shortages continue, the health, safety, and welfare of the American people are threatened; and industry is severely handicapped in the effort to attain production of commodities necessary (1) to the economic welfare of the United States, and (2) to insure the success of such program as may be adopted for aiding in the economic recovery of Europe; and

Whereas this critical situation requires the temporary exercise of emergency powers for the purpose of relieving such shortages: Therefore be it

Resolved, etc., That during the period of 60 days beginning with the day after the date of the enactment of this joint resolution, and notwithstanding commitments heretofore made, it shall be unlawful to export kerosene, gas oil, distillate fuel oil, or residual fuel oil from the United States to any foreign country, except that—

(1) exports of any such product necessary for use by the armed forces of the United States may be made;

(2) in the case of any foreign country which regularly imported any such product from the United States during the period from 1935 to 1940, both inclusive, exports thereto of such product may be made during such 60-day period in an amount not in excess of one-twelfth of the average annual amount thereof exported to such country from the United States during such period from 1935 to 1940;

(3) this joint resolution shall not require reduction of exports so as to reduce the imports into the Dominion of Canada from the United States below amounts conforming with the voluntary import-reduction program heretofore undertaken by Canadian authorities and Canadian industry.

SEC. 2. Whoever violates the provisions of section 1 of this joint resolution shall, upon conviction, be punished by a fine of not more than $10,000 or by imprisonment for not more than 2 years, or by both such fine and imprisonment.

SEC. 3. As used in this joint resolution, the term "United States" includes the Territories and possessions of the United States.

Mr. Speaker, you will note that subsection (3) of section 1, of each resolution exempts any reduction of exports into the Dominion of Canada from this country below amounts conforming with the voluntary import reduction program heretofore undertaken by the Canadian authorities and Canadian industry.

I have a number of reasons for suggesting that exemption. For your reference, may I say that I quoted the press release from the Department of Commerce issued on January 2 as to this voluntary reduction. Again, you will find it at page 329 of the RECORD, January 19.

Substantially, it is an agreement to reduce on the part of industry in Canada its imports of finished kerosene, stove oil, furnace oil, and Diesel oil from this country to 50 percent or less of the monthly average of imports in the first quarter of 1947. While the announcement made it clear that the current program would merely run through the month of January, I have been reliably informed that the Canadian industry is now in session in an effort to continue, and perhaps even lessen, their requests for these types of oils during February and March.

Therefore, it is my contention that if our neighbors in Canada, where conditions, so far as temperature and snow are concerned, are at least comparable, if not more severe, than prevailing conditions in New England and the northern part of the United States, can join hands with us to help relieve the desperate situation in this country, there is every reason to believe that the other friendly countries to which we propose to export substantial quantities of needed fuels would do as much, had they been requested. Since the Department of Commerce has, at various times, indicated a doubt as to what this Congress intended in legislation to which I shall refer later, and since during the testimony Monday it was stated repeatedly that the legislation was construed to give only a "permissive" authority to the Department, I submit that no time should be lost in declaring at least an emphatic statement of congressional intention in terms of existing conditions.

I must add that I do have some reservation as to whether more cannot be accomplished through negotiations between our officials and our industry and the Canadian officials and their industry. Evidence developed before the House Committee on Interstate and Foreign Commerce in December 1947 indicated an increase over 1946–47 of exports of oil to Canada of approximately 385 percent. It is further my understanding from the testimony before the committee last Monday that the oil shipped through the Portland (Maine)-Montreal pipe line is not included in our export data; that it is considered in transit from South America to Canada. I know it is the intention of the House Interstate and Foreign Commerce Committee to obtain much more information as to the facts, but I do feel that we would be fully justified in exempting exports to the Dominion of Canada from any such resolution in view of their friendly initiative and efforts to assist us.

Next, I want to call your attention to the fact that this first resolution is keyed to the Canadian effort and is restricted to a period of 60 days. It is intended to tie the legislation directly into the quota program so that there can be no misunderstanding.

Finally, you will find in each of the resolutions that exports necessary for use by the armed forces of the United States may be made.

There still remains a great deal of doubt about the facts justifying the apparent allotment of 2,025,000 barrels of this particular fuel for Japan and the Ryukyus. The justification should be carefully examined.

Next, turning to the second resolution, a different approach is taken, but basically it rests upon the assertion frequently made that we have been historically the suppliers to many of our neighboring countries and that if we were to place even a limitation on the amounts of fuel oil shipped to them it would create a very delicate and dangerous situation. I understand such proposals have been characterized as silly.

In reply to that, it seems to me self-evident that these very countries are most anxious that the United States should remain at its full productive capacity and that they would gladly join with us, as Canada has, in trying to bring that about. The news today of the shut-down in the Detroit area simply points up similar desperate conditions in other localities which have not received wide notice. I do not know what the loss of production over the entire country in January has been, but I submit that any loss is unfortunate in this sense.

Moreover, I do not believe our friends in these other countries want to see the working men and women of America injured in terms of loss of work and wages. I think it is silly in the extreme to argue that the people of these countries would not be willing to share any shortages with us, and work out on a cooperative basis a program such as is suggested in these resolutions.

To go back to the second resolution, there are two methods of approach. I have suggested that wherever any foreign country on this allocation program actually imported any of these products from the United States in the period between 1935 and 1940, both inclusive, then the same rule should apply—50 percent reduction in the allocations for 60 days—in other words, one-twelfth of the average monthly amount exported to those countries during that period.

However, you will note that the resolution as phrased would have the effect of completely prohibiting any exports of these desperately needed fuels to any country which, in fact, cannot demonstrate that we were historically a supplier in this period. In other words, it would result in an embargo, so far as new postwar customers are concerned.

Let me add that it is my understanding that up to a few weeks ago, the only screening undertaken by our Government was by approving requests of "end users" relayed to us by the representatives of the sovereign governments involved. Reference has been made during testimony that the "end users" submitted their requirements and that it was presumed that their governments had checked against the necessity of these requirements. That may be so, but I rather suspect that the gentlewoman from Ohio, having sat, as she has now for several days, on the proposed European aid program, will agree with me that the history of the written requirements submitted by the sixteen nations was indicative of the desire to get more than perhaps was necessary and that they would accept a substantial reduction upon the suggestion from American officials.

I have no pride of authorship of these resolutions. As a matter of fact many of my colleagues, who feel as I do, joined with me and have made very constructive suggestions. I think the resolutions probably can be improved. I shall be glad to accept any suggestions from anybody; but I do submit that the time has come, the time is now, when, if we are going to be as productive as we must be, if we are going to carry out the promises we say we should undertake, we must turn our eyes and our attention to the only great source outside of Canada in this world today for the things the people in the other democratic nations say they need. I have to discharge my responsibility to the people of my district. I hope those of you who represent people in other districts who are old, who are sick, who are young, who are suffering, who are out of work will look into this matter carefully.

It is my intention tonight to propose further references to significant testimony presented to the House Committee on Interstate and Foreign Commerce last July, last December, to the Committee resolution of December 19, and to evidence during the current hearings. If you do not have a copy of the Preliminary Report of the Committee, committed to the Committee of the Whole House on the State of the Union and ordered printed January 26, I suggest you will find it a most helpful document. It is Report No. 1270, Eightieth Congress, second session.

The SPEAKER. Under a previous order of the House, the gentleman from Wisconsin [Mr. BYRNES] is recognized for 10 minutes.

SPECULATION BY FEDERAL EMPLOYEES

Mr. BYRNES of Wisconsin. Mr. Speaker, we have been shocked by the recent revelations concerning the scope of speculation in commodities by employees in the Federal Government. We have been shocked, not because these employees have engaged in illegal activities in any form under our present statutes and not because we feel that speculation in the commodity markets is evil, per se, but because of the flagrant disregard of an ethical code which most of us had taken for granted.

We contend, and I believe I speak for the vast majority of the Members of this body, that everyone shall have the opportunity in this country to make a profit so long as he is willing to compete within the law on an equal basis with everyone else. What shocks us is that persons who are in a position to obtain information because of their Federal jobs which is not freely available to everyone else have seen fit to violate an unwritten law which says that personal profit, or the speculation for personal profit, shall be denied to anyone who might possibly have such information because of his acceptance of Federal responsibility.

It boils down, then, not to the question of whether or not such individuals actually made a profit, nor to a question as to whether they actually sought information which might help them make a profit, but to the basic question, "Did these individuals, while holding Federal jobs, enter the commodity markets for the purpose of making money?" If they did, they stand convicted of a strange sense of personal ethics, of breaking, to our shock and sorrow, a well-understood but unwritten law, and of lowering the faith of our citizenry in the Government which these individuals have sworn to support.

I need not discuss here today the strange sense of ethics which permits Edwin Pauley to display extensive charts showing his huge and detailed speculative activities during years when he held responsible, top-ranking, Presidential appointments. A recent editorial in the Washington Post states very well the incongruity of the position of Pauley and other inside speculators who attempt to defend or dismiss lightly their speculations. I quote from the editorial:

> There are three arguments against speculation by Government employees so obvious that they ought to be comprehensible even to so stubborn a mind as Ed Pauley's: (1) A man engaged in speculation is not a man devoting his whole time and attention to his job; (2) a man engaged in speculation cannot have that disinterestedness which is indispensable to the proper formulation or discharge of Government policy; (3) a man engaged in speculation cannot enjoy the confidence of his colleagues since they can never be sure that he will not take advantage of some casual remark, some casual revelation about departmental affairs. A man may be completely honorable but he still does not belong in the Government if he speculates any more than an honorable judge belongs on the bench in a case concerning which he might be biased or have an interest.

Let us apply these standards to another Federal employee who recently was revealed by the Secretary of Agriculture as having speculated in grain during the period from January 1, 1946, to December 15, 1947. He is Winthrop G. Brown, at present Chief of the Division of Commercial Policy in the Department of State. According to the Associated Press, Mr. Brown when questioned as to his appearance on the list, protested as follows:

> Winthrop G. Brown told a reporter he made about $2,715 in grain trading from April 1945 to May 1946.
>
> He said he had nothing whatever to do with determining when to buy or sell, leaving this in the hands of an investment counselor in New York.
>
> Brown added that at no time did he have any inside information. Nor did he attempt to advise his counselor in any way.

From the ethical point of view, these protestations fall flat. To my mind, it is of small importance whether Mr. Brown made or lost a small or a huge amount of money in grain speculation; it is of small importance how his speculative accounts were handled whether by himself or by his investment counselor; it is of small importance whether he actually advised his counselor or not.

What is of paramount importance is this: Mr. Brown did speculate. Mr. Brown is a responsible employee of the Federal Government. Mr. Brown, by his action, has seriously impaired the confidence of the people and of this Congress in his moral standards, and has contributed materially to a feeling of no confidence in the Federal Government itself.

Mr. Brown did speculate; he admits that. What is Mr. Brown's record of Federal employment? The Library of Congress has supplied me with this in-

formation concerning his record since 1941:

Winthrop Gilman Brown: Attorney, Lend-Lease Administration, June–November 1941; executive officer, Harriman Mission and Mission for Economic Affairs, London, 1941–45; appointed Chief, Division of Commercial Policy, Department of State (P–8, annual salary, $8,750), July 26, 1945; Chairman, Trade Agreements Committee, 1945—; member, Committee for Reciprocity Information, 1945—.

Mr. Brown did speculate. Mr. Brown has been a Federal employee almost continuously since 1941. Was Mr. Brown ever in a position to obtain information that might contribute to his success in commodity market speculation?

Let us look at the record. His only admitted speculation is between the dates April 1945 and May 1946. If that is his only speculation in commodities, was he ever in a position during that time to obtain inside information, which he claims he did not have at any time?

During that period, Mr. Brown was not only Chief of the Commercial Policy Division, but he was chairman of the Trade Agreements Committee, and a member of the Committee for Reciprocity Information.

According to the Congressional Directory, the Division of Commercial Policy "has responsibility for the formulation, coordination, and maintenance of the international commercial policy of the United States, and action in regard to protection and promotion of American foreign trade—on a basis of private enterprise; elimination of international discriminatory trade practices; and general promotion of multilateral world trade."

Here then is a man who has the responsibility for the formulation of the international commercial policy of the United States who speculated while holding that responsibility and who now claims that at no time, did he have any inside information. If he had no inside information concerning every facet of our domestic economy and of the general world situation, he was remiss in his duties as Chief of his Division. If he did, he either tells an untruth, or he has been misquoted by one of our major news services.

Further than this, however, Mr. Brown was a member, during this time, of the Committee for Reciprocity Information. This committee, formed to carry out section 4 of the Reciprocal Trade Act, receives the views of interested parties in any foreign trade agreement. According to the Congressional Directory, it "may receive information on any phase of the trade-agreements program, whether relating to the operation of an agreement already made or to one under consideration."

Thus, the scope of the work of this committee is almost unlimited and may cover any segment of our industrial or agricultural life. It deals intimately with supply and demand and costs of production. Is it ethical for a man on this committee to speculate in the commodity market for the purpose of making a personal profit?

Further than this, Mr. Brown is chairman of the trade agreements committee. The report of the majority—a Democratic majority—of the Ways and Means Committee on the extension of foreign trade agreements on May 18, 1945, had this to say about the scope of the trade agreements committee's information:

The Department of Commerce's full resources are utilized. * * * The Department of Agriculture, through its representatives on all committees, furnishes full information and advice on all items pertaining to both imports and exports of agricultural products. * * * The Treasury Department supplies information and advice on all items pertaining to its field of interest—

And so forth. As chairman of this committee, Mr. Brown had complete charge of the negotiations at Geneva which resulted in a general lowering of agricultural tariffs, and he is, in fact, the man who signed the final agreements for the United States. These negotiations began in April of 1947. According to Assistant Secretary of State Thorp, the initiative for beginning these negotiations were undertaken by the United States in late 1945. Suffice to say, the chairman of this trade agreements committee would be remiss in his duty if he did not have every scrap of information he could get his hands on concerning supply, demand, and costs of production, both present and future, of every agricultural and industrial product produced in this country. He would be remiss if he did not know what foreign supply and demand was likely to be. But, further than this, he must, by the very nature of his work, have been in a position to judge accurately what the rates of duty on hundreds of agricultural products were going to be after January 1, 1948. If this does not constitute inside information, then I believe Mr. Brown owes us his personal explanation of what constitutes inside information. The fact that the rates of duty on wheat, barley, cereals, butter, and a great many other products were considerably lowered by the trade agreements committee in its negotiations with other powers enters into this discussion only to point up the fact that a wide and definite knowledge of these commodities must have been made available to the chairman of this committee.

One other comment on the inside character of Mr. Brown's information. In order that the Ways and Means Committee could intelligently study the operation of the reciprocal trade agreements, it was necessary for them to pass a resolution requesting the Secretary of State to furnish pertinent information concerning the agreements to the committee. Such information had previously been refused point-blank. The Ways and Means Committee, further, on occasion has asked the Tariff Commission for information about its own work, and it has replied that it was not permitted by the State Department to release such information. Does Mr. Brown refuse to classify this information—to which he must have access by nature of his work—as inside information?

The plain facts of this whole matter are: Mr. Brown did speculate. He speculated while he was a Federal employee. His Federal position gave him access to information which was not only inside, but which has been refused to the Congress of the United States. It is up to the President to judge whether this man has the high moral qualifications necessary for a position of grave importance. It is up to the Congress to determine whether we shall permit, under law, such a lack of moral responsibility in our public servants.

I believe Mr. Brown should either explain himself to the full satisfaction of the American people, or should resign, or should be removed from office.

For what they are worth, I offer the information contained in these remarks to the Select Committee Studying Speculation, and to its distinguished chairman, the gentleman from Minnesota.

ENROLLED BILLS SIGNED

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H. R. 2361. An act to authorize the filing of actions in State courts to quiet title to lands described in a treaty between the United States and the Delaware Indians, dated October 3, 1818.

H. R. 3153. An act to provide for the sale or other disposal of certain submarginal lands located within the boundaries of Indian reservations in the States of Montana, North Dakota, and South Dakota.

H. R. 3322. An act to facilitate rights-of-way through restricted Osage Indian land, and for other purposes.

H. R. 3326. An act to provide for the granting of certificates of competency to certain members of the Osage Indian Tribe in Oklahoma, and for other purposes.

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1100. An act for the relief of Frankie Stalnaker.

ADJOURNMENT

Mrs. BOLTON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 34 minutes p. m.) the House adjourned until tomorrow, Friday, January 30, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1261. A letter from the President, Board of Commissioners, District of Columbia, transmitting the Twelfth Semiannual Report of the Administrator of Rent Control, for the period July 1, 1947, to December 31, 1947; to the Committee on the District of Columbia.

1262. A letter from the President, Board of Commissioners, District of Columbia, transmitting a draft of a proposed bill to provide that children be committed to the Board of Public Welfare in lieu of being committed to the National Training School for Girls, that the property and personnel of the National Training School for Girls be available for the care of children committed to or accepted by the Board of Public Welfare, and for other purposes; to the Committee on the District of Columbia.

1263. A letter from the Acting Comptroller General of the United States, transmitting the report of the Comptroller General of the United States of the work of the General

Accounting Office for the fiscal year 1947; to the Committee on Expenditures in the Executive Departments.

1264. A letter from the assistant to the Attorney General, transmitting a draft of a proposed bill to authorize the transfer to the Attorney General of a portion of the Vigo plant, formerly the Vigo Ordnance, near Terre Haute, Ind., to supplement the farm lands required for the United States prison system; to the Committee on Expenditures in the Executive Departments.

1265. A letter from the President, Capital Transit Co., transmitting a report covering operations of Capital Transit Co. for the calendar year 1947, with balance sheet as of December 31, 1947; to the Committee on the District of Columbia.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BISHOP: Joint Committee on the Disposition of Executive Papers. House Report No. 1277. Report on the disposition of certain papers of sundry executive departments. Ordered to be printed.

Mr. BISHOP: Joint Committee on the Disposition of Executive Papers. House Report No. 1278. Report on the disposition of certain papers of sundry executive departments. Ordered to be printed.

Mr. VAN ZANDT: Joint Committee on the Observance and Celebration in Cuba of the Fiftieth Anniversary of American and Cuban Victories in the War With Spain. Report pursuant to House Concurrent Resolution 108, Eightieth Congress without amendment (Rept. No. 1285). Referred to the Committee of the Whole House on the State of the Union.

Mr. FELLOWS: Committee on the Judiciary. H. R. 1878. A bill to amend the immigration laws to deny admission to the United States of persons who may be coming here for the purpose of engaging in activities which will endanger the public safety of the United States; with an amendment (Rept. No. 1286). Referred to the House Calendar.

Mr. MILLER of Connecticut: Committee on Interstate and Foreign Commerce. H. R. 4427. A bill to provide basic authority for the performance of certain functions and activities of the Department of Commerce, and for other purposes; with amendments (Rept. No. 1287). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FEIGHAN: Committee on the Judiciary. H. R. 332. A bill for the relief of Jacob A. Johnson; with an amendment (Rept. No. 1279). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 1733. A bill for the relief of G. C. Hedrick; with an amendment (Rept. No. 1280). Referred to the Committee of the Whole House.

Mr. CASE of New Jersey: Committee on the Judiciary. H. R. 1780. A bill for the relief of the Cannon Valley Milling Co.; without amendment (Rept. No. 1281). Referred to the Committee of the Whole House.

Mr. CASE of New Jersey: Committee on the Judiciary. H. R. 2136. A bill for the relief of Mrs. Martha W. Johnson; with an amendment (Rept. No. 1282). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 2433. A bill for the relief of the legal guardian of Joseph DeSouza, Jr.; with an amendment (Rept. No. 1283). Referred to the Committee of the Whole House.

Mr. FEIGHAN: Committee on the Judiciary. H. R. 4400. A bill for the relief of Ben Grunstein; with amendments (Rept. No. 1284). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ENGEL of Michigan:

H. R. 5172. A bill to reduce individual income-tax payments, and for other purposes; to the Committee on Ways and Means.

By Mr. FARRINGTON:

H. R. 5173. A bill to amend section 203 of the Hawaiian Home Commission Act, designating certain public lands available home lands; to the Committee on Public Lands.

H. R. 5174. A bill to authorize Commodity Credit Corporation to make adjustment payments to certain producers of raw cane sugar in Puerto Rico and Hawaii; to the Committee on Banking and Currency.

H. R. 5175. A bill to confirm and ratify Act 205 of the Session Laws of 1947 of the Territory of Hawaii, relating to the issuance of public-improvement bonds; to the Committee on Public Lands.

By Mr. KEARNEY:

H. R. 5176. A bill to amend section 603 (a) of title VI of the National Housing Act, as amended; to the Committee on Banking and Currency.

By Mr. NODAR:

H. R. 5177. A bill to reduce postage rates on parcels containing food, clothing, or medicines mailed to certain foreign countries; to the Committee on Post Office and Civil Service.

By Mr. PRESTON:

H. R. 5178. A bill to provide for assistance by the Federal Government in the repair of damage caused by erosion by waves and currents to the shores of the county of Chatham, State of Georgia, and in the prevention of future damage to such shores; to the Committee on Public Works.

By Mr. TALLE:

H. R. 5179. A bill to extend the life of the Commodity Credit Corporation and to extend certain provisions affecting the price-support program for agricultural commodities; to the Committee on Banking and Currency.

By Mr. McCORMACK:

H. R. 5180. A bill to increase the amount of Federal aid to State or Territorial homes for the support of disabled soldiers and sailors of the United States; to the Committee on Armed Services.

By Mr. ANDREWS of New York:

H. R. 5181. A bill to authorize the Secretary of the Army to exchange certain property with the city of Kearney, Nebr.; to the Committee on Armed Services.

H. R. 5182. A bill to authorize the President to permit nationals of other nations to receive instruction and training in schools, training establishments, ships, units, and other installations maintained or administered by the Department of the Army, the Department of the Navy, the Department of the Air Force, or the United States Coast Guard; to the Committee on Armed Services.

H. R. 5183. A bill to authorize the Secretary of the Army, the Secretary of the Navy, the Secretary of the Air Force, or the Secretary of the Treasury to accept and use gifts, devises, and bequests for schools, hospitals, libraries, cemeteries, and other institutions under the jurisdiction of the Department of the Army, the Department of the Navy, the Department of the Air Force, or the Department of the Treasury, respectively, and for other purposes; to the Committee on Armed Services.

By Mr. BEALL:

H. R. 5184. A bill to repeal the provision of the District of Columbia Appropriation Act, 1948, prohibiting free instruction in the public schools of the District of Columbia of pupils residing outside of the District; to the Committee on the District of Columbia.

By Mr. BRADLEY:

H. R. 5185. A bill to amend section 202 (c) (2) of the Social Security Act, as amended, so as to increase children's insurance benefits payable thereunder; to the Committee on Ways and Means.

By Mr. CORBETT:

H. R. 5186. A bill to adjust the compensation of postmasters, officers, and employees of the postal service; to the Committee on Post Office and Civil Service.

By Mr. FERNÓS-ISERN:

H. R. 5187. A bill to authorize Commodity Credit Corporation to make adjustment payments to certain producers of raw cane sugar in Puerto Rico and Hawaii; to the Committee on Banking and Currency.

By Mr. LEONARD W. HALL:

H. R. 5188. A bill to amend section 32 of the Trading With the Enemy Act; to the Committee on Interstate and Foreign Commerce.

By Mr. SADLAK:

H. R. 5189. A bill to provide for a research and development program in the Post Office Department; to the Committee on Post Office and Civil Service.

By Mr. SASSCER:

H. R. 5190. A bill to repeal the provision of the District of Columbia Appropriation Act, 1948, prohibiting free instruction in the public schools of the District of Columbia of pupils residing outside of the District; to the Committee on the District of Columbia.

By Mr. SMITH of Virginia:

H. R. 5191. A bill to authorize and direct the Secretary of the Interior to grant a right-of-way; to the Committee on Public Lands.

By Mr. HARLESS of Arizona:

H. R. 5192. A bill to amend the Contract Settlement Act of 1944 so as to authorize the payment of fair compensation to persons contracting to deliver certain strategic or critical minerals or metals in cases of failure to recover reasonable costs, and for other purposes; to the Committee on the Judiciary.

By Mr. KEATING:

H. R. 5193. A bill to amend the Nationality Act of 1940; to the Committee on the Judiciary.

By Mr. MULTER:

H. R. 5194. A bill granting exemption from income tax in the case of retirement, annuities, and pensions; to the Committee on Ways and Means.

H. R. 5195. A bill to amend the Surplus Property Act of 1944, as amended; to the Committee on Expenditures in the Executive Departments.

By Mr. MURRAY of Wisconsin:

H. R. 5196. A bill relating to the disposition of certain surplus property located outside the United States; to the Committee on Expenditures in the Executive Departments.

By Mr. HARDIE SCOTT:

H. R. 5197. A bill to amend the act of July 31, 1947, so as to extend the period during which actions or proceedings by the United States or any State or local public agency to recover possession of certain housing accommodations may not be maintained in cases of undue hardship to occupants; to the Committee on Banking and Currency.

By Mr. THOMPSON:

H. R. 5198. A bill authorizing preliminary examinations and surveys of the streams and their larger tributaries flowing through the Brazoria-Galveston soil-conservation district, the Trinity Bay soil-conservation district, the Coastal Plains soil-conservation district, and the Matagorda County soil-conservation district, in Texas; to the Committee on Public Works.

By Mr. WOLVERTON:

H. R. 5199. A bill to amend the Judicial Code in respect to the original jurisdiction of the district courts of the United States in certain cases, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H. R. 5200. A bill to amend section 32 of the Trading With the Enemy Act; to the Committee on Interstate and Foreign Commerce.

By Mrs. ROGERS of Massachusetts:

H. J. Res. 310. Joint resolution to temporarily prohibit the exportation of petroleum and petroleum products; to the Committee on Interstate and Foreign Commerce.

By Mr. HESELTON:

H. J. Res. 311. Joint resolution to place temporary restrictions on the exportation of certain petroleum products; to the Committee on Interstate and Foreign Commerce.

H. J. Res. 312. Joint resolution to place temporary restrictions on the exportation of certain petroleum products; to the Committee on Interstate and Foreign Commerce.

By Mr. JOHNSON of Texas:

H. J. Res. 313. Joint resolution to strengthen the common defense by continuing to maintain an adequate domestic rubber-producing industry; to the Committee on Armed Services.

By Mr. KERSTEN of Wisconsin:

H. Con. Res. 136. Concurrent resolution to refer the plight of Archbishop Stepinac to the United Nations; to the Committee on Foreign Affairs.

H. Con. Res. 137. Concurrent resolution to call a conference for the revision and strengthening of the United Nations Charter; to the Committee on Foreign Affairs.

By Mr. VAN ZANDT:

H. Con. Res. 138. Concurrent resolution relative to the expenses of a delegation to attend the ceremonies in Habana, Cuba, in connection with the observance of the fiftieth anniversary of the sinking of the United States battleship *Maine;* to the Committee on House Administration.

H. Con. Res. 139. Concurrent resolution providing for a joint session of the two Houses on Monday, April 19, 1948, in commemoration of the fiftieth anniversary of the victory over Spain; to the Committee on Rules.

H. Con. Res. 140. Concurrent resolution extending the life of the Joint Committee on the Observance and Celebration of the Victory Over Spain; to the Committee on Rules.

By Mr. COLE of New York:

H. Con. Res. 141. Concurrent resolution to authorize the National Academy of Sciences to report upon developments in the mathematical aspects of the apportionment problem as it affects the Congress of the United States; to the Committee on Post Office and Civil Service.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALBERT:

H. R. 5201. A bill to authorize the Secretary of the Army to convey by quitclaim deed certain mineral rights in certain lands situated in the State of Oklahoma to Alfred A. Drummond and Addie G. Drummond; to the Committee on Public Lands.

By Mr. BAKEWELL:

H. R. 5202. A bill for the relief of B. L. Pond (Ben Luke Pond); his wife, Mrs. B. L. Pond; and his minor son, David Pond; to the Committee on the Judiciary

By Mr. DINGELL:

H. R. 5203. A bill for the relief of Sgt. Ted G. Miodinski; to the Committee on the Judiciary.

By Mr. ELSAESSER:

H. R. 5204. A bill to authorize cancellation of deportation in the case of Anthony Consola; to the Committee on the Judiciary.

By Mr. FARRINGTON:

H. R. 5205. A bill for the relief of Mrs. Ling Shee Tai; to the Committee on the Judiciary.

H. R. 5206. A bill for the relief of Dementina Camara, Mary Kapola Kaleikini, and John Kaleikini, Jr.; to the Committee on the Judiciary.

By Mr. JAVITS:

H. R. 5207. A bill for the relief of James P. Kalogris; to the Committee on the Judiciary.

By Mr. JENNINGS:

H. R. 5208. A bill for the relief of Dimple Benoit; to the Committee on the Judiciary.

By Mr. THOMAS of Texas:

H. R. 5209. A bill for the relief of Alexander Stewart; to the Committee on the Judiciary.

By Mr. PRESTON:

H. R. 5210. A bill for the relief of the Reese & Argust Wrecking Co., Inc.; to the Committee on the Judiciary.

By Mr. REGAN:

H. R. 5211. A bill for the relief of Gregorio Abuan Dalao; to the Committee on the Judiciary.

By Mr. STANLEY:

H. R. 5212. A bill for the relief of James Alfred Beckett; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1222. By Mr. BUCK: Petition of Staten Island Women's Post, No. 1598, of the American Legion, urging the enactment of legislation establishing a system of universal military training; to the Committee on Armed Services.

1223. Also, petition of American Legion Auxiliary, Washington Square Unit, No. 1212, New York City, containing the signatures of 26 residents of lower Manhattan, urging the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1224. Also, petition of American Legion Huttner-Pasqualini Post, No. 1367, signed by Robert J. Frey, adjutant, and 98 residents of Staten Island, N. Y., urging the enactment of legislation establishing a system of universal military training; to the Committee on Armed Services.

1225. By Mr. CROSSER: Petition of Ladislaus L. Szavi and 50 other residents of Cleveland, Ohio, urging universal military training; to the Committee on Armed Services.

1226. By Mr. FORAND: Resolution of Local 387, National Federation of Post Office Clerks, Providence, R. I., urging representatives in Congress of the United States to support all legislation designed to increase the basic salary of postal employees; to the Committee on Post Office and Civil Service.

1227. By Mr. HART: Petition of the New Jersey State Grange, relating to taxation of farmer cooperatives; to the Committee on Ways and Means.

1228. Also, petition of the New Jersey State Grange, urging that, in permitting shipments of farm machinery to other nations, careful consideration be given to the needs of agriculture in this country; to the Committee on Foreign Affairs.

1229. Also, petition of the committee on social education and action of the Synod of the Presbyterian Church in New Jersey, expressing opposition to the establishment of compulsory military training during peacetime; to the Committee on Armed Services.

1230. Also, petition of the board of directors of the New Jersey State Organization for Public Health Nursing, urging that all discriminatory taxes and restrictive legislation as would apply to fortified margarine be abolished; to the Committee on Ways and Means.

1231. Also, petition of 24 residents of Jersey City, N. J., urging the establishment of a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1232. By Mr. HESELTON: Petition of 29 residents of Cheshire and Pittsfield, Mass., favoring legislation establishing a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1233. By Mr. JENKINS of Pennsylvania: Petition of Mrs. A. Kollar, Unit 495, American Legion Auxiliary, Shickshinny, bearing signatures of 37 residents of Shickshinny, Pa., urging the enactment of legislation establishing a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1234. By Mr. KEARNEY: Petition signed by approximately 3,500 residents of the city of Gloversville and Fulton County, N. Y., requesting the Congress and our President to instruct our delegates to the United Nations to secure machinery to enforce world law in order more promptly and effectively to carry out the purposes of the United Nations Charter; to the Committee on Foreign Affairs.

1235. Also, petition of Francis G. Corneau and other residents of Schenectady County, N. Y., in support of legislation establishing a system of universal military training; to the Committee on Armed Services.

1236. Also, petition of S. E. Brande, adjutant, and members of Niskayuna Post, No. 1092, American Legion, Schenectady, N. Y., in support of legislation establishing a system of universal military training; to the Committee on Armed Services.

1237. Also, petition containing the signatures of 34 citizens of Indian Lake, Hamilton County, N. Y., in the Thirty-first Congressional District, advocating the enactment of a system of universal military training; to the Committee on Armed Services.

1238. Also, petition of Mrs. Eleanor M. Burton, unit legislative chairman, and members of American Legion Auxiliary Post, No. 578, Unadilla, N. Y., in support of legislation establishing a system of universal military training; to the Committee on Armed Services.

1239. By Mr. LEWIS: Petition of 61 residents of East Palestine and vicinity, circulated by George F. McBane Post, No. 31, American Legion, in support of legislation establishing a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1240. Also, petition of 13 residents of Powhatan Point, Ohio, circulated by Unit 228, American Legion Auxiliary, of Powhatan Point, for legislation establishing a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1241. By Mr. REGAN: Petition of Veterans of Foreign Wars of Texas, to amend the provisions of the Social Security Act in respect of benefits now denied dependent survivors of members of the armed forces who were insured when they entered the service; to the Committee on Ways and Means.

1242. By Mr. SMITH of Wisconsin: Petition of Frank Kresen Post, No. 24, of the American Legion, Lake Geneva, Wis., urging legislation to establish a system of universal military training; to the Committee on Armed Services.

1243. By the SPEAKER: Petition of W. E. Weaver, Ocala, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1244. Also, petition of Peter Turner, Miami, Fla., and others, petitioning consideration of

their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1245. Also, petition of Wayne B. Albers, West Palm Beach, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1246. Also, petition of West Palm Beach Townsend Club, No. 1, West Palm Beach, Fla., petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

1247. Also, petition of H. A. Harber, Miami, Fla., and others, petitioning consideration of their resolution with reference to endorsement of the Townsend plan, H. R. 16; to the Committee on Ways and Means.

REGULATION OF LOBBYING ACT

In compliance with Public Law 601, Seventy-ninth Congress, title III, Regulation of Lobbying Act, section 308 (b), which provides as follows:

(b) All information required to be filed under the provisions of this section with the Clerk of the House of Representatives and the Secretary of the Senate shall be compiled by said Clerk and Secretary, acting jointly, as soon as practicable after the close of the calendar quarter with respect to which such information is filed and shall be printed in the CONGRESSIONAL RECORD.

The Clerk of the House of Representatives and the Secretary of the Senate jointly submit their report of the compilation required by said law and have included all registrations and quarterly reports received for the fourth calendar quarter 1947.

To carry out the provisions of the Lobbying Act three forms were printed and used in making detailed statements (Form A), registrations (Form B), and filing quarterly reports (Form C).

Section 308 (b) requires the printing of information received and filed. Forms B and C, upon which this information was submitted, are reproduced as follows:

FORM B

REGISTRATION (IN DUPLICATE) WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES AND SECRETARY OF THE SENATE UNDER THE LOBBYING ACT

(Public Law 601, 79th Cong.)

Name _____

Business address _____

INFORMATION REQUESTED FROM PERSON REGISTERING

(1) The name and address of the person by whom employed:

(1) _____

(2) In whose interest he appears or works:

(2) _____

(3) The duration of such employment:

(3) _____

(4) How much he is paid and is to receive:

(4) _____

(5) By whom he is paid or is to be paid:

(5) _____

(6) How much he is to be paid for expenses:

(6) _____

(7) What expenses are to be included:

(7) _____

See Form C for quarterly report to be filed.

OATH OF REGISTRANT

[Omitted in printing]

FORM C

QUARTERLY REPORT OF PERSONS REGISTERING UNDER LOBBYING ACT TO BE FILED, IN DUPLICATE, WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES AND SECRETARY OF THE SENATE

(Public Law 601, 79th Cong.)

Name _____

Business address _____

INFORMATION REQUIRED IN QUARTERLY REPORT

Each such person so registering shall, between the 1st and 10th day of each calendar quarter, so long as his activity continues, file with the Clerk of the House of Representatives and Secretary of the Senate—

(1) A detailed report under oath of all money received and expended by him during the preceding calendar quarter:

(1) _____

(2) To whom paid:

(2) _____

(3) For what purposes:

OATH OF REGISTRANT FILING QUARTERLY REPORT

[Omitted in printing]

REGISTRATIONS

The following registrations were received for the fourth calendar quarter 1947, and filed, using Form B, with the Clerk of the House of Representatives and the Secretary of the Senate:

(NOTE.—In order to reduce space, the questions in Form B (see above) are not repeated. Only the answers to questions are printed and are indicated by numbers in parentheses.)

Babbitt, Elizabeth Clarke (Mrs. George Harris Babbitt), delegate, 1819 Wyoming Avenue NW., Washington, D. C. (1) Mrs. B. G. Shay, national president, Service Star Legion, Inc., 361 Indiana Avenue, St. Joseph, Mo., through the secretary. (2) In interest of service men and women and their families, Service Star Legion, Inc. (3) By appointment—usually for 1 year. (4) $25. (5) By the national president (through the secretary). (6) $25. (7) Stationery, books, transportation, postage, typing, etc.

Bargeron, Carlisle, Transportation Building, Washington, D. C. (1) Carrole B. Huntress. (2) National St. Lawrence project conference. (3) Indefinite. (4) For quarter, $2,800 and bonus of $800. (5) National St. Lawrence project conference. (6) Out of pocket. (7) [Blank.]

Bennet, William S., 44 Wall Street, New York, N. Y. (1) Forest Lumber Co., 1116 R. A. Long Building, Kansas City, Mo.; Algoma Lumber Co. in liquidation, care of Mr. George R. Birkelund, Baker, Fentress & Co., 208 South La Salle Street, Chicago 4, Ill.; Lamm Lumber Co., care of Mr. Ralph H. Case, Southern Building, Washington, D. C. (2) Same as No. 1. (3) The remainder of Eightieth Congress. (4) For services referred to in Public Law No. 601, Seventy-ninth Congress, not to exceed a contingent 10 percent. (5) Companies named in No. 1. (6) Amounts actually expended. (7) Ordinary expenses such as traveling, meals, hotel rooms, telegrams, telephone, and the like.

Black, Robert I., 232 Madison Avenue, New York, N. Y. Will advise Washington address as soon as office space obtained. (1) National Association of Magazine Publishers, Inc. (2) He is vice president of the NAMP. The member magazine publisher companies of the NAMP. (3) Permanent. (4) $12,500 per annum. (5) National Association of Magazine Publishers, Inc. (6) This amount can only be determined at the end of each quarter. (7) Necessary day-to-day operating expenses.

Bledsoe, Samuel B., 1730 I Street NW., Washington, D. C. (1) Selvage & Lee, 1 East Forty-third Street, New York, N. Y. (2) National Association of Margarine Manufacturers. (3) Indefinite. (4) $1,500 monthly. (5) National Association of Margarine Manufacturers. (6) Actual out-of-pocket expenditures. (7) Hotels, meals, taxis, travel, mimeographing, and distribution costs, entertainment, and miscellaneous.

Blumberg, Samuel, 200 Fifth Avenue, New York, N. Y. (1) Cigar Manufacturers Association of America, Inc., 350 Fifth Avenue, New York, N. Y. (2) Cigar Manufacturers Association of America, Inc. (3) I have been under retainer as general counsel to the above association for many years; the arrangement expires at its annual meeting in January of each year. (4) As general counsel I represent the association in all of its matters and receive a fee of $15,000 per annum, plus expenses. (5) Cigar Manufacturers Association of America, Inc. (6) All expenses. (7) Traveling expenses, long distance calls, and miscellaneous office disbursements.

Bradley, Otis T., 15 Broad Street, New York, N. Y. (1) Guaranty Trust Co. of New York as trustee of the several trusts described as the Frances G. Phipps trust, Herbert Sanford Ward trust, Sarita E. Barclay trust, and Colville Herbert Sanford Barclay trust, under indenture dated December 24, 1913, and various indentures supplemental thereto made by Charles H. Sanford, 140 Broadway, New York, N. Y. (2) The trustee named in (1). (3) The employment is for the purpose of attempting to secure an amendment to the Federal Gift Tax Acts involving gifts in trust, and the effect for gift-tax purposes of the surrender by the grantor of a retained power to alter the disposition of the property but not in any way beneficial to himself, and the employment is expected to continue until such amendment is either secured or rejected. (4) Registrant is a member of the law firm of Davis, Polk, Wardwell, Sunderland & Kiendl, which firm may receive compensation for my services from Guaranty Trust Co. as trustee at the customary rates for professional services charged. (5) The trustee named in (1). (6) The firm of Davis, Polk, Wardwell, Sunderland & Kiendl will be reimbursed for out-of-pocket expenses incurred by me in connection with the aforesaid amendment. (7) The usual and normal expense items, such as, for example, traveling expenses, telephone and telegraph charges, printing, etc.

Burke, William R., Southern California Committee on Displaced Persons, 215 West Seventh Street, Los Angeles, Calif. (1) Citizens Committee on Displaced Persons, 39 East Thirty-sixth Street, New York, N. Y. (2) The above committee. (3) Terminable at will. (4) $460 per month plus reimbursement of actual out-of-pocket expenses. (5) Citizens Committee on Displaced Persons. (6) Actual amount of out-of-pocket expenses. (7) To include such items as railroad fare, travel subsistence, and telephone and telegraph tolls.

Clorety, Joseph A., Jr.,[1] American Veterans Committee, 1200 I Street, NW., Washington, D. C. (1) American Veterans Committee, Inc. (2) Above organization. (3) At will. (4) $5,600 per annum for performance of all duties as national secretary of organization. Activities under the Lobbying Act constitute no more than 25 percent of these duties. (5) American Veterans Committee,

[1] Registration with the Secretary only.

Inc. (6) Variable. (7) Taxis, occasional lunch.

Coles, Marvin J., 813 Washington Building, Washington, D. C. (1) New York Freight Forwarders and Brokers Association, and members thereof, New York, N. Y. (2) New York Freight Forwarders and Brokers Association. (3) Employment is for an indefinite period. (4) Registrant will receive a retaining fee of $2,500. (5) New York Freight Forwarders and Brokers Association. (6) Registrant will be reimbursed for out-of-pocket expenses. (7) Usual and normal expense items, such as traveling expense, telephone and telegraph charges, taxis, printing, etc.

Cortright, Frank W., 1028 Connecticut Avenue NW., Washington, D. C. (1) National Association of Home Builders. (2) Said association. Registrant has been advised by counsel that he is not subject to the Lobbying Act. This registration is therefore filed under protest and merely as a matter of personal precaution in view of the indefiniteness of said act and the lack of judicial interpretation thereof. It does not in any way constitute an admission by registrant that he is subject to the act. (3) Indefinite. (4) $17,500 a year as salary, plus $7 per diem plus out-of-pocket expenses as indicated below. Said payments are for general services as executive vice president of the association and are not dependent upon rendition of services which might be considered lobbying. (5) National Association of Home Builders. (6) Actual out-of-pocket expenses. (7) Travel, telephone, taxicabs, lunches, etc.

Cox, Langford, Stoddard & Cutler, 1210 Eighteenth Street NW., Washington, D. C. (1) Publicker Industries, Inc., 1429 Walnut Street, Philadelphia, Pa. (2) Same. (3) Indefinite. (4) Not fixed; to be determined on the basis of legal services rendered. (5) Publicker Industries, Inc. (6) Not fixed. (7) Normal disbursements only, such as taxis, long-distance telephone calls, telegrams, mimeographing, etc.

Davis & Gilbert, a partnership consisting of A. M. Davis and A. M. Gilbert, 1 East Forty-fourth Street, New York, N. Y. (1) The Best Foods, Inc., 88 Lexington Avenue, New York, N. Y. (2) The Best Foods, Inc. (3) We are not employed specifically for the purposes set forth in the first sentence of section 308 (a), Public Law 601, Seventy-ninth Congress. We are paid a yearly retainer for acting as legal counsel for the above-named company, and as such counsel we may, from time to time, be called upon to present the cause of the company in respect to legislation affecting its business. Such activity, if any, would constitute only an incidental and minor part of our duties. (4) Our retainer as legal counsel is $35,000 per year, plus necessary expenses and disbursements. We are not paid specifically for engaging in any activities which might come within the purview of Public Law 601. We have been receiving this retainer in monthly payments for many years and have continued to receive it during the entire period since the effective date of Public Law 601, but to date we have not engaged in any activities encompassed by said law. (5) The Best Foods, Inc. (6) Expenses incurred by the registrant law firm and by any member or associate thereof on behalf of said company. No such expenses have thus far been incurred in connection with activities within the scope of Public Law 601. (7) See (6) above.

Downs, Thomas J., 1625 K Street NW., Washington, D. C. (1) Citizens Committee on Displaced Persons, 39 East Thirty-sixth Street, New York, N. Y. (2) The above committee. (3) Terminable at will. (4) $1,500 per month plus reimbursement of actual out-of-pocket expenses. (5) Citizens Committee on Displaced Persons. (6) Actual amount of out-of-pocket expenses. (7) To include such items as railroad fare, travel subsistence, and telephone and telegraph tolls.

Downs, Thomas J., Commonwealth Building, 1625 K Street NW. (1) Fur industry, through Associated Fur Coat and Trimming Manufacturers, 393 Seventh Avenue, New York, N. Y. (2) Same. (3) Until December 1, 1948. (4) $10,000 per annum as a retainer as Washington counsel on all matters affecting the economic and legal welfare of the industry plus a fee of $15,000 in the event excise tax on furs is cut from 20 percent to 10 percent plus an additional fee of $25,000 in the event the entire excise tax on furs is repealed on or before July 1, 1948. (5) Fur industry, through Associated Fur Coat and Trimming Manufacturers. (6) Actual amount of out-of-pocket expenses. (7) Actual amount of out-of-pocket expenses for railroad fare, travel sustenance, telephone, and telegraph tolls.

Ellison, Newell W., 701 Union Trust Building, Washington, D. C. (1) Ray W. Britton, 1416 Cherry Street, Erie, Pa. (2) See No. (1). (3) Indefinite. (4) No fee yet determined. (5) See No. (1). (6). Not yet determined. (7) Usual disbursements customary in legal work.

Ferguson, John H., Empire State Building, New York, N. Y. (1) Committee for the Marshall Plan To Aid European Recovery. (2) In behalf of the committee named above. (3) Up to 6 months. (4) $1,000 a month beginning December 1, 1947. (5) Committee for the Marshall Plan To Aid European Recovery. (6) Out-of-pocket expenses. (7) Typical expenses, such as travel, meals, telegrams, etc.

Fort, J. Carter (amended registration), 929 Transportation Building, Washington, D. C. This is a supplement to the registration (Form B) filed by registrant on December 18, 1946, for the purpose of bringing up to date the information therein shown. With respect to item (2), rider A, of said registration: The director of the bureau of railway economics is now also a vice president of the Association of American Railroads. The public-relations work of the association has been placed in a separate department, headed by a vice president. An assistant general counsel has been added to the staff of the law department. With respect to item (4) of the registration: The compensation there shown has been increased by $10,000 per year effective January 1, 1948.

Fort, Josiah, 1424 K Street NW., Washington, D. C. (1) Tobacco Association of United States, Greenville, N. C. (2) American tobacco-exporting trade. (3) Present year's contract expires April 15, 1948. (4) $10,000 per year salary and actual expenses. (5) Tobacco Association of United States. (6) Actual only. (7) Transportation and incidental.

Foster, Charles E., 1701 Eighteenth Street NW., Washington, D. C. (1) Disabled American Veterans, 1701 Eighteenth Street NW., Washington, D. C. (2) In the interest of service-connected disabled American war veterans and their dependents. (3) Indefinite. (4) $4,500 per annum; 10-percent bonus. (5) Disabled American Veterans. (6) Any expense incurred (see No. (7)). (7) Taxis, lunches, and other expenses incidental to work at the Capitol; also actual traveling expense.

Francis, Joseph H., Morgan, Utah. (1) National Board of Fur Farm Organizations. (2) National fur farming industry. (3) Employed on a yearly basis from August to August of each year. (4) Annual salary of $12,000. This represents full salary for acting as executive secretary of the organization; attending to legislative matters is only a small percent of the duties. (5) National Board of Fur Farm Organizations. (6) Necessary traveling expenses. (7) Travel and lodging.

Gerrity, Harry J., Hill Building, Washington, D. C. (1) Oregon-Washington Bridge Co., Security Building, Olympia, Wash. (2) Same. (3) Remaining session of Eightieth Congress. (4) $2,500; paid January 2, 1948. (5) Oregon-Washington Bridge Co. (6) No specific amount. (7) Expenses customary in legal work, outside of office and overhead expenses.

Glazier, William, 930 F Street NW., Washington, D. C. (1) National Union of Marine Cooks and Stewards, CIO, 86 Commercial Street, San Francisco, Calif. (2) The membership of the National Union of Marine Cooks and Stewards. (3) Indefinite. (4) No salary or personal expenses. Receive $100 a month for office expenses. (5) Office expenses of $100 a month paid by the National Union of Marine Cooks and Stewards. (6) See 4. (7) See 4.

Graham, Chester A., 2111 Florida Avenue NW., Washington, D. C. (1) Friends Committee on National Legislation. (2) Friends Committee on National Legislation. (3) December 1947 to May 1, 1948. (4) $333 per month, on the basis of $4,000 a year. (5) Friends Committee on National Legislation. (6) Refund of actual expenses incurred. (7) Railroad and other transportation together with lodging and meals when on field trips or committee business, telephone calls, taxis. Field trips are for keeping the Society of Friends and others aware of legislative developments, urging a generous program of aid for world recovery, and defeat of universal military training.

Haas, John A., 1731 I Street NW., Washington, D. C. (1) Same as original. (2) Same as original. (3) Same as original. (4) $6,500 per year. (5) Same as original. (6) Same as original. (7) Same as original.

Haddon, George A., Police Pension Fund, 420 City Hall Annex, Philadelphia, Pa. (1) Philadelphia Police Pension Fund Association. (2) Philadelphia Police Pension Fund Association. (3) Indeterminate. (4) Expenses only. (5) Philadelphia Police Pension Fund Association. (6) Approximately $100 per week while in Washington, D. C. (7) Fares, hotels, meals, taxis, etc.

Hart, Stephen H., 350 Equitable Building, Denver, Colo. (1) National Livestock Tax Committee. Employed not for lobbying but for services as tax expert drafting tax legislation and explaining tax problems of livestock industry—appearing before House and Senate committees and Bureau of Internal Revenue. (2) American National Livestock Association, National Woolgrowers' Association, and various State cattle and sheep associations. (3) Indefinite. (4) $50 per day at my office; $100 per day out of town. (5) National Livestock Tax Committee. (6) Actual out-of-pocket expenditures. (7) Transportation, meals, hotel, telephone, mimeographing, etc.

Hays, William J., 902 Twentieth Street NW., Washington, D. C. (1) Martin Popper. (2) Aivah Bessie, Herbert Biberman, Lester Cole, Edward Dmytryk, Ring Lardner, Jr., John Howard Lawson, Albert Maltz, Samuel Ornitz, Adrian Scott, Dalton Trumbo. (3) Two weeks. (4) $466.76. (5) Martin Popper. (6) Amount necessary to cover items under (7). (7) Telephone calls, taxicabs fares, and other incidentals.

Hester, Ewart A., 432 Shoreham Building, Washington, D. C. (1) The law offices of Clinton M. Hester. (2) The law offices of Clinton M. Hester (see attached statement[2]). (3) Annual basis. (4) $10,000 per annum. (5) The law offices of Clinton M. Hester. (6) All necessary expenses. (7) Usual expenses—travel, telephone, etc.

Holman, Charles W., 1731 I Street NW., Washington, D. C. (1) Same as original. (2) Same as original. (3) Same as original.

[2] Not printed. Filed in the Clerk's office.

(4) $16,500. (5) Same as original. (6) Same as original. (7) Same as original.

Hosking, Floyd J., 1329 E Street NW., Washington, D. C. (1) Corn Industries Research Foundation, 3 East Forty-fifth Street, New York, N. Y. (2) Corn Industries Research Foundation. (3) Continuously since May 1936. (4) Compensation for legislative activities not determined. (5) Corn Industries Research Foundation. (6) No specific sum authorized. (7) Actual expenses necessarily incurred.

Huff, George B., secretary, the Indiana Tax Equality Committee, Inc., 38 North Pennsylvania Street, Indianapolis, Ind. (1) The Indiana Tax Equality Committee, Inc. (2) The Indiana Tax Equality Committee, Inc., which committee is composed of and represents businessmen and firms in all lines in Indiana in an effort to further equality of taxation among competing businesses. (3) From November 10, 1947, to indefinite. (4) Expense reimbursement only. (5) The Indiana Tax Equality Committee, Inc. (6) Reimbursement for all expenses incurred on behalf of committee. (7) Hotels, meals, automobile, and all other living and travel expenses incurred in service on behalf of committee.

Huntress, Carroll B., vice president, Republic Coal & Coke Co., 17 Battery Place, New York City. (1) Acting as chairman for National St. Lawrence Project Conference, 843 Transportation Building, Washington, D. C. (2) National St. Lawrence Project Conference, without compensation, but with reimbursement for expenses for travel, hotel, postage, and long distance telephone calls for New York office. (3) Indefinite. (4) [Blank.] (5) [Blank.] (6) [Blank.] (7) These are for travel and hotel expenses, postage, and long distance telephone service. See (2).

Hyman, Joseph B., 215 North Pitt Street, Alexandria, Va. (1) Publicker Industries, Inc., 1429 Walnut Street, Philadelphia, Pa. (2) Same. (3) Indefinite. (4) Not fixed; to be determined on the basis of legal services rendered. (5) Publicker Industries, Inc. (6) Not fixed. (7) Normal disbursements only, such as taxis, long distance telephone calls, telegrams, etc.

Irvin,[3] Isaiah Tucker, DeLand, Fla. (Washington address: Raleigh Hotel.) (1) National Conference of Veteran Trainees Person: Fred Owen, Jr., national chairman, 810 West Highland Boulevard, DeLand, Fla. (2) Veterans of World War II generally, more specifically for student and on-the-job trainees who are utilizing the provisions of Public Law 346 or Public 18, commonly known as the GI bill of rights. (3) Until such time as legislation is passed which will give the veteran of World War II all that he is entitled to, not more, but certainly not less. (Specifically: For 6 months from date or more if necessary.) (4) He is to be paid no personal compensation for his services, only expenses which must at all times be reasonable and subject to the approval of the national officers each week. (5) He will be paid expenses from the national treasury, which expense checks shall be signed by the national director of finance and no other. (6) His expenses shall at no time exceed $500 a week. (7) Phone calls, telegrams, radio time, taxi fare, hotel lodging, food, entertainment, and any other reasonable expenditure which is incurred in furthering the movement to obtain what the veteran of World War II so richly deserves.

Johnson, Vernon A., Lockheed Aircraft Corp., 1025 Connecticut Avenue NW., Washington, D. C. (1) Lockheed Aircraft Corp., Burbank, Calif. (2) Lockheed Aircraft Corp. (3) Indefinite. (4) Salary at the rate of $10,000 per year until March 31, 1948. Salary at the rate of $11,000 per year beginning April 1, 1948. (5) Lockheed Aircraft Corp. (6) Indefinite amount to cover out-of-pocket expenses. (7) Entertainment, travel, and miscellaneous local expenses.

Judd & Gurfein, 39 Broadway, New York, N. Y. (1) Metropolitan Motion Picture Theatres Association, Inc., Paramount Building, Times Square, New York, N. Y. (2) Metropolitan Motion Picture Theatres Association, owners and operators of motion picture theaters in metropolitan area of New York State. (3) Year to year employment as general counsel. (4) Annual retainer as general counsel covers services of which those rendered under Public Law 601, Seventy-ninth Congress are merely a part. (See separate sheet.)[2] (5) Metropolitan Motion Picture Theatres Association, Inc. (6) Actual out-of-pocket disbursements. (7) Travel expenses and living expenses away from New York City, subscriptions to special periodicals, stenographic overtime, etc.

Kline, Allan B., 58 East Washington Street, Chicago, Ill. (1) American Farm Bureau Federation. (2) American Farm Bureau Federation. (3) Continuing. (4) $15,000. (5) American Farm Bureau Federation. (6) None, except reimbursement of actual necessary expenditures approved by officers of American Farm Bureau Federation. (7) None, except as noted under (6).

Littell, Norman M., 1422 F Street NW., Washington, D. C. (1) Navajo Tribe of Indians, residing in Arizona, New Mexico, Utah, and Colorado. Address of superintendent: Window Rock, Ariz. (2) In the interest of the Navajo Tribe of Indians, if, as, and when matters pertaining to the tribe come before committees of Congress. (3) Undersigned is employed as chief counsel for the Navajo Tribe of Indians for 10 years, with possible termination in 5 years. (4) $7,500 per annum as compensation for legal services by the undersigned and his associates, S. King Funkhouser and Leland L. Yost. That portion of compensation payable for possible appearances before congressional committees is not separately indicated, but may be said to be a very small portion of the $7,500 retainer which is primarily for legal services in the handling of the many legal problems of the Navajos. (5) From funds in deposit in the Treasury of the United States to the credit of the Navajo Tribe of Indians. (6) There is no provision for expenses other than a general limitation that the travel and other expenses of general counsel shall not exceed $2,500. This sum is for expenditures involved in the legal work of the tribe and it is not anticipated that any such expenses will be incurred for possible appearances before congressional committees in connection with tribal business. (7) None, except as indicated in question (6).

Loft, George, 2111 Florida Avenue NW., Washington, D. C. (1) Friends Committee on National Legislation. (2) Friends Committee on National Legislation. (3) Three to four months. (4) $333 per month, on the basis of $4,000 per year. (5) Friends Committee on National Legislation. (6) Refund of actual expenses incurred. (7) Railroad and other transportation together with lodging and meals when on field trips or committee business, telephone calls, taxis. Field trips are for keeping the Society of Friends and others aware of legislative developments, urging a generous program of aid for world recovery, and defeat of universal military training.

Lorence,[3] Walter E., 730 Chamber of Commerce Building, Cincinnati, Ohio. (1) The Ohio Valley Improvement Association, Inc., 730 Chamber of Commerce Building, Cincinnati, Ohio, of which I am the executive vice president, and which has for its purposes those listed on the attached sheet.[2] My activities in connection with legislative matters are only incidental to the principal purposes of my employment. (2) I will appear, when necessary, in the interests of the association for the purposes for which it was formed. (See (1) above.) (3) No definite duration. (4) My salary is $12,000 per year, less withholding and social-security taxes, of which only a small part is for services in connection with legislative matters. (5) The Ohio Valley Improvement Association, Inc. (6) No allowance, actual out-of-pocket expenses in connection with association activities to be reimbursed. (7) Transportation and lodgings when away from home; also taxis, telephone calls, and other proper business expenses.

Crampton, Charles J., attorney, 700 Insurance Building, San Antonio, Tex.; State Rights Association, Post Office Box 2371, Houston, Tex. (1) Retainer fee $7,500; for expenses $932.32. (2) Various. (3) Hotels, travel fares, etc. (4) None. Distributed copies of American Bar Association Recommendation for Tax Equalization, published by the association, to attorneys. We did not cause it to be published. It was the official report of the association. (5) To bring about constructive cooperation between community-property and common-law States for the development of a plan of tax equalization, whereby husbands and wives in all States may be permitted to divide their property and income, after marriage, for Federal estate, gift, and income-tax purposes in the same manner as is provided in the community-property State concept. Any such practice to be based on the ownership of their property and income as determined by the State law. This principle is stated in the recommendation of the American Bar Association tax equalization proposal which has been presented in hearings before the Ways and Means Committee. To support the retroactive repeal of the 1942 estate- and gift-tax amendments, as they apply to community-property States in a very unfair, discriminatory, inequitable manner. To cooperate with all States for the development of a general income, gift- and estate-tax plan which will equalize Federal taxes with fairness to all, and recognize the laws of the several States as they determine the ownership of property and income by their citizens.

Crawford, James M., Indemnity Insurance Co. of North America, 1600 Arch Street, Philadelphia, Pa. (1) Deponent has neither received nor expended any money for attempting to influence the passage or defeat of any legislation by the Congress. Ellison, Newell W., 701 Union Trust Building, Washington, D. C., R. W. Britton, 1416 Cherry Street, Erie, Pa. (1) None received and none expended during previous quarter. (2) None. (3) None. (4) None. (5) Proposal to amend provisions of the Internal Revenue Code relating to partnerships.

Ely, Northcutt, report as legal representative of Colorado River Board of California and Six Agency Committee, 730 Fifteenth Street NW., Washington, D. C. (1) Nothing received during the quarter. Bills have been rendered and are outstanding for $5,240. The entire amount represents legal fees for services of this office and in California in legislation and litigation affecting California interests in the Colorado River. Of this figure $2,000 is payable by the Colorado River Board and $3,240 is payable by the Six Agency Committee. Part of these amounts are for services rendered prior to October 1, 1947. (2) Office staff, building owner for rent, telephone and telegraph companies, suppliers of office materials. Approximately one-third of total income is expended for these items, but since this is part of a general law practice, it is impossible to allocate specific items of salary, rent, etc., to particular clients. (3) Salaries, office overhead, telegraph, telephone, office rent, and general maintenance of law offices. (4) None. (5) Conferences and reports to clients on H. R. 1616, S. 1175, House Joint Resolution 236, Senate Joint Resolution 145, and related bills, H. R. 1848, S. 693, H. R. 2873, H. R. 3194.

Ely, Northcutt, report as attorney for Water Project Authority of the State of California, 730 Fifteenth Street NW., Washington, D. C. (1) $1,500, the entire amount of which represents legal fees for services of this office and in California in connection with Central Valley power and water questions, and legislative matters incidental thereto. Part of this amount represents payment for services rendered prior to October 1, 1947. (2) Office staff, building owner, for rent, telephone and telegraph companies, suppliers of office materials. Approximately one-third of total income is expended for these items, but since this is part of a general law practice, it is impossible to allocate specific items of salary, rent, etc., to particular clients. (3) Salaries, office overhead, telegraph, telephone, office rent, and general maintenance of law offices. (4) None. (5) Conferences and reports to client on H. R. 4748.

Fairbanks, Joseph, 1001 Fifteenth Street NW., Washington, D. C., Descendants of the Signers of the Declaration of Independence, Milton Addison Thomas, secretary general, 212 West Highland Avenue, Chestnut Hill, Philadelphia, Pa. (1) None. (2) No payments. (5) Legislation affecting all veterans and their dependents in relation to employment, hospitalization, rehabilitation, pensions, disability compensation, and housing; welfare of servicemen of the armed forces and their dependents; matters relating to the national security, immigration and naturalization, the combatting of subversive activities; and the furtherance of a sound foreign policy; other matters included in the resolutions adopted by the National Encampment and the National Council of Administration.

King, Joseph T., National Retail Lumber Dealers Association, Ring Building, Eighteenth and M Streets NW., Washington, D. C. (1) $1,800 salary and $263.51 expenses. (2) Pullman Co., railroads, restaurants, hotels, cab drivers. (3) Meals, taxi fares, and tips while traveling on official business. Business luncheons. (4) National Affairs Reports and Bulletins. (5) Legislation directly affecting the retail building supply dealers, such as Emergency Price Control Act, Fair Labor Standards Act, wage and hour legislation, housing legislation, tax legislation, and Second War Powers Act.

King, Willford I., Committee for Constitutional Government, Inc., 205 East Forty-second Street, New York, N. Y. (1) I have received no salary during this quarter, but have received the following for expenses: $15.75 for travel and $135.63 for secretarial and other incidental expenses. (2) I am not a disbursing officer and have made no payments for the Committee for Constitutional Government, by whom I am employed. (3) [Blank.] (4) [Blank.] (5) Not employed for this purpose, but, incidentally, I occasionally oppose legislation which I believe to be antisocial and favor that which I believe to be socially beneficial.

Kitchen, C. W., United Fresh Fruit and Vegetable Association, 2017 S Street NW., Washington, D. C. (1) None. (2) None. (3) None. (4) Various articles have been prepared and published in trade periodicals and association yearbooks on marketing subjects, none dealing specifically with legislative matters. (5) Not employed to support or oppose any specific legislation.

Kline, Robert E., Jr., 703 Munsey Building, Washington, D. C.; Sea-Air Legislative Committee, 1809 G Street NW., Washington, D. C. (1) None. (2) None. (3) None. (4) None. (5) Legislation to permit steamship companies to engage in foreign and overseas air transportation.

Koch, Robert M., National Agricultural Limestone Association, Inc., 1424 K Street NW., Washington, D. C. (1) It is estimated that, as secretary of the National Agricultural Limestone Association, Inc., $1,000 of my salary represents that part of my time covered by Public Law 601 during the fourth quarter of 1947. This was all disbursed for personal living expenses. In addition, I received $20 for reimbursement for taxis and carfare in connection with legislation of interest to members of the association. (2) See (1). (3) See (1). (4) [Blank.] (5) Any legislation directly or indirectly affecting the agricultural limestone industry.

Kreutz, Oscar R., executive manager, National Savings and Loan League, 1835 K Street NW., Washington, D. C. (1) $3,750 total salary for quarter. Although I spent no time whatever in the fourth quarter of the year in any kind of lobbying activities, I spent not more than 25 percent of my time in studying pending legislation and in conferences with other private industry groups on the subject of pending legislation. Therefore, not more than 25 percent of the total salary for the quarter, or $937.50, should be chargeable to legislative work. (2) None of the expenses incurred nor reimbursements received by me in the fourth quarter was chargeable to legislative expenses. (3) [Blank.] (4) National Savings and Loan Journal. (5) Bills to improve the facilities of savings and loan associations for encouragement of thrift and home ownership, are supported, while legislation inimicable to the interests of the savings and loan business is opposed.

Kruse, Herman C., Pacific Gas & Electric Co., 245 Market Street, San Francisco, Calif. (1) No activity during quarter. (2) None. (3) None. (4) None. (5) None.

Lacques, Paul H., Bigham, Englar, Jones & Houston, 99 John Street, New York, N. Y. (1) Received various sums during the quarterly period (October, November, and December) at various times a total of $232.50 from Bigham, Englar, Jones & Houston. None of such receipts exceeded $100. (2) Railroad companies, hotels, and club. (3) Transportation, accommodations, meals, telephone and telegraph charges (4) None. (5) H. R. 669.

Lanham, Fritz G., Woodley Park Towers, 2737 Devonshire Place, Washington, D. C.; A. E. Brooks, 2202 Fort Worth National Bank Building, Fort Worth, Tex. (1) None received and no expenditures except small sums for postage. (2) None paid. (3) No payments. (4) None. (5) Legislation affecting nonresident United States citizens engaged in business abroad.

Lanham, Fritz G., Woodley Park Towers, 2737 Devonshire Place, Washington, D. C.; National Patent Council, Inc., 1434 West Eleventh Avenue, Gary, Ind.; American Fair Trade Council, Inc., 11 East Forty-fourth Street, New York City; Trinity Improvement Association, Inc., 1308 Commercial Standard Building, Fort Worth, Tex. (1) From National Patent Council as retainer $1,500; from American Fair Trade Council as retainer $1,000 and $36.03 for expense of business trip to New York and a telegram; from Trinity Improvement Association for rental and other expenses and clerical help $750. There have been no expenditures except for postage and as above recited. (2) No ex-

penditures except as shown in (1) above. (3) Rental, garage, traveling, and postage. (4) None. (5) Those I represent are all nonprofit organizations, and I serve in an advisory capacity and not for the purpose of supporting or opposing legislation in Congress. Their purposes are principally educational with reference to the objectives of their organizations.

Lanham, Fritz G., Woodley Park Towers, 2737 Devonshire Place, Washington, D. C.; State Rights Association, Houston, Tex. (1) I have received no money and expended none except small sums for postage. (2) No payments made. (3) No payments made. (4) None. (5) Legislation to preserve and promote the rights of the States under our system of government, to return to the States such normal functions as they should rightfully assume, to restrict Federal agencies to Federal functions, and to equalize taxation in accordance with State laws.

La Roe, Wilbur, Jr., Investment Building, Washington, D. C.; National Independent Meat Packers Association, 740 Eleventh Street NW., Washington, D. C. (1) Clark & La Roe, law firm, received from the National Independent Meat Packers Association, $4,500, total of monthly payments for general legal services, of which I received a share as partner. (2) No payment made to any other person. (3) [Blank.] (4) None. (5) Possible legislation relating to cost of Federal meat inspection.

La Roe, Wilbur, Jr., Investment Building, Washington, D. C.; Seatrain Lines, Inc., 39 Broadway, New York, N. Y. (1) Clark & La Roe, law firm, received from Seatrain Lines, Inc., $1,875, monthly payments on annual retainer, of which I received a share as partner. (2) No payment made to any other person. (3) See (2). (4) None. (5) I have not supported or opposed any legislation during the past quarter.

Laugherty, R. R., 10 Independence Avenue SW., Washington, D. C.; Railway Employees' Department, A. F. of L., 608 South Dearborn Street, Chicago, Ill. (1) Salary, $1,500; expenses, $750. No money expended only for personal maintenance. (2) Annapolis Hotel, taxi fare, postage, telephone and telegraph, cleaning, and food. (3) Necessary living, transportation, and communication expense. (4) None. (5) Legislation affecting and detrimental to railroad employees.

Lawrence, John V., American Trucking Associations, Inc., 1424 Sixteenth Street NW., Washington, D. C. (1) Registrant received only his regular salary of $19,000 per year for all services; not apportioned. He expended a total of $6.90. (2) The money was paid to various taxi drivers employed in taking registrant between his office and the Capitol or House or Senate Office Buildings, and to clerks and cashiers for lunches. (3) The money paid taxi drivers was for transportation to and from my office as indicated in (2). (4) Legislative Outlook for 1948 written for Go magazine. (5) Any legislation affecting the trucking industry.

Lawrence, Joseph S., M. D., American Medical Association, 1302 Eighteenth Street NW., Washington, D. C. (1) Receipts: Salary, October 1 to December 31, 1947, $3,750; retirement savings bond, $5,000; reimbursements for travel expenses, $650.53; total receipts, $9,400.53. Expenses: travel, $343.21; hotel, $52.87; meals, $55.15; taxi, $21; conferences, $12.80; total expenses, $485.03. (2) Roosevelt Hotel, Biltmore Hotel, Palmer House, Eastern Airlines, Van Curler Hotel, Pennsylvania Central Airlines. (3) Travel, hotels, meals, local transportation, conferences, incidental expenses. (4) None. (5) bills relating to public health endorsed or opposed by the section of the House of Delegates of the American Medical Association or the principles espoused by that body.

Lee, Ivy, and T. J. Ross, United States Cuban Sugar Council, 405 Lexington Avenue, New York, N. Y. (1) Received $6,248.17, expended $498.11. See appended statement I.[2] (2) See appended statement I.[2] (3) See appended statement. I.[2] (4) See appended statement II. (5) Registrant advises the United States Cuban Sugar Council on public-relations matters pertaining to sugar legislation relating to the Sugar Act of 1948 and the Sugar Act of 1937, as amended.

Leopold, Joseph F., 936 Liberty Bank Building, Dallas, Tex.; National Tax Equality Association, 231 South La Salle Street, Chicago, Ill. (1) Nothing received except regular salary. (2) Nothing paid out other than regular travel expenses for which I was reimbursed by National Tax Equality Association. (3) Hotel, transportation, and usual travel expenses. (4) None. (5) No particular legislation. Tax equality in general.

Letts, David S., 901 Tower Building, Washington, D. C.; American Transit Association, 292 Madison Avenue, New York, N. Y. (1) Received $1,300 salary as attorney for the American Transit Association. Received $205.81 reimbursement for actual business expenses. None for lobbying purposes. (2) Railroads, taxicabs, etc.; hotels and restaurants; merchants and others. (3) Traveling and living expenses away from Washington. Expenses in Washington for transportation, fees, dues, entertainment, and miscellaneous. (4) None. (5) He may support or oppose legislation affecting the transit industry.

Levine, Seth, CIO Maritime Committee, 132 Third Street SE., Washington, D. C. (1) $1,365 in salary; $130 expenses; 25 percent of time devoted to legislative activities; the remainder of time was spent solely in economic research. (2) Taxi companies, telephone companies, dispensers of periodicals. (3) Taxis, telephone calls, periodicals. (4) CIO News, ACA News, NMU Pilot, IFAWA Fisherman, the American Marine Engineer. (5) Support legislation in the intent of seamen, fishermen, and allied maritime workers, and oppose legislation detrimental to them.

Libby, Frederick J., executive secretary, National Council for Prevention of War, 1013 Eighteenth Street NW., Washington, D. C. (1) Salary, $1,125; expenses, $180.31; total, $1,305.31. (2) Expenses for railroad tickets, hotels, taxis, porters, telephone and telegraph service (out of town), postage, and miscellaneous expenses. (3) Speaking trips, attending conferences and meetings, etc. (4) Peace Action, monthly news bulletin of National Council for Prevention of War. (5) Supports, in pursuance of the purposes of the organization, legislation which promotes peace and opposes legislation which, in our judgment, leads to war.

Liljenquist, L. Blaine, 1415 K Street NW., Washington, D. C.; E. F. Forbes, president, Western States Meat Packers Association, Inc., 604 Mission Street, San Francisco, Calif. (1) Salary for quarter October 1 to December 31, 1947, inclusive, $1,875; reimbursement for expenses incurred during this period, $479.01; total quarterly salary and reimbursement for expenses, $2,354.01. (2) Various. (3) Transportation, communications, entertainment, and miscellaneous office expenses incurred in the regular business activity of the association. (4) None. (5) As Washington representative of the association many of my duties do not come within the purview of the act. With respect to legislation, I am interested in that which affects the meat-packing industry.

Linton, Donald H., Eastern Gas and Fuel Associates, 250 Stuart Street, Boston, Mass. (1) None during period. (2) [Blank.] (3) [Blank.] (4) None. (5) None.

Little, Charles R., Kenwood Road, box 153M, route 508, Cincinnati, Ohio; executive secretary, Ohio Valley Conservation and Flood Control Congress, Dr. Charles E. Holzer, president; Holzer Hospital, Gallipolis, Ohio. (1) Receiver for expenses, $600; expenses, $641.77. (2) Various hotels, restaurants, etc. (3) Transportation, $372.91; lodging, $74.31; meals, $84.81; tips, $15.31; office (periodicals, communication, postage, stationery, supplies), $94.43. (4) None. (5) Any dealing with conservation and flood control in the Ohio Valley, including appropriation bills.

Little, Walter J., Atchison, Topeka & Santa Fe Ry. Co., et al., 510 West Sixth Street, Los Angeles, Calif. (1) Received from Atchison, Topeka & Santa Fe Ry., Southern Pacific, Union Pacific, Northwestern Pacific, and Western Pacific Railroads for expenses, $724.94. (2) Railroads, air lines, and other transportation, $296.66; hotels, meals, and lodging, $252.28; incidentals, $176. (3) Transportation and living costs. (4) None. (5) All legislation affecting the railroads.

Lockwood, Maurice H., the National Fertilizer Association, Inc., 616 Investment Building, Washington, D. C. (1) Of salary received by me during the preceding calendar quarter, $200 may be allocable to attempts to influence the passage or defeat of legislation. (2) [Blank.] (3) [Blank.] (4) Fertilizer News and Fertilizer Review, published by NFA. My address, Firm Foundations, at the 1947 fall meeting was reproduced in Commercial Fertilizer, Atlanta, Ga.; the American Fertilizer, Philadelphia, Pa.; Agricultural Chemicals, New York City. I issued and distributed a press release on the association's fall meeting and one regarding my testimony on the fertilizer supply situation before the subcommittee on fertilizer of the Committee on Agriculture, House of Representatives, December 10, but do not know what publications may have published them in whole or in part. (5) Any legislation that might affect the manufacture or distribution of fertilizer or the general agricultural economy, including such bills in the Eighteenth Congress as H. R. 869, H. R. 2494, H. R. 3421, H. R. 4562, H. R. 4752, and S. 1251.

Lodge, F. S., The National Fertilizer Association, Inc., 616 Investment Building, Washington, D. C. (1) Of salary received by me during the preceding calendar quarter, $50 may be allocable to attempts to influence the passage or defeat of legislation. (2) [Blank.] (3) [Blank.] (4) [Blank.] (5) Any legislation that might affect the manufacture or distribution of fertilizer or the general agricultural economy, including such bills in the Eighteenth Congress as H. R. 869, H. R. 2494, H. R. 3421, H. R. 4562, H. R. 4752, and S. 1251.

Lord, Day & Lord, 25 Broadway, New York; 1614 Eye Street NW., Washington, D. C.; Agency of Canadian Car & Foundry Co., Ltd., 30 Broadway, New York, N. Y. (1) None. (2) None. (3) [Blank.] (4) None. (5) H. R. 4043, Eightieth Congress.

Lorence, Walter S.,[1] The Ohio Valley Improvement Association, Inc., 730 Chamber of Commerce Building, Cincinnati, Ohio. (1) Regular salary for December 1947 as reported on Form B; reimbursements of $191.64 for personal out-of-pocket expenses. (2) Self (salary); expenses (various). (3) Personal out-of-pocket expenses for lodgings, food, travel, telephone calls while in Washington, D. C. (4) None. (5) None at the present time.

Lucas, James C., American Retail Federation, 1627 K Street NW., Washington, D. C. (1) Salary, $200; expenses, $51.10. (2) Taxi drivers, restaurants. (3) Transportation and meals. Lyon, A. E., executive secretary, Railway Labor Executives' Association, 10 Independence Avenue SW., Washington, D. C. (1) No money received except regular salary and expenses. No money expended for the purpose of attempting to influence the passage

[2] Not printed. Filed in the Clerk's office.

[1] Filed with the Clerk only.

or defeat of any legislation. Total salary for quarter, $2,250. Total expenses for quarter, $633.76. (2) None. (3) None. (4) None. (5) Incidental to other and varied duties which comprise the major part of work, all legislative proposals of concern to labor and railway labor in particular.

McAvoy, Clifford T., 1029 Vermont Avenue NW., Washington, D. C.; United Electrical, Radio & Machine Workers of America, CIO, 11 East Fifty-first Street, New York, N. Y. (1) No money received for purposes covered by this act. (2) [Blank.] (3) [Blank.] (4) [Blank.] (5) Legislation for the general welfare.

McAvoy, Harold,[7] 907 Lormer Street, Brooklyn, N. Y.; National Association Post Office Railway Mail Service & Mail Handlers, 1113 Arch Street North Side, Pittsburgh, Pa. (1) $1,200 which must cover all expenses for the quarter. (2) Harold McAvoy, our legislative representative. (3) Legislation for the benefit of all mail handlers, watchmen, and messengers employed by the Post Office Department. (4) Mail Handlers Journal. (5) He must support all legislation that will benefit all mail handlers, watchmen, and messengers employed by the Post Office Department.

McBride, Don,[6] secretary-manager, National Reclamation Association, 1119 National Press Building, Washington, D. C. (1) Total receipts for period (see schedule VI),[8] $9,657.39; total expenditures for period (see schedule V),[8] $11,145.67. (2) See attached Schedules V and VI.[8] (3) See attached Schedules V and VI.[8] (4) National Reclamation Association Bulletin (see enclosed).[8] (5) Amendment to the Reclamation Project Act of 1939 and any other legislation affecting resources of the 17 Western States (see sec. 3, Purposes, 1st page, our constitution enclosed in first quarterly report).

McBride, Jonas A., 10 Independence Avenue SW., Washington, D. C.; Brotherhood of Locomotive Firemen and Enginemen, 318 Keith Building, Cleveland, Ohio. (1) (a) Salary as vice president and national legislative representative of the Brotherhood of Locomotive Firemen and Enginemen, $2,500; (b) Salary of Glenn C. Russell, clerk, $935; (c) personal expenses of Jonas A. McBride, $671.46; printing and supplies, $94.40; rent (paid to Labor, 10 Independence Avenue SW), $270; telephone and telegrams, $44.39; postage, $30. (2) (a) To Jonas A. McBride for salary; (b) to Glenn C. Russell for salary; (c) personal expenses to hotels, Pullman accommodations, etc., printing and supplies to various printers and stationers, telephone, telegrams, and postage are self-explanatory. (3) For maintenance of the office of the vice president and national legislative representative of the Brotherhood of Locomotive Firemen and Enginemen. (4) None. (5) All legislation affecting the interests of the Brotherhood of Locomotive Firemen and Enginemen.

McCarthy, Frank J., The Pennsylvania Railroad Co., 211 Southern Building, Fifteenth and H Streets NW., Washington, D. C. (1) Salary: $1,232.50 per month, which is paid for all the services rendered to The Pennsylvania Railroad Co., only a part of which have to do with legislation. $126.28 was expended by me as expense money, during the fourth quarter of 1947, for taxicabs, meals, automobile expenses, and incidentals. In addition to this amount, I also received $834.47 for expenses incurred in connection with other duties performed for The Pennsylvania Railroad Co., which have no relation to the purposes covered by this act. (2) Various transportation companies, restaurants, garages, communication companies, etc. (3) $126.28 was expended by me as expense money, during the fourth quarter of 1947, for taxicabs, meals, automobile expenses, and incidentals. (4) None. (5) Legislation affecting the interests of The Pennsylvania Railroad Co.

McClure, Warren C., Box 207, Camden, Ark.; Mississippi Valley Association, 511 Locust Street, St. Louis, Mo. (1) None for legislative purposes. (2) None for legislative purposes. (3) [Blank.] (4) None. (5) None at the present time.

McCrory, Samuel H., 6811 Sixth Street NW., Washington, D. C.; Hemp Producers Association, Paul A. Hemmy, Jr., secretary, Juneau, Wis. (1) None during quarter beginning October 1, 1947. Engagement terminated as of November 25, 1947. (2) None. (3) None. (4) None. (5) None.

McDonald, E. L., Townsend National Recovery Plan, Box 534, Cheney, Wash. (1) Received for quarter ending December 31, 1947, the sum of $318.62 from Townsend National Recovery Plan, Broadway 6875, Cleveland, Ohio. (2) Transportation. (3) Travel expense. (4) None. (5) H. R. 16, the Townsend plan.

McFarland, Rev. A. J., Christian Amendment Movement, 914 Clay Street, Topeka, Kans. (1) Salary, $750; expenses, $350; total, $1,100. (2) Salary for home expenses. Expenses for travel—rail and bus fare, hotel, restaurants, etc. (3) Answered above. (4) The Christian Patriot, 914 Clay Street, Topeka, Kans.; the Covenanter Witness, 1121 Buchanan Street, Topeka, Kans. (5) Support a Christian amendment to the Constitution of the United States, which reads as follows: "The preamble shall be amended to read: 'We, the people of the United States, devoutly recognizing the authority and law of Jesus Christ the Saviour and King of nations,' in order to form a more perfect union, do ordain and establish this Constitution for the United States of America."

McGough, Richard, Washington Railroad Association, 515 Hoge Building, Seattle, Wash. (1) Salary as stated in original registration. Expenditures in connection with Federal legislation: None. (2) [Blank.] (3) [Blank.] (4) None. (5) Any legislation affecting transcontinental railroads operating in the State of Washington.

McGrath, Thomas Edward, 626 Eye Street NW., Washington, D. C., Taxpayers of United States of America, United States Treasury. (1) Approximately, $165. (2) Thomas Edward McGrath. (3) To use as I see fit, which fitness I use in lobbying for Public Law 601, Seventy-ninth Congress. (4) Published for fee—none. Soliciting press support via lobbying, numerous. (5) It's my desire to run the gauntlet of all legislation before Congress, but with 400 plus Representatives and 90 plus Senators, the Executive, press, etc., to contact, I fall far short of my objective. I do the best I can with only 24 hours in a day—holidays et al.

McGrath, Tom J., 324 Shoreham Building, Washington, D. C.; Chesapeake & Ohio Railway, Richmond, Va.; Eastern Gas and Fuel Associates, Boston, Mass.; National Coal Association, Washington, D. C. (1) No payments received. (2) [Blank.] (3) [Blank.] (4) [Blank.] (5) Participating in the consideration of natural-gas legislative matters as the interests of clients may appear to be affected by such legislation.

McKeehan, Merrick, Arter & Stewart, a partnership, 2800 Terminal Tower, Cleveland, Ohio; The Holstein-Friesian Association of America, Brattleboro, Vt. (1) Received $93.32 for disbursements made for this client. (This sum includes disbursements made for this client in other matters. The disbursements made in this matter and included in said sum were reported in previous reports). Expended $15.19. (See paragraph (3).) (2) Telephone Co. Telephoning, $15.19. (4) None. (5) To support H. R. 3884.

McLaughlin, Robert E., 410 Central Building, 805 G Street NW., Washington, D. C.; AMVETS (American Veterans of World War II), Victor Building, 724 Ninth Street NW., Washington, D. C. (1) No expense money drawn or expended, except petty cash for taxi fares. Since May 1, 1947, I have been acting as legislative consultant for AMVETS at a modest per-diem rate for time actually consumed. (2) See (1). (3) See (1). (4) National AMVET. (5) To support legislation providing care and assistance for veterans of World War II and their dependents.

McLaughlin, Robert E., National Association of United States Storekeepers-Gaugers, 805 G Street NW., Washington, D. C. (1) Received quarterly retainer (see Form B). (2) See (1). (3) See (1). (4) None. (5) To support legislation beneficial to this client and civil-service employees in general.

McMahon, John A., president, National Association of Postal Supervisors, 171 Milton Street, Dorchester Center Station, Boston, Mass.; National Association of Postal Supervisors, box 1225, Nashville, Tenn. (1) $1,145.20 received from Michael C. Nave, treasurer, National Association of Postal Supervisors, room 326, Main Post Office, Chicago, Ill. (2) John A. McMahon, president, National Association of Postal Supervisors, Pennsylvania Railroad; New York, New Haven & Hartford Railroad, Hotel Continental, Washington, D. C. (3) Reimbursement for loss of salary while absent from regular duty; railroad transportation; hotel accommodations; telephone and telegrams. (4) The Postal Supervisor; official magazine of the National Association of Postal Supervisors. (5) Legislation pending in Congress involving salary adjustments, hours of labor, and the liberalization of the retirement laws in the interests of the supervisors employed in the postal service.

McMains, W. H., Distilled Spirits Institute, Inc., 1135 National Press Building, Washington, D. C. (1) Salary, $2,500, which is in payment for all services rendered, only a part of which deal with legislation. No expenses have been authorized or incurred for purposes listed under this act. (2) See (1). (3) See (1). (4) None. (5) Any legislation affecting the industry represented is reported to members, including such bills in the Eightieth Congress as Senate Joint Resolution 123, S. 265, H. R. 2571, Senate Joint Resolution 167, and H. R. 4388.

McMillan, Robert W., Management Planning of Washington, Inc., 1025 Connecticut Avenue NW., Washington, D. C. (1) $2,226, with less than one-twentieth of the time and service for which such compensation was paid being for activities which might conceivably be construed as coming within the purview of any of the provisions of title III of the Legislative Reorganization Act of 1946; $43.10, reimbursement of expenses allocable to foregoing activities. (2) Taxi drivers and operators of eating and refreshment places. (3) Transportation and other normal out-of-pocket expenses. (4) None. (5) No specific legislation.

MacCracken, William P., Jr., 1152 National Press Building, Washington, D. C.; Remington Rand, Inc., 315 Fourth Avenue, New York, N. Y.; and American Optometric Association, 142 South State Street, Marion, Ohio. (1) None. (2) Telephone and telegrams, $34.56; taxis and miscellaneous, $16.75; total, $41.31. (3) See (2) above. (4) None. (5) On behalf of the American Optometric Association, I have been requested to support the action of the District of Columbia Optometric Association in requesting an amendment to the optometry law for the purpose of raising the standards of the profession and providing better visual care for residents of the District of Columbia; also, to support legislation which would afford veterans who are entitled to visual care at Government expense outside of the veterans' facilities to select the services of a licensed optometrist where the veteran so elects. This right is at the present time denied him by the Veterans' Admin-

(5) See explanatory statement attached to form A filed March 6, 1947; and supplemental statement attached hereto, and supplemental statement filed July 14, 1947.

Withers, Hamilton E.,[1] 417 North Main Street, Salisbury, N. C., Brotherhood of Railroad Trainmen, Cleveland, Ohio. (1) Received $79.65 from Brotherhood of Railroad Trainmen, Cleveland, Ohio, to cover loss of time and expenses for 3 days; expended this for meals and living expenses for 3 days. (2) None. (3) None. (4) None. (5) To oppose legislation detrimental to organized labor.

Woodrum, Clifton A., president, American Plant Food Council, Inc., 910 Seventeenth Street NW., Washington, D. C. (1) No funds received or expended during preceding calendar quarter for the purpose of directly or indirectly influencing legislation. Please see explanatory letter filed with original registration. (2) None. (3) None. (4) None. (5) None.

Woodson, George W., 424 North Washington Avenue, Lansing, Mich.; Townsend National Recovery Plan, Inc., 6875 Broadway, Cleveland, Ohio. (1) I received as a commission $1,198.29 and the only money I spent was for hotel, traveling, meals, postage, supplies, telephone and telegraph, and clerical work. None spent for political campaigns. (2) I

[1] Filed with the Clerk only.

paid no money to individuals for anything except clerical work. (3) None. (4) None. (5) Townsend bill, H. R. 16.

Woodul, Walter F., 818 Chronicle Building, Houston, Tex. (1) Compensation as previously reported and $530 for months of September, October, and November, 1947. (2) Hotel Baker, Dallas, Tex., $10.50; and to various other hotels, restaurants, telegraph and telephone companies, Pullman Co., and others in amounts less than $10. (3) Hotels, $14; meals, $34.40; transportation, $24.34; telephones, telegrams, tips, taxis, and incidentals, $28.03; entertaining, $33.35. (4) None. (5) All railroad legislation affecting Texas railroads.

Wootton, Edward W., Wine Institute, 900 National Press Building, Washington, D. C. (1) $3,000 quarterly, salary as manager of the Washington office of the Wine Institute, principal offices at 717 Market Street, San Francisco. (2) Received by the undersigned for all personal services rendered as manager of this office, some of which services involve legislative activity. (3) See (1) and (2) above. No expenditures were made by undersigned to any other person for legislative purposes. (4) None. (5) Proposed amendments to Internal Revenue Code affecting wine and brandy production and representations with respect to agricultural exemptions under Fair Labor Standards Act.

Worley, Harry F., president of the National Customs Service Association, 5353 Reno Road NW., Washington, D. C. (1) He received only salary and reimbursement of travel, postage, office supplies, and office and incidental expenses. No part of money received for salary or expenses was expended in support of or opposition to any legislation. (2) See No. (1). (3) See No. (1). (4) Customs Service News, published monthly by the National Customs Service Association. He is the editor. It covers the activities of the association, news of prospective and enacted legislation, and news of personal interest to the membership. (5) He supports legislation which would benefit officers and employees of the Federal Government and opposes legislation which is against their interests. He directs legislative, administrative, or court action affecting the interests of the officers and employees of the United States Customs Service. His appearance before the committees of Congress is incidental to other activities, and forms only a small portion of the aggregate.

Wormhoudt, Marion P., 701 Union Trust Building, Washington, D. C.; R. W. Britton, 1416 Cherry Street, Erie, Pa. (1) None received and none expended during previous quarter. (2) None. (3) None. (4) None. (5) Proposal to amend provisions of the Internal Revenue Code relating to partnerships.

Wozencraft, Frank W., 605 Southern Building, Washington, D. C.; Independent Bankers Association, 410 Gulf States Building, Dallas, Tex. (1) $3,000 fees for services (received by firm of Case & Wozencraft); $700 reimbursement for traveling, telephone, and telegraph expenses. (2) Air lines, hotels, etc., in connection with travel involved; Western Union and telephone company. (3) See (2) above. (4) [Blank.] (5) Bank holding company legislation.

Wright, Walter C., Jr., Tax Equality Committee of New Jersey, Inc., 44 Cooper Street, Woodbury, N. J. (1) Receipts, $77.09; expenditures, $76.94. (2) and (3) Railway express, expressage, $1.95; United States Post Office, postage, $34.09; Secretary of State of New Jersey, filing fee, $2; county clerk, Mercer County, N. J., filing fee, 25 cents; Roy Sampson, Woodbury, N. J., sign, $2.50; New Jersey Bell Telephone Co., phone calls, $5.55; Western Union Co., telegram, $1.07; various restaurants, meals, $3.14; various common carriers, carfare, $6.53; various gas stations, gas, oil, etc., $19.86; total, $76.94. (4) Woodbury Daily Times, Woodbury, N. J., and perhaps some of the other 55 or 60 newspapers in New Jersey that I sent the same news release to. (I have no way of knowing which of the other papers printed this.) (5) I am supporting any and all legislation tending to place cooperative associations on the same tax basis as noncooperative associations. More particularly, I am opposed to the virtual exemption from Federal income taxes the co-ops enjoy at present.

Yonkers, Andrew J., Socony-Vacuum Oil Co., Inc., 26 Broadway, New York, N. Y. (1) Money received, salary, $875 (this represents one quarter of the amount of registrant's annual remuneration which is attributable to the performance of duties which are subject to the Lobbying Act); reimbursement for traveling expenses, $172.35; total, $1,047.35. Money expended (in connection with duties related to the Lobbying Act), $172.35. (2) Railroads, air lines, taxis, hotels, restaurants, telephones, and tips. (3) Normal traveling expenses. (4) None. (5) Legislation affecting the petroleum industry.

Young, Donald A., United States Chamber of Commerce, 1615 H Street NW., Washington, D. C. (1) Received salary, $2,500; expenses, $36.68. Expended transportation, $18.35; meals, $5.25; telephone, $13.08. (2) Taxi companies, telephone company, restaurants. (3) Transportation to and from, and communication with, the Capitol; other normal and necessary expenses. (4) None. (5) All legislation of interest to business.

Zook, John D., Ohio Chamber of Commerce, 17 South High Street, Columbus, Ohio. (1) None. (2) None. (3) Actual and necessary traveling expenses on employer's business. (4) None. (5) Legislation dealing with social security, labor, taxation, and other matters of interest to our organization.

SENATE

FRIDAY, JANUARY 30, 1948

(Legislative day of Monday, January 26, 1948)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The Chaplain, Rev. Peter Marshall, D. D., offered the following prayer:

O Lord our God, even at this moment as we come blundering into Thy presence in prayer, we are haunted by memories of duties unperformed, promptings disobeyed, and beckonings ignored.

Opportunities to be kind knocked on the door of our hearts and went weeping away.

We are ashamed, O Lord, and tired of failure.

If Thou art drawing close to us now, come nearer still, till selfishness is burned out within us and our wills lose all their weakness in union with Thine own. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The Chief Clerk read the following letter:

UNITED STATES SENATE,
PRESIDENT PRO TEMPORE,
Washington, D. C., January 30, 1948.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. WILLIAM F. KNOWLAND, a Senator from the State of California, to perform the duties of the Chair during my absence.

A. H. VANDENBERG,
President pro tempore.

Mr. KNOWLAND thereupon took the chair as Acting President pro tempore.

THE JOURNAL

On request of Mr. WHERRY, and by unanimous consent, the reading of the Journal of the proceedings of Wednesday, January 28, 1948, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries, and he announced that the President had approved and signed the following acts:

On January 29, 1948:

S. 944. An act for the relief of Oran Curry.

On January 30, 1948:

S. 1043. An act for the relief of Frank J. Shaughnessy, collector of internal revenue, Syracuse, N. Y.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had passed without amendment the joint resolution (S. J. Res. 179) to change the date for filing the report of the Joint Committee on the Economic Report.

The message also announced that the House had disagreed to the amendment of the Senate to the bill (H. R. 2192) for the relief of the Massman Construction Co.; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. JENNINGS, Mr. REEVES, and Mr. CRAVENS were appointed managers on the part of the House at the conference.

ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Acting President pro tempore:

S. 1100. An act for the relief of Frankie Stalnaker;

H. R. 2361. An act to authorize the filing of actions in State courts to quiet title to lands described in a treaty between the United States and the Delaware Indians, dated October 3, 1818;

H. R. 3153. An act to provide for the sale or other disposal of certain submarginal lands located within the boundaries of Indian reservations in the States of Montana, North Dakota, and South Dakota;

H. R. 3322. An act to facilitate rights-of-way through restricted Osage Indian land, and for other purposes; and

H. R. 3326. An act to provide for the granting of certificates of competency to certain members of the Osage Indian Tribe in Oklahoma, and for other purposes.

LEAVES OF ABSENCE

Mr. BARKLEY. Mr. President, I ask unanimous consent that the two Senators from Florida [Mr. PEPPER and Mr. HOLLAND] may be excused from attending the sessions of the Senate for the balance of this week and next week, in order that they may attend hearings on flood-control matters pertaining to the State of Florida.

The ACTING PRESIDENT pro tempore. Without objection, the leave is granted.

Mr. HICKENLOOPER. Mr. President, I ask unanimous consent that beginning with the present week end I may be absent from the Senate for a week or

10 days on official business of the Joint Committee on Atomic Energy.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

INCOME FROM CHEROKEE NATIONAL FOREST—LETTER FROM W. R. PADDOCK

Mr. McKELLAR. Mr. President, I ask unanimous consent that there be printed in the RECORD as a part of my remarks a letter under date of January 19, relating to the Cherokee National Forest, from W. R. Paddock, forest supervisor of the United States Forest Service.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

UNITED STATES DEPARTMENT
OF AGRICULTURE, FOREST SERVICE,
CHEROKEE NATIONAL FOREST,
Cleveland, Tenn., January 19, 1948.

The Honorable KENNETH MCKELLAR,
Washington, D. C.

DEAR SENATOR MCKELLAR: I have just been informed that the Tennessee State treasurer has been paid $30,988, which represents the annual return to the State of 25 percent of the income from the Cherokee National Forest. These funds, as you probably know, are distributed to the 10 counties which contain national forest lands for use in supporting their schools and roads.

In addition, 10 percent of the forest income is spent within the national forest to maintain the road system. This forest-road system is important locally, as it serves the local residents living within or adjacent to the national forest. Also, forest products are hauled over these roads, and they are used by recreationists, hunters, and fishermen.

Federal acquisition of the lands within the Cherokee Forest has been carried on progressively over a period of 35 years with the present acquired area being 565,000 acres. Most of these lands were acquired in a cut-over condition. Part of the area is rough, at high elevations and protection results are mainly intangible watershed values. However, the greater part of the forest is becoming increasingly productive. The present timber yield should continue and even increase in future years. In addition to timber-sale income, the national forest has a considerable revenue from miscellaneous land uses, such as summer-home-site rental, recreation concessions, and grazing.

For your information, the payments to the individual counties are listed. Payment is on the basis of the national forest acreage in each and amounts to nearly 6 cents per acre:

Carter	$4,090
Cocke	2,076
Greene	1,704
Johnson	2,324
McMinn	124
Monroe	7,716
Polk	7,654
Sullivan	1,921
Unicoi	2,789
Washington	589

I trust the foregoing information concerning the Cherokee National Forest will be of interest to you.

Very truly yours,
W. R. PADDOCK,
Forest Supervisor.

MEETING OF SUBCOMMITTEE OF THE COMMITTEE ON BANKING AND CURRENCY

Mr. FLANDERS. Mr. President, I ask unanimous consent that the subcommittee of the Committee on Banking and Currency now considering the subject of meat rationing may hold a session this afternoon.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

DEMOCRATIC PRIMARY RETURNS FOR 1915

Mr. McKELLAR. Mr. President, I ask unanimous consent that there be printed in the RECORD the returns of a primary election held in Tennessee more than 30 years ago, in 1915. It is very difficult to get these returns, and I wish to have them preserved in the RECORD.

There being no objection, the returns were ordered to be printed in the RECORD, as follows:

Counties	Democratic primary, Nov. 20, 1915			Run-off primary, Dec. 15, 1915	
	Lea	McKellar	Patterson	McKellar	Patterson

TRANSACTION OF ROUTINE BUSINESS

By unanimous consent, the following routine business was transacted:

EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT OF FOREIGN SURPLUS DISPOSAL

A letter from the Secretary of State, transmitting, pursuant to law, the eighth report of the Department of State on the disposal of United States surplus property in foreign areas, including therein a report from the Foreign Liquidation Commissioner under section 202 of the Philippine Rehabilitation Act of 1946 (with an accompanying report); to the Committee on Expenditures in the Executive Departments.

REPORT ON CONTRACT TERMINATIONS AND SETTLEMENTS

A letter from the Secretary of the Treasury, transmitting, pursuant to law, the fourteenth quarterly report on contract settlement, covering the period October 1 through December 31, 1947 (with an accompanying report); to the Committee on the Judiciary.

WITHDRAWAL OF PUBLIC NOTICES IN YUMA RECLAMATION PROJECT

A letter from the Under Secretary of the Interior, transmitting a draft of proposed legislation to authorize the withdrawal of public notices in the Yuma reclamation project, and for other purposes (with an accompanying paper); to the Committee on Interior and Insular Affairs.

AUDIT REPORT OF FEDERAL DEPOSIT INSURANCE CORPORATION

A letter from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report on the audit of the Federal Deposit Insurance Corporation for the fiscal year ended June 30, 1946 (with an accompanying report); to the Committee on Expenditures in the Executive Departments.

AUDIT REPORT ON TENNESSEE VALLEY ASSOCIATED COOPERATIVES, INC.

A letter from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report on the audit of Tennessee Valley Associated Cooperatives, Inc., for the fiscal year ended June 30, 1947 (with an accompanying report); to the Committee on Expenditures in the Executive Departments.

REPORT OF ADMINISTRATOR OF RENT CONTROL, DISTRICT OF COLUMBIA

A letter from the President of the Board of Commissioners of the District of Columbia,

transmitting, pursuant to law, the semiannual report of the Administrator of Rent Control, for the period July 1, 1947, to December 31, 1947 (with an accompanying report); to the Committee on the District of Columbia.

REPORT OF OPERATIONS OF CAPITAL TRANSIT CO.

A letter from the president of the Capital Transit Co., transmitting, pursuant to law, a report covering the operations of the Capital Transit Co. for the calendar year 1947, together with a balance sheet as of December 31, 1947 (with an accompanying report); to the Committee on the District of Columbia.

REPORT OF WASHINGTON GAS LIGHT CO.

A letter from the president of the Washington Gas Light Co., transmitting, pursuant to law, a detailed statement of the business of that company, together with a list of stockholders, for the year ended December 31, 1947 (with accompanying papers); to the Committee on the District of Columbia.

PETITIONS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the ACTING PRESIDENT pro tempore:

A resolution adopted by the Board of Aldermen of the City of St. Louis, Mo., favoring the enactment of legislation providing for the construction of sport-participation establishments as an aid in the reduction of juvenile delinquency; to the Committee on Banking and Currency.

The petition of the West Palm Beach Townsend Club, No. 1, West Palm Beach, Fla., praying for the enactment of legislation providing for a uniform national pension system; to the Committee on Finance.

Petitions of Ida Thompson and Howard Lipscomb, of Paces, Va., praying for the enactment of the bill (S. 984) to prohibit discrimination in employment because of race, religion, color, national origin, or ancestry; to the Committee on Labor and Public Welfare.

By Mr. MAYBANK:

A concurrent resolution of the Legislature of the State of South Carolina; to the Committee on Armed Services:

"Concurrent resolution memorializing the Congress of the United States of America to direct the War Department of the United States to maintain the complete operation of the facilities at the Charleston ordnance depot

"Whereas Charleston ordnance depot, a facility of the United States Army, situate in the county of Charleston, S. C., is an installation operating upon an area of over 6,700 acres of land with a present valuation of over $56,000,000 and possessing one of the finest deep-water dock facilities on the east coast of the United States; and

"Whereas this facility has been in operation for a period of 25 years and has rendered outstanding and invaluable services in the field of Army ordnance in respect to the storing, assembling, renovating, and shipping of ammunition in World Wars I and II; and

"Whereas the geographical location of this depot together with its most advanced and complete physical properties combined with its employment of outstanding technicians and highly trained ordnance personnel, which technicians and personnel have made their homes in the area adjoining such depot and to offer to such depot skilled labor unexcelled in this country; and

"Whereas the present international emergency confronting the world today has placed this country, together with its armed forces charged with the protection of life and liberty of its people, on notice that its national integrity and even its physical boundaries are only so safe as its state of military preparedness; and

"Whereas the past history of the participation of the Charleston ordnance depot as an instrumentality of national defense of this country has been an outstanding value and assistance to the protection of this country and to her allies in waging war; and further that should this country become involved in another major conflict, the Charleston ordnance depot, its services and facilities, would be necessary military establishment in the protection of our beloved country: Now, therefore, be it

"*Resolved by the house of representatives (the senate concurring)*, That the Congress of the United States of America be hereby memorialized to direct the War Department of the United States to maintain in a full and complete status the facilities of the Charleston Ordnance Depot, Charleston, S. C.

"January 29, 1948, Columbia, S. C., House of Representatives."

THE MARSHALL PLAN

Mr. HOEY. Mr. President, I have received a letter from Dr. DeWitt B. Nettleton, of Pinehurst, N. C., referring to a petition containing the signatures of 2,053 citizens from 23 States endorsing the Marshall plan. Pinehurst is a well-known winter resort in North Carolina, and the people signing this petition are in Pinehurst from all over our country.

I ask unanimous consent that Dr. Nettleton's letter be printed in the RECORD, and that the letter and petition be referred to the Committee on Foreign Relations.

The ACTING PRESIDENT pro tempore. Without objection, the letter and petition will be referred to the Committee on Foreign Relations, and the letter will be printed in the RECORD.

The letter is as follows:

PINEHURST, N. C., *January 29, 1948.*

The Honorable CLYDE R. HOEY,
Washington, D. C.

DEAR SENATOR HOEY: I have just mailed you the petition in favor of the Marshall plan which you so kindly offered to place in the hands of Senator VANDENBERG.

The total of 2,035 signatures is most gratifying to the committee having the matter in hand, although we might have had a few more; Mrs. James Boyd told me this morning that people wishing to sign were still coming to her office.

Signed as it is by a substantial number of citizens who are residents of 23 different States and the District of Columbia, and who represent both major political parties, this committee requests that this petition be given the weight implicit in these facts.

May I express to you the thanks of this committee and of all the signers of the petition for your personal interest in this matter, and for delivering the same into the hands of Senator VANDENBERG.

Respectfully yours,

DEW. B. NETTLETON,
Chairman, Pinehurst-Southern Pines Committee for the Marshall Plan.

LEGISLATION BENEFICIAL TO WIDOWS AND OTHER DEPENDENTS OF WAR VETERANS

Mr. LODGE. Mr. President, I ask unanimous consent to present for appropriate reference and to have printed in the RECORD resolutions adopted by Captain Lester S. Wass Post, No. 3, American Legion, Gloucester, Mass., and endorsed by the Disabled American Veterans, Chapter 74, the Veterans of Foreign Wars of the United States, Post 1624, the AMVETS, and the newly formed National Guard Veterans' Organization, all of Gloucester, Mass., favoring the enactment of legislation beneficial to widows and other dependents of war veterans.

There being no objection, the resolutions were received, referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

CAPTAIN LESTER S. WASS POST,
NO. 3, AMERICAN LEGION,
Gloucester, Mass., January 12, 1948.

Be it resolved in regular meeting assembled of Captain Lester S. Wass Post, No. 3, American Legion, Gloucester, Mass., That the Congress of the United States be petitioned to amend all present laws and regulations pertaining to widows and other dependents of veterans of any war participated in by the Armed Forces of the United States to allow (authorize) the previously mentioned widows and other dependents to draw the existing pensions regardless of any other income which they may be receiving from any source whatsoever; also be it

Resolved, That the Congress of the United States be petitioned to make all income received by any widows or other dependents of any veteran exempt from all taxation by the Federal Government.

Unanimously passed, December 23, 1947, by Captain Lester S. Wass Post, No. 3, American Legion, Gloucester, Mass.

EDWARD S. DEGNAN,
Adjutant.

This resolution has also been passed unanimously by the Disabled American Veterans, Chapter 74, of Gloucester, Mass., and by the Veterans of Foreign Wars of the United States, Post 1624, of Gloucester, Mass. Also by the AMVETS of Gloucester, Mass., and the newly formed National Guard Veterans' Organization of Gloucester, Mass.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, January 30, 1948, he presented to the President of the United States the enrolled bill (S. 1100) for the relief of Frankie Stalnaker.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. GURNEY (for Mr. ROBERTSON of Wyoming), from the Committee on Armed Services:

S. 1195. A bill to repeal the laws relating to the length of tours of duty of officers and enlisted men of the Army at certain foreign stations; with an amendment (Rept. No. 847).

By Mr. RUSSELL, from the Committee on Armed Services:

S. 1520. A bill to amend section 3 of the act of August 24, 1912 (37 Stat. 554), as amended, so as to provide reimbursement to the Post Office Department by the Navy Department for shortages in postal accounts occurring while commissioned officers of the Navy and Marine Corps are designated custodians of postal effects; without amendment (Rept. No. 848).

By Mr. BYRD, from the Committee on Armed Services:

S. 1478. A bill to authorize the transfer of lands in the Fort Wingate Military Reserve, N. Mex., from the War Department to the Interior Department; with amendments (Rept. No. 853).

By Mr. CAPPER, from the Committee on Agriculture and Forestry.

S. J. Res. 164. Joint resolution to authorize the Regional Agricultural Credit Corporation of Washington, D. C., to make loans to fur farmers, and for other purposes; with an amendment (Rept. No. 849).

By Mr. HICKENLOOPER, from the Joint Committee on Atomic Energy:

S. 1004. A bill to amend the Atomic Energy Act of 1946 so as to provide that no person shall be appointed as a member of the Atomic

Energy Commission or as general manager of such Commission until an investigation with respect to the character, associations, and loyalty of such person shall have been made by the Federal Bureau of Investigation; with amendments (Rept. No. 851).

By Mr. TOBEY, from the Committee on Interstate and Foreign Commerce:

S. J. Res. 173. Joint resolution to continue until July 1, 1949, the authority of the Maritime Commission to sell, charter, and operate vessels, and for other purposes; with amendments (Rept. No. 856).

REPORTS ON DISPOSITION OF EXECUTIVE PAPERS

Mr. LANGER, from the Joint Select Committee on the Disposition of Executive Papers, to which were referred for examination and recommendation two lists of records transmitted to the Senate by the Archivist of the United States that appeared to have no permanent value or historical interest, submitted reports thereupon pursuant to law.

REPORT OF JOINT COMMITTEE ON ATOMIC ENERGY (S. REPT. No. 850)

Mr. HICKENLOOPER. Mr. President, I have here a report in the nature of a general outline of the activities of the Joint Committee on Atomic Energy to be made to the Congress. The law contemplates that the Joint Committee shall inform the Congress from time to time as to its general activities, and this report has been adopted. I send it to the desk, and without taking the time to read it, I ask unanimous consent that the report may be printed in the RECORD in full.

There being no objection, the report was received and ordered to be printed in the RECORD, as follows:

DEVELOPMENT AND CONTROL OF ATOMIC ENERGY

FIRST REPORT OF THE JOINT COMMITTEE ON ATOMIC ENERGY TO THE CONGRESS OF THE UNITED STATES

This report is submitted to the Congress by the Joint Committee on Atomic Energy in order to give the Members of Congress a brief outline of the general fields of activity of the joint committee from the time of its active organization to date. The Atomic Energy Act of 1946 imposes strict injunctions of secrecy against revealing details or other information falling within the classification of restricted data and in order that these legal prohibitions be observed, it will be necessary to make this report in general terms.

Section 15 (b) of the Atomic Energy Act of 1946 (Public Law 585, 79th Cong.), among other provisions, states:

"The joint committee shall make continuing studies of the activities of the Atomic Energy Commission and of problems relating to the development, use, and control of atomic energy."

History of the act

Shortly after the first military use of the atomic bomb in August 1945, a number of proposals for exercise of control over the production, use, and development of atomic energy were introduced in both Houses of Congress. On October 3, 1945, the President sent a message to the Congress stressing the necessity of legislation. On October 29, the Senate adopted Senate Resolution 179 establishing the special committee on atomic energy, and all bills concerning atomic energy introduced in the Senate were referred to this committee. Bills concerning atomic energy introduced in the House were referred to the Military Affairs Committee. Both committees held open and executive hearings, receiving the testimony of a large number of witnesses in the scientific, technical, military, business, and Government fields.

Following weeks of discussion in the Senate special committee, S. 1717, introduced by Senator MCMAHON, chairman, was reported back to the Senate on April 19, 1946, as amended in committee. On June 1, the bill was passed by the Senate and was referred to the House Military Affairs Committee. After a number of amendments, this committee reported H. R. 5364 (S. 1717 as amended), which passed the House of Representatives on July 20 and went to conference. Here the bill was agreed upon in its final form and the conference report was accepted by both Houses on July 26. With the affixing of the President's signature on August 1, 1946, Public Law 585 came into force and effect.

With the enactment of this law, it was declared to be the policy of the people of the United States that:

"Subject at all times to the paramount objective of assuring the common defense and security, the development and utilization of atomic energy shall, so far as practicable, be directed toward improving the public welfare, increasing the standard of living, strengthening free competition in private enterprise, and promoting world peace."

Following the effective date of the act, the President, on October 28, 1946, announced the recess appointments of the members of the Atomic Energy Commission, as follows: David E. Lilienthal, Chairman; Robert F. Bacher, Sumner T. Pike, Lewis L. Strauss, William W. Waymack.

These appointees took their oaths of office and assumed their duties on November 1, 1946, and it was directed by the President in Executive Order 9816 that title to the properties of the Manhattan Engineer District be transferred to the Atomic Energy Commission effective midnight, December 31, 1946, and this was done.

On December 12, 1946, the President appointed, as provided by the act, members of the General Advisory Committee, as follows: Dr. James B. Conant, president of Harvard University; Dr. Lee A. DuBridge, president of California Institute of Technology; Dr. J. Robert Oppenheimer, University of California; Dr. Enrico Fermi, University of Chicago; Dr. I. I. Rabi, Columbia University; Hartley Rowe, chief engineer of United Fruit Co.; Dr. Glenn T. Seaborg, University of California; Dr. Cyril S. Smith, University of Chicago; Hood Worthington, chief chemist of E. I. du Pont de Nemours Co.

These appointments are not subject to Senate confirmation.

Thereafter, on January 4, 1947, Dr. J. R. Oppenheimer was named chairman of this General Advisory Committee.

On December 30, 1946, the President announced the recess appointment of Carroll L. Wilson to be general manager of the Commission, subject to Senate confirmation. The announcement of this appointment completed the Presidential appointees provided for in the act who are subject to Senate confirmation.

Pursuant to section 2 (c) of the act, the Secretary of War and the Secretary of Navy appointed, as representatives of their respective Departments, members of the Military Liaison Committee, as follows: Lt. Gen. Lewis H. Brereton, United States Army, chairman; Maj. Gen. Lunsford E. Oliver, United States Army; Col. John H. Hinds, United States Army; Rear Adm. Thorvald A. Solberg, United States Navy; Rear Adm. Ralph A. Ofstie, United States Navy; Rear Adm. William S. Parsons, United States Navy.

On January 31, 1947, Maj. Gen. Lunsford E. Oliver was reassigned and Lt. Gen. Leslie R. Groves was appointed to this vacancy.

On August 2, 1946, the day of adjournment of the Seventy-ninth Congress, second session, the Joint Committee on Atomic Energy, as provided by the act, was appointed as follows:

By the President pro tempore of the Senate, Mr. MCKELLAR, on the part of the Senate: Mr. BRIEN MCMAHON, of Connecticut; Mr. RICHARD B. RUSSELL, of Georgia; Mr. EDWIN C. JOHNSON, of Colorado; Mr. TOM CONNALLY, of Texas; Mr. HARRY F. BYRD, of Virginia; Mr. ARTHUR H. VANDENBERG, of Michigan; Mr. EUGENE D. MILLIKIN, of Colorado; Mr. BOURKE B. HICKENLOOPER, of Iowa; Mr. WILLIAM F. KNOWLAND, of California.

By the Speaker of the House, Mr. RAYBURN, on the part of the House of Representatives: Mr. R. Ewing Thomason, of Texas; Mr. Carl T. Durham, of North Carolina; Mr. Aime J. Forand, of Rhode Island; Mr. Chet Holifield, of California; Mr. Melvin Price, of Illinois; Mr. Charles H. Elston, of Ohio; Mr. J. Parnell Thomas, of New Jersey; Mr. Carl Hinshaw, of California; Mrs. Clare Boothe Luce, of Connecticut.

This joint committee organized on August 2, 1946, and Senator MCMAHON was elected chairman and Representative Thomason vice chairman.

On January 20, 1947, after the commencing of the Eightieth Congress, the Joint Committee on Atomic Energy was appointed as follows: Mr. BOURKE B. HICKENLOOPER, of Iowa; Mr. ARTHUR H. VANDENBERG, of Michigan; Mr. EUGENE D. MILLIKIN, of Colorado; Mr. WILLIAM F. KNOWLAND, of California; Mr. JOHN W. BRICKER, of Ohio; Mr. BRIEN MCMAHON, of Connecticut; Mr. RICHARD B. RUSSELL, of Georgia; Mr. EDWIN C. JOHNSON, of Colorado; and Mr. TOM CONNALLY, of Texas.

By the Speaker of the House of Representatives, Mr. Martin, on the part of the House of Representatives; Mr. W. Sterling Cole, of New York; Mr. Charles H. Elston, of Ohio; Mr. Carl Hinshaw, of California; Mr. James E. Van Zandt, of Pennsylvania; Mr. James T. Patterson, of Connecticut; Mr. R. Ewing Thomason, of Texas; Mr. Carl T. Durham, of North Carolina; Mr. Chet Holifield, of California; and Mr. Melvin Price, of Illinois.

The first meeting of the joint committee was held on January 21, 1947, at which time Senator HICKENLOOPER was elected chairman and Representative COLE, vice chairman. Later, upon his appointment to the Federal district court, Representative Thomason resigned from the House of Representatives and Representative LYNDON B. JOHNSON, of Texas, was appointed by the Speaker to succeed him on the joint committee.

The Presidential nominations for the members of the Commission and the general manager were referred to the Senate section of the joint committee on January 20, 1947. Hearings on these nominations were conducted by the Senate section of the joint committee over the period from January 27 through March 4, 1947, and consisted of 32 public sessions and 6 executive sessions. Fifty-five witnesses were heard and interrogated, including all of the nominees, and the committee afforded full opportunity to other Members of the Senate who were not members of the committee to request witnesses, to question witnesses, and to participate in the hearings.

At the conclusion of the hearings, the committee voted to and did recommend to the Senate that the Senate advise and consent to the appointment of all of the nominees and on April 9, 1947, they were confirmed by the Senate. Under the provisions of the act, the terms of the Commissioners will expire 2 years after August 1, 1946, which was the effective date of the act. The terms of each member of the Commission will eventually be 5 years, but the terms of the members appointed in 1948, when all present terms expire, are as follows: One Commissioner to be appointed for a period of 1 year, one Commissioner for a period of 2 years, one Commissioner for a period of 3 years, one Commissioner for a period of 4 years, and one Commissioner for a period of 5 years. Each of these terms expires on

August 1 of the year in which the respective term ends, and as each term expires, an appointment for that position is to be made for a period of 5 years.

Activities of the joint committee

Section 15 of the Atomic Energy Act of 1946, among other provisions, defines the activities of the joint committee as follows:

"The joint committee shall make continuing studies of the activities of the Atomic Energy Commission and of problems relating to the development, use and control of atomic energy. The Commission shall keep the joint committee fully and currently informed with respect to the Commission's activities. All bills, resolutions, and other matters in the Senate or the House of Representatives relating primarily to the Commission or to the development, use, or control of atomic energy shall be referred to the joint committee."

It also provides:

"The committee is authorized to utilize the services, information, facilities, and personnel of the departments and establishments of the Government."

Fully aware that the field of atomic energy is of vast significance to the people of the United States and of the world, and conscious of the unprecedented problems created by this revolutionary development of science, the committee members undertook, as their first activity, the task of familiarizing themselves with the general nature of this new field. It seemed axiomatic that there must be general comprehension of the nature of this complex subject before the committee could undertake to evaluate the activities of the Commission or to make future recommendations to the Congress.

Immediately subsequent to the confirmation of the Commissioners and the general manager, the joint committee began a program of consultations and executive hearings with the Atomic Energy Commission and with other departments and agencies of the Government that have varying degrees of responsibility in the program. These meetings have been held frequently and for the purpose of acquainting the committee with the operation of the program and policies of the Commission and to keep the committee informed with respect to the efficiency of the integration of the various activities and responsibilities of all departments and agencies of the Government in the advancement of the research and development of atomic energy in this country. These inquiries have, in general and in varying degrees of detail, covered the fields of overall objectives, physical plant, security, production, personnel, materials, town management, labor, international objectives, health and biological programs, raw materials, weapons, industrial and agricultural prospects, military application, and other matters incident to these general fields.

Beginning with the organization of the committee, the selection of a staff was commenced. This staff now numbers 16 people and is set up under an executive director, a deputy director, and 4 sections: information, production, security, and development. Five members of the staff spend a substantial portion of their time visiting the various installations for inspection of activities coming within their particular fields, and they, together with other members of the staff, keep in constant touch with the Atomic Energy Commission through its headquarters staff. A constant liaison and flow of information from the field and the headquarters is maintained, designed to keep the joint committee currently and fully informed. In addition, the committee maintains continuous liaison with the Atomic Energy representation of the United States at the United Nations headquarters, with one member of the staff in continuous assignment there.

It should be stated at this point that the joint committee does not attempt to pass judgment on specialized scientific or technical procedures involved in the program. The committee represents the legislative branch of the Government and is not equipped to be an authority in highly specialized fields of research or technology. Moreover, the committee has not assumed the responsibilities for administrative policies that are clearly vested in the Atomic Energy Commission under the act, but is attempting to gain as much information and knowledge from an over-all standpoint as will enable the committee to recommend, from time to time, any legislation that may be desirable and to keep abreast of the potentially changing needs and requirements of a tremendous program that, without doubt, is still in its infancy.

Following numerous hearings and consultations by the committee between April and the 1st of August 1947, most of the committee members undertook inspection trips to the major physical installations of the Commission, such as those at Oak Ridge, Los Alamos, the Radiation Laboratory at Berkeley, the Hanford Works, the Argonne National Laboratory at Chicago, and some other installations. These inspections by committee members, based upon a background of information previously developed by studies, are invaluable in creating a more comprehensive understanding of the project and a first-hand view of the physical properties and the objectives and progress of this development.

The value of these inspection trips has proven itself in many ways. The sheer size and complexity of the plants and the diversity of the laboratory activities cannot be comprehended without personal observation. Information secured on these trips has helped provide the committee with factual background against which to evaluate progress. Many opportunities to acquire information and make independent appraisal of specific activities presented themselves. Such personal observation and inquiry provide an important means for independent judgment which the committee feels is essential to the fulfillment of its duties under the act.

Close liaison with key personnel of the Commission also has been maintained through continuous contact by the committee staff members with the Commission headquarters in Washington. Numerous conferences have been held with the chiefs of the statutory divisions, other division heads, and with personnel at varying levels within the organization, both in Washington and in the field. Periodic reports of these activities are made to the committee which keep the constantly developing picture available to its members.

The joint committee has also been aware of the importance of keeping fully informed of the progress of international purposes and plans for the control of atomic energy. For the achievement of this purpose, the committee maintains a staff representative at the United Nations who acts in the capacity of unofficial observer for the committee at the meetings of the United Nations Atomic Energy Commission. Studies have been made of the various proposals for international control, the working papers of the subcommittees and the progress of the negotiations. In this connection, the committee has also heard reports from the Under Secretary of State and the Deputy American Delegate to the United Nations Atomic Energy Commission.

Besides the information which comes to the committee directly from personal inspections and conferences, from the Commission, and from its own staff, committee members have examined and considered a vast quantity of information obtained from other sources. Staff members have carried on a continuous program of research, compilation and analysis of unclassified information relating to scientific development, practical applications, international negotiations and activities in foreign countries. This has made it possible for the committee to continue its educative program as well as to carry out the directive of the Atomic Energy Act to "make continuing studies * * * of problems relating to the development, use, and control of atomic energy."

Much information of a classified nature, especially information relating to security, production, and military matters has been presented to the Committee in executive session. In addition to the Chairman and the Commissioners of the Atomic Energy Commission, witnesses appearing before the committee in executive session have included the General Manager of the Commission, and his principal technical aides; the General Counsel; the Director of Security; Secretary of National Defense; Under Secretary of State Lovett; former Under Secretary of State Acheson; Dr. Frederick H. Osborn, deputy delegate to the United States; the Joint Chiefs of Staff; members of the Military Liaison Committee; the Director of the Central Intelligence Agency; Gen. Leslie R. Groves, Chief of the Armed Forces Special Weapons Project; Dr. Vannevar Bush, Director of the Research and Development Board, and Harry A. Winne, vice president in charge of engineering of the General Electric Co. Further meetings will be held periodically with these and other persons.

It is the considered conviction of the committee that, until such time as an effective, enforceable and reliable program for the international control of atomic energy is in successful operation, the most vital business of the Atomic Energy Commission must be the meeting of the atomic requirements of national defense. Executive and administrative responsibility for adequately meeting these requirements is combined by law in the President, the Department of National Defense, and the Atomic Energy Commission.

The joint committee has been assured that those charged with these responsibilities are keenly aware thereof. This phase of the atomic energy program is of paramount and continuing interest to the Joint Committee and the committee considers that continuous knowledge and reassurance of the adequate discharge of these responsibilities is fundamentally necessary to its reliable evaluation of the general success of our program.

The concern which large segments of the public, the press and Members of Congress have shown for the security of our atomic energy program, is shared most actively by the members of the joint committee.

The joint committee is informing itself as completely as possible on all phases of the vital problem of maintaining security in the whole field of atomic energy. The scope and ramifications of the security responsibility which faces the Atomic Energy Commission are tremendous. Clearance for employment of thousands of persons, physical protection of numerous plants, adequate safeguarding of production, as well as accounting for and protection of millions of restricted documents are major problems of the security program.

Numerous visits have been made to the various facilities of the commission for the specific purpose of observing the status of physical security at these installations. Such matters as physical protection afforded by fences and protective lighting; the qualifications, training and efficiency of the guard force; the visitor control system; shipment security; document control; and the storage of restricted materials have been the subjects of intensive study.

The joint committee has reviewed the investigative files of the Atomic Energy Commission relative to the employees of the commission and its contractors. In a number of these cases reviewed, certain questions were raised by the committee and the matters were discussed in detail with the Atomic Energy Commission and its security staff. (In cer-

tain of these cases, the committee has requested that the commission outline in detail its security policy as applied to these specific instances. In the majority of these cases, the personnel involved had been employed during the time when the project was operated by the Manhattan engineer district.) The committee feels strongly that it must continue to follow closely, as it has in the past, the type of personnel engaged in the atomic energy program. To this end the committee staff will continue to conduct these studies of the personnel investigative files of the Atomic Energy Commission. It is the opinion of the committee that the matter of security of personnel is of extreme importance in the over-all problem of the protection of the vital aspects of this important program.

The joint committee has been assured by the Atomic Energy Commission that it is vitally concerned with the problem of personnel security and has recently established a Review Board, headed by former Associate Justice Owen J. Roberts, to assist it in establishing standards and criteria with regard to the employment of personnel in this program. In this connection, the Commission is increasing its efforts to assure itself that there will be no weak links in the chain. The Commission is mindful of the importance of guarding against losses of security through weaknesses or disloyalty of personnel. The Canadian incident involving Dr. Allen Nunn May is ample warning to all of us of the consequences of relaxed vigilance.

The intent of the Congress with regard to security is clearly indicated in the terms of the Atomic Energy Act of 1946. The joint committee is convinced that the Atomic Energy Commission is devoting continuous attention to the responsibility of carrying out this intent. It has inaugurated programs designed to strengthen security and to further protect the vital phases of the project.

While recognizing that the Atomic Energy Commission is unique among Federal agencies, the committee, nevertheless, is aware of parallels, in many of the Commission's production activities, with major American industries such as petroleum refining, heavy chemical production, construction, and power equipment manufacture. It is, therefore, the policy of the committee to apply certain criteria applicable to private industry as yardsticks in studying the operations of the Commission.

To this end, the joint committee has requested from the Atomic Energy Commission a statement of its major programs in terms of present accomplishment and long-range forecasts for future activities. While the difficulties of formulating and stating such programs against a background of currently changing events are acknowledged, the committee believes it is impossible to examine current activities, expenditures and programs intelligently without possessing a clear-cut definition of the aims of the Commission in discharging their responsibilities under the Atomic Energy Act. The first report has been received and is being studied. Subsequent reports will be received on a quarterly basis.

Inquiries are made on such matters as production; construction; contractor performance; town management; personnel policy; power development; radioisotope sales; medical, biological, agricultural, and basic research; fiscal policy; stock piling; expert licensing; health and safety standards; and national research laboratories.

The relative importance of each of the above, and other subjects, to the joint committee's activities varies, but every effort is being made to integrate the total information so as to compose a relatively complete picture of atomic energy development today and in the months and years to come.

As a result of the threatened strike at Oak Ridge in November and December 1947, the joint committee has undertaken a thorough investigation of the important problem of a formula that will assure continuity of work in the atomic-energy program. The committee is unanimous in its conviction that the national security demands uninterrupted operation of the critical facilities of the Atomic Energy Commission. Of the several operating production plants of the Atomic Energy Commission, Oak Ridge is the only one where labor is organized and bargains collectively for the production workers involved. The threat of a strike posed serious potential results as a consequence of interruption in the flow of materials from a possible shut-down of facilities and pointed up sharply the necessity for such an investigation. The committee expects to continue with its investigation and to recommend such action as its conclusions may justify.

Legislation

The committee has heretofore requested, and the request is in continuous effect, from the Atomic Energy Commission and from the Secretary of Defense, that any problems which they believe to exist or are reasonably foreseeable in the future, and which may require legislation or alteration of the act, be suggested to the committee from time to time for study and recommendation. At the time of filing this report, no such suggestions or recommendations have been received. It is the opinion of the committee that sufficient time has not yet elapsed to warrant any conclusions as to whether or not additional or supplemental major legislation will be needed in the program but constant attention is given at all times to this subject.

Summary

The joint committee is a legislative committee which was created as a special servant of the Congress to follow this vast and complex program within the terms of the act. The joint committee does not at this time recommend to the Congress any major legislation affecting the policies or the philosophy of the act. As a legislative committee, it does not feel that it should at this time draw any final conclusions respecting the operation of this program or the administrative policies in effect. Sufficient time has not elapsed to warrant conclusions of this kind. This is not to be construed either as an attitude of hostility or an attitude of approval, but on the contrary expresses an attitude on the part of the committee to objectively evaluate the various phases of the program as a result of more mature opportunity.

The Nation is presently far ahead of any other nation in the over-all knowledge and development in the atomic energy field, and the joint committee believes that we must continue to maintain our preeminence in this field in the future.

Respectfully submitted.

THE JOINT COMMITTEE ON ATOMIC ENERGY,
BOURKE B. HICKENLOOPER, *Chairman.*
W. STERLING COLE, *Vice Chairman.*

INTERIM REPORT OF SPECIAL COMMITTEE TO STUDY PROBLEMS OF AMERICAN SMALL BUSINESS—SURVEY OF ALASKAN NEWSPRINT RESOURCES (S. REPT. NO. 852)

Mr. CAPEHART. Mr. President, from the Special Committee To Study Problems of American Small Business, I ask unanimous consent to submit, pursuant to Senate Resolution 20, appointing a special committee to study problems of American small business, an interim report relating to a survey of Alaskan newsprint resources, and request that it be printed with illustrations.

The ACTING PRESIDENT pro tempore. Without objection, the report will be received and printed as requested by the Senator from Indiana.

UNITED STATES INFORMATION SERVICE IN EUROPE (S. REPT. NO. 855)

Mr. SMITH. Mr. President, Senate Resolution 161 of July 26, 1947, authorized the Committee on Foreign Relations to appoint a subcommittee to make a "complete study and investigation with respect to the nature, manner of performance, and effect of all activities carried out by the State Department or any other agency of the Government for the purpose of acquainting the peoples of foreign countries with the United States, its peoples and their activities, and the policies and objectives of its Government." The subcommittee was authorized for the purpose of this resolution to cooperate with a subcommittee of the Committee on Foreign Affairs of the House of Representatives and to report not later than February 1, 1948.

I am pleased to ask unanimous consent to submit to the Senate this report and appendixes entitled "The United States Information Service in Europe."

The ACTING PRESIDENT pro tempore. Without objection, the report will be received and printed.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. BYRD:

S. 2088. A bill to provide that the farm-acreage allotments for type 21 fire-cured tobacco for the marketing year 1948–49 shall not be less than such allotments for the marketing year 1947–48; to the Committee on Agriculture and Forestry.

S. 2089. A bill conferring jurisdiction on the Court of Claims to hear, determine, and render judgment on the claim of the heirs of William H. Peters and Washington Reed; to the Committee on the Judiciary.

By Mr. GURNEY:

S. 2090. A bill to authorize the President to permit nationals of other nations to receive instruction and training in schools, training establishments, ships, units, and other installations maintained or administered by the Department of the Army, the Department of the Navy, the Department of the Air Force, or the United States Coast Guard; to the Committee on Armed Services.

By Mr. BUCK (by request):

S. 2091. A bill to provide that children be committed to the Board of Public Welfare in lieu of being committed to the National Training School for Girls; that the property and personnel of the National Training School for Girls be available for the care of children committed to or accepted by the Board of Public Welfare, and for other purposes; to the Committee on the District of Columbia.

By Mr. CAPEHART:

S. 2092. A bill to amend section 8 of the act of June 19, 1886, as amended, and section 27 of the Merchant Marine Act, 1920, as amended, to enable the people of Alaska to obtain needed shipping service; to the Committee on Interstate and Foreign Commerce.

By Mr. LODGE:

S. 2093. A bill to incorporate the Italian-American World War Veterans of the United States; to the Committee on the Judiciary.

By Mr. CAIN:

S. 2094. A bill for the relief of Mrs. Pearl Shizuko Okada Pape; to the Committee on the Judiciary.

By Mr. WATKINS:

S. 2095. A bill to authorize the Secretary of the Interior to construct, operate, and

maintain the Central Utah project; to the Committee on Interior and Insular Affairs.

By Mr. MORSE:

S. 2096. A bill to except from the Federal admissions tax the first $100 collected in any calendar year from the sale of admissions the proceeds of which inure to the benefit of any high or elementary school; to the Committee on Finance.

By Mr. BUTLER:

S. J. Res. 180. Joint resolution to maintain the status quo in respect of certain employment taxes and social-securtiy benefits pending action by Congress on extended social-security coverage; to the Committee on Finance.

AMENDMENT OF PUBLIC HEALTH SERVICE ACT—AMENDMENT

Mr. SMITH submitted an amendment intended to be proposed by him to the bill (S. 1454) to amend the Public Health Service Act in regard to certain matters of personnel and administration, and for other purposes, which was ordered to lie on the table and to be printed.

REDUCTION OF INDIVIDUAL INCOME-TAX PAYMENTS—AMENDMENT

Mr. BUTLER submitted an amendment intended to be proposed by him to the bill (H. R. 4790) to reduce individual income-tax payments, and for other purposes, which was referred to the Committee on Finance and ordered to be printed.

EXTENSION OF AUTHORITY OF SPECIAL COMMITTEE TO STUDY PROBLEMS OF AMERICAN SMALL BUSINESS ENTERPRISES

Mr. WHERRY (for himself, Mr. CAPEHART, Mr. CAIN, Mr. MARTIN, and Mr. MURRAY) submitted the following resolution (S. Res. 191), which was referred to the Committee on Rules and Administration:

Resolved, That the authority conferred by Senate Resolution No. 20, Eightieth Congress, agreed to January 24, 1947 (creating a special committee to study the problems of American small business enterprises) and continued by Senate Resolution No. 153, Eightieth Congress, agreed to July 26, 1947, is hereby continued until the expiration of the Eightieth Congress.

Such committee is hereby authorized to expend from the contingent fund of the Senate $50,000 in addition to the amounts heretofore authorized for the same purposes.

INTEROCEANIC SHIP CANAL ACROSS ISTHMUS OF TEHUANTEPEC

Mr. CHAVEZ submitted the following resolution (S. Res. 192), which was referred to the Committee on Interstate and Foreign Commerce:

Resolved, That in the furtherance of inter-American defense and Western Hemisphere economic progress and solidarity, the President is requested to enter into negotiations with the Government of the Republic of Mexico for the purpose of ascertaining the willingness of that Government to make a treaty providing for the construction, operation, and maintenance of an interoceanic ship canal across the Isthmus of Tehuantepec.

A PROGRAM FOR AGRICULTURE—ADDRESS BY SENATOR BALL

[Mr. BALL asked and obtained leave to have printed in the RECORD an address entitled "A Program for American Agriculture," delivered by him at the annual banquet of the Minnesota Farm Bureau Federation, at St. Paul, January 21, 1948, which appears in the Appendix.]

PENNSYLVANIA GOALS CONFERENCE—ADDRESS BY SENATOR MYERS

[Mr. MYERS asked and obtained leave to have printed in the RECORD an address delivered by him in introducing Hon. Clinton P. Anderson, Secretary of Agriculture, at a dinner meeting of the Annual Pennsylvania Goals Conference, Production and Marketing Administration, United States Department of Agriculture, at Harrisburg, Pa., on January 12, 1948, which appears in the Appendix.]

ADDRESS BY SENATOR MARTIN BEFORE UNION LEAGUE OF KANAWHA COUNTY, W. VA.

[Mr. BRICKER asked and obtained leave to have printed in the RECORD an address delivered by Senator MARTIN at a luncheon meeting of the Union League of Kanawha County, W. Va., and the Kanawha County Women's Republican Club at Charleston, W. Va., on January 26, 1948, which appears in the Appendix.]

AMERICAN STABILITY AND WORLD PEACE—ADDRESS BY SENATOR MYERS

[Mr. MYERS asked and obtained leave to have printed in the RECORD an address entitled "American Stability and World Peace," delivered by him at the annual meeting of the Pennsylvania Dress Manufacturers' Association at New York City on January 3, 1948, which appears in the Appendix.]

CITATION OF SENATOR MARTIN BY VETERANS OF FOREIGN WARS, AND STATEMENT TO COMMUNIST WAR VETERANS

[Mr. COOPER asked and obtained leave to have printed in the RECORD a citation given to Senator MARTIN, of Pennsylvania, by the Veterans of Foreign Wars of the United States, and a statement made by Senator MARTIN, of Pennsylvania, to Communist war veterans on May 9, 1947, which appear in the Appendix.]

THE CHICAGO SUBWAY—ADDRESS BY MAJ. GEN. PHILIP B. FLEMING

[Mr. LUCAS asked and obtained leave to have printed in the RECORD an address on the subject of the Chicago subway, delivered by Maj. Gen. Philip B. Fleming, Administrator of the Federal Works Agency, before the Chicago Association of Commerce and Industry, at Chicago, January 21, 1948, which appears in the Appendix.]

EDITORIAL TRIBUTE TO THE LATE JOSEPHUS DANIELS, FROM NEW YORK TIMES

[Mr. TAYLOR asked and obtained leave to have printed in the RECORD an editorial tribute to the late Josephus Daniels, published in the New York Times of January 16, 1948, which appears in the Appendix.]

THE OLD MASTER—EDITORIAL FROM THE DAILY ADVANCE, OF LYNCHBURG, VA.

[Mr. BYRD asked and obtained leave to have printed in the RECORD an editorial referring to a speech delivered by former Postmaster General James A. Farley at Lynchburg, Va., published in the Daily Advance, Lynchburg, Va., January 16, 1948, which appears in the Appendix.]

MORE POST OFFICES, MORE MONEY FOR POSTMEN—EDITORIAL FROM THE HOME NEWS (BRONX AND MANHATTAN, N. Y.)

[Mr. LANGER asked and obtained leave to have printed in the RECORD an editorial entitled "We Want More Post Offices; Postmen Need More Money," from the Home News (Bronx and Manhattan, New York City), of January 27, 1948, which appears in the Appendix.]

OUR PACIFIC POSSESSIONS—EDITORIAL FROM THE NEW YORK TIMES

[Mr. CORDON asked and obtained leave to have printed in the RECORD an editorial entitled "Our Pacific Possessions," from the New York Times of January 4, 1948, which appears in the Appendix.]

THE PRESIDENT'S BUDGET—EDITORIAL COMMENTS

[Mr. LUCAS asked and obtained leave to have printed in the RECORD an editorial entitled "Not Phony," from the Washington Star of January 29, and one entitled "Phony Economy," from the Washington Post, of January 30, which appear in the Appendix.]

ST. LAWRENCE SEAWAY — EDITORIAL FROM THE BOSTON HERALD

[Mr. SALTONSTALL asked and obtained leave to have printed in the RECORD an editorial entitled "St. Lawrence Ascension," published in the Boston Herald of January 28, 1948, which appears in the Appendix.]

PROGRAM OF BALTIMORE YOUTH ADVISORY BOARD—ARTICLE FROM BALTIMORE SUN

[Mr. O'CONOR asked and obtained leave to have printed in the RECORD an article entitled "Award Honors Helpfulness," published in the Baltimore Sun of January 25, 1948, dealing with the program initiated by the Baltimore Youth Advisory Board, and certain awards in connection with that program, which appears in the Appendix.]

CONTINUATION OF RENT CONTROL—STATEMENT BY SENATOR MYERS

[Mr. MYERS asked and obtained leave to have printed in the RECORD a statement made by him on January 30, 1948, before a subcommittee of the Senate Committee on Banking and Currency, in connection with Senate bill 1741, to continue rent control, which appears in the Appendix.]

THE ST. LAWRENCE SEAWAY—STATEMENT BY SENATOR WILEY

[Mr. WILEY asked and obtained leave to have printed in the RECORD a statement regarding the St. Lawrence seaway prepared by him, which appears in the Appendix.]

AMERICAN AID TO THE PEOPLES OF THE WORLD—STATEMENT BY WALTER WHITE

[Mr. CAPPER asked and obtained leave to have printed in the RECORD a statement by Walter White, secretary of the National Association for the Advancement of Colored People, before the Senate Committee on Foreign Relations, January 27, 1948, which appears in the Appendix.]

AUTHORIZATION FOR COMMITTEE ON EXPENDITURES IN THE EXECUTIVE DEPARTMENTS TO MAKE CERTAIN EXPENDITURES, ETC.

Mr. LUCAS. Mr. President, on Wednesday there was a report from the Committee on Rules and Administration of Senate Resolution 189. I regret that I was not here when the resolution was acted upon. There are some things in it which, it seems to me, ought to be discussed. It calls for an appropriation of $125,000. It was agreed to, apparently, without any objection. I ask unanimous consent that the vote be reconsidered and the resolution placed on the calendar.

Mr. WHERRY. Mr. President, I ask that the distinguished Senator withhold the request, if he will, at least until the chairman of the Committee on Expendi-

tures in the Executive Departments is in the Senate Chamber.

Mr. LUCAS. I will do that.

Mr. WHERRY. I suggest to the Senator that he make the request later in the afternoon, when the chairman is present.

Mr. LUCAS. I shall be glad to comply with the request.

POSTPONEMENT TO MARCH 1, 1948, OF SUBMISSION OF REPORT BY JOINT COMMITTEE ON THE ECONOMIC REPORT TO STUDY CONSUMERS' PRICES

Mr. BALDWIN. Mr. President, Senate Concurrent Resolution 19, which was the concurrent resolution that created the subcommittees of the Joint Committee on the Economic Report to study consumers' prices, provided that the report of the committee should be submitted by the 1st of February. The three subcommittees, Mr. President, held very extensive hearings all over the country. As a matter of fact, I doubt if in recent years, if ever before, such an extended attempt has been made to get to the people and discuss with them any single problem. The result of it is that we have a tremendous amount of material. I think it is the sense of the committee, as a result of the meeting held a couple of days ago, that we would ask unanimous consent to extend the time for filing that report from the 1st of February until the 1st of March this year.

Personally I regret very much that we have to ask this extension, and I am extremely hopeful that the report of the committee will be available before the 1st of March, because it deals with the all-important subject of consumer prices. I am familiar, however, with the task with which the staff has had to labor, and with which the committee has had to labor. We desire to compile and submit a complete report, and to do so we shall need this additional time.

Therefore, Mr. President, I submit a concurrent resolution and ask unanimous consent for its present consideration.

The ACTING PRESIDENT pro tempore. The concurrent resolution will be read for the information of the Senate.

The concurrent resolution (S. Con. Res. 38) was read, as follows:

Resolved by the Senate (the House of Representatives concurring), That section 2 of Senate Concurrent Resolution 19, Eightieth Congress, first session, is amended by striking out "February 1" and inserting in lieu thereof "March 1."

Mr. WHERRY. Mr. President, reserving the right to object, may I ask the Senator from Connecticut whether the concurrent resolution has been adopted by the members of the subcommittee to which the Senator refers?

Mr. BALDWIN. I know that the Senator from Ohio [Mr. TAFT], were he present, would offer this concurrent resolution. It was his office which got in touch with me about it. I have talked with two members of the committee, the Senator from Alabama [Mr. SPARKMAN] and the Senator from Vermont [Mr. FLANDERS]. Perhaps they can advise the Senate concerning that matter. I did not happen to be present at the last meeting of the committee myself because I was attending the funeral of a dear friend in New York, so I cannot speak from my actual knowledge, but I am sure the resolution was favorably acted upon by the subcommittee.

Mr. WHERRY. Has the Senator requested that the concurrent resolution be presented to the Committee on Rules and Administration for its action?

The ACTING PRESIDENT pro tempore. The Senator from Connecticut is asking unanimous consent for the present consideration of the concurrent resolution.

Mr. WHERRY. The Senator from from Connecticut desires that the resolution be immediately acted upon on the floor of the Senate, without having gone through the usual procedure of having been referred to the Committee on Rules and Administration?

Mr. BALDWIN. That is correct.

Mr. WHERRY. The Senator states that the subcommittee is in favor of the resolution. The procedure is an unusual one.

Mr. FLANDERS. Mr. President, the concurrent resolution was agreed to by the subcommittee.

Mr. WHERRY. Very well. I have no objection.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the concurrent resolution without reference to the Committee on Rules and Administration?

Mr. WHERRY. Mr. President, I am not going to object. I am stating to the Senate that the procedure requested to be taken now is an unusual one. The Senator in making his request does not follow the regular procedure, which is to have the resolution referred to the Committee on Rules and Administration, which would then act upon it, and, if it acted favorably, it would report it to the Senate for its consideration. In the future I believe we should adhere more strictly to that rule. I realize that the request is only for an extension of time to submit a report. I desire to accommodate the Senator. I believe the time should be extended. Therefore, I shall waive any objection. However, again I wish to say that the procedure is in violation of the rule. I think the rule is a very important one, which Members of the Senate should follow, if they can do so.

Mr. BALDWIN. Mr. President, I want to make it perfectly clear for the RECORD, so far as I am concerned, that I wish the report could be made available on the 1st of February, but it could not be made available as of that date. The concurrent resolution is one which the chairman of the committee, apparently, at the request of the full committee, was going to present today himself; but, not being present, his office has asked me to present it.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Connecticut for immediate consideration of the concurrent resolution?

There being no objection, the concurrent resolution (S. Con. Res. 38) was considered and agreed to.

CELEBRATION IN CUBA OF FIFTIETH ANNIVERSARY OF AMERICAN AND CUBAN VICTORIES IN WAR WITH SPAIN (S. REPT. NO. 854)

Mr. MARTIN. Mr. President, the Joint Committee on the Observance and Celebration in Cuba of the Fiftieth Anniversary of American and Cuban Victories in the War With Spain, created by House Concurrent Resolution 108, Eightieth Congress, agreed to July 26, 1947, submits the following report pursuant to section 2 (b) of said resolution:

In the discharge of its duties under House Concurrent Resolution 108, your committee has considered various plans for the observance contemplated by the resolution, and has had the active cooperation of representatives of the Cuban Embassy in Washington. After discussion of all plans, your committee has unanimously agreed upon the following recommendations:

(a) In connection with the observance of the fiftieth anniversary of the sinking of the United States battleship *Maine* in Habana Harbor, it is recommended that a delegation be appointed to be composed of two Members of the Senate to be appointed by the President of the Senate, two Members of the House to be appointed by the Speaker, and two representatives of the United Spanish War Veterans, consisting of the commander in chief and one other member of that organization, to attend the ceremony that will be held in Habana, Cuba, on Sunday, February 15, 1948. This action was approved after it was indicated by a spokesman for the Cuban Embassy that the Cuban Government would formally invite the delegation, through diplomatic channels, within the next few days. Expenses in connection with the visit of the delegation to Cuba are to be paid from the moneys authorized by House Concurrent Resolution 108.

(b) It is recommended that a joint session of the Congress of the United States be called for Monday, April 19, 1948, at which time the President of the United States will address the joint session. The President has already agreed to such action. In Habana, Cuba, on the same date, a joint session of the Cuban Legislature will be held, with the President of Cuba addressing the joint session. National and international broadcasting companies have indicated their willingness to cover these two joint sessions.

(c) While your committee is submitting this report not later than February 2, 1948, as provided in House Concurrent Resolution 108, it is recommended that the committee, together with its authority and authorized moneys, should be continued for a period of 30 days after April 19, 1948.

The necessary resolutions to carry out the foregoing recommendations will be submitted contemporaneously with this report.

To carry out this proposal, I ask unanimous consent that a concurrent resolution, which I submit, be now considered.

The ACTING PRESIDENT pro tempore. The Senator from Pennsylvania has asked unanimous consent to have considered at this time, without reference to committee, a concurrent resolution. Or does the Senator merely ask unanimous consent to submit the concurrent resolution?

Mr. MARTIN. I should like to have consideration of the concurrent resolution now, because it is necessary to have the committee continued if we are to carry out the plan.

The ACTING PRESIDENT pro tempore. The concurrent resolution will be read for the information of the Senate.

The concurrent resolution (S. Con. Res. 39) was read, as follows:

Resolved by the Senate (the House of Representatives concurring), That in commemoration of the fiftieth anniversary of the victory over Spain, resulting in the liberation of Cuba, the two Houses of Congress shall assemble in the Hall of the House of Representatives at 1 o'clock in the afternoon, on Monday, April 19, 1948.

That the joint committee created by House Concurrent Resolution 108, Eightieth Congress, is empowered to make suitable arrangements for fitting and proper exercises for the joint session of Congress herein authorized.

That invitations to attend the exercises be extended to the President of the United States and the Members of his Cabinet, the Chief Justice and Associate Justices of the Supreme Court of the United States, the diplomatic corps (through the Secretary of State), the general of the armies, the Chief of Staff to the Commander in Chief, the Chief of Staff, United States Army, the Chief of Naval Operations, the Chief of Staff, United States Air Force, the commandant of the Marine Corps, and the commandant of the Coast Guard, and such other persons as the joint committee shall deem proper.

That the President of the United States is hereby invited to address the American people at the joint session of the Congress in commemoration of the fiftieth anniversary of the victory over Spain.

Mr. LUCAS. Mr. President, reserving the right to object, how much money will this cost?

Mr. MARTIN. The committee had an appropriation of $25,000, none of which has been expended. The proposed expenditure would be entailed by the sending of six persons to Havana, Cuba, for the observance of the fiftieth anniversary of the sinking of the battleship *Maine*.

Mr. LUCAS. Where does the $25,000 come from?

Mr. MARTIN. It comes equally from the contingent funds of the House and of the Senate.

Mr. LUCAS. Did the original concurrent resolution provide for the kind of trip now proposed to be made?

Mr. MARTIN. The original concurrent resolution called for the appointment of four Members of the Senate and four Members of the House to recommend a suitable celebration of the fiftieth anniversary of the freedom of Cuba, and the report which I have just read, unanimously agreed to by the joint committee, recommends that we send a committee to Cuba to join in the celebration of the fiftieth anniversary of the sinking of the battleship *Maine*, and that on the 19th of April, which is the fiftieth anniversary of the adoption of the resolution that Cuba ought to of right be a free and independent state, there be held a joint session of the two Houses of Congress, to be addressed by the President of the United States. This would make a very fine and dignified recognition of this very important point in history. The broadcasting companies have signified their willingness to give us a world-wide hook-up. At this critical period in the history of the world it seems a fine opportunity for those two nations, which have gotten along so well during the past 50 years, to afford an example to the world that America is not an aggressive nation, but is interested in having free government established throughout the world. The Cuban Government has very enthusiastically entered into these plans.

Mr. LUCAS. Mr. President, I object to the present consideration of the concurrent resolution.

The ACTING PRESIDENT pro tempore. Objection is heard. The concurrent resolution will be referred to the Committee on the Judiciary.

Mr. WHERRY. Mr. President, will the Senator from Illinois withhold his objection for just a moment so that I may ask a question?

Mr. LUCAS. Certainly.

Mr. WHERRY. Is my understanding correct, that a former concurrent resolution of authorization has already been passed, and that this simply amends the former concurrent resolution?

Mr. MARTIN. Yes. Of course, if it is desired to refer the concurrent resolution to the Committee on Rules and Administration, that is entirely agreeable to me.

I also ask unanimous consent to submit two other concurrent resolutions to carry into effect the recommendations of the committee. We must remember that the committee is to make its report on or before February 2, 1948.

Mr. LUCAS. Mr. President, I should like to accommodate the Senator from Pennsylvania; but a little while ago I asked unanimous consent for the reconsideration of a resolution which was passed on Wednesday. My request was objected to, and I think under the circumstances I shall object.

Mr. WHERRY. Mr. President, I hope the distinguished Senator will not allow that observation to stand in the RECORD. I did not object to reconsideration of the resolution. I asked the distinguished Senator to withhold his request until the chairman of the committee could be present.

Mr. LUCAS. That is correct; but the Senator told me later in the corridor that two Senators would object.

The ACTING PRESIDENT pro tempore. The Senator from Illinois objects.

Mr. MARTIN. Mr. President, I ask unanimous consent to submit two other concurrent resolutions in connection with this report, for appropriate reference.

The ACTING PRESIDENT pro tempore. Without objection, the concurrent resolutions will be received and appropriately referred.

EXTENSION OF JOINT COMMITTEE ON OBSERVANCE AND CELEBRATION OF VICTORY OVER SPAIN

Mr. MARTIN submitted the following concurrent resolution (S. Con. Res. 40), which was referred to the Committee on the Judiciary:

Resolved by the Senate (the House of Representatives concurring), That House Concurrent Resolution 108, Eightieth Congress, agreed to July 26, 1947, is amended by striking out the last sentence of section 2 (b) and inserting in lieu thereof the following: "The committee shall cease to exist upon the expiration of 30 days after April 19, 1948."

FIFTIETH ANNIVERSARY OF SINKING OF UNITED STATES BATTLESHIP "MAINE"

Mr. MARTIN submitted the following concurrent resolution (S. Con. Res. 41), which was referred to the Committee on the Judiciary:

Resolved by the Senate (the House of Representatives concurring), That House Concurrent Resolution 108, Eightieth Congress, agreed to July 26, 1947, is amended by adding at the end of section 3 thereof the following: "The funds made available under this concurrent resolution shall be available for paying the expenses of a delegation to attend the ceremonies that will be held in Habana, Cuba, on Sunday, February 15, 1948, in connection with the observance of the fiftieth anniversary of the sinking of the United States battleship *Maine*, to be composed of two Members of the Senate to be appointed by the President of the Senate, two Members of the House of Representatives to be appointed by the Speaker, and two representatives of the United Spanish War Veterans, consisting of the commander in chief and one other member of that organization, together with the expenses of any of the employees of the committee whose services are required in connection with this ceremony."

LEGISLATIVE PROGRAM

Mr. WHERRY. Mr. President, just prior to the continuance of the debate on the St. Lawrence seaway by the distinguished Senator from Louisiana, I should like to suggest to the membership of the Senate, because some have asked me about it, the program for next week. It is the intention now to adjourn, at the conclusion of the session today, until Monday next at noon. Such a motion, of course, will mean that there will be a morning hour on Monday, during which the calendar will be called from the beginning for the consideration of measures to which there is no objection, after which the order of business again will be the St. Lawrence seaway, as the unfinished business on the calendar.

It is also our intention to have an executive session today when the debate is concluded for the day. On the calendar there are certain nominations which I think should be brought to the attention of the Senators at this time, because we shall ask that they be confirmed today.

It is also the intention, beginning Monday, to have daily sessions until the debate on the St. Lawrence seaway is concluded, if that meets with the approval of the Senate, at least until Thursday night. If it has not been concluded by that time, we will make further announcements about the program for the Friday session and also for next week.

If there is any question any Senator would like to ask, I shall try to answer it, but the program for next week is about as I have outlined it. I make this statement for the benefit of those who are interested in the program and who have telephoned me about it.

THE ST. LAWRENCE SEAWAY

The Senate resumed the consideration of the resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof.

The ACTING PRESIDENT pro tempore. Under the order of Wednesday last, the Chair recognizes the senior Senator from Louisiana [Mr. OVERTON].

Mr. WHERRY. Mr. President, will the Senator yield?

Mr. OVERTON. If it is the purpose of the Senator to suggest the absence of a quorum, I think there are about as many Senators now present as would be here after a quorum call.

Mr. WHERRY. I was about to say that if the Senator from Louisiana desired a quorum call, I would suggest the absence of a quorum.

Mr. OVERTON. I would not object to yielding for that purpose a little later.

Mr. WHERRY. Very well.

Mr. OVERTON. Mr. President, when the Senate was last in session, day before yesterday, we were addressed on the subject of the St. Lawrence seaway by the distinguished Senator from Massachusetts [Mr. LODGE]. His discourse upon this subject was very thorough, very able, and brilliant. It covered the whole subject matter, all that the proponents are now urging, and the opposition, in their arguments. After that masterly address by the junior Senator from Massachusetts I do not feel that I can add very much to the subject matter of the controversy, but I find myself face to face with one acquaintance. Shortly after I had been in the Senate, in 1934, I spoke against what was known in that day as the Great Lakes-St. Lawrence seaway treaty. It was presented to the Senate as a treaty, and it always has been presented as a treaty. Traditionally there has not been any agreement between the Dominion of Canada and the United States of America with respect to the boundary waters between the two countries, which has not been submitted in the form of a treaty. The agreement regarding the St. Lawrence project lost its aspect as a treaty, not by any act of the Senate, but by a decree of the State Department because it was felt that as a treaty possibly it could not muster a two-thirds vote in the United States Senate. Therefore, as a matter of strategy, it was considered better to offer it as an executive agreement, in the hope that it would command a majority vote of the Senate and of the House.

When the project was presented in 1934, the principal argument was that it would give employment to the unemployed. It came up again in 1945 as a national-defense project. Now, in 1948, it comes before us dressed in all the togs it had worn before—unemployment relief, navigation, power, national defense, plus the new theory presented, of self-liquidation through the levying of tolls.

It is doubtful if any measure ever considered by Congress has been the subject of more extensive hearings, more prolonged debate, and more decisive action than has the project for the construction of the Great Lakes-St. Lawrence seaway. Time after time for nearly a quarter of a century it has been paraded, in one form or another, through the legislative halls, each time to be decisively beaten back. When it was last presented as an amendment to a river and harbor bill it was defeated by a vote of more than 2 to 1. Impractical though it may be, economically unsound as it is, nevertheless, its proponents, in a critical hour like this, are insisting again that we dissipate our time and energy and sorely needed national funds on a proposition which the people of the country, through their chosen representatives, have repeatedly rejected.

To my mind, the one thing which strongly indicts the St. Lawrence project as insupportable is the readiness with which it has been able through the years to change outwardly its shape and form, and yet inwardly remain the same stupendous blunder. It has been presented to the Congress as a treaty; it has come here as a public works project; and it has been here in the form of an agreement between the United States and Canada, in which form it now appears. Furthermore, the project continues to be, even in its more favorable aspects, highly questionable in its economics. Perhaps its proponents hope to becloud even further its economic unsoundness, and lull the Congress into agreement by covering its obvious defects with the lures of self-liquidation and national defense.

I fail to understand the reluctance, yea, the refusal, of the proponents of the St. Lawrence project to allow it to be the subject of the same searching study to which all our public works, in whatever category, are put. Could it be that they know it will fail to meet the test? Could it be that they, too, are convinced that if the searchlight of practical engineering and sound waterway economics is applied to it, it will be exposed as thoroughly unsound? It must be that their failure to demand this study proves their own apprehension that the project is not only impractical, but would never be able to stand on its own feet economically. This refusal of the proponents to allow the project to be carefully scrutinized in the regularly established way thunders its economic weakness. I know that the proponents of the St. Lawrence would have Senators believe and would have the country believe that such a study has been made, but I assert now that the thoroughgoing engineering and economic study which the Congress for nearly half a century has required on all waterway projects has not been made on the St. Lawrence. The established method for such examination has been ruthlessly and strangely ignored.

Congress many years ago established a method for examining all waterway projects, and since early in the present century the Congress has scrupulously insisted repeatedly that each project it authorized must first be handled in this established, orderly, and thoroughly sound manner.

The adopted method provides for the direction by the Congress of a preliminary examination and survey by the Army engineers. If the report is favorable, a complete survey and examination is undertaken, first by a district engineer, and then by a division engineer, who reports his conclusions to the Chief of Engineers. The Chief of Engineers first sends the report to the Board of Engineers for Rivers and Harbors, which then conducts a hearing on the project. The Board of Engineers for Rivers and Harbors then submits its report to the Chief of Engineers, who, in turn, also studies the entire case and drafts a report, which report, as a precaution, under recent legislation, is submitted for comment to the governor or governors of the State or States involved. Thereupon the Chief of Engineers submits the entire report to the Congress.

If the report of the Chief of Engineers is favorable, the proper committee in the Senate or House calls for public hearings. These hearings are exhaustive and frequently extend over a considerable period of time. If the congressional committees then decide that the project is meritorious, appropriate authorization legislation is reported. The project then bears the scrutiny of the entire Congress, and to be effected must be adopted by it.

I insist that the St. Lawrence seaway is in no different category from any other waterway project in the country.

I am well aware of the argument which has been advanced by the proponents that the St. Lawrence seaway is different, and that it cannot, and should not, be treated as are our other waterway projects because of its international aspects. That argument collapses of its own weight. The St. Lawrence, except for length, is no different from the St. Mary's River, which connects Lake Superior and Lake Huron. It, too, is on the international boundary. The improved project falls within both Canada and the United States. But, mark you, they reckoned without their hosts, because the improvements on the St. Mary's River were, in truth and in fact, subjected to the same study and authorization process as were the improvements on the Ohio River.

In recent weeks many of us have been disturbed about the developments in Panama in connection with the great Canal which crosses that Isthmus. Many in this body on both sides of the aisle have become so disturbed that they have presented bills which would eventually lead to construction of other canals, one in Nicaragua, one in Mexico, and suggestion has been made of other routes through other Central American countries. Those who have taken the lead in this matter have not, however, attempted to circumvent the well and long-established policy of Congress. They could have followed the example of the proponents of the St. Lawrence and set out to evade the necessary engineering and economic study which should be given to such a huge undertaking. To their everlasting credit, however, they have not pursued that course, but rather have presented legislation which calls for a survey and examination by the Army engineers to determine the engineering practicability and the economic soundness of the various routes under discussion. And it is significant to point out that, at least from the standpoint of national defense, the situation to the south of us roars its importance, in comparison with that of the St. Lawrence, as a national-defense measure.

The claims of the proponents of the St. Lawrence project have been heard here. They are given in the report which accompanies the joint resolution now under consideration. They say, and would have the Senate believe, that an engineering and economic study has been made on this waterway. Just what, then,

is the so-called study which they use as the foundation of their entire argument? Who made it? How was it made? And why was it made as it was?

Well, first of all, someone asked the Army engineers to state whether the project was practical from an engineering standpoint, and if it was practical, how much it would cost to build it. That is all the Army engineers have been asked about. Then the proponents turned to the Department of Commerce and asked, in effect, How much commerce will such a waterway carry? That, in substance, was the problem which the Department of Commerce was given. So the Army engineers on the one hand go out and determine if such a channel can be built and then sit down with their pencils and figure the cost of construction. Simultaneously the Department of Commerce sits down and sends out some questionnaires, looks up a few figures here and there, does a bit of meditating and a bit of simple arithmetic, and profoundly states that so many millions of tons of commerce would use the waterway annually.

I have no animosity toward the Department of Commerce. As a matter of fact, I think the Department of Commerce, in its own particular fields, has done a reasonably able job. The Department of Commerce has had no experience in inland-waterway economics, and, so far as I know, has never conducted any economic studies in connection with the construction of any of our coastal harbors or inland waterways. The Department of Commerce did not then have and does not now have the personnel and the background which such a highly technical study demands.

Why were not the Army engineers asked to make the usual study of the St. Lawrence? Over and over that question repeats itself in every consideration of the St. Lawrence, in every test to which it is subjected. I do not know the answer. But I repeat that I suspect that it is because even the proponents know, as do many of us, that such a searching study might sound the death knell of the St. Lawrence project.

Now let us turn for a while to the national defense aspects of the St. Lawrence project. If ever a bubble burst wide open and dissipated into thin air, so has this empty claim of the proponents of the St. Lawrence that the project is of immeasurable and incalculable worth to our national defense. The claim is so thoroughly fantastic that it raises a serious doubt in my mind whether it was seriously advanced by the advocates of the proposal. So weak and lame is this contention that I have become convinced that it could not have been advanced in seriousness, but rather was held out as alluring bait in the absence of more substantial arguments. What does the official witness of the Department of National Defense, as it is now constituted, say about this fantastic claim? That witness before the committee was Secretary Royall. What did he say? I quote his testimony:

> The Army's position and the War Department's position is that the St. Lawrence seaway is not vital to national defense, but that the project would be helpful to national defense.

Through several pages of testimony in the hearings before the subcommittee an effort was made to obtain a stronger statement from Secretary Royall. I commend him for his honesty and frankness. Again and again he repeated verbatim and in substance this statement.

There is not a creek in Indiana, there is not a marsh in Florida, or a bayou in Louisiana about which Secretary Royall could not have made the same statement. The improvement of a creek, if it permitted full and extensive agricultural operations, would, of course, not be vital to the national defense, but the production of the food and fibers would quite obviously be helpful in time of war. I recall that during the war there were even some creek improvements which the War Production Board said were vital to the national defense. But the War Department will not say that the St. Lawrence is vital to the national defense. They say of the St. Lawrence what the War Production Board said of Loggy Bayou in north Louisiana, that its improvement would be helpful to the national defense. But the War Production Board would not allow the improvement of Loggy Bayou because it was not vital to the national defense.

The subcommittee and the majority report of the full committee make a valiant but vain effort to substantiate the claim of national defense necessity. The testimony shows that again and again an effort was made to make the project appear as one without which our great Nation no longer can defend itself from a foreign foe.

Mr. President, I submit that very far from being vital to our national defense, the St. Lawrence project, if built, may serve as the agent for seriously challenging our ability to protect that which we hold so dear from assault from without. I assert that the St. Lawrence waterway is not only not vital to the national defense, but that it would be harmful—perhaps even fatally harmful—to our national security.

This is not the first time in our national history that a situation similar to this has come under the eye and comment of one of our greatest statesmen. Before the Louisiana Purchase, the boundary of the United States did not extend beyond the western bank of the Mississippi River. The region extending westward beyond the Mississippi was owned and controlled intermittently by France and Spain, and then France again. It was a serious menace to our national defense as well as to our national economy. France owned and controlled the mouth of the Mississippi from the approximate latitude of Baton Rouge on down and held dominion over the remaining half of the mighty river.

In his third annual message to Congress on October 17, 1803, Mr. Jefferson, as President of the United States, who had negotiated the Louisiana Purchase, commenting on it, said:

> The property and sovereignty of the Mississippi and its waters secure an independent outlet for the produce of the Western States and an uncontrolled navigation through their whole course, free from collision with other powers and the dangers to our peace from that source.

Previous to this message to Congress, Thomas Jefferson wrote to John Dickinson as follows:

> MONTICELLO, *August 9, 1803.*
>
> DEAR SIR: Your friendly favor of the first instant is received with that welcome which always accompanies the approbation of the wise and good. The acquisition of New Orleans would of itself have been a great thing, as it would have ensured to our western brethren the means of exporting their produce; but that of Louisiana is inappreciable, because, giving us the sole dominion of the Mississippi, it excludes those bickerings with foreign powers, which we know of a certainty would have put us at war with France immediately, and it secures to us the course of a peaceable nation.

From the standpoint of national peril the St. Lawrence situation is more acute, in one important sense at least, than the situation with respect to the Mississippi River. The United States did have control of one-half of the Mississippi in practically its entire length. The St. Lawrence rises in the United States, leaves its borders and flows many miles through the Dominion of Canada. A foreign nation owns and controls not only its mouth, but its borders on both sides. While we are happily at peace today with the Dominion of Canada, and I hope will ever be, there can be no prediction as to what may occur sooner or later in a world so torn with bitterness, greed, and the prospects of additional warfare. Even if we remain on friendly terms with Canada, some strong foreign power may seize the outlets and lower reaches of the St. Lawrence, wrest it from the hands of the Dominion of Canada and have it backfire upon us as a menace, and perhaps a disaster to our national defense. Except for the unnavigable Rio Grande, the St. Lawrence is the only river rising in the United States and debouching its waters into the open sea through a foreign land. We have absolute power and dominion over all our streams and inland navigable waters from source to mouth.

Little consideration seems to have been given to the effects of this gigantic supposedly national cure-all upon one of the most vital cogs in our national-defense machinery, namely, the merchant marine, which may well be dealt a crippling if not fatal blow by construction of the St. Lawrence Channel. A few years ago the late Senator Josiah Bailey, of North Carolina, then chairman of the old Senate Commerce Committee, asked the principal ship operators in the country to express to him their views on this project. Their responses to the Bailey letter were read by me into the CONGRESSIONAL RECORD last May 8, and may be found on pages 4771–4779, volume 93, part 4. All except 1 of the 32 responding to the inquiry opposed the seaway, and stated that in the event of its construction they would be unable to extend operations to the Great Lakes area. That response was from the operators of vessels under the American flag. The late Senator Bailey communicated with 32 of the principal ship operators, and 31 of them answered that if the St. Lawrence

project were built they never expected to use it, and they showed that they could not use it.

These are the men who carry our goods to the four corners of the earth and bring back in their ships the raw materials, the finished products, and the produce our economy demands from around the globe. They qualify as the best experts on shipping. Day in and day out, year after year, they have engaged in it as a business enterprise.

Never have they been unwilling to enter into any shipping trade which offered economic merit. But what do they say of the St. Lawrence project? Our ships, they say, cannot and will not operate there. Since the channel would be only 27 feet in depth, ships drawing more than 24 feet could not use it. American ships, practically all of which have been constructed to much greater draft, could not operate on the route, but many foreign ships could.

Mr. President, I should like to read a statement showing the depths of the principal ports of the United States. Bear in mind that the depth of the St. Lawrence Channel is to be 27 feet, and that vessels drawing more than 24 feet could not use that channel.

These are the depths of the ports for which I have figures:

	Feet
Portland, Maine	35
Boston, Mass	40

Those are the minimum controlling depths in those harbors.

	Feet
Providence, R. I	35
New York, N. Y	45
Philadelphia, Pa	37–40
Baltimore, Md	35–39
Norfolk, Va	40
Newport News, Va	40
Wilmington, N. C	32
Charleston, S. C	35
Savannah, Ga	34
Jacksonville, Fla	30
Tampa Harbor, Fla	30
Mobile, Ala	32
New Orleans, La	35–40
Lake Charles, La	35
Port Arthur, Tex	36
Beaumont, Tex	34
Houston, Tex	34
Texas City, Tex	34
Corpus Christi (Port Aransas), Tex	34
Los Angeles-Long Beach, Calif	35
Richmond, Calif	30–32
Oakland, Calif	30–35
San Francisco, Calif	40
San Pablo Bay and Mare Island Strait, Calif	30
Portland, Oreg	35
Seattle, Wash	34
Tacoma, Wash	29–30
Everett, Wash	30

Those are the actual depths authorized by Congress with respect to those ports of the United States.

Now, let us turn from the main ports of the United States and look at the ports on the Great Lakes. Let us see how they can utilize even vessels of 27-foot draft. The following are the authorized depths of the principal ports on the Great Lakes:

	Feet
Duluth-Superior, Minn	25–26
Two Harbors (Agate Bay), Minn	26
Milwaukee, Wis	21
Ashland, Wis	25
Chicago, Ill	21
Calumet Harbor, Ill	25–26
Indiana Harbor, Ind	25–26

I regret that the senior Senator from Wisconsin, who has charge of the joint resolution and who is so interested in the Great Lakes region, is not here to get these figures. Apparently he is not apprised of them.

	Feet
Gary Harbor, Ind. (private)	27
Muskegon, Mich	21
Detroit, Mich. (in through channel)	25–26
Toledo, Ohio	25
Cleveland, Ohio	25
Sandusky, Ohio	21–22
Buffalo, N. Y	22–25
Rochester (Charlotte) Harbor, N. Y	20
Oswego Harbor, N. Y	21

There is the story.

So, Mr. President, we see that in the Great Lakes there are harbors of insufficient depth to accommodate themselves to the proposed new traffic without the expenditure of vast sums of money.

The St. Lawrence would open our shipping to the tramp steamers of the world, thus taking from American bottoms American goods which should be transported on American-flag ships. For many, many years our Government has subsidized our merchant marine to make it competitive with the fleets of other nations, who build ships and man them for a fraction of the cost which a United States operator must pay. Even then, an inadequate merchant marine always has been a source of anxiety to our military leaders when they were faced with the problem of defending our country.

Certainly the American seamen who transported fighting men to fronts which covered the globe, and then made it possible for them to stick there by the constant flow of ammunition, food, clothing, and equipment played an extremely vital role in the victory in the last war. Without our merchant marine, we would never have been able to have maintained ourselves in the dark days of 1942 and 1943.

I think it would be just as unwise for us now to scrap our merchant marine as it would be to say that in these days of rockets and atom bombs, the tank no longer is a practical means of warfare, and we will therefore abandon our armored forces. That would be nonsensical. Yet the proponents of the St. Lawrence seaway are asking us to do to the American merchant marine what they would not dare propose for our tank and air forces—cripple and destroy them.

Among the objections offered by the ship-line operators was that the seaway would be in use only 7 months each year, since ice conditions would prevent operations during five winter months. They explained that port facilities and offices would have to be maintained the year round, even though cargoes could be handled only 7 months. At the same time, they said, similar facilities would have to be continued at Atlantic ports to provide for traffic during the time the seaway was inoperable.

One operator pointed out that Chicago is only 1,500 miles from the ocean via the Mississippi River system to New Orleans, whereas the route through the Great Lakes and the St. Lawrence to the ocean would be in excess of 2,200 miles. He expressed the opinion that current freight rates, including the cost of transfer from barge to ship at New Orleans, are cheaper than the ship rate would be from Chicago to the Atlantic by way of the St. Lawrence, since the reduced draft and high insurance rates caused by the rocky canal channels and 15 locks through the St. Lawrence project would, along with the distance involved, offset any other considerations.

Are we, then, Mr. President, going to trade our merchant marine, which so recently so well proved its worth to our national defense, for something which even the Secretary of War has damned with faint praise as "helpful to our national defense"? Are we to say to those brave men who struggled so bravely against the elements and against enemy submarines only a short time ago that we no longer need them? Are we to say to those who felt the impact of hot enemy lead or who sat hungry in open lifeboats for days, awaiting rescue, that their sacrifices were unnecessary? Yet that is what we would do if we were to build the St. Lawrence seaway and open it to the tramp steamers of the world, and thus take from our own merchant marine that which would keep it virile and ready against the day when it might again be called to arms.

Mr. President, in presenting this joint resolution, the proponents of the St. Lawrence seaway have gone even farther astray than they ever dared before. By inserting a section providing for the imposition of tolls on the use of the proposed waterway under the guise of self-liquidation, they are undertaking to overturn a policy so firmly imbedded in our national life that its origin is found in the ordinances under which this then infant Nation was governed under the Articles of Confederation.

Mr. President, the matter of tolls is very important. It is a brand new phase of this subject; it has been injected into this proposal only recently. Now for the first time it has been brought to the attention of the Senate. During my 17 years in the Senate of the United States I have had occasion to make some study of waterways. Therefore, if I may suggest the absence of a quorum, without losing the floor——

The ACTING PRESIDENT pro tempore. The absence of a quorum has been suggested. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Gurney	Moore
Baldwin	Hatch	Morse
Ball	Hawkes	Murray
Barkley	Hayden	Myers
Brewster	Hickenlooper	O'Conor
Bricker	Hill	O'Daniel
Bridges	Hoey	O'Mahoney
Brooks	Ives	Overton
Buck	Jenner	Reed
Bushfield	Johnson, Colo.	Revercomb
Butler	Johnston, S. C.	Russell
Byrd	Kem	Saltonstall
Cain	Kilgore	Smith
Capehart	Knowland	Sparkman
Capper	Langer	Stennis
Chavez	Lodge	Stewart
Connally	Lucas	Taylor
Cooper	McCarran	Thomas, Utah
Cordon	McCarthy	Thye
Donnell	McClellan	Tobey
Downey	McFarland	Tydings
Dworshak	McGrath	Vandenberg
Ecton	McKellar	Watkins
Ellender	McMahon	Wherry
Ferguson	Magnuson	Wiley
Flanders	Malone	Williams
Fulbright	Martin	Wilson
George	Maybank	Young
Green	Millikin	

Mr. WHERRY. I announce that the Senator from Wyoming [Mr. ROBERTSON] is absent on official business.

Mr. LUCAS. I announce that the Senator from Mississippi [Mr. EASTLAND] and the Senator from Oklahoma [Mr. THOMAS] are absent on public business.

The Senators from Florida [Mr. HOLLAND and Mr. PEPPER] and the Senator from Virginia [Mr. ROBERTSON] are absent by leave of the Senate.

The Senator from North Carolina [Mr. UMSTEAD] and the Senator from New York [Mr. WAGNER] are necessarily absent.

The ACTING PRESIDENT pro tempore. Eighty-six Senators having answered to their names, a quorum is present.

Mr. OVERTON. Mr. President, there is no policy which is more thoroughly embedded in our national life than the policy of no tolls on any waterways within the jurisdiction of the United States. That policy was established in the very dawn of the Nation. Its origin is found in the ordinance under which the then infant Nation was governed under the Articles of Confederation. Repeatedly since that time the Congress and our administrative agencies reaffirmed our national belief that our waterways should be open to all on equal terms. I am of the view that the proposal now before us is the greatest threat which has ever faced the use and continued development of our great inland-waterway system.

I was particularly struck by the testimony of the representative of the Association of American Railroads when he appeared before the subcommittee of the Committee on Foreign Relations of the United States Senate and discussed the toll feature. I think his statement perhaps best illustrates the fear which I am sure many Senators share with me that the imposition of a toll on the St. Lawrence would serve as only the forerunner of an attempt to levy similar assessments on our other waterways. Dr. J. H. Parmelee, vice president of the association, had this to say:

> Now, if a principle of tolls is established on the St. Lawrence waterway, presumably that will be continued into other waterways. It at least would be an opening wedge for its consideration by Congress in connection with waterway developments elsewhere. We would welcome that as a development of thought and principle in this country, and to that extent it seems to me that every railroad in the United States, regardless of its position and location, is interested in this principle of self-liquidation as proposed to be applied to the St. Lawrence waterway. In other words, I am putting it on a somewhat broader basis than that of merely traffic competition.

Dr. Parmelee's statement is the view of the railroad industry, for many times the railroads have come forward advancing proposals to levy tolls on our inland waterways.

Let us go back to the beginning and trace as best we can this national policy of toll-free waterways. Apparently the earliest national declaration on the subject of taxation for use of navigable waterways was in the Ordinance of 1787 for the Government of the Territory of the United States northwest of the Ohio River, in which article 4 states:

> The navigable waters leading into the Mississippi and St. Lawrence and the carrying places between the same shall be common highways and forever free, as well to the inhabitants of the said territory as to the citizens of the United States and those of any other States that may be admitted into the Confederacy, without any tax, impost, or duty therefor.

In the early days of our Republic when our great rivers served as the principal avenues of commerce, our natural waterways remained free for use by all. The Federal Government faced waterway development as one of the important issues of the day, for many of the leading statesmen of that period recognized the necessity for the development of our great natural resources and the extension of our avenues of travel if we were to become strong and virile. In those early days in the beginning of the nineteenth century, the Congress authorized surveys and provided funds for clearing and snagging our rivers. A great city in my own State, Shreveport, was named for Captain Shreve, whose name became legend on the rivers for his efforts to clear them of obstructions and open them to navigation. With meager funds and primitive methods, he traveled the great rivers of our country—the Missouri, the Ohio, the Mississippi, the Red, and the Arkansas—keeping them as best he could open to the commerce of a growing Nation. Captain Shreve's career was a fitting parallel to the history of his day. But in his day, as now, there were no tolls on these great natural waterways. I doubt seriously that our great western development could have ever been accomplished if the leaders of that day had been so blind as to have insisted upon or allowed the imposition of tolls on those streams.

Mr. FERGUSON. Mr. President——

The PRESIDING OFFICER (Mr. IVES in the chair). Does the Senator from Louisiana yield to the Senator from Michigan?

Mr. OVERTON. I yield.

Mr. FERGUSON. Does the Senator make a distinction between the Mississippi River, the Missouri River, the Ohio River, and the St. Lawrence River, the latter river being an international waterway?

Mr. OVERTON. None whatsoever, because the St. Lawrence River rises in the United States, flows within the jurisdiction of the United States for a large part of its course, and then flows through the Dominion of Canada. I make no such distinction as that, because if tolls are imposed on the St. Lawrence River, they will be imposed on a river which is within the control and jurisdiction of the United States.

Mr. FERGUSON. The same thing took place on the Suez Canal and on the Panama Canal.

Mr. OVERTON. I shall reach that in a moment, and show the difference between the two situations.

Mr. FERGUSON. Is the Senator familiar with the fact that the 1909 treaty between the United States and Canada provides, in effect, that tolls might be charged on this international waterway?

Mr. OVERTON. There has been no agreement as to the imposition of tolls on the part of the United States.

Mr. FERGUSON. Does not the treaty provide for such tolls?

Mr. OVERTON. I do not recall exactly whether it so provides. If the able Senator from Michigan says it does, I accept his statement.

Mr. FERGUSON. I do not think there is any doubt about it.

Mr. OVERTON. But, as a matter of fact, tolls have never been imposed. There has to be an agreement by the Congress.

Mr. FERGUSON. Up to this time they have not been imposed. Is the Senator seriously objecting to a provision for the self-liquidation of the St. Lawrence waterway project?

Mr. OVERTON. I am.

Mr. FERGUSON. And that objection comes principally from the fact that he fears that would cause the Congress to impose tolls on the Mississippi, the Ohio, and various other rivers of this country?

Mr. OVERTON. That is correct.

Mr. FERGUSON. I see a great distinction, because the St. Lawrence River is an international waterway. The treaty provides that such tolls may be imposed, and therefore self-liquidating projects could be established. But I do not see any precedent whatever for any fear the Senator may have that that would make domestic waterways in America toll waterways. I hope the Senator does not feel that way about it.

Mr. OVERTON. It certainly is an entering wedge. The President of the National Association of American Railways testified that he felt it was an entering wedge, in effect, and said that we could not very likely escape that conclusion. If tolls are imposed on the use of the St. Lawrence River, tolls could also be imposed on the use of other navigable streams within the domain of the United States. I just read a quotation from his testimony.

Mr. FERGUSON. Were not the railroads the ones who first objected to transit of the St. Lawrence River being free of tolls, because it involved competition which was unfair to them, because they paid taxes on their rights of way, and had to pay all the expenses of private enterprises, and therefore objected to building a waterway to be free of tolls? Now they reverse themselves and say, "We are fearful, now, that there will be tolls upon the Mississippi River." Does not the Senator think that they are bringing that forward for the purpose of giving the people on the Mississippi River occasion to feel that they will be prejudiced by this particular project?

Mr. OVERTON. I am not talking about the Mississippi River only; I am talking about all the streams throughout the United States.

Mr. FERGUSON. So am I. I am interested in the Mississippi River, and in every other river in the United States.

Mr. OVERTON. I know, because I have dealt with river and harbor bills for a number of years in the Senate, that every time one of those bills provided

that navigation projects be authorized, railroad companies appeared in favor of tolls being imposed upon the waterway involved. They pointed out that the competition was unfair; that they had to pay taxes, and so forth, that they had great burdens to bear, and that therefore there should be tolls imposed upon the use of such waterways. They take the position now before the Committee on Foreign Relations, "If you start with the St. Lawrence waterway, all right and good. We will be glad of it, because we will consider that as an entering wedge."

Mr. FERGUSON. I think they are opposing it. They first opposed it on the toll idea. They thought there should be tolls, and then when the committee arranged legislation to provide for tolls, they said, "You people on the Mississippi, be careful, because if the Government ever puts a toll on the St. Lawrence River you can expect tolls on the Mississippi River and every other waterway."

Mr. OVERTON. They are opposing and have opposed, as the Senator knows, the St. Lawrence waterway from the very beginning. They have opposed it on the ground of undue competition with railroads. However, they are not opposing the imposition of tolls on the St. Lawrence waterway; they are opposing the St. Lawrence waterway itself.

Mr. FERGUSON. Will the Senator yield further?

Mr. OVERTON. I yield.

Mr. FERGUSON. The early railroad people of America had great vision; there is no doubt about it. I hope that the present operators of the railroads will acquire the same vision, and not oppose a project like the St. Lawrence waterway, because at the outset it may take a few dollars from them, for I am satisfied that when the project is completed the whole Nation will be benefited, and the railroads will be carrying local traffic to various inland points of America, even across the border into Canada, and it will bring to them a much greater harvest than they have experienced up to the present time. It will require vision. Railroad men in the past were men of vision. I hope the present railroad operators will look at what is proposed from the standpoint of the Nation as a whole, and not merely from the standpoint of a particular waterway.

Mr. OVERTON. Let me say, Mr. President, that the early development of the West was not by the railways. It was by those who had the vision to use the waterways. They used canoes, skiffs, and flatboats, and carried their produce along the rivers which had their sources in the western area. After the West was built up sufficiently to invite the railroads, the railroads went in and, under big land grants given by the United States, proceeded to construct railroads.

I am not in sympathy with the railroads in their desire to impose tolls on waterways. On the contrary, I have continuously fought the imposition of tolls upon our waterways. Let me tell the Senator what happened. The railroads ran commerce off the waterways of the United States when they got entrenched with their roadbeds and their rolling stock which carried freight swiftly, and they were in competition with the steamboats and finally drove them off the rivers. Water transportation has come back. We have barge lines and towboats, with their modern Diesel engines, and the waterways are able now to maintain themselves.

Mr. FERGUSON. Mr. President, will the Senator yield further?

Mr. OVERTON. I yield.

Mr. FERGUSON. I am in sympathy with the waterways. We are appropriating great sums for them, without the imposition of tolls. Coming from Michigan, I favor the development of the whole United States. Let me read what one of the railroad men said—Dr. Parmelee—on page 212 of the record of the hearings. The Senator from Wisconsin [Mr. WILEY] was asking the question, and this is his question:

> What your answer means now is that you would be in favor of it if you could get all of the competing facilities with the railroads put on a self-liquidating basis.
>
> Dr. PARMELEE. I would not say in favor of it; no. I don't know that any business enterprise goes out and works hard for its competitors. But at least we would not be before Congress opposing it.
>
> Senator WILEY. We agree, then, that you are in favor of the self-liquidating idea?
>
> Dr. PARMELEE. Absolutely; yes, sir.

Mr. OVERTON. He explained in another statement why. He said:

> If the principle of tolls is established on the St. Lawrence waterway, presumably that will be continued in the other waterways.

That is the reason why.

> It at least would be an opening wedge in the consideration by Congress in connection with waterway development elsewhere.

Mr. FERGUSON. On what page is that?

Mr. OVERTON. I do not have the page, but it is a verbatim quotation from his testimony. I am sorry I do not have the page.

Mr. FERGUSON. Does the Senator really take seriously the statement that if the waterway is put on a self-liquidating basis this Congress would impose tolls on waterways inside the United States?

Mr. OVERTON. I am not talking about this particular Congress, but I have read enough of history and have lived through a large enough portion of it to know that policies can gradually be upset and overturned. I have seen that in my day. It has happened sometimes from one session to another. But as a rule policies are gradually undermined. That is what can happen. I take it very seriously. It may happen if we undertake to impose tolls on a waterway simply because a part of the stream flows through another country.

Mr. FERGUSON. Does the Senator really believe that constructing this waterway would be a detriment to Louisiana?

Mr. OVERTON. I am not making any such argument. I said at the outset that I would not. I would rather discuss the subject from a broad national standpoint. Is the Senator upholding it simply because he thinks it will benefit Michigan?

Mr. FERGUSON. No; but I think it will benefit Louisiana.

Mr. OVERTON. I am very glad to have the Senator's opinion on that question.

Mr. FERGUSON. The development of the Midwest has been a great benefit to Louisiana.

Mr. OVERTON. I am certain the imposition of tolls will not be of any benefit to Louisiana, or to Missouri, or to Michigan.

Mr. President, I was talking about Captain Shreve. Following that, I began to make the statement that in 1884, 64 years ago, Congress adopted legislation declaring free waterways to be the national policy. Now the proponents of the project undertake to say, "Yes; it is a free waterway; but if a part of it goes into the Dominion of Canada it is no longer to be a free waterway, but is to be taxed with tolls because the Dominion of Canada wants it"—or because of some other reason, perhaps because they want to build this project into a scintillating rhapsody of self-liquidation.

Mr. President, I shall undertake to show that there will not be any self-liquidation about it.

In 1884, 64 years ago, the Congress adopted legislation declaring free waterways as the national policy; and then in 1909 reiterated the policy in language which is, so far as I am able to determine, the law of the land today. This language, which is contained in a River and Harbor Act of March 3, 1909, reads as follows:

> That no tolls or operating charges whatever shall be levied upon or collected from any vessel, dredge, or other watercraft for passing through any lock, canal, canalized river, or other work for the use and benefit of navigation now belonging to the United States or that may be hereafter acquired or constructed.

The Interstate Commerce Commission has followed that policy and has stated it succinctly on numerous occasions. Perhaps the Commission's clearest expression on the policy is contained in its decision in the case of Decatur Navigation Co. against Louisville & Nashville Railroad, which was decided on July 14, 1914. In that decision the Commission made this statement:

> A natural waterway improved by the expenditure of public funds should be thrown open as far as possible to the free and unrestricted use of all those who desire to avail themselves of it. It differs materially from a privately constructed and privately owned roadbed which, though quasi-public in nature, is built by individuals or corporate interests primarily for their own gain. A navigable river is a public highway, a natural avenue of commerce, and the public interest demands that its advantages be utilized to the fullest extent.

I should like to have the Senator from Wisconsin, who apparently is very much interested in this question, consider carefully that statement by the Interstate Commerce Commission. Certainly the Interstate Commerce Commission has given as much study to this question as anyone else has and is not inclined to favor the waterways.

Mr. President, I shall repeat the opening sentence of the decision of the Interstate Commerce Commission which I have already quoted.

Mr. WILEY. What is the date of that decision, please?

Mr. OVERTON. July 14, 1914. It is to be found in the case of Decatur Navigation Co. against Louisville & Nashville Railroad:

> A natural waterway improved by the expenditure of public funds should be thrown open as far as possible to the free and unrestricted use of all those who desire to avail themselves of it.

Mr. President, what is it proposed that we do with the St. Lawrence? Would not we be pouring money out of the coffers of the United States Treasury to build up the St. Lawrence as a waterway? If we do that, does not it come within the purview of the statement made by the Interstate Commerce Commission that such waterways should be free and unrestricted in their use?

Mr. WILEY. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. WILEY. Of course the distinguished Senator from Louisiana realizes that the St. Lawrence River, after passing the northern boundary of New York, is wholly in Canada; that the portion of the river which flows out of Lake Ontario to Montreal runs between two nations; after that, on its way to the sea, it flows entirely in Canadian territory. The Senator from Louisiana understands that, I am sure; does he not?

Mr. OVERTON. I also understand that the Great Lakes are a part of this whole project, and that one-half of all of them, with the exception of Lake Michigan, lies within the United States. All of Lake Michigan lies within the domain of the United States.

Mr. WILEY. The Senator from Louisiana also understands, does he not, that his statement that the St. Lawrence rises in the United States is incorrect?

Mr. OVERTON. No; I was not incorrect.

Mr. WILEY. The St. Lawrence is the outlet for the Great Lakes system, and the Great Lakes system provides a boundary between the United States and Canada.

Apropos of the discussion about the railroads which the distinguished Senator from Michigan [Mr. FERGUSON] had with the distinguished Senator who now has the floor, let me say now that in 1900 or thereabouts, the great railroad men of the United States, including Howard Elliot, of the Northern Pacific; H. E. Byram, of the Milwaukee & St. Paul; C. H. Markham, of the Illinois Central; Fred W. Sargent, of the Northwestern; Ralph Budd, of the Great Northern; Charles Donnelly, of the Northern Pacific; Edward Pennington, of the Soo; S. M. Felton, of the Chicago North Western; Hale Holden, of the Burlington; and Henry Thornton, of the Canadian National, the men who had the vision and built the railroads, saw the possibilities of the St. Lawrence project, and endorsed it.

Mr. OVERTON. I do not question that. But the Senator from Wisconsin now takes the position that the American railroads are opposed to this project. That is quite true.

Mr. WILEY. No, Mr. President. If the Senator will further yield, let me say that the situation is that the railroads have gotten into the hands of the eastern interests, and they have formed an association; and my dear personal friend, Mr. Faricy, has been elected by all the railroads and has come to Washington, and it is now his business to look after the business of the railroads before the Congress.

But many eminent Members of this body—and among them I mention such outstanding Senators as the distinguished Senator Walsh, of Montana—have said and demonstrated, I think, without any question, that all railroads to the west and even those south of the Great Lakes will essentially be benefited by the construction of the St. Lawrence seaway project, and that if any railroads are injured, it will be those that go from Chicago to the east coast.

Mr. President, although the railroads now have one great organization and one gentleman who speaks for all of them, the actual fact is, as indicated by former Senator Walsh and other outstanding men, that the best interests of the railroadmen will be promoted by seeing to it that this waterway is constructed.

I agree that the situation we now confront is somewhat similar to that in the case of the Taft-Hartley bill, with respect to which the leaders of certain movements made very positive statements, and in that connection said they voiced the views of American labor. They attempted to influence some legislators, and to a certain extent they did influence some of them. However, those leaders did not actually express the opinion of the common workingman of America. The polls which have been taken since that time have clearly indicated that those leaders did not correctly express the views of the American workingman.

So it is that today the organized voice of the railroads, the big fellows, whose interests are closely allied with those of the financial interests in the East, does not represent the heart and soul of the railroads or the heart and soul of the men who work for and are interested in the railroads; at least, that is my own conclusion, based upon conversations I have had with many of those who are directly concerned, and also based upon a study of the practical situation and a consideration of the outline map of the United States.

Mr. OVERTON. Mr. President, after all is said and done, the Association of American Railroads is opposed to the construction of the St. Lawrence seaway, and is in favor, if the seaway is authorized, of the imposition of tolls on its navigation, and in that connection it makes the frank statement that that would be an entering wedge for the imposition of tolls on other waterways in which the United States is interested or over which it has dominion.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. OVERTON. I shall be very glad to yield, if the Senator from Wisconsin can throw any light on this matter. If he can show me that the Association of American Railroads is not opposed to the St. Lawrence seaway project, and is not in favor of the imposition of tolls if the project is authorized, then I shall be very glad to hear about it.

Mr. WILEY. I admit that on the record the Association of American Railroads is opposed to the St. Lawrence seaway. That is why that organization is lobbying around here. But that is not the question.

I should like to have the Senator from Louisiana indicate the page of the hearings from which he quoted a few moments ago when he made the statement that the imposition of tolls on the St. Lawrence seaway project would be an entering wedge.

Mr. OVERTON. That statement is to be found at the bottom of page 211, and I should like to have the Senator read it.

Mr. WILEY. Is the Senator from Louisiana referring to the hearings on Senate Joint Resolution 104?

Mr. OVERTON. I refer to the hearings on Senate Joint Resolution 111, held on May 28 and 29 and June 11, 12, 13, and 20, 1947.

Mr. President, in 1939 the House of Representatives Committee on Interstate and Foreign Commerce had before it legislation proposing the imposition of tolls on the users of inland waterways. So we see that the matter of the imposition of tolls on our inland waterways is something that is being agitated and is pressed from time to time, and we see that in 1939 there was pending in the House of Representatives a legislative proposal for the imposition of tolls on the users of inland waterways. At that time the Secretary of War made a statement in regard to that legislative proposal. Of course, the very able and distinguished Senator from Michigan [Mr. FERGUSON] likes to quote the Secretary of War as being in favor of this project, but I should like to have the Senator listen to what the Secretary of War had to say in reference to the question we now are discussing:

> The establishment of a tolls system would be a reversal of a long-established national policy regarding navigable waterways as highways open to all without restrictions in the form of charges for use. The great preponderance of freight transported on inland waterways is composed of bulky, low-grade commodities that would not move in volume if low-cost transportation were not available. Any influence, therefore, which resulted in an increased transportation cost would be reflected in a decreased movement of freight.

That is just as true of the St. Lawrence as it is true of the Mississippi River, of the Arkansas, or of the Missouri.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. OVERTON. No, not until I finish this quotation.

The ACTING PRESIDENT pro tempore. The Senator declines to yield.

Mr. OVERTON. I continue the quotation:

> It is believed that the imposition of a toll system would, at this stage of waterway development, almost certainly defeat its primary purpose. Faced with ever-lessening traffic requiring ever-increasing tolls per ton to meet the requirements of this bill, the situation would progress toward a total absence of tonnage, an impossible toll charge, and a complete break-down of the waterway transportation system.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. WILEY. Would the Senator support the bill if the toll feature were eliminated?

Mr. OVERTON. Not a bit. I never have supported it. I do not expect to support it.

Mr. WILEY. When a similar bill without a toll feature in it was considered at a former time, I believe the Senator argued it would be a great detriment to the port of New Orleans and the South, if the St. Lawrence waterway were put through. Is that not correct?

Mr. OVERTON. That was at a time when there was a limitation on the amount of water that could be taken out of an American lake, namely, Lake Michigan, and sent down the Illinois River. I made the argument, among other arguments, that that limitation should not be imposed upon the United States of America under the guise of a treaty.

Mr. WILEY. Were not all the witnesses from New Orleans, at that time, and at the hearings on the pending measure, this time, basing their testimony on the theory that if the St. Lawrence seaway were completed New Orleans would lose a considerable amount of traffic?

Mr. OVERTON. I do not know. I did not attend the former hearings, and I have not attended the latter hearings, nor have I read the evidence before the committee.

Mr. WILEY. Was the testimony not based on the theory that New Orleans would be economically injured?

Mr. OVERTON. I do not know. I do not know what the New Orleans people said, and I do not care; I am speaking for myself. Now, that is being perfectly frank.

Mr. WILEY. The Senator is always frank and always responsive. He has made it definitely clear now that, no matter what kind of resolution were offered, no matter what the people of the country asked in relation to the St. Lawrence, whether that it be toll free or accompanied by the imposition of tolls, the Senator would be against it. That is very clearly the situation.

Mr. OVERTON. I did not say anything of the kind. I do not recollect the people of the United States rising en masse and blocking office 135, begging me to support the St. Lawrence seaway. When that time comes, I shall give such a bill consideration.

This comment, particularly the last portion of it, could be made just as pertinent to the proposition now before us. I have stated publicly in recent months and repeat here that the toll provision in this resolution can well become, if enacted, one of the most ironic chapters in our legislative history, for by its enactment we will be destroying what the proponents of this measure have stated is their principal purpose—the lowering of freight rates by development of ocean navigation on the St. Lawrence River and the Great Lakes. The cost of the toll will materially narrow the margin between present rates and anticipated lower rates on the St. Lawrence. I hope the Senator from Wisconsin will listen to this, because I am making a direct attack on one of his favorite arguments.

Mr. WILEY. I am listening.

Mr. OVERTON. The cost of the toll will materially narrow the margin between present rates and anticipated lower rates on the St. Lawrence to such an extent that the use of the waterway will not be attractive, anticipated tonnages will not be forthcoming, higher tolls will become necessary, and a vicious spiral will be begun which will result in destruction of the very goal which is now sought.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. WILEY. I should like to ask, what is the distinction? We spent over a billion dollars maintaining a 9-foot channel in the Mississippi River from Chicago to New Orleans. Not 1 cent of that has come back, and we have had a pittance of traffic. The undisputed testimony showed that not one carload of wheat moved from Kansas City to the South. We have spent a billion dollars on the project, and have received nothing in return. We are now asking that the St. Lawrence seaway project be put on a self-sustaining basis. The undisputed evidence, even of the opposition, is that it would be a paying proposition, today, if operated on a toll basis. Let us take their own figures from the record. The opposition has failed to concede the fact, apparent in all history, that wherever the railroads have gone, wherever we have developed our resources, our action was not based upon an assured promise that the costs would be recovered. It was the increased industry and improved economic life of the community that made the railroads and canals successful.

Mr. OVERTON. May I interrupt the Senator?

Mr. WILEY. Yes.

Mr. OVERTON. I did not yield to him for a dissertation on the Mississippi River or the Ohio River. I called his attention to this statement of mine, and I wanted to see if he could answer it. It is logical. I repeat, the cost of the toll will materially narrow the margin between present rates and anticipated lower rates on the St. Lawrence to such an extent that the use of the waterway will not be attractive, anticipated tonnages will not be forthcoming, higher tolls will become necessary, and a vicious spiral will be begun which will result in destruction of the very goal which is now sought.

Mr. WILEY. I am sure if the Senator listened to my argument the other day, he obtained the basic figure, and he will find the testimony in the RECORD. I should like, in answer to the precise question the Senator has asked me, to call attention right now, to the distinguished people from New York, men of outstanding business ability, engineers, if you please, including the engineers of the Army, and others, who have said the project would be self-liquidating. They have so stated, and have given us the figures. I repeat that no one can look into the future with absolute certainty, but one may look into the future and not sell this country short by saying "This is a growing country."

Mr. OVERTON. Mr. President, I do not yield further. The Senator goes far afield when I try to narrow him down. This is a long debate, and I want to narrow him down to the point under consideration. I am unable to do it. Every time he gets a chance, he goes floating down the Mississippi River.

Mr. WILEY. And back to New Orleans.

Mr. OVERTON. I should be very glad to welcome the Senator.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. OVERTON. I want to answer the statement of the Senator from Wisconsin, then I will yield. He says the Army engineers say it is self-liquidating. Let me read what General Wheeler, the Chief of Army engineers, has to say. I quote from his testimony:

> Before the Corps of Engineers could render a definite finding as to whether the new deep-water navigation works on the St. Lawrence River could be made to pay out by the imposition of tolls, it would be necessary to make a thorough study of all prospective traffic, the character and amount of tonnage that would actually move under a toll system in conformity with certain assumed principles and toll rates such as those set forth in section 3 (a) of Senate Joint Resolution 111, and the actual net income from those tolls as compared with the assessed navigation costs.

The Chief of Engineers said it would take 1 year of hard study to arrive at that.

Mr. SALTONSTALL. Mr. President, just along that line, I should like to ask the Senator from Louisiana if it is not true that a great deal of the grain now moving through the 14-foot canal and using the Welland locks would have to go into bigger bottoms, which would have to pay toll, in order to make the seaway supporting? There would not be room enough in the Welland locks to take all the present toll-free traffic and also enough additional toll traffic to make the seaway self-liquidating.

Mr. OVERTON. The Senator is absolutely correct on that point. I am very glad to have him make that observation.

Mr. TYDINGS. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. TYDINGS. Not only are the observations of the Senator from Louisiana and the Senator from Massachusetts sound, in my judgment, but the situation is even worse than either one of them has pictured it. On the one hand, all the taxpayers of the United States would have to put up the money to build the canal, yet a great many of the taxpayers would have to put up the money and at the same time father and favor a project which would injure irreparably their own business, because in order to support the traffic, the traffic would have to be siphoned from countries that now enjoy it, because of natural advantages. Those people would be injured by the loss of that traffic, and in addition, they would be taxed to create something that would injure their own business.

Mr. SALTONSTALL. Mr. President, will the Senator yield for a question right along the line of the statement of the Senator from Maryland?

Mr. OVERTON. I yield.

Mr. SALTONSTALL. Is it not a fact that in all the harbors and seaways on the Atlantic and Pacific, up to 1944, approximately $705,000,000 was spent on new improvements? This one seaway, if built, will cost as much as the improvements put into all the harbors that are operating 12 months in the year, if not more, and this seaway, which will take at the maximum 30,000,000 tons of traffic, is operating only 7 months in the year, yet it will cost just as much as all the improvements up to 1944. Is that not a fact?

Mr. OVERTON. That is my recollection of the figures, but I am not absolutely accurate as to the figure of $705,000,000. It is approximately that amount.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. WILEY. At this time, as an answer to what has been said by my three distinguished opponents, I want to say that the American Farm Bureau, representing the farmers——

Mr. OVERTON. May I interrupt? Are they discussing tolls?

Mr. WILEY. Yes; that is part of the proposition.

Mr. OVERTON. Very, well, I should like to know what the farmers think.

Mr. WILEY. They represent the National Farmers Union, and they are indirectly and directly interested in their own economic welfare.

Mr. OVERTON. What do they say about tolls? God bless the American farmer. I am for the farmer, but I want to know what the farmer has to say about tolls.

Mr. WILEY. The Senator has never before been against the farmer, but now we have got him on the spot.

Mr. OVERTON. Does the Senator say I have always heretofore been against the farmer?

Mr. WILEY. No, the Senator has never before been against the farmer, but he is now.

Mr. OVERTON. I am not against the farmer now.

Mr. WILEY. In answer to the statement of the distinguished Senator from Massachusetts, in which I think his able collaborationist from Maryland concurred, I want to say that they have neglected entirely the argument which one Great Lakes shipper was patriotic enough to advance, and which is also included in the final letter from the shippers that was introduced yesterday by the Senator from Massachusetts [Mr. LODGE]. In one of the letters sent to the late Senator Bailey a Great Lakes shipper frankly says that it is in the interest of America to have the seaway developed, and that it would be well to do so, though it might result in hurting his own business.

The point I want to make is that last season 50,000,000 tons of freight were carried through the MacArthur lock alone. Through the Soo locks over 100,000,000 tons of freight were carried in one season of 7 months. Some eastern Senators boast about what can be done on the east coast. Let me say to them that the Welland Canal can accommodate a considerable amount of freight, but at a certain point in the canal the cargo carried in the larger boats must be unloaded and reloaded into smaller boats. Stevedores are obliged to handle the cargo. If cargo is destined to Montreal by way of the Welland Canal it must be transshipped—it must be unloaded and reloaded.

I call attention to the last letter introduced into the RECORD by the Senator from Massachusetts [Mr. LODGE], in which it is pointed out that it is only common sense that the cost of transportation must be greater when there must be transshipment, when cargo must be unloaded from larger boats and placed in smaller boats. It is admitted that larger boats can handle cargo better than the small ones, and that if the shipment can be made through in larger boats it will result in a saving of at least 10 cents a bushel of grain for the farmer.

Mr. President, it has been estimated by Julius Barnes that if the present condition in Europe continues, we will have to ship, not a hundred million bushels but 400,000,000 bushels from Canada and the United States through the ports, and with such heavy traffic shipment by canal will be advantageous.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. OVERTON. I will yield to the Senator from Massachusetts after I have replied to the Senator from Wisconsin. I should in all seriousness like to make an observation to the able and distinguished and beloved Senator from Wisconsin. I have sat here now for 2 days of debate and observed the criticisms which have fallen so profusely from the lips of the Senator from Wisconsin.

Mr. WILEY. Mr. President, will the Senator from Louisiana speak a little louder?

Mr. OVERTON. I said, Mr. President, that I had sat here now for 2 days and listened to the rapid fire of criticism which has shot from the lips of the Senator from Wisconsin. He has leaped on the Senator from Louisiana and said, "He is prejudiced in favor of the Mississippi River; he is an enemy of the farmer"; he has leaped on the able Senator from Maryland [Mr. TYDINGS] and said that he is being influenced by selfish interests in order to help his own city of Baltimore; he has leaped upon the junior Senator from Massachusetts [Mr. SALTONSTALL] for 101 different arguments that he has made. The Senator from Wisconsin has been drawing sectionalism into this cause, which ought to be a national cause. The debate ought to be free from all such censure.

Mr. President, I am going to ask the Senator from Wisconsin if he will not rise and bow his head with me in prayer, and utter the words from the Universal Prayer, by Alexander Pope:

> Let not this weak, unknowing hand
> Presume Thy bolts to throw,
> And deal damnation round the land
> On each I judge Thy foe.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. WILEY. I shall bow my head, surely. I am sure the distinguished Senator has indulged in a very clever retort. But now I bow my head and I pray that wisdom may be granted to the opposition and that they may have a larger vision, and see the needs of a great country, not simply for today or tomorrow, because the job cannot be done in 6 years. I pray that their children and grandchildren will not look back upon the record and say, "There they stood thinking they were right, and once again they brought a Pearl Harbor upon America." So I do pray, sir, but I pray that unto this great body there will be granted a larger vision, so we will not think simply in terms of Wisconsin or Massachusetts, or New Orleans, or other cities, but that we shall think of our country, as Webster did, as one country, inseparable, and that we may see the need in this hour and in the future for the development of the great St. Lawrence waterway.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. SALTONSTALL. I am a little disturbed after listening to poetry and the invitation to pray. I cannot speak poetry. I can pray, but I am not going to pray just at this moment.

Instead, it is my desire now to answer one set of facts which the Senator from Wisconsin has just presented. He stated again that over 50,000,000 tons of freight had gone through the MacArthur lock in the past year. I would call to his attention a fact with respect to which I think I am correct. The MacArthur lock has two sets of locks—one of which accommodates large vessels and one which accommodates small vessels. The Welland Canal, through which all kinds of vessels must go in order to make the proposed seaway self-liquidating, has only one set of locks, and those locks can be used either by toll-free ships of small cargo capacity or toll-paying ships of big cargo capacity. There we find a bottleneck. The Senator cannot rightly compare the traffic which may go through this seaway and the traffic which has gone through the MacArthur lock.

Mr. WILEY. Mr. President, will the Senator again yield?

Mr. OVERTON. I yield.

Mr. WILEY. I should like to clear up the matter of the MacArthur lock. The Soo locks and the MacArthur lock are one, but the MacArthur lock is only part of the whole Soo lock system. Through the Soo locks last season were carried more than 100,000,000 tons of freight. Traffic going one way through the MacArthur lock amounted to nearly 50,000,000 tons. That is my answer with respect to the MacArthur lock. The MacArthur lock, and the lock in the Welland Canal, as I understand, and the locks contemplated to be built in connection with the St. Lawrence seaway will have 30 feet clearance, and the channel will have a clearance of 27 feet. If one lock at the Soo can accommodate 50,000,000 tons of traffic going only one way—it was not a two-way traffic, as it will be when the commerce of tomorrow utilizes this great lock system—Senators can imagine what will happen when ships come back loaded. On that basis, as was testified,

it is estimated that practically 70,000,000 or 80,000,000 tons of freight will be handled through the St. Lawrence seaway.

Mr. TYDINGS. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. TYDINGS. The genial, able, and distinguished Senator from Wisconsin a moment ago charged the Senator from Louisiana [Mr. OVERTON], the Senator from Massachusetts [Mr. SALTONSTALL], and myself with that narrowness of vision which is sometimes attributed to those afflicted with sectionalism. As I look at Wisconsin, and I look at this great canal, which is a dream, and I think how the people, the farmers, the merchants, the businessmen, and the boatmen will be penalized, hurt, injured, put at a disadvantage, discriminated against if the canal is built, then I must say that my admiration for the Senator from Wisconsin mounts even higher than mountains, because here is one man who has approached the question without the slightest vestige of narrow sectionalism.

Mr. OVERTON. Mr. President, if, as I predict, the imposition of tolls on the St. Lawrence is followed by the placing of tolls on our other inland waterways, the situation becomes even darker. Existing rail rates in much of the territory which would be served by the St. Lawrence waterway are pegged to a great extent on rates which prevail on existing waterways and the Great Lakes. The placing of tolls on the Upper Mississippi, the Missouri, the Ohio, the Illinois, and numerous of their tributaries, would almost immediately remove from them great tonnage, and in the matter of a few years we would find them used scarcely at all, and the way would be open for increased transportation costs by overland carriers. This feature, therefore, is a very real threat in that it not only would not allow cheap movement, but would serve as a means to force even higher the existing tariffs.

Now, I think it might be well, since the point is certain to be raised, to dispose of the contention that the use of the Panama Canal is subject to tolls. That was a contention which some Senator raised, I think it was the Senator from Wisconsin, and I told him that I would touch on that point later. We may as well take it up and dispose of it now.

In the first instance, the Panama Canal was not constructed with the view of equalizing competition between waterway and overland carriers, which is among the stated reasons for construction of the St. Lawrence waterway. Nor is the Panama Canal entangled with any hypothesis about the relation of specific toll rates to the theoretically more efficient utilization of natural resources. Nor is the Panama Canal picture spotted with any elaborate allocation of costs among the several functions served by the enterprise.

I have found a very interesting statement in House Document No. 159, Seventy-ninth Congress, first session, which is the Report on Public Aids to Domestic Transportation. This report quite fully discussed the matter of tolls on waterways and had this to say, among other things, regarding the Panama Canal:

> Because the Panama Canal is the only Federal waterway on which tolls are charged and because it is the only interoceanic canal among all the Federal navigation projects, there is no need to consider the consequences—immediate or remote—if the level of tolls established should prove to be inequitable in comparison with the level of tolls on some other waterway. Because the Canal is only a 50-mile passage in a journey, for each vessel, that is thousands of miles long, there is little likelihood that a small increase in tolls would greatly restrict, or, a small decrease largely encourage, the use of the waterway by commercial vessels.

This document was written long before there was any thought, so far as I know, of injecting a toll feature into the St. Lawrence waterway legislation. But there is nothing in this legislation as now before us which would change the statement in the slightest.

I think it unnecessary to burden the Senate at this time with a detailed discussion of the toll feature as applied to the St. Lawrence waterway. Such a discussion, in the first instance, would be entirely beside the point, if for no other reason than that the necessary engineering study and economic data upon which a reasonably accurate estimate of construction costs can be based is entirely lacking. Any discussion, therefore, of the details of the toll would be entirely superfluous, because there is not the beginning of a basis for discussion.

But, then, this is typical of the entire proposition. Someone apparently had a dream one night and undertook to translate it into reality the next day by inserting into this measure a so-called self-liquidating proviso through levying of tolls. This feature has had just about the same study as any other feature of the project, which means that it has been handled rather haphazardly and superficially. Nowhere can I find where any study has been made of what commodity will pay how much toll between what points, what traffic will be considered local and not subject to tolls, how the tolls will be collected and by whom—in fact, there is no answer to any question which might be raised by the toll provision. I am aware of some obviously hastily arrived at figures in the majority report which fail to reflect the detailed study required in such a far-reaching undertaking. I think it might be pertinent to point out that General Wheeler, Chief of the Army Engineers, in his testimony before the committee estimated that at least 1 year would be required to make a study of the toll feature alone. Of course, it is quite obvious that the time which has elapsed since introduction of the resolution under consideration has not yet reached a year.

The very agency upon which the proponents relied for their economics has testified with great emphasis on the necessity of a thorough study of the toll feature.

I should like to have the able Senator from Wisconsin [Mr. WILEY], as well as the Senator from Michigan, listen to this. Probably it escaped their notice. I want to show them that the Department of Commerce damns the very method by which it is undertaken to determine that tolls would make the St. Lawrence waterway self-liquidating.

I quote from part VII of the St. Lawrence Seaway, prepared by the Department of Commerce in 1941. On pages 30 to 32 of this survey are the following very pertinent comments:

> Whether or not tolls should actually be levied on the St. Lawrence seaway is a matter of national policy which requires careful study and analysis. The question of charging tolls on waterways has been a highly controversial issue in American history and has become enshrouded in tradition and practice which does not allow a quick and partial solution. With the exception of the Panama Canal, waterways established by the United States have been notably free of tolls. This policy is embedded in the law of the country. * * *
>
> Furthermore, a consideration of tolls in any one case, such as the St. Lawrence seaway, necessitates an examination of the effect of such tolls upon competitive routes. Tolls cannot be charged on the St. Lawrence without studying the effects of this practice upon the Ohio and the Mississippi River systems and the New York State Barge Canal.
>
> The problem of charging tolls on the St. Lawrence is further complicated by the fact that there already exists an extensive canal system from Lake Superior to the lower St. Lawrence River which is free of tolls. The effect of a new schedule of toll charges upon existing traffic must certainly be studied very carefully and the possibilities of discriminatory charges in order to preserve the relative position of industries and commerce established on a principle of free water transportation must be examined. This is particularly important since Canadian national policy in the St. Lawrence watershed, which is the Dominion's economic life line, is based upon the principle of toll-free water transportation.

Mr. FERGUSON. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. FERGUSON. I appreciate that the Department of Commerce, being a part of the executive branch, would naturally rather have this a free highway. But it was a congressional idea. The able senior Senator from Michigan [Mr. VANDENBERG] is responsible, and the Congress is responsible, for this self-liquidating idea. When the Department of Commerce was speaking about the waterways of America being free from toll, it was correct, but the international highways, such as this canal would be, are an entirely different problem. The United States Congress, being the policy-making body, being responsible for appropriating the people's money to build a project like this, naturally conceived the idea, and should conceive the idea, that it should be self-liquidating. So, after all, while it is a great international project, it will in the end cost the taxpayers nothing. If we put more projects such as this in our international relations on a self-liquidating basis, America and the other countries will all be better off.

Mr. OVERTON. The point I raise, and the point I am undertaking to emphasize as I go along, is that once the committee says, "We are going to make it self liquidating," instead of leaving the question of self-liquidation to those who had made a study of it through the century and a half of existence of this Nation, it turned it over to the Department

of Commerce. The Department of Commerce was not in a position to make a study of the question. It says so in effect. It could not make a hurried report, and no one else could. Let me repeat:

Whether or not tolls should actually be levied on the St. Lawrence seaway is a matter of national policy which requires careful study and analysis. * * * Furthermore, a consideration of tolls in any one case, such as the St. Lawrence seaway, necessitates an examination of the effect of such tolls on competitive routes.

Tolls cannot be charged on the St. Lawrence without studying the effects of this practice upon the Ohio and the Mississippi River systems, and the New York State Barge Canal.

Mr. WILEY. Mr. President, what is the date of that report?

Mr. OVERTON. Nineteen hundred and forty-one.

That is what our authority says. I quote further from the report of the Department of Commerce:

The problem of charging tolls on the St. Lawrence is further complicated by the fact that there already exists an extensive canal system from Lake Superior to the lower St. Lawrence River which is free of tolls. The effect of a new schedule of toll charges upon existing traffic must certainly be studied very carefully, and the possibilities of discriminatory charges in order to preserve the relative position of industries and commerce established on a principle of free water transportation must be examined.

This is particularly important since Canadian national policy in the St. Lawrence watershed, which is the Dominion's economic life line, is based upon the principle of toll-free water transportation.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. OVERTON. As soon as I finish another sentence or two.

The peculiar nature of traffic through the St. Lawrence River—

I should like the Senator to digest all of this as I go along.

Mr. WILEY. I am listening to the Senator.

Mr. OVERTON. I am not making this argument. The Department of Commerce is making it. They are the Senator's authority.

The peculiar nature of traffic through the St. Lawrence canals at present and through the prospective seaway also creates some problems that require careful examination. Low-priced staple agricultural products form a considerable part of this traffic. Hence a flat charge on a tonnage basis, as at Panama Canal, may not be effectively applicable in the case of the St. Lawrence seaway. It is important, therefore, to study the possibilities of discriminatory rates between classes of products that utilize the seaway.

I now yield to the Senator from Wisconsin, and, when he has finished, I will shoot the last barrel of the Commerce Department's criticism of the Senator's method of procedure.

Mr. WILEY. Mr. President, I should like to have every Senator listen. I agree fully with what the Department of Commerce stated in 1941. But 7 years have gone by since then. The Department of Commerce has made a study. Apparently the Senators who signed the minority report of the committee have not studied it. The report of the Department of Commerce was made in November of 1947. It gives all the evidence and the statistics, and answers everything which has been said. It took the Department 7 years to get the facts. In view of the great objection made, and the ignorance which exists as to what the Department of Commerce has found, in view of the fact that Senators apparently have not read the record, and because Secretary Harriman was a great railroad man, and gave estimates of tonnage and the possibilities of return on a self-liquidating basis, I ask that excerpts from the report of the Department of Commerce be printed in the RECORD following the conclusion of the remarks of the distinguished Senator from Louisiana.

Mr. OVERTON. I have no objection. One thing that should be carefully stated is the effect of the tolls on the Ohio and Mississippi Rivers. I think it will be found that the Department never made such a study.

The ACTING PRESIDENT pro tempore. Is the Senator from Wisconsin asking permission to have the report printed in the Appendix, or at the conclusion of the remarks of the Senator from Louisiana.

Mr. WILEY. The latter.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(See exhibit A.)

Mr. FERGUSON. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. FERGUSON. The Senator's last question was, I think, an appropriate one, as to what effect tolls on this international waterway would have on domestic waterways. I think I can answer that by saying that they are in an entirely different category. One is an international highway; the others are purely domestic highways. When Congress lays down the theory and policy of a toll on this particular highway it is not in the least affecting the policy which has already been established on the other highways.

Mr. OVERTON. The Department of Commerce, apparently, differs with the Senator from Michigan. I read what the Department had to say. In plain words they said that the effect upon the Ohio, Mississippi, and Missouri Rivers, should be considered.

Mr. REVERCOMB. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. REVERCOMB. I followed with a great deal of interest the statements regarding tolls. May I inquire if it is not a fact that if tolls can be established in any amount or at any rate for passage through the project there must be an agreement between Canada and this country? Is not that correct?

Mr. OVERTON. That is correct.

Mr. REVERCOMB. And no such agreement has been had?

Mr. OVERTON. Not at all.

Mr. REVERCOMB. In fact, no rate has been made, no provision for tolls has been agreed upon. So, as a matter of fact, as we stand here today in the Senate and discuss the question, we do not know whether there will be any toll charged, or if a toll shall be charged, we do not know what the rate will be. Is not that correct?

Mr. OVERTON. That is correct.

Mr. REVERCOMB. We do not know whether Canada will agree to tolls or to any rate. It seems to me that we are not in position to discuss it. It has not developed far enough, in fact, for us to discuss the question of tolls. Everything seems to be based upon surmise. We are here engaged in a long discussion as to what the toll will be, what the return will be, when no tolls have been fixed. We do not know whether they will ever be fixed. They cannot be fixed until Canada agrees with us regarding them.

I make that observation because it has occurred to me that before we discuss how much return will come in to liquidate the project we should at least know what the rate will be. That we do not know, because no move to establish the facts has yet taken place.

Mr. OVERTON. That point is well taken by the Senator. The treaty contemplates that in the future there shall be an agreement between Canada and the United States as to whether there shall be any tolls, and, if so, what shall be the rates, and the other necessary provisions to be inserted in such an agreement. Of course, one man's prophecy is as good as that of another man. My prophecy may not be worth anything in this connection.

Mr. REVERCOMB. Will the Senator yield at this point?

Mr. OVERTON. I yield.

Mr. REVERCOMB. These are all prophecies. We are not talking about facts. We are not talking about established tolls; they are surmises.

Mr. OVERTON. That is correct. The treaty provision itself on the subject of tolls is a mere hope.

Mr. REVERCOMB. Or a desire. Even if a toll be established we do not know what part of it will come to this country and what part will go to Canada, do we?

Mr. OVERTON. How much of it?

Mr. REVERCOMB. Yes.

Mr. OVERTON. We do not know how much of the revenue will come to this country.

Mr. REVERCOMB. No one knows at this time. We are talking about liquidating with money that we do not know will exist, and even if it shall exist, we do not know what it will amount to.

Mr. OVERTON. I want to make this prophecy. I think Canada is so wedded to a toll-free system on the St. Lawrence waterway, which is her principal waterway, that she will never agree with the United States on any system of tolls. I may be incorrect about that.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. WILEY. I think the Senator is wrong about that, because already Canada and the United States have agreed in principle that the seaway be made self-liquidating through a system of toll charges. I say again to the Senate that this is simply an authorization. An agreement was made in 1941 and it would have come before the Senate if it had not been for Pearl Harbor. It provided that tolls should be levied subject to negotiation and approval of the two

Houses of this Congress and of the Canadian Parliament. I may say that it is stated in the agreement that the tolls shall not exceed $1.25 a ton.

Mr. REVERCOMB. I take it from the statement of the able Senator from Wisconsin that an amount has not been agreed upon. Until such amount has been agreed upon there can be no talk of self-liquidation, as the term is used here. We do not know how long it will require. We do not know that an amount will be agreed upon. No minimum is fixed; only a maximum is fixed. How can any of us say that there will be liquidation? Within what time will it be liquidated? We cannot tell that when we do not know what the charge will be upon the various types of commerce and cargoes carried.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. OVERTON. I yield to the Senator from Wisconsin.

The ACTING PRESIDENT pro tempore. The Chair would like to interrupt to call attention to the rule that no Senator shall interrupt another Senator in debate without his consent, and that in order to get consent he must first address the Presiding Officer. It will help the parliamentary situation if there are not two or three Senators seeking recognition at the same time.

Mr. OVERTON. I agree with the Chair.

Mr. FERGUSON. Mr. President, will the Senator yield?

The ACTING PRESIDENT pro tempore. Does the Senator from Louisiana yield to the Senator from Michigan?

Mr. OVERTON. I yield.

Mr. FERGUSON. The joint resolution lays down a pattern or standard for the guidance of the executive branch in relation to the liquidating provision. Section 3 provides as follows:

SEC. 3. (a) During the period of construction the President is authorized and directed to negotiate a further agreement with the Government of Canada, under the provisions of the Boundary Waters Treaty of 1909, defining the rates of charges or tolls to be levied for the use of the new deep-water navigation facilities on the St. Lawrence River, authorized in this joint resolution—

This is the provision which sets up the standard. That standard may be reviewed; that is, the question of whether or not they have lived up to it may be reviewed by both Houses of Congress—

Provided, That (1) the total charges shall be fair and equitable and shall give due consideration to encouragement of increased utilization of the navigation facilities, and to the special character of bulk agricultural, mineral, and other raw materials; (2) that tolls shall vary for ships in ballast and according to the character of cargo with the view that each classification of cargo will so far as practicable derive relative benefits from the use of these facilities; (3) that in no event shall the total charges exceed the equivalent of $1.25 per short ton of laden cargo, and may be less, depending on character of cargo; (4) that tolls may also be charged for passengers but that in no event shall the total charges exceed the equivalent of $1.50 per passenger; (5) that tolls shall apply only on traffic utilizing the new deep-water navigation works in the St. Lawrence River, with such exception of local or way or Government traffic as may be agreed upon by the two countries: *Provided further*, That such agreement shall become effective only after approval by the Congress of the United States and the Parliament of Canada.

That is similar to the provisions with respect to the Panama Canal. It is said that such procedure with respect to the Panama Canal worked out satisfactorily.

Mr. President, it is practically impossible to work out in advance all the details of a toll agreement. Therefore the President is given this right and is provided with this standard to guide him in applying the agreement, after it is ratified, so that we may proceed to work out a satisfactory arrangement.

In the past, Canada and the United States have been able to work out satisfactory arrangements. They have been negotiating on this matter. At the present time both of them approve the idea of self-liquidation.

The 1909 treaty provides for tolls. Therefore I see no reason why we should not start this project, and then proceed in an orderly way, as we did in the case of the Panama Canal, to work out a satisfactory toll arrangement.

I thank the Senator for yielding to me.

Mr. REVERCOMB. Mr. President, will the Senator yield to me?

Mr. OVERTON. In just a moment.

First, Mr. President, let me say that we are a long way from any agreement with respect to tolls. Canada may at any time fail to agree with us in regard to any of the various toll provisions contained in the joint resolution. Such action would then end the matter of tolls.

In the meantime we are to authorize the canal and it is to be built. But before we receive any tolls we shall have to wait and wait until some agreement is made with Canada with respect to all the intricate details of revenue tolls, some of which are outlined or stated in this joint resolution. It will be necessary for both countries to agree that the total charges are fair and equitable. In other words, both the Congress of the United States and the Parliament of Canada will have to agree that they are fair and equitable. They will also have to agree that the tolls properly vary for ships in ballast and according to the character of cargo with the view that each classification of cargo will so far as practicable derive relative benefits from the use of these facilities.

How difficult it will be for there to be a meeting of the minds in regard to such an indefinite clause. That is my point. The joint resolution clearly provides:

(3) That in no event shall the total charges exceed the equivalent of $1.25 per short ton of laden cargo, and may be less, depending on character of cargo.

That is most indefinite. The joint resolution also provides:

(4) That tolls may also be charged for passengers.

The amount to be charged is set forth as a dollar and a half, but only as a maximum.

It is also provided that the tolls shall apply only on traffic utilizing the new deep-water navigation works on the St. Lawrence River.

So for purposes of charging tolls it will be necessary to separate the traffic that uses the new navigation works on the St. Lawrence from the traffic that now uses that waterway. The latter traffic will be free from tolls. With respect to all those complicated matters and the arrangements made regarding them, the Congress of the United States and the Parliament of Canada must agree.

Now I yield to the Senator from West Virginia.

Mr. REVERCOMB. Mr. President, when I first made my inquiries of the able Senator, I did not know that I was going to precipitate such an extensive discussion of this point. But I think it is well to have this debate occur, because it seems to me that in the discussion of this very important question, when so much emphasis has been laid upon the self-liquidation feature, and when the appeal is made to the Members of the Senate, "Oh, no; this project will not cost the Government anything in the end; eventually it will pay for itself," we should realize that today we do not know how much will be paid or whether, indeed, any amount will be paid.

Section 3 of the pending joint resolution, which has been read by the able Senator from Michigan, points out emphatically that no agreement has been made. It says that the Government of the United States is willing to enter into an agreement or negotiations with Canada to make an agreement. That clearly indicates—and it seems to me it clinches the point—that today we do not know what the return from the canal will be.

So it seems to me that we are putting the cart somewhat before the horse when the Congress, which is asked to pass this joint resolution, is also told that in the future it will be necessary to decide what rates shall apply to the use of the waterway.

Also, I note in section 3 the statement that—

In no event shall the total charges exceed the equivalent of $1.25 per short ton of laden cargo, and may be less, depending on character of cargo—

And the further statement that—

Tolls may also be charged for passengers but that in no event shall the total charges exceed the equivalent of $1.50 per passenger.

I point out that those are maximum amounts or charges. Today we do not know whether in the suggested negotiations with the Government of Canada, which may or may not desire to negotiate upon this subject, the maximum will be fixed at $1.25 a ton. Canada may say, "We want a free canal here; we are going to benefit by it, and we want no tolls; but we will agree upon 10 cents a ton"—or perhaps they will suggest 20 cents a ton, Mr. President.

So it seems to me that we cannot talk about liquidating the cost of a project or paying for it until we know what the project will pay in the way of returns, or at least until we know the basis of the returns.

Certainly no one would undertake to build a toll bridge until he had calculated in advance what the returns from it would be, if it were desired to obtain a return from the investment. We are

told that this canal will provide sufficient return on the investment; but certainly no one would ordinarily attempt to build a toll bridge, for instance, until the tolls for persons or the tolls for traffic across the bridge had been determined.

Likewise, in connection with the canal, one of the strongest appeals which is made by the proponents is that it will pay for itself. But today they are forced to place in the very measure that is now before the Senate evidence that there is no provision in regard to what the returns will be, and that we cannot say at this time what returns will be made.

So it seems to me we are discussing a very nebulous and unreal matter when we say that the St. Lawrence seaway will pay its own way, inasmuch as we do not know whether there will be any payment at all; and even if there is payment, certainly we do not know what amount will be paid. It is obvious that we cannot seriously consider the alleged self-liquidation feature of the project until we know what the income from it will be. However, we do not know that today.

Mr. OVERTON. Mr. President, first let me shoot this last bolt from the Department of Commerce against the claim that this system will be self-liquidating. This is the last paragraph, which I have been wanting to read for the last half hour. Of course I am always glad to yield to my associates, especially when they throw a great deal of light upon a question.

Here is what the Department of Commerce said in 1941, but it is just as true today as it was then:

> The St. Lawrence seaway is not a continuous canal system. It consists, in fact, of a series of canals separated from each other by lakes, rivers, and channels. There is waytraffic over part of the distance in this extensive Great Lakes-St. Lawrence system, between, for instance, Lake Superior and Lake Michigan, or between Lake Erie and Lake Ontario, or between Lake Ontario and Montreal. Some traffic utilizes one segment, other traffic uses two links in the waterway system, and there is also through traffic which utilizes all of the canals in this interconnected system. Hence the establishment of tolls must be studied in the light of this situation, which is immeasurably more complicated than at either the Suez Canal or the Panama Canal.

Mr. THYE. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. THYE. More important than the question of tolls is the question of navigation and its effect upon the parts of the United States that are concerned. We must consider the effect on the Senator's part of the United States and also its effect on my part of the United States. The question is whether the transportation made possible by this project will afford benefits, and, if so, what benefits, to the great central section of the United States. We need that transportation. We need it in order to develop the real resources of our Nation.

But more important than that is the fact that today the New England area is handicapped for lack of power, and because of that very lack of power, at this time, it is necessary to ration electricity to certain functions within the economy in the New England area.

So again I say that more important than the actual capacity of this project are the benefits that the great United States, my country and yours, will derive from it.

We must remember that even our great Secretary of State, General Marshall, has said that we need this project so far as national defense is concerned. If the Senator and I wish to study the question from the standpoint of national defense and the need for electricity on the part of our Nation should it ever again be confronted with a world conflict, we should consider carefully the words of the Secretary of State. In addition, we realize that we need electricity for industrial uses in these great United States—not only in the New England area, but in the more central portions of our Nation. So I say——

Mr. OVERTON. Mr. President, if I may interrupt the Senator, let me say I doubt seriously that very much electricity from this particular project will be used in the United States, except in the State of New York.

Mr. THYE. Mr. President, if the Senator will yield further to me——

Mr. OVERTON. Yes. However, let me point out that I am not discussing the question of power, and I shall not go into that subject matter.

Mr. THYE. If the Senator will yield, I shall appreciate it.

Mr. OVERTON. I should rather not reargue the whole subject matter, but I shall be very glad to yield to the Senator.

Mr. THYE. I thank the Senator.

Mr. OVERTON. I will yield to him, if he will confine himself to the tolls question.

Mr. FERGUSON. Mr. President, will the Senator yield, in connection with the matter of tolls?

Mr. OVERTON. I want to conclude, as it is getting late. I will yield, but this will be the last time I will yield.

Mr. FERGUSON. I thank the Senator. I appreciate his courtesy.

Mr. OVERTON. I have just a few more remarks to make, and I should like to conclude my presentation of the subject.

Mr. FERGUSON. The Senator has been very kind, and I appreciate his yielding, because I should like to say something on the question raised by the able Senator from West Virginia about the fact that the agreement has not been entered into prior to the building of the canal, and also the statement that possibly Canada would never enter into this agreement about tolls. In paragraph 1 of the pending resolution itself will be found these words:

> *Provided*, That the President, before said agreement enters into force, obtains satisfactory assurances, by exchange of notes or otherwise, that the Government of Canada agrees to the principle of making the new deep water navigation works on the Great Lakes-St. Lawrence system herein authorized self-liquidating by charging reasonable tolls, this principle to be implemented through the conclusion of arrangements satisfactory to both governments pursuant to section 3 of this joint resolution.

In other words, before the resolution becomes effective the President of the United States, through exchange of notes, shall be satisfied that Canada agrees to the self-liquidation. Naturally, it is impossible to tell at the present time what the amount will be, but they must agree that over so many years it would be liquidated.

As I said before, the 1909 treaty provided for tolls. We have here a recognition of the fact that certain parts of the canal are wholly within the United States, and therefore we have some right to say what tolls should be charged. We could impose even our own tolls upon it, so as to be able to obtain a fair liquidation. But as I see it, the whole agreement is a fair and reasonable one providing for self-liquidation. All that is required is that the Executive, whoever he may be, should enter into a reasonable agreement for liquidation, subject, however, to paragraph 3, which sets up certain limitations or standards. I thank the Senator.

Mr. OVERTON. I answer the Senator from Michigan by renewing my prediction. I do not think they will ever reach an agreement on the subject of tolls.

Mr. GEORGE. Mr. President, will the Senator yield?

Mr. OVERTON. I yield.

Mr. GEORGE. If the Senator will yield to me for just one moment, I should like to suggest that if the matter is of such extreme importance and is yet in an embryonic state, that is all the more reason why we should be patient enough at least to have a treaty which would become binding upon the two countries.

I should like to call attention, if the Senator from Louisiana will permit me to do so, to the result of our impatience in the case of Panama very recently. We were too impatient to have a treaty when we could have had one, and we paid out vast sums of money in Panama. We are now invited to leave Panama without regard to the expenditures of money we have made therein. I do not suggest that that may occur in the case of Canada, but I do suggest that no nation can predicate its action upon the assumption that any other nation will act otherwise than in its own self-interest under any circumstances.

Mr. WILEY and Mr. REVERCOMB addressed the Chair.

The ACTING PRESIDENT pro tempore. Does the Senator yield; and if so, to whom?

Mr. OVERTON. Mr. President, I shall proceed to conclude my address as soon as the Senator from Georgia concludes.

Mr. GEORGE. I conclude with the statement that very recently we negotiated a treaty with Mexico dealing with the waters of the Colorado River and the Rio Grande. We had the patience then to approach the subject in the way in which we should approach the pending question. We are here asked hurriedly to commit ourselves, and, at the least that anybody can say, we are allowing the camel to get his nose under the tent, so that hereafter we shall be bound to do things that we do not now intend, unless there is first concluded a dependable agreement.

Mr. WILEY. Will the Senator yield?

Mr. OVERTON. I am sorry, I should like very much to yield, but I am tired. I must conclude. I have but a few more remarks.

The ACTING PRESIDENT pro tempore. The Senator from Louisiana declines to yield.

Mr. OVERTON. Mr. President, one of the main purposes of my trespassing upon the time of the Senate in the consideration of the pending business has been to bring the Senate's attention to the new phase of the Great Lakes-St. Lawrence waterway, and that is the unscientific, impractical, and indefensible levying of toll charges. I hope that this phase of the problem will be commented upon by other Senators, either for or against the measure.

There are many phases of the proposed venture which time does not permit me to present for the consideration of this body. I have had under study the Great Lakes-St. Lawrence waterway project since my entrance into the Senate in 1932. I have spoken against it on a number of occasions and have covered practically every question and issue involved in prior debates. I have omitted, for instance, what to me is one of the most interesting and, at the same time, most important issues involved, and that is whether the proposal submitted by the President is a treaty or an executive agreement. I respectfully insist that it is a treaty, and have in hearings conducted before committees of the Senate and in debate on the floor undertaken to show why unquestionably under international authority and in the light of our traditional relations with Canada with respect to our boundary waters the compact before us has all the elements and all the importance of a treaty between two sovereign powers.

Neither, Mr. President, have I commented on the obsolete and antiquated method of construction of the St. Lawrence channel in the light of our own experience with inland waterways and harbors. Modern merchant ships have caused us to throw into the discard on our projects authorized for inland waterways and harbor projects the 27-foot channel. We have substituted the 30- to 35-foot channel. I am speaking now of channels to be used by oceangoing vessels, and not by barge lines. We are, on all waters that are to be used by our merchant vessels, providing as rapidly as possible channels of no less depth than 35 feet. And the day is not far off when we shall be obligated to utilize 40-foot channels to take care of the advancements in modern merchant-ship construction.

Neither have I alluded to the power program contained in the proposal—a power project in which the United States is to furnish the money for Canada to build the dams and make all the large capital investment, leaving only to Canada the burden of installing its own generating equipment at a comparatively small cost and, at the same time, giving to Canada the right to utilize one-half of all the power generated.

In fine, Mr. President, the proposal is one that seeks to gather all the votes that it can of either the Senate or the Senate and House combined by unsubstantiated offers of lower freight rates to the Middle West, of cheaper power to New York—and when I say New York I mean New York only—and to navigation, both domestic and foreign, and the further untenable argument of a superior and grandiose bastion of national defense. Mr. President, the project falls crashing to the ground with its overweighted cargo of inept rhetoric and futile promises that can never be realized.

EXHIBIT A

CAPACITY OF THE SEAWAY

SEAWAY CAN ACCOMMODATE ESTIMATED ORE, GRAIN, AND COAL TRAFFIC

From the foregoing commodity studies, potential seaway traffic has been estimated at thirty to thirty-seven and a half million tons of iron ore, six and one-half to eleven and one-half million tons of grain, and about 4,000,000 tons of bituminous coal, making a grand total for these three commodities of forty and a half to fifty-three million tons. In addition there is a distinct possibility that a huge traffic in petroleum might develop although any substantial traffic in this commodity should be regarded as a long-range rather than an immediate possibility. Accordingly the following discussion is in terms of the three commodities, ore, grain, and coal, which would move in large volume on the seaway shortly after its completion.

The question now arises as to whether the capacity of the proposed seaway will be adequate to handle such a heavy volume of traffic. For more than a decade, discussion of the St. Lawrence project has been in terms of a capacity of approximately 25,000,000 tons. This figure was derived from an estimate prepared in 1934 by the United States Army Board of Engineers.[1] The 1934 estimate of the Army Engineers was one of practical, as distinguished from theoretical, capacity, and apparently was based on the assumption that the traffic pattern on the seaway would resemble the pattern then prevailing on the Great Lakes. This assumption involved an exceptionally unbalanced cargo movement with 80 percent of the traffic moving down-bound and only 20 percent up-bound. On this basis, the Army Engineers arrived at an average tonnage per vessel passage through the locks of only 3,800 tons. This relatively small tonnage per vessel multiplied by 7,230 vessel passages produce a maximum tonnage of 27,473,000 tons, which was then reduced to 25,000,000 tons.

Theoretical capacity of the St. Lawrence project represents the total traffic which could be moved through the seaway during a normal 240-day navigation season if the locks were constantly operated at top speed and if every vessel passing through the locks in each direction were fully loaded. The Canadian Government has estimated that the limiting lock on the seaway, lock No. 2 on the Welland Canal, has an effective capacity of 28 single lockages per day with the largest bulk freighters on the Lakes.[2] Assuming that each vessel passing through the locks carried 10,000 tons of freight, the Canadian authorities arrived at a capacity figure of 67,720,000 tons for 6,720 vessel passages. If vessels such as the new lake ore freighters, which can carry more than 15,000 tons, comprised the entire traffic of the seaway and were fully loaded in both directions the theoretical capacity of the project would be in the neighborhood of 100,000,000 tons.

Obviously it is impractical to expect that either the 100,000,000- or the 67,000,000-ton figure will ever be realized, but it is equally obvious that under conditions of full utilization with relatively balanced traffic in each direction, the practical capacity of the seaway is far in excess of the 25,000,000 tons assumed in previous discussions of the subject. As a matter of fact, in 1945 the MacArthur Lock in the upper lakes, which is of the same general dimensions as the limiting lock on the seaway, handled 42,000,000 tons of traffic, despite the fact that most of the tonnage moved in one direction.

With specific reference to the traffic estimates on ore, coal, and grain of from forty and one-half to fifty-three million tons, it appears likely that the seaway should be able to handle such a volume. The number of vessel passages required to move ore up-bound by lake freighters with carrying capacities of 15,000 tons would be 2,000 vessel passages for 30,000,000 tons of ore and 2,500 vessel passages for 37,500,000 tons. These same lake freighters would be available for carrying down the river the estimated potential volume of grain and coal. More than half of the boats would have to make the down-bound trip in ballast. The utilization of from 2,000 to 2,500 vessel passages one way and 4,000 to 5,000 vessel passages in both directions for ore, coal, and grain would leave an excess theoretical capacity of 850 to 1,350 one-way vessel passages, and 1,700 to 2,700 vessel passages in both directions.

Some questions have been raised about the effect of present interlake traffic utilizing the Welland Canal on the capacity of the Canal for seaway traffic. It has been contended that interlake traffic would absorb all but about 10 of the lockages available per day at the Welland Canal, thus reducing the capacity of the Welland Canal for seaway traffic to 10 large vessels per day.[3] Consideration of the actual movement of interlake traffic utilizing the Welland Canal and the anticipated movement in ore, grain, and coal vessels indicates that such a restriction is highly unlikely.

Total traffic through the Welland Canal in 1945 was about 13,000,000 tons, of which down-bound traffic constituted 91 percent.[4] Canadian statistics do not show how much of the down-bound traffic actually terminates in Lake Ontario and how much is transshipped in small canallers down the St. Lawrence River. However, the interlake items may be derived from the following table showing down-bound through and way traffic over the Welland Canal: [5]

Down-bound Welland Canal traffic, 1945

(In thousands of short tons)

Wheat	3,014
Gasoline	610
Petroleum	1,398
Soft coal	4,313
Iron ore	1,391
Hard coal	114
Total	10,840

If interlake traffic is to constitute a restriction on the seaway capacity of the Welland Canal, it would have to be the result of the movement of the above-listed commodities, which made up 92 percent of the total down-bound tonnage in 1945.

Most of the tonnage in wheat and coal either moved directly from the Welland Canal down the St. Lawrence River or was transshipped from Lake Ontario ports in small St. Lawrence canallers. The data on through

[5] Ibid.

traffic via the St. Lawrence canals show that 2,000,000 tons of wheat were shipped down the St. Lawrence in 1945, or two-thirds of the amount which moved through the Welland Canal. Two million six hundred thousand tons of soft coal went down the St. Lawrence in 1945, or about 60 percent of the volume moving through the Welland Canal.[6] All of the wheat and most of the soft coal shown as moving down the St. Lawrence River are the same wheat and coal which moved through the Welland Canal. On the other hand, the iron-ore movement is strictly interlake. No iron ore moved down the St. Lawrence.

No matter what precise proportion of the volume of wheat, coal, and ore was interlake, the movement of these commodities should not seriously restrict the capacity of the Welland Canal for seaway traffic. It has already been demonstrated that more than 50 percent of the boats carrying ore up the seaway will not have return cargo. These vessels will probably pick up interlake bulk cargo on an out-of-pocket cost basis rather than return light down the seaway. Since their down-bound rates do not have to be fully compensatory, the large lake freighters will be able to compete most effectively with smaller carriers for the down-bound interlake trade. Further, the present down-bound interlake iron-ore movement will probably be eliminated altogether as a result of diminution of the ore flow from the head of the Lakes and the advantages of restricting upper lake ore tonnage to destination points on Lakes Erie and Michigan.

There remains only for consideration the down-bound movement of petroleum and gasoline, which totaled in 1945 roughly 2,000,000 tons, of which no more than 160,000 tons continued down the St. Lawrence River.

The growing shortage of petroleum supplies in the United States, which furnish the down-bound tonnage via the Welland Canal, will probably lead to the development of an up-bound seaway petroleum movement to Lake Ontario points before the down-bound petroleum movement becomes an obstacle to seaway traffic. Even if down-bound traffic continues at present levels, the number of lockages absorbed by the down-bound tankers at 2,000,000 tons would be only about 660 one way, if each tanker required a single lockage. The existing lake tankers are about 250 feet long, 43 feet wide, with a loaded draft of about 14 feet and an average carrying capacity of 3,000 tons. Two tankers can easily be locked simultaneously, indicating a maximum reduction in the number of lockages required to about 330 one way. Neither the minimum nor the maximum number of lockages required for the small tankers would interfere with estimated seaway movement of forty and one-half to fifty-three million tons of ore, grain, and coal.

TOLL CHARGES AND REVENUES

There are three questions with respect to the provisions for toll charges in the pending legislation which are germane to the purposes of the present study. These are:

1. Will the indicated volume of ore, grain, and coal move via the seaway if the cost of the movement is increased by the imposition of tolls?

2. Can toll rates be so adjusted as to encourage the use of the largest lake freighters in order to assure the most efficient and economical utilization of the limited capacity of the seaway in relation to the huge volume of potential traffic which it is estimated will be available?

3. What amount of total toll revenue might be derived from the estimated tonnage of ore, grain, and coal traffic without interfering with the above two objectives?

It is clear from the section on iron ore that the delivered cost of imported ore via the seaway, particularly if it originates in Labrador, will be considerably less than that of taconite under present technological developments. A toll charge of as much as 50 cents per short ton would apparently not interfere with the seaway movement or force diversion to other methods of transport.

Inasmuch as up-bound ore would constitute the principal seaway tonnage, it would be desirable to give maximum encouragement to down-bound bulk commodities in order to stimulate the development of a balanced traffic in both directions. While apparently most grain and coal could support a toll charge equal to the indicated rate for iron ore, without eliminating the rate savings on the seaway movement as compared with alternative routes, it may be desirable, in order to promote the maximum volume of grain and coal shipments, to set somewhat lower charges for these commodities. A rate of 25 to 35 cents per ton would probably assure maximum grain and coal seaway traffic. Tolls for vessels in ballast might be set at 15 cents per dead-weight ton. Vessels going down the seaway could accordingly carry coal or grain at toll charges only 10 or 20 cents a ton higher than if they sailed in ballast. With the net burden of coal and grain tolls at such low levels there is no question but that the large, low-cost lake freighters will displace the small, higher-cost vessels which can use the existing free-canal system.

In view of the limited capacity of the seaway in relation to the volume of traffic now anticipated, it is essential that toll charges be graduated in such a way as to furnish the maximum advantage for using vessels of great carrying capacity. Accordingly, for vessels carrying bulk commodities and for vessels operating in ballast, it would appear desirable to fix a minimum charge based on vessels of at least 12,000 tons carrying capacity. The net effect of this measure would be to make the toll per ton of cargo, on a vessel carrying 8,000 tons, 50 percent higher than for a vessel carrying 12,000 tons. Combined with the low operating-cost advantages already enjoyed by the large lake carriers because of their huge carrying capacity, the toll differential would insure that bulk commodities, which require no transfer or can be transferred at low cost, would be handled on the seaway by lake carriers of greatest carrying capacity.

On the basis of the suggested toll charges discussed above, the toll revenue from ore, coal, and grain, and from ore carriers returning light would range from 21 to 27 million dollars. It is not intended to advance these figures as the revenue which should or will be derived from seaway traffic in ore, coal, and grain. The sole purpose of the estimate is to indicate the revenue which might be raised by assessing tolls at levels which do not interfere with the volume of seaway traffic, and which would encourage maximum use of the largest carriers.

Possible range of toll charges and toll revenue

Commodity	Potential traffic	Per ton toll charge	Total revenue
		Cents	
Ore	30-37½ million tons	50	$15,000,000-$18,750,000
Grain	6½-11½ million tons	25-35	1,625,000- 4,025,000
Coal	4 million tons	25-35	1,000,000- 1,400,000
Ballast	19½-22 million tons (deadweight tonnage)	15	3,300,000- 2,925,000
Total			20,925,000- 27,100,000

[6] Canal Statistics, 1945. Op. cit.

Mr. BUTLER. Mr. President, I intend to vote against the pending joint resolution (S. J. Res. 111) providing for improvement of the existing St. Lawrence waterway. My constituents are entitled to know my reasons for reaching this decision, and I therefore desire to set them forth clearly on the record.

This is another one of those questions upon which the public is inclined to take strong positions for and against, without having the opportunity to give the proposal the detailed study that it deserves. I have received numerous highly emphatic letters from friends in my State, expressing strong convictions in favor of the proposal. I have also received many letters expressing equally strong opinions against it. My correspondents, in most cases, have not had an opportunity to study the financial and engineering aspects of the problem. They have not had available to them the detailed hearings, committee reports, and other studies which delve into the practical considerations involved. Their opinions are, therefore, necessarily based to a large extent on incomplete information—brief statements of public officials as reported in the press, and the like.

Those of us who must vote on this matter have a definite responsibility to inform ourselves more fully. The responsibility lies with us to decide whether it is in the interests of the United States to authorize the expenditure of several hundred millions of dollars. This particular question revolves, to a large extent, around detailed figures setting forth the estimated costs and anticipated benefits of the waterway. On the basis of my study of these figures, I have come to the conclusion that this project is not sound from an engineering and financial standpoint.

As a matter of fact, the principal conclusion to which I have come is that the studies and preparations that have been made to date for the project are hopelessly inadequate to justify us in going ahead. This question has been under consideration now for almost half a century in one form or another. In all that time, it might be thought that by now enough facts would have been developed to enable us to render a clear-cut judgment on its advisability. In my opinion, that is not the case. Let me mention some of the things on which we do not yet appear to have enough information on which to act.

First of all, the evidence in the record as to the capacity of the waterway when it is constructed is inconsistent and inconclusive. The only real study we have to date is that of the Army engineers, which indicated a capacity of 25,000,000 to 27,000,000 tons.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. BUTLER. I yield.

Mr. AIKEN. The Senator from Nebraska understands that the Army engineers' estimate was based on one-way traffic?

Mr. BUTLER. I am making my statement, I will say to the Senator from Vermont, on the basis of the report I have read from the Army engineers.

Mr. AIKEN. That is correct. And their report took into consideration that there would be almost wholly one-way traffic, at the time they made that estimate, I believe, of 30,000,000 tons a year.

Mr. BUTLER. They included, however, any estimate they thought was reasonable for traffic both ways. They did not limit it to traffic one way.

Mr. AIKEN. But the two-way traffic was not included in the estimate of 30,000,000 tons.

Mr. BUTLER. Mr. President, the Army engineers have not made any revision of this estimate on capacity and were not willing to do so without making a thorough study of the subject. Proponents of the measure have insisted that the physical capacity would run somewhere between 40,000,000 and 100,000,000 tons. On a question of this sort, we certainly should be able to secure a fairly definite figure from competent engineers, since it is an engineering question. The question is all the more important since estimates justifying the waterway as a self-liquidating proposition are based on a traffic of at least 35,000,000 tons annually. I very earnestly believe we should not be asked to support this proposal until the Army engineers go definitely on record that the waterway has a physical capacity of at least 35,000,000 tons.

Secondly, we do not have any definite up-to-date study from an impartial authoritative source of the potential traffic that might use the waterway. On the question of the economic potentialities of the waterway we have only the St. Lawrence survey of 1941, prepared by the Department of Commerce. This study claimed a tonnage of only 25,000,000 representing an increase of only 16,000,000 tons over present traffic, and numerous errors have been pointed out in this old report.

It is true that last summer during the Senate hearings, the Department of Commerce presented us with revised estimates which are much more optimistic. In presenting these estimates, however, the Secretary of Commerce admitted frankly that the Department had not yet made a detailed analysis of potential traffic on the waterway. It is also true that late last year the Department of Commerce went much further in presenting detailed estimates in a publication in the series of industry reports on domestic transportation, entitled, "An Economic Appraisal of the St. Lawrence Seaway Project." This study makes a fairly full analysis of some of the important factors involved. It does not, however, attempt to deal with all the principal types of cargo which might be expected to move over the waterway. The discussion is confined to only four commodities—iron ore, grain, coal, and petroleum—and traffic in two of these items—iron ore and petroleum—is entirely hypothetical. This study does not touch at all on most of the commodities dealt with in the 1941 report by the Department of Commerce.

In the same way, General Wheeler told us that the Corps of Engineers had never made an exhaustive study of this subject. He went on to say that a definite finding of the economic feasibility of the project by the Corps of Engineers would require a full study of all prospective traffic, which would take more than one year to complete. In other words, neither the Department of Commerce nor the Corps of Engineers has given us firm estimates that would justify us to assume the project can be self-liquidating.

Proponents of the measure before us apparently base most of their optimism on the assumption that a very heavy traffic in iron ore or petroleum upstream may develop at some time in the future. They do not attempt to prove that this traffic will develop; they merely say that it might. In other words, the case is built on hypothetical possibilities. We should not authorize this project on the basis of guesswork. We can find out a great deal more definitely just what is in prospect. If the upper-lake ore deposits should become depleted to such an extent as to require upstream movement of substantial tonnages of iron ore, we will know about it in plenty of time to make provision for improved transportation when the time comes. The same is true of the hypothetical traffic in petroleum products.

Thirdly, no definite determination has yet been made that the tolls which could be charged on traffic would return sufficient revenue to pay the cost of the construction. The recent study by the Transportation Division of the Commerce Department attempts to show that these costs could be liquidated by a low level of tolls which would not unduly burden the prospective traffic. This section of the report, however, is based on the assumption that gigantic quantities of traffic would be handled. In fact, the section implies that about 75,000,000 tons might be handled each year. This figure is in sharp contrast with even the optimistic estimates of the physical capacity of the waterway. Furthermore, it is based on the assumption that tremendous quantities of iron ore would move upstream. If the iron ore traffic does not develop or if it should happen that the waterway cannot accommodate anything like 75,000,000 tons, the conclusions of this tabulation would fall to the ground. In that case, a sharply higher level of toll rates would be necessary which might place such a heavy burden on the commerce as to divert traffic from using the waterway. What we should do is figure out whether the potential traffic can afford a toll of $1.25 a ton or higher. Then we should compute whether there will probably be enough traffic on that basis to pay the costs. Until we know these essential facts, we should not authorize this waterway.

Fourthly, the whole question of tolls is so much up in the air that we should insist on some definite decisions before we go ahead. The level of tolls is to be set through negotiation with Canada. We do not know precisely what the Canadian viewpoint on this question is, and whether Canada will be willing to agree on a level of tolls high enough to make the project self-liquidating. That is something that could well be settled in advance of the enactment of this legislation. Although it would not be possible to settle on exact toll rates for every item, it would certainly be advisable to agree on the general considerations and the type of formulas to be used in arriving at the toll rates. As it is now, we are asked to assume that there will be no trouble at all in reaching an agreement with Canada that will be satisfactory to us, and we are asked to approve this legislation before negotiations on that point have even begun.

Fifthly, from a reading of the record, it is not apparent exactly how much electricity will be generated and how much of that power will be firm power available the year around. Testimony from recognized authorities appear to differ by as much as 100 percent in the estimate of power to be generated.

Mr. AIKEN. Mr. President, I should like to have the Senator state for the record the authority for the statement he has just made respecting such a wide range of difference in the estimates of power which would be developed. I have no such knowledge as the Senator has just stated. I know that when the power companies tried to secure the St. Lawrence development they estimated a certain amount of power. Herbert Hoover's committee estimated a certain amount of power. The Army engineers estimated a certain amount of power. The Federal Power Commission estimated a certain amount of power. All those I have mentioned are quite good authorities on the subject. But so far as I know they have not varied greatly in their estimate, and I know they have not varied as much as 100 percent. Perhaps the Senator means that the flow of the river will vary 100 percent. That is true. The high-water flow of the St. Lawrence is approximately double the low-water flow. The St. Lawrence has the most constant flow of any river in the world. Most rivers will have about 30 to 40 times as much water in high water as they will in low water. So I am wondering if that is what the Senator refers to. I wonder if the Senator's reference to a variation of as much as 100 percent does not refer to the flow of the river, between the high- and the low-water marks. However, I should like to know who the Senator's authorities are.

Mr. BUTLER. Let me say to the distinguished Senator from Vermont, whom I respect very highly, especially on the question of public power, that I think if he will listen to the very brief comment which I intend to continue to make on this particular phase of the subject, he will be perfectly satisfied with my position.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. BUTLER. I yield.

Mr. AIKEN. I am a little surprised at the Senator's attacking the power phase, because at the last national meeting of the Rural Electrification Associations every delegate from the State of Nebraska voted in favor of the St. Lawrence seaway. Knowing the Senator's admiration for the REA and his support of the REA, I am rather surprised to see him take issue with the delegation from his own State, which seems to have an entirely different viewpoint.

Mr. BUTLER. I will say to my friend from Vermont that if he will be patient

and allow me to continue my statement on the subject I think he will find that there is very little difference, if any, between his position and mine with reference to REA and the development of power.

Testimony from recognized authorities appears to differ—and for the benefit of the Senator from Vermont I shall endeavor to supply him with the source of the authority for this statement.

Mr. AIKEN. I should like to have those authorities.

Mr. BUTLER. Facts of that sort can be developed fairly accurately, and I shall do my utmost to satisfy my friend from Vermont.

In the Committee on Interior and Insular Affairs we have had to do with a number of projects dealing with the generation of electric energy, and we have never found too much difficulty in determining fairly exactly how much power will be generated by a particular project. Until we get some definite figures on this phase of the proposal, I do not believe we should go ahead.

Sixth, there has been no definite determination at all of the harbor improvements that will be necessary for the various Great Lakes ports, in order to permit them to handle the larger boats that supposedly will come to them if the St. Lawrence waterway is deepened to 27 feet. This is a very important point which has been almost completely glossed over in the hearings. The Brookings Institution report estimated this item at $175,000,000. We should insist on full and accurate data on this question before we go ahead.

In short, the whole project appears to be enveloped in a maze of conflicting testimony and optimistic guesswork. If we are to go ahead with this development, we have a right to expect fairly definite answers from competent authorities on all of these points. We should refuse to accept any such proposal until we are supplied with much more exact and adequate data than we have been supplied with in this case.

This is the part which I thought might interest the Senator from Vermont:

I hope my previous remarks regarding the power phase of this particular measure will not be construed as opposition to an expansion of the Federal Government in this field where such developments can be worked out on a sound basis. The power side of this project in particular seems to have a great deal of merit, even though the facts that have been given to us on this point are not as complete as they might be. The project has been presented to the public in such a way as to imply, however, that we cannot proceed with the power development unless we also authorize the waterway. That is not true. Facilities for generating tremendous quantities of additional power could be constructed without necessarily going ahead with the other plans for deepening the channel. I should be happy to see plans along this line developed further, so that rural electrification cooperatives and other consumers in that area could be assured of an additional supply of low-cost power without burdening the entire Nation with the excessive cost of this entire project.

There are other important considerations to which we should give careful attention. Much has been made of the supposed advantages of the project from the standpoint of national defense. Under the new conditions which we are likely to face, however, there is no reason to think that our Great Lakes ports will be any safer from attack than our Atlantic ports. Chicago and Detroit are about the same distance from Europe by air as are Boston and New York. More important, nine-tenths of the proposed waterway lies in the territory of a foreign power, although we are expected to put up two-thirds of the money for the construction. Our relations with Canada have been extremely friendly for well over a century, and I trust will always remain so.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. BUTLER. I yield to the Senator from Vermont.

Mr. AIKEN. I presume the Senator expects his constituents at home to read his speech. I know that he wants them to know the facts as they are. He states that the United States is supposed to put up approximately two-thirds of the total cost of this project. I know that he wants his folks at home to know that that is because Canada has already completed a great part of the work which she was expected to do, including the Welland Canal and other works, and will, of course, be given credit for the work which has been done previously. In fact, Canada spent $133,000,000 in developing her part of the waterway, as far as she has gone, while the United States was spending only $18,000,000 on our part. I know that the Senator wants his constituents to know that; and I hope that if he prints his speech and sends it to them, he will not omit my remarks.

Mr. BUTLER. I can assure my good friend from Vermont that his remarks will be included when the speech is spread over the State of Nebraska—as very likely will be the case.

However, I repeat that nine-tenths of the waterway is within the Dominion of Canada, while about one-tenth is in our area, and the costs are not so divided.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. BUTLER. I yield.

Mr. AIKEN. I invite the Senator's attention to the fact that all the main dams will be within the borders of the United States, and all the locks and canals which it is proposed to build will be within the United States. The part which will be in Canada is the Welland Canal, and the deepening of the bed of the St. Lawrence River after it leaves the international boundary. Most of the construction work to be done, including all the main dams, will be in the United States; and one-half of the power plant and the power dam will be in Canada, and one-half in the United States.

Mr. REVERCOMB. Mr. President, will the Senator yield?

Mr. BUTLER. I yield.

Mr. REVERCOMB. Since the point has been raised, let me ask the Senator from Vermont upon what basis it is proposed that the United States shall pay so much more of the construction cost than Canada is expected to pay.

Mr. AIKEN. Because Canada has already expended $133,000,000 in developing her part of the waterway, at a time when costs were much lower. Of course, Canada is being given credit for her farsightedness, and is being credited with the development at present-day costs. I think there is no difference of opinion as to that basis of reasoning.

Mr. REVERCOMB. Mr. President, will the Senator further yield?

Mr. BUTLER. I yield to the Senator from West Virginia.

Mr. REVERCOMB. Let me say to my able friend from Vermont that there is quite a difference of view upon that division, certainly from the standpoint of the Senator from West Virginia.

The able Senator has stated that the division of cost is based upon the fact that the Welland Canal was built several years ago by Canada. Let me say to the able Senator that the cost of this project was estimated last May by the Army engineers at more than $838,000,000. The cost of $838,000,000 is to be divided as follows: $523,531,000 to be paid by the United States, and $315,770,000 to be paid by Canada.

That is not the whole of it. Canada is to be credited with $132,672,000 for her part of the construction involved in the Welland Canal. Upon what basis was the cost originally divided, with more than $523,000,000 against the United States, and only $315,000,000 against Canada? That was before credit was allowed for the Welland Canal. What is the basis for that division?

Mr. AIKEN. Mr. President——

Mr. WILEY. Mr. President——

The ACTING PRESIDENT pro tempore. Does the Senator from Nebraska yield; and if so, to whom?

Mr. BUTLER. I think the Senator from Vermont had better answer the question of the Senator from West Virginia.

Mr. WILEY. Mr. President, I can answer the question.

Mr. BUTLER. I yield to the Senator from Wisconsin.

Mr. WILEY. That question was put to the Government authorities, and I have the answer before me, verbatim:

When the 1932 treaty was negotiated the division of total cost, including past expenditures, was practically equal for the United States and Canada. The reason for the changed cost relationship today is that past expenditures were primarily Canadian and were made at a time when construction costs were comparatively low. Canada has already expended $133,000,000 on navigation works which are integral parts of the seaway, as compared with $32,000,000 for the United States. Future expenditures, on the other hand, for the most part cover works assigned to the United States, and have been estimated on the basis of the higher construction costs now obtaining. In any event, the pending legislation provides for self-liquidation of the new navigation works so that the proportion of cost borne by each country is not a primary factor in evaluating the project. The users will pay for the new navigation works.

Mr. REVERCOMB. Mr. President, will the Senator yield?

Mr. BUTLER. I yield to the Senator from West Virginia.

Mr. REVERCOMB. Mr. President, we have talked about the question of the users paying for the project. I take it that is the idea of liquidating the project by tolls. I think it has been very clearly brought out that the tolls are not fixed. We do not know what they will be. We do not know how long it will take to liquidate the project, if it shall ever be liquidated. So that the statement made by representatives of the Administration hardly answers the question which I have asked regarding the division of costs. The plain figures show that the division is put down as $523,000,000-plus against the United States and only $315,000,000 against Canada, originally. Canada's proportion of $315,000,000 is credited with $132,000,000, leaving Canada's estimated share at $183,098,000.

I bring that up because of the question being raised regarding the proportion of costs. It seems to me that is an unfair apportionment of costs. I ask why the United States should have to put up so much more than should Canada.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. BUTLER. I yield.

Mr. AIKEN. Mr. President, I was going to reply in a general way in the same manner that the Senator from Wisconsin replied to the Senator from West Virginia, but inasmuch as the Senator from Wisconsin had the reasons written out verbatim, I think that is the best answer to leave in the RECORD. Certainly costs are lower on the Canadian side. The costs of labor are lower, and Canada was far-sighted enough to complete much of her work while costs were not over half what they are today. Therefore she is being given credit for that work.

I hope that the views of the Senator from West Virginia are not colored by the fact that the power generated at the St. Lawrence side would effect a saving of 7,000,000 tons of coal a year, if it were used to take the place of coal. As a matter of fact, it would not be used for that purpose. The use of coal would increase as a result of this great development. But here is where a saving might be effected. The power generated at the St. Lawrence dam would have an equivalent energy of 21,000,000 barrels of oil. Everyone in the United States knows how necessary it is to save oil today. Everyone in the St. Lawrence area knows how difficult it is to get oil today. It is costing our people 14 cents a gallon to buy oil. That amounts to $7 a barrel. There is $140,000,000 worth of oil going to waste down the St. Lawrence River every year. Why do we quibble over whether Canada is getting credit for $1,000,000 or $10,000,000 more than she should get? I feel that it would be impossible to propose a bill of any kind for the development of water power for the benefit of the people which would satisfy the Senator from West Virginia or the Senator from Nebraska.

Mr. REVERCOMB. Mr. President, will the Senator yield further?

Mr. BUTLER. I yield to the Senator from West Virginia.

Mr. REVERCOMB. Let me assure the Senator from Vermont that the views of the Senator from West Virginia are not colored by anything that should not color them; and I am certain that the Senator's views are not colored by the fact that he hopes to get some cheap power in his State.

Mr. AIKEN. I never in my life saw so many broadminded people in one spot as we find right here.

Mr. REVERCOMB. Mr. President, will the Senator yield further?

Mr. BUTLER. I yield.

Mr. REVERCOMB. Mr. President, when I asked why there was such an unfair apportionment of the costs and asked upon what basis the division was made I heard a discourse upon coal, oil, and power. It is brought out that Canada paid for the Welland Canal, and that we ought to credit Canada $132,000,000 more than that amount against her apportioned costs for the construction of the Welland Canal. The Senator from Vermont has stated that when Canada constructed the Welland Canal labor was cheaper and materials were cheaper. I am wondering if the Senator means to tell us that we are not only giving Canada credit for the cost of the Welland Canal, but are giving her the value of the Welland Canal as if it were constructed as of today. Will the Senator answer that question for me?

Mr. WILEY. Mr. President, will the Senator yield?

Mr. BUTLER. I yield to the Senator from Wisconsin. I do not wish to yield for a digression.

The ACTING PRESIDENT pro tempore. The Senator from Nebraska yields to the Senator from Wisconsin for the purpose of answering the question raised by the Senator from West Virginia, but not for a digression.

Mr. WILEY. I want to say that Herbert Hoover, a good Republican, said that the determination of the amount of tolls should be made by the two countries for construction and completion, otherwise they will have no idea what the actual necessary amounts are.

The total cost of the canal is estimated at $720,000,000. The total Canadian cost is $230,000,000. Deducting that from the total cost would leave $490,000,000. We deduct the power cost to the United States of $161,000,000, and that leaves the total cost of the power to the United States $329,000,000. The cost to both Canada and the United States is $398,000,000. Then we get into the question of the interest charges and what they should be.

Answering directly the question, I want to say that, as was stated yesterday, the former Governor of New York always looked at the record. We should look at the record, and here it is:

> When the 1932 treaty was negotiated, the division of total cost, including past expenditures, was practically equal for the United States and Canada. The reason for the changed cost relationship today is that past expenditures were primarily Canadian and were made at a time when construction costs were comparatively low. Canada has expended $133,000,000 on navigation works which are integral parts of the seaway as compared with $32,000,000 for the United States. Future expenditures, on the other hand, for the most part cover works assigned to the United States and have been estimated on the basis of the higher construction costs now obtaining. In any event, the pending legislation provides for self-liquidation of the new navigation works, so that the proportion of cost borne by each country is not a primary factor in evaluating the project. The users will pay for the new navigation works.

In relation to that, my good friend from West Virginia has throughout the day suggested that we cannot with any degree of certainty evaluate the future return. There are men like former President Hoover, men like Mr. Stimson and others, who have said that the construction of the project would be in the public interest. No farmer can tell what his crop will be, but he has faith and he plans and hopes that the sunshine, the rain, and other factors will help him to produce his crop. That is the sort of faith that has produced America.

We have the great potential savings suggested by the Senator from Vermont [Mr. AIKEN] in connection with millions of dollars worth of potential oil going down the river, generating electricity to take care of the heat units needed by the people of New York.

Montreal is the second port in America from the standpoint of tonnage. It feeds only 15,000,000 Canadians. But when we start to feed Milwaukee, Chicago, Cleveland, and the other Lake ports, with their population of 50,000,000, what does the Senator suppose the traffic will be?

I have faith in the future of America which, it seems to me, some of my distinguished Republican colleagues do not have.

Mr. REVERCOMB. Mr. President, will the Senator yield?

Mr. BUTLER. I yielded a moment ago for the purpose of permitting the Senator from Wisconsin to answer the question which was asked by the Senator from West Virginia. I did not yield for a digression, but I believe that in the answer we got a hundred-percent digression. I yield to the Senator from West Virginia.

Mr. REVERCOMB. I want to say to the Senator that I appreciate very much his yielding in order to get an answer. I have not received the answer yet. The only answer I got to my question was that the Senator from Vermont [Mr. AIKEN] talked about coal and power, and the Senator from Wisconsin spoke of the future of the country, and tolls. That did not answer my question. I thank the Senator from Nebraska for yielding. I shall have to wait and let the question be answered later.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. BUTLER. I yield to the Senator from Vermont.

Mr. AIKEN. I wish to plead guilty to that with which the Senator from West Virginia, by inference, charges me. I do wish to see the power rates in New York and New England cut in half. They should be cut in half in order to bring them down to the level of the power rates which exist in more favored parts of the country. I am afraid I am guilty of partiality in that direction.

Mr. REVERCOMB. Mr. President, will the Senator yield?

Mr. BUTLER. For a digression or for a question?

Mr. REVERCOMB. A question.

Mr. BUTLER. I yield.

Mr. REVERCOMB. I wish to reiterate that it seems to me the question pends unanswered. Later in the course of the discussion I hope to bring into the RECORD the inequitable division, as I consider it, which is made between the two countries.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. BUTLER. For a question or an answer?

Mr. WILEY. For a question.

Mr. BUTLER. I yield.

Mr WILEY. The Senator has stated that my answer was a digression. However, I ask whether my statement does not answer expressly, directly, and dynamically, the question of the Senator from West Virginia.

Mr. BUTLER. I can say——

Mr. WILEY. I wish to point out that this is the question, and I have read it twice to the Senate:

When the 1932 treaty was negotiated, the division of total costs——

Mr. BUTLER. Let me interrupt the Senator right there to ask whether I correctly understood him to refer to "the 1932 treaty"?

Mr. WILEY. That is what it says.

Mr. BUTLER. I observe that it was a treaty, not an agreement.

Mr. WILEY. I repeat, Mr. President:

When the 1932 treaty was negotiated, the division of the total costs, including past expenditures, was practically equal for the United States and Canada.

I have read that twice before.

Mr. BUTLER. Mr. President, before continuing my very brief statement, which I have practically completed, I wish to point out very plainly at this time, inasmuch as this statement may be circulated in toto among the people of my State, that neither the distinguished Senator from Vermont nor the distinguished Senator from Wisconsin nor any other Member of the Senate is more friendly to the development of the power facilities of the United States than I am.

Mr. President, when I was interrupted for this digression, I was touching upon the subject of our relations with Canada, which for a period of more than a century have been extremely friendly, and we all trust they will remain so forever. The fact remains, however, that Canada is a sovereign nation, just as we are, and she may very well have different interests and may take a different course of action in case another conflict occurs. In 1898, we were at war, but Canada was not. From 1914 to 1917 and from 1939 to 1941, Canada was at war, but we were not. In case of a future conflict, there is no reason to think that our interests will be identical. In those circumstances, we shall have no real control whatever over the use of this waterway, which is proposed to be built largely with our money. We shall not be in a position to insist that the lower nine-tenths of it be made available to our traffic.

One other point deserves attention: The proposed waterway will not be usable for 4 or 5 months each year. It is unfortunate that the Great Lakes-St. Lawrence system is located so far north. It would be better if it started in Nebraska for instance. Although the winter freeze there would impede transportation to some extent for several months, the period would not be as prolonged as for the location of the proposed St. Lawrence project.

Mr. President, in conclusion I should like to emphasize just one further point which seems to me rather important: Inasmuch as this is a proposal to improve conditions for ocean navigation, it might be thought that the steamship companies would be among its strongest advocates. However, that is not the case. In fact, the oceangoing steamship operators seem to be less interested in this whole question than almost any other group is. Just 2 years ago, 32 leading American steamship companies were asked what would be their practical reaction to construction of the waterway. Only one of those companies replied that its vessels would use it, and one other was unable to give a definite opinion. Thirty companies stated that they had no intention of using the waterway, if constructed. What stronger testimony could we have on the practical value of this project? If the steamship operators themselves—practical men who know the problems of navigation—have no confidence in this plan—how can we of the Senate overrule their judgment and determine to construct it anyway? If oceangoing steamers are not going to use the waterway, its construction will not benefit even those lake ports and other groups which have been most vocal in support of the idea.

Mr. President, we are still laboring under the load of a gigantic wartime debt. We are still paying taxes at a record rate for peacetime. We are still struggling to find some way of reducing a Federal budget which is over four times as high as our greatest prewar peacetime budget. This resolution proposes that we spend another half billion dollars on a proposal for which no clear case has been made, and which would be of very doubtful value. If we mean what we say about reducing the cost of Government, we cannot possibly afford to approve this measure at this time.

AWARDS IN VOICE OF DEMOCRACY CONTEST

Mr. MURRAY. Mr. President, it is most encouraging and inspiring in these times, when democracy is on trial throughout the world, to find that here at home a widespread interest exists among our young people in respect to the ideals and privileges we enjoy as citizens under our American form of government.

Recently a national contest for scholarships, under a program entitled "Voice of Democracy," was conducted among high school students of the country. This program was sponsored by the National Association of Broadcasters, the Radio Manufacturers Association, and the United States Junior Chamber of Commerce. The winners in the contest were selected by a panel of distinguished judges on the basis of having written and voiced the best 5-minute broadcasts on the subject, "I Speak for Democracy." Approximately 20,000 students participated, and four young ladies, representing the States of Ohio, Maryland, Oklahoma, and Montana were selected as co-equal winners of the contest. These four successful contestants were awarded prizes at a National Awards Luncheon held in Washington, D. C., at the Hotel Statler, on January 28, 1948, presided over by Dr. John W. Studebaker, commissioner of the Office of Education. The awards were presented by the Honorable Tom C. Clark, Attorney General of the United States, consisting of a certificate designating each as a winner in the contest, together with a $500 scholarship award.

In this contest, 38 States and Alaska entered contestants, representing approximately 20,000 high-school students, boys and girls, in 500 communities. Twenty of the State winners were boys, but the preliminary screening of entries to 12 found 7 girls and 5 boys among the finalists. Three finalists were selected by the screening judges in each of the four sections of the country. In the final contest, the panel of judges was made up of Attorney General Tom C. Clark, Gen. Omar N. Bradley, Father Edward J. Flanagan, Mrs. Oveta Culp Hobby, United States Senator Warren G. Magnuson, Fleet Admiral Chester W. Nimitz, and Mr. James Stewart, of Hollywood. The winners in the contest were Miss Janet Geister, of Cuyahoga Falls, Ohio; Miss Laura Shatto, of Hagerstown, Md.; Miss Alice Wade Tyree, of Lawton, Okla.; and Miss Rose Ellen Mudd, of Missoula, Mont.

I think it is significant that these four young ladies were the winners in this contest. It is indicative of the growing influence of American women in public affairs.

I am especially proud of the fact that a Montana girl, Miss Rose Ellen Mudd, a student at the Sacred Heart Academy at Missoula, was one of the winners. She was entered in the contest by radio station KGVO, of Missoula, with the cooperation of the Montana Junior Chamber of Commerce of that city. I have been deeply impressed by her radio talk on the subject of democracy, and feel justified in bringing it to the attention of Senators.

I am sending to the desk a transcription of Miss Rose Ellen Mudd's broadcast, copies of the addresses delivered at the national awards luncheon by Hon. Tom C. Clark, United States Attorney General, and by Dr. John W. Studebaker, Commissioner of Education, and an editorial from the Washington Post of January 28, 1948, entitled "Speak for Democracy." I ask that these may be printed in the RECORD following my remarks, in the order presented.

There being no objection, the matters were ordered to be printed in the RECORD, as follows:

I SPEAK FOR DEMOCRACY

(By Rose Ellen Mudd)

I am an American. As an American, I can do many things. Is it a coincidence that the word American ends in "I can"? That "I can" is the basis for democracy? It expresses the free will and determination of a free people—people who govern themselves.

"I can" was the spirit of the pioneering Americans when they faced the hardships of an unknown, uncivilized land and overcame them. Their spirit remained when they faced overwhelming odds and great dangers to gain their freedom from England.

"I can" was the spirit of the Nation, when, looking at the political systems of the other countries of the world, and their results, the American statesmen formed our Constitution and the Bill of Rights. They vowed to insure, to themselves, and to us, their posterity, the rights of mankind—freedom of speech, of the press, of religion. Freedom from want, and from fear. Freedom from the tyranny of government—the right to rule ourselves. The voice of America—the Constitution—was born.

"I can" was the spirit of the people when our liberty was threatened in 1918, and again in 1941. We had to win to save an ideal. The voices of democracy spoke, and we did. The cost was great, but the willingness to pay was greater, for we knew the worth of the prize that was threatened.

The men of America who instituted our democratic principles, the great Emancipator who enforced them, the American people who have held them so securely—all have the spirit of the Constitution, and a wholesome pride in their superior government which gave them freedom. With this spirit democracy has triumphed many times in many things.

To share this great gift with the rest of the world is our goal. But first we must show the world the worth of democracy, and help others to see its advantages. Our spirit of brotherhood, tolerance, and respect for our fellow men—that is the essence of democracy. We must speak for democracy in a strong voice—telling the world of its greatness, and urging it to enjoy it with us.

I am an American citizen of 1947, in whose hands a portion of the peace of the world lies. I too remember the Constitution, its meaning, and its worth. I have a share in the voice of democracy, and I wish to speak in its behalf. I want the people of America to live democracy. I want to share the blessings of freedom with the world, for I know that to keep the world, I must help to keep the peace.

I have the spirit of "I can." I want to share that spirit, and with God's help, I will.

REMARKS OF TOM C. CLARK, ATTORNEY GENERAL OF THE UNITED STATES, IN AWARDING PRIZES TO FOUR WINNERS OF VOICE OF DEMOCRACY CONTEST FOR HIGH SCHOOL STUDENTS SPONSORED BY THE NATIONAL ASSOCIATION OF BROADCASTERS, THE RADIO MANUFACTURERS ASSOCIATION, AND THE UNITED STATES JUNIOR CHAMBER OF COMMERCE, SOUTH AMERICAN ROOM, STATLER HOTEL, WASHINGTON, D. C., WEDNESDAY, JANUARY 28, 1948

I am happy to join in honoring these four young ladies this afternoon.

Before turning to the very pleasant task allotted me of awarding the prizes, I should like to say a few words about Our American Way of Life.

This occasion is significant of what can happen in America. Four young ladies, in a national contest, have won the final awards. They competed with the Nation's best—both boys and girls. This could happen only in a land where equality of opportunity is a part of the national creed. I do hope it symbolizes an era in which women will take a more active interest in public life.

The greatness of America is grounded in enduring principles. Our American heritage is something more than a rich continent lying between two oceans.

It is a land where its citizens can get joy out of achievement and thrill out of creative effort.

In this land of freedom, each of us has undreamed-of opportunities.

You, young people, are living in the most challenging age of all times. You now have wonderful tools with which to explore and utilize the rich resources of the earth for the betterment of mankind. Mind you, I said, betterment of mankind.

Although many of the geographical frontiers are closed to exploration, there are still frontiers of science, of medicine, of law, and of thought—all frontiers of fuller living that challenge each of us to the highest endeavor.

As we meet this challenge, we are determined to make this America a better, a more Christian-like, a more beautiful place in which to live. Each of us is proud of our country; we must each so live that our country will be proud of us.

I SPEAK FOR DEMOCRACY

(By John W. Studebaker, U. S. Commissioner of Education)

(Introductory remarks on Station WOL and the Mutual Broadcasting System network in Washington, D. C., January 28, 1948, honoring the four national winners in the high school radio-speech contest under the title, "I Speak for Democracy")

Ladies and gentlemen, we are here today to honor the youth of our country. Twenty thousand young Americans, in 500 communities, did some real thinking about our way of life last November. They thought about their responsibilities, their opportunities, and the future of the United States. In a Nation-wide contest, they delivered brief speeches with the title "I Speak for Democracy."

These speeches about our representative form of government were made in response to an opportunity provided by the National Association of Broadcasters, the Radio Manufacturers Association, and the United States Junior Chamber of Commerce. This contest, in addition to developing a wholesome competitive spirit among these young people, has had the effect—we hope—of stimulating new interest, on the part of teachers, in the usefulness of radio as a teaching instrument. Those of us who share the responsibility of educating the young people of our Nation have long recognized the great value of radio as a learning tool.

The radio industry and the Junior Chamber of Commerce are to be commended for their role in this unique program.

Here is how the contest worked. First, a school, next the community, then the entire State, selected a winner. Finally, recordings made by the State winners were sent to the national judges. We are now about to make the national scholarship awards to the four co-equal national winners representing the four major divisions of the country.

One of the national judges is here for the climax of this contest, Attorney General Tom Clark. Admiral Nimitz, Gen. Omar Bradley, Senator Warren Magnuson, Jimmy Stewart, the motion picture star, Mrs. Oveta Culp Hobby, wartime director of the Women's Army Corps, and Father Flanagan, of Boys' Town; the other judges—unable to be here—are probably listening now.

In a moment you will be introduced to the four successful contest winners who today will receive their awards. You may have been surprised, as I was, to learn that they are all girls. Perhaps this result portends a large increase in the representation of the fair sex in places of leadership.

I have known these girls for about 24 hours. I have seen them conduct themselves with poise and dignity but with great natural spontaneity before the President of the United States, who received them yesterday at the White House. So long as our schools and our homes can produce such earnest and intelligent young people as these, we can be reassured about the future of our Nation.

It is my pleasure now to introduce the Attorney General of the United States, who will make the presentations to our guests, the Honorable Tom C. Clark.

REMARKS BY JOHN W. STUDEBAKER TO THE LUNCHEON GUESTS, FOLLOWING THE PRESENTATION OF AWARDS TO THE WINNERS BY THE HONORABLE TOM C. CLARK, ATTORNEY GENERAL OF THE UNITED STATES

Now that you have been introduced to the national winners in the I Speak for Democracy contest, I know you are all eager to hear their winning speeches. That opportunity will be afforded you in a few minutes. Before presenting excerpts from the speeches, may I say a further word about what I conceive to be the significance of this contest.

First, I think it is significant that the judges who heard many of the State finalist entries were impressed by the extent to which these high school students had a firm hold on the central concept of democracy, namely, the concept of the dignity and worth of the individual human person. It is from this concept that our democratic convictions about human freedom stem—convictions so superbly expressed in our Declaration of Independence and our Constitution but more especially in the Bill of Rights—convictions succinctly summarized in the freedom pledge, given currently in the schools in connection with the Freedom Train and its exhibits of the priceless documents of our American heritage:

"I am an American. A free American. Free to speak without fear. Free to worship God in my own way. Free to stand for what I think right. Free to oppose what I believe wrong. Free to choose those who govern my country. This heritage of freedom I pledge to uphold for myself and for all mankind."

Second, it is significant that this contest has been conducted at this particular time, when the democratic concept of freedom, exemplified in our American way of life, is under serious attack in many areas of the world, when doctrines of class hatred, proletarian dictatorship, a completely planned economy, and atheism, struggle for supremacy with democratic ideals of human liberty. The impact of this struggle is centered in Europe and Asia. But it is by no means limited to those continents.

Inasmuch as the conflict is ideological, it can best be resolved by educational means. Our schools and colleges, together with the radio, the press, the motion pictures, and other instrumentalities of free inquiry and free communication have a vital responsibility here—a responsibility to make clear to our own citizens, and indeed to all men wherever they can be reached, the crucial differences between democracy and its rivals. When those differences have been made entirely clear, and when the practices which flow from them are also made apparent, I have no doubt about the eventual choice mankind will make.

It is my conviction that our schools and colleges, as well as the press and the radio, must clearly recognize and aggressively accept the responsibility of propagating the democratic faith. Let me add that in so doing we shall need propagation through deeds as well as by words. The message of democracy, especially if it is to carry hope to the millions of discontented, groping, hungry people in other parts of the world, must be accompanied by deeds of understanding and helpfulness and reconstruction.

Third, I think it is significant that the radio industry in America, represented by the National Association of Broadcasters and the Radio Manufacturers Association, should have been active sponsors of this educational contest. The educational uses of radio have tremendous possibilites. These possibilities are as yet largely unexplored. I do not refer alone to the uses of radio by teachers in schools and colleges. I refer as well to the

educational uses of radio by broadcasters who reach the great rank and file of citizens of all ages, but especially the adult citizens, in a program of education for democracy. Such a program can be replete with drama and interest—a powerful force for the further development of social intelligence and concern for human welfare. I congratulate the industry and the broadcasters for their growing interest and effort in this field.

Finally, it seems to me significant that we in this audience should all of us by our presence here today be giving testimony to our interest in and concern about what the schools of this country are doing in the development of an understanding of and a zeal for American democracy. In just a moment now you will have evidence of the way in which the cream—I was about to say the peaches and cream—of our high school youth think and feel about democracy. It is heartening to know that these young ladies are representative of more than 20,000 contestants who submitted speeches, and of some 7,000,000 high school youth of this country who in their homes and schools and communities are learning to know and to live, as well as to speak for, democracy. The United States Office of Education is proud of these young ladies, representative of the high school youth of this Nation, proud also, with the support of Congress, to have a part in assisting the schools and colleges throughout the country to strengthen and improve at every possible point their programs of instruction designed to develop zeal for American democracy.

[From the Washington (D. C.) Post]

SPEAK FOR DEMOCRACY

The four high school girls to whom Attorney General Clark will today present awards as winners of the Voice of Democracy competition are honored visitors in the Capital. They topped some 20,000 contestants in all parts of the country, boys among them, although one would never suspect it from the outcome, to win trips to Washington and $500 scholarships in a contest sponsored by the National Association of Broadcasters, the Junior Chamber of Commerce and the Radio Manufacturers Association. The contest as a whole afforded reassurance as to the soundness of democracy in this country at the grass roots. Each contestant made a 5-minute speech, I Speak for Democracy. They spoke not alone with fervor but with a maturity of outlook and a sense of the significance of their subject that went entirely beyond the conventions of patriotism. We congratulate the winners, Laura Shatto, Janet Geister, Alice Wade Tyree, and Rose Ellen Mudd, on their triumph—and even more on their understanding of the richness of their heritage.

THE FUEL-OIL SHORTAGE

Mr. WHERRY. Mr. President, before the Senate proceeds to the consideration of executive business, I should like to make a brief comment in regard to the statement made by the distinguished Senator from Vermont that the New England States are short of fuel oil—which of course is the fact, and I do not want in any way to attempt to detract from the force of his argument that the St. Lawrence seaway should be developed in order to provide improved and increased transportation for fuel oil and other commodities. Nevertheless, I now call attention to the fact that the acute shortage of fuel oil which is being experienced in the United States is due to many factors. One of them, and a prime factor it is, is transportation. I call the attention of the Members of the Senate to the report which was filed approximately 60 days ago by the Committee on Small Business. In it the committee pointed out that this administration was selling to foreign governments 100 T–2 tankers, 51 of which were taken out of the active fleet, and 29 of which were taken out of the active service which has been bringing fuel oil from the Gulf States to the port of Baltimore and to other ports on the Atlantic coast as far north as Boston, Mass. A letter of protest was written to the President of the United States before those sales were confirmed, and in that letter attention was called to the acute situation in regard to transportation, and it was pointed out that such a shortage of fuel oil would develop unless the sales were made to citizen applicants, instead of to noncitizen applicants. That was pointed out clearly, and it cannot be disputed or denied.

So the acute fuel-oil shortage in which we now find ourselves is partly caused by the fact that we have transferred to foreign countries these 100 T–2 tankers, which cost $4,500,000 apiece, but were sold to foreigners for $1,500,000 apiece.

Mr. President, that is not all that report reveals. I say this not only as a United States Senator but as an American citizen and an American taxpayer: Twenty-seven percent of the steel which went into tubular steel has been exported from the United States during the past year. That is what has caused the shortage in pipe-line construction and also the loss in the bringing in of new wells in proven territories, and also wildcat wells. But primarily the loss thus caused is a loss of transportation, because increased pipe-line facilities would provide added transportation for fuel oil and natural gas. Three hundred and thirty thousand tons of pipe-line steel was provided for the Saudi Arabia oil fields, but now the portion of it which has been shipped cannot even be used, because of the troubles in Palestine. It is because of those shipments that pipeline construction in the United States has been blocked. That is extremely regrettable, because such construction in this country would afford the transportation facilities which are so badly needed in order to bring fuel oil and natural gas to the consumers in the United States.

So I desire to call attention to the fact that transportation is a vital factor in this situation. If the present trouble is to be cured for the balance of the present fuel-oil season, and also in the future, next summer, we must reconsider what has been done and we must see to it that a sufficient number of vessels are repaired or reconditioned so as to replace the vessels which have been taken from our active service, the loss of which is so largely responsible for the present acute situation in regard to supplies of fuel oil.

Mr. President, although there has been this shortage, as we all realize, yet it would not have been as acute as it is at this time but for the sale of those vessels. So if the present acute situation is to be alleviated, we shall have to obtain more vessels by way of having ships reconditioned, and thus put more vessels into the service of carrying fuel oil between the Gulf and the eastern seaports, so as to alleviate any further suffering this winter from cold.

THE ST. LAWRENCE SEAWAY

The Senate resumed the consideration of the resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof.

Mr. LODGE. Mr. President, I realize that under the rules of the Senate it is not possible to have cartoons reproduced in the RECORD. If that were possible, I should certainly ask unanimous consent to have reproduced a cartoon by C. K. Berryman which appeared in the Washington Evening Star of Wednesday, January 28. It shows a snow-covered scene, with John Q. Taxpayer standing in front of a bulletin board on which the following items appear:

LATEST BULLETIN

Prices continue to rise. Housing prospects dim. Oil shortages alarming. Peace prospects terrible. New fight against tax-reduction. White House balcony under way.

On the other side is shown a picture of the President saying to John Q. Taxpayer, "I tell you what—let's build the St. Lawrence Canal!"

Mr. WILEY. Mr. President, I ask unanimous consent that a telegram from the aluminum workers' union, one from Walter P. Reuther, international president of the UAW–CIO and a letter from Julius H. Barnes, president of the National St. Lawrence Association, be printed at this point in the RECORD.

There being no objection, the matters were ordered to be printed in the RECORD, as follows:

MASSENA, N. Y., *January 29, 1948.*

Hon. ALEXANDER WILEY,
United States Senate,
Washington, D. C.:

Employment is dropping steadily and metal orders are delayed in filling because of a power shortage in Massena, N. Y., today. Ninety-four men have been laid off at the Aluminum Co. of America plant this week. Power supply present operations at this aluminum plant is largely imported from Canada. One pot line that reduces alumina to aluminum by an electrolytic process was shut down Monday, January 26, for lack of power. The power that would be available by harnessing the St. Lawrence River for producing electric power is desperately needed in this entire area. The United States Senate must approve the St. Lawrence project in its entirety.

ALUMINUM WORKERS' UNION, No. 19256,
J. J. CALLAHAN, *Secretary.*

WASHINGTON OFFICE, UAW–CIO,
Washington, D. C., January 29, 1948.

Walter P. Reuther, international president of the UAW–CIO, today sent the following wire to Senator ARTHUR VANDENBERG, urging prompt passage of the pending St. Lawrence seaway resolution:

"On behalf of almost 1,000,000 UAW–CIO members in the United States and Canada, I urge prompt, favorable action on Senate Joint Resolution 111, approving the United States-Canadian agreement on the St. Lawrence seaway and power project. Production in the Northeast is already suffering from power shortages.

"The development of the St. Lawrence project will end the risk of similar power deficits in the future. It will create additional wealth for the whole Nation through

the expansion of transportation and power facilities and will contribute to the creation of a full production and full employment economy. In such an economy the Great Lakes region can have its rightful outlet to the sea without detriment to the ports and industries of the Atlantic seaboard.

"More than 12,000,000,000 kilowatt-hours of energy a year which the St. Lawrence project can add to the power output of the United States and Canada will be a tremendous boon to the peoples of both countries.

"WALTER P. REUTHER,
"International President, UAW-CIO."

NATIONAL ST. LAWRENCE ASSOCIATION,
Washington, D. C., January 22, 1948.

MY DEAR SENATOR: I am writing to you concerning a matter which I feel has overriding national importance. During many years of service as president and chairman of the board of the United States Chamber of Commerce, I came to appreciate the fair-minded and enlightened devotion to public interest which characterizes our public officials. It is in this spirit that I address you regarding the St. Lawrence seaway project.

In these momentous days we must ever keep before us the mainspring of the strength of American democracy—the free development of our natural and human resources and the great skill in technology and management which is the marvel of the world. The St. Lawrence project is one of those magnificent achievements within our grasp, and of immediate interest. Currently the project will come before you as Senate Joint Resolution 111, which authorizes its construction on a self-liquidating basis.

The St. Lawrence seaway, like the Panama Canal, will be a national investment, meeting all its expenses and interest on the investment. All of us can approve and support such a businesslike proposition, which puts it above criticism on the ground of Government economy and eliminates the danger of diversion of business from existing transportation systems through Government subsidy. The St. Lawrence seaway as now proposed is a self-supporting investment in national security and prosperity.

In the accompanying brief summary you will note the importance attached to this project by the Joint Chiefs of Staff, the United States Corps of Army Engineers, and the United States Maritime Commission for peacetime commerce and national security in periods of emergency.

Five former Presidents of the United States Chamber of Commerce are enrolled with us in support of this great undertaking: Eric Johnston, John H. Fahey, James Kemper, Henry I. Harriman, and the writer. In addition, such prominent business and civic leaders as Henry Ford II, John Cowles, Cyrus Eaton, Edward J. Noble, Owen D. Young, Marshall Field III, Laird Bell, Mrs. Franklin D. Roosevelt, William L. White, and a host of others are associated with us in our plea to you that you give sympathetic consideration to this measure.

Business opinion is in favor of the St. Lawrence project. A poll of business opinion conducted by Modern Industry magazine gave the following results: Should Modern Industry favor the St. Lawrence seaway project?

	Yes	No
	Percent	*Percent*
New England	54.0	46.0
Mid-Atlantic	55.1	44.9
North Central	75.1	24.9
South	55.5	44.5
Midwest	73.8	26.2
Mountain and Pacific	62.1	37.9

United States average, 63.7 percent, yes; 36.3 percent, no.

Other polls of public opinion show overwhelming approval by the general public. National leaders over the past 25 years have, without exception, recommended the construction of this project. Presidents Calvin Coolidge, Herbert Hoover, Franklin Roosevelt, Harry S. Truman; Secretaries of State Charles Evans Hughes, Henry L. Stimson, Cordell Hull, James F. Byrnes, Edward Stettinius, and George C. Marshall; Governors Alfred E. Smith, Herbert H. Lehman, Thomas E. Dewey, Charles Edison, Harold Stassen, and a host of others. These leaders have not been mistaken. Their support is based on the best engineering and business analysis and study of the project.

A project of such national importance needs your earnest consideration, untrammeled by temporary local considerations. In urging the approval of this, we are asking you to join with us in building up America for our children and grandchildren.

The Great Lakes-St. Lawrence Valley is the lifeline of the continent of North America. Our own industrial and agricultural civilization is based upon cheap transportation on this waterway. Canada is wholly dependent on it. The further development of this area will be a contribution to the wealth and progress of these two nations which stand today as the bulwark of democracy. The 12,000,000 people of Canada are the best customers of the United States, barring none. With the development of the St. Lawrence project it can be expected that Canada, as well as the United States, will grow in industry and population, thereby making a greater contribution to public well being in peacetime, and to defense of the continent in event of danger to our security.

The stakes are high; the decision is yours.

Very truly yours,

JULIUS H. BARNES,
President.

Mr. LODGE. Mr. President, I present a telegram from Mr. W. C. Hushing, chairman of the national legislative committee of the American Federation of Labor, in opposition to the St. Lawrence seaway, which I ask to have printed in the RECORD at this point.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

WASHINGTON, D. C., *January 28, 1948.*

Hon. HENRY CABOT LODGE, Jr.,
United States Senate,
Senate Office Building:

Under date of January 27, President Green advises me that the executive council of the American Federation of Labor now in session reaffirms the American Federation of Labor's position in opposition to the St. Lawrence waterway project. Our testimony as presented on March 1, 1946, by Legislative Representative Lewis Hines to Senate Committee on Foreign Relations, sets forth our views. I wish to advise you and the other Members of this fact because the project is now under debate in the Senate.

W. C. HUSHING,
Chairman, National Legislative Committee, American Federation of Labor.

Mr. WHERRY. Mr. President, the hour having arrived when the opponents of the measure have apparently concluded for the day, I should like to suggest, in fact, I should like to make a unanimous-consent request, that after the Senate reconvenes on Monday next at noon, and after the morning hour, the pending business, which is the St. Lawrence seaway bill, shall continue to be considered, and that the distinguished senior Senator from Wisconsin shall be recognized.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

EXTENSION OF PRESIDENTIAL AUTHORITY UNDER TITLE III OF SECOND WAR POWERS ACT, 1942

The ACTING PRESIDENT pro tempore laid before the Senate a message from the President of the United States, which was read and, with the accompanying papers, referred to the Committee on Banking and Currency.

(For President's message, see proceedings of the House of Representatives for Thursday, January 29, 1948, on p. 686.)

MASSMAN CONSTRUCTION CO.

The ACTING PRESIDENT pro tempore laid before the Senate a message from the House of Representatives announcing its disagreement to the amendment of the Senate to the bill (H. R. 2192) for the relief of the Massman Construction Co., and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. WILEY. I move that the Senate insist upon its amendment, agree to the request of the House for a conference, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the Acting President pro tempore appointed Mr. WILEY, Mr. DONNELL, and Mr. MCGRATH conferees on the part of the Senate.

EXPENDITURES, ETC., BY COMMITTEE ON EXPENDITURES IN THE EXECUTIVE DEPARTMENTS—MOTION TO RECONSIDER

Mr. LUCAS. Mr. President, I enter a motion to reconsider the vote on Wednesday, January 28, 1948, agreeing to Senate resolution 189, authorizing the Committee on Expenditures in the Executive Departments to make certain expenditures and to employ temporary assistants.

The ACTING PRESIDENT pro tempore. The motion will be entered.

EXECUTIVE MESSAGES REFERRED

The ACTING PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE SESSION

Mr. WHERRY. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

The ACTING PRESIDENT pro tempore. If there be no reports of committees, the clerk will state the nominations on the Executive Calendar.

POST OFFICE DEPARTMENT

The legislative clerk read the nomination of Vincent C. Burke, of Kentucky, to be First Assistant Postmaster General.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is confirmed.

Mr. WHERRY. I ask that the President be immediately notified of the confirmation of this nomination.

The ACTING PRESIDENT pro tempore. Without objection, the President will be notified forthwith.

Mr. O'MAHONEY subsequently said: Mr. President, the Senate has just confirmed the nomination of Mr. Vincent C. Burke to be First Assistant Postmaster General of the United States. I did not want the occasion to pass without taking a moment to express my very high opinion of the character and ability of Mr. Burke. It was my good fortune to be First Assistant Postmaster General in 1933. At that time Mr. Burke was selected as Deputy First Assistant Postmaster General, and I can say from personal experience that he has all the qualifications that go to make an excellent Postmaster General. With Mr. Donaldson as Postmaster General and Mr. Burke as First Assistant Postmaster General, the people of the United States may be certain that the Post Office Department is headed by two of the ablest career men in the service of the Government. I feel we are all fortunate today that the Senate, acting upon the recommendation of the Committee on Post Office and Civil Service, has confirmed the nomination of Mr. Burke. I thank the Senator.

DEPARTMENT OF COMMERCE

The legislative clerk read the nomination of John R. Alison, of Florida, to be Assistant Secretary of Commerce.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is confirmed.

Mr. WHERRY. I ask that the President be immediately notified of the confirmation of the nomination.

The ACTING PRESIDENT pro tempore. Without objection, the President will be notified forthwith.

INTERSTATE COMMERCE COMMISSION

The legislative clerk read the nomination of Walter M. W. Splawn, of Texas, to be an Interstate Commerce Commissioner.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is confirmed.

Mr. WHERRY. I ask that the President be immediately notified of the confirmation of the nomination.

The ACTING PRESIDENT pro tempore. Without objection, the President will be notified forthwith.

FEDERAL COMMUNICATIONS COMMISSION

The legislative clerk read the nomination of Wayne Coy, of Indiana, to be a member of the Federal Communications Commission.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is confirmed.

Mr. WHERRY. I ask that the President be immediately notified of the confirmation of the nomination.

The ACTING PRESIDENT pro tempore. Without objection, the President will be notified forthwith.

The legislative clerk read the nomination of George E. Sterling, of Maine, to be a member of the Federal Communications Commission.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is confirmed.

Mr. WHERRY. I ask that the President be immediately notified of the confirmation of the nomination.

The ACTING PRESIDENT pro tempore. Without objection, the President will be notified forthwith.

COAST AND GEODETIC SURVEY

The legislative clerk proceeded to read sundry nominations in the Coast and Geodetic Survey.

Mr. WHERRY. Mr. President, I ask sundry nominations in the Coast and Geodetic Survey be confirmed en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are confirmed en bloc. That completes the calendar.

Mr. WHERRY. I ask that the President be immediately notified of the confirmation of the nominations.

The ACTING PRESIDENT pro tempore. Without objection, the President will be notified forthwith.

COAST GUARD

Mr. WHERRY. Mr. President, from the Committee on Interstate and Foreign Commerce, and at the request of the Acting Chairman, the Senator from New Hampshire [Mr. TOBEY], I report favorably sundry nominations in the Coast Guard, and I ask unanimous consent for their immediate consideration. There are approximately 1,400 of the nominations, a complete list of which appears in the CONGRESSIONAL RECORD of January 16, at pages 283, 284, 285, and 286.

The ACTING PRESIDENT pro tempore. Is there objection?

The Chair hears none, and the clerk will state the nominations.

The legislative clerk proceeded to state the nominations.

Mr. WHERRY. I ask that the nominations in the Coast Guard be confirmed en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the nominations are confirmed en bloc.

Mr. WHERRY. I ask that the President be immediately notified of the confirmation of the nominations.

The ACTING PRESIDENT pro tempore. Without objection, the President will be notified forthwith.

LEGISLATIVE PROGRAM

Mr. WHERRY. Mr. President, so there may be no mistake about the procedure next week, I may suggest to Members of the Senate that the motion tonight will be a motion to adjourn, so that we shall proceed under the morning hour Monday, at which time there will be a call of the calendar, from the beginning, on bills to which there are no objections, after which the pending business, which is the St. Lawrence seaway bill, will be resumed. At that time, because of the unanimous-consent request just granted, the Senator from Wisconsin will be recognized.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. WHERRY. I am glad to yield to the Senator from Wisconsin.

Mr. WILEY. In order that those who read the RECORD may comprehend what is to take place on Monday, the Senator from Wisconsin does not expect to take the floor and speak at that time, but he does expect that the Senator from Michigan [Mr. FERGUSON], the Senator from Kentucky [Mr. BARKLEY], the Senator from Vermont [Mr. AIKEN], and possibly the Senator from Wisconsin [Mr. MCCARTHY] may, if we can apportion the time among ourselves. My understanding with the distinguished Senator from Massachusetts is that on Tuesday he will have the day, and then, after that, we shall try to work out an amicable allotment of time, in an effort to conclude debate, if possible, next week.

Mr. WHERRY. Mr. President, I again call to the attention of Members of the Senate the fact that it will be the intention, if the Senate approves, beginning Monday, to have daily sessions up to and including Thursday night, if the pending business is not then disposed of. On Thursday, we shall make an announcement relative to a session on next Friday, and the proposal for the following week. All of this, of course, is subject to the approval of the Members of the Senate.

Mr. LODGE. Mr. President, if the Senator will yield, I desire to inquire whether any unanimous-consent agreement has been entered into other than the agreement to recognize the Senator from Wisconsin on Monday.

Mr. WHERRY. That is all.

The ACTING PRESIDENT pro tempore. That is the only unanimous-consent agreement that has been entered into.

Mr. LODGE. The understanding is that on Tuesday the opponents of the pending measure will have a day in which to present their views on the subject, although there are a great many who want to speak in opposition, and I do not know whether they can complete their addresses on Tuesday or not.

Mr. WHERRY. Mr. President, I think there should be a clear understanding that the only unanimous-consent agreement that has been made is that when the Senate proceeds with the pending business, after the call of the calendar on Monday, the Senator from Wisconsin shall be recognized. Any further understanding or unanimous-consent agreement will have to be reached or made at that time.

The ACTING PRESIDENT pro tempore. That is the understanding of the Chair.

Mr. LUCAS. Mr. President, of course, I would move that that be done. Under the strict parliamentary rule, the Chair can at that time recognize anyone he wishes to recognize.

Mr. WHERRY. Certainly.

The ACTING PRESIDENT pro tempore. Aside from the Senator from Wisconsin, who will be recognized; but whoever the occupant of the Chair is at that time certainly from that point on will recognize, under the rules of the Senate, whatever Senators seek recognition on the floor.

Mr. LUCAS. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. LUCAS. Am I to understand that the Senate can at this time by unanimous consent enter into an agreement whereby the Chair is duty bound to rec-

ognize some one Senator on Monday next, when the session convenes?

The ACTING PRESIDENT pro tempore. The Chair will say that he has not been a Member of the Senate as long as the able and distinguished Senator from Illinois, but he has always been informed that the Senate could do anything by unanimous consent, and the effect of such an agreement is to suspend the rule up to that point.

Mr. LUCAS. Mr. President, will the Chair repeat that?

Mr. WHERRY. Has the Senator concluded?

Mr. LUCAS. No. I think this is very important, because I have always understood, since I have been a Member of the United States Senate, that a unanimous-consent agreement could not be made whereby a Senator would be recognized on the following day, and that it was definitely up to the Senator presiding at the time as to whom he would recognize. If there is a new ruling on that, I should like to know it, although I know such practice as we have been discussing has been followed consistently and continuously without any objection. I merely raised the point for the information of the Senate, in order to get a parliamentary ruling on it. I am sure, if the Chair makes that ruling, he is making a ruling which is diametrically opposed to many rulings that have been made in the past.

The ACTING PRESIDENT pro tempore. It is simply a unanimous-consent agreement which has been asked from the floor, and that was agreed to by the Senate of the United States, which acts as a temporary suspension of the rule up to that point. The Chair is informed by the Parliamentarian it is not an unprecedented action on the part of the Senate or of the Presiding Officer in a similar situation.

Mr. LUCAS. Mr. President, will the Senator yield further?

Mr. WHERRY. I yield.

Mr. LUCAS. I am very glad to know that, and I should like to take a look at the precedents, myself, on this point, between now and next Monday, because if I have been laboring under a delusion all the years that I have been in the Senate, upon this parliamentary question, I certainly should like to know about it. I still maintain that there is no unanimous-consent agreement that can bind the then Presiding Officer to recognize the Senator from Wisconsin on Monday next when we meet on a new legislative day.

The ACTING PRESIDENT pro tempore. The Chair will say to the able Senator from Illinois that the latest precedent that he would cite to the Senator from Illinois is the precedent whereby the senior Senator from Louisiana obtained the floor today.

Mr. LUCAS. I am not questioning that at all. I say to the Chair that it is done frequently. The only question I raise is this: Assuming that the President pro tempore, the Senator from Michigan, on Monday next recognizes the Senator from Illinois, what will the Senate do about that, under the unanimous-consent agreement?

The ACTING PRESIDENT pro tempore. The Chair would say that very likely the Presiding Officer on next Monday would have read the RECORD, and the matter may take care of itself.

Mr. LUCAS. That is not the question. Of course, it is a hypothetical question, and if the Chair does not care to answer, he does not have to do so, but I maintain I have a material point involved in this parliamentary situation. We have a great parliamentarian in Mr. Watkins. I am certain I have talked with him some time in the past about this very point. It may be I wholly misunderstood him.

The ACTING PRESIDENT pro tempore. The Chair is going to rule that the request of a Member of the Senate was for unanimous consent that this action be carried out, the consent was given by the Senate itself that the procedure be followed on Monday, and therefore it is in order.

Mr. LUCAS. If I may have one more word, I just want to add that I seriously submit that whoever occupies the chair on next Monday can recognize the Senator from Wyoming or the Senator from Illinois, if he rises, notwithstanding the terms of the unanimous-consent action taken today, and if such were done, no point of order would be in order upon such recognition.

THE DROPPING OF 66 KANSAS CITY VOTE INDICTMENTS

Mr. KEM. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a newspaper clipping entitled "Sixty-six Kansas City Vote Indictments Dropped."

Mr. President, I can well understand the reason for dismissing these indictments, because they were based upon stolen ballots and in the absence of the ballots fraud with respect to them is not susceptible to proof. I hope, however, that this action will not mislead anyone into thinking that the Kansas City, Mo., vote scandals are cleared up. That is by no means the case. The Attorney General has never satisfactorily explained his gross failure to act as the duties of his office require. The Kansas City, Mo., vote scandals still remain a blot on the elections in 1946.

There being no objection, the clipping was ordered to be printed in the RECORD, as follows:

[From the Washington Evening Star of January 29, 1948]

SIXTY-SIX KANSAS CITY VOTE INDICTMENTS DROPPED

KANSAS CITY, January 29.—Vote-fraud charges against 66 persons indicted by a State grand jury which investigated the 1946 Kansas City primary election were dismissed yesterday in circuit court.

The mass dismissals followed a ruling by Circuit Court Judge James W. Broaddus that testimony of former grand jurors as secondary evidence was not admissable under Missouri law.

Ballots and records which the grand jury used in its investigation were stolen, and Prosecutor James G. Kimbrell had proposed to use grand jurors as witnesses to offer testimony regarding the missing information.

Among the contests in the 1946 primary was the Fifth Missouri Congressional District race for the Democratic nomination. Enos Axtell, backed by President Truman, defeated Roger C. Slaughter, the incumbent. In the general election, however, Republican ALBERT L. REEVES defeated Mr. Axtell.

ADJOURNMENT TO MONDAY

Mr. WHERRY. Mr. President, I move that the Senate adjourn until Monday next at 12 o'clock noon.

The motion was agreed to; and (at 4 o'clock and 15 minutes p. m.) the Senate adjourned until Monday, February 2, 1948, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate January 30 (legislative day of January 26), 1948:

DEPARTMENT OF COMMERCE

Isaac N. P. Stokes, of the District of Columbia, to the position of Solicitor, Department of Commerce.

POSTMASTERS

The following-named persons to be postmasters:

ALABAMA

Joseph T. Evans, Elkmont, Ala., in place of R. B. Evans, retired.

Charles B. Brock, Steele, Ala., in place of J. T. Wheeler, resigned.

Larry Robinson, Tuskegee Institute, Ala., in place of J. A. Johnson, transferred.

ALASKA

Marietta M. Benson, Metlakatla, Alaska, in place of T. E. Benson, resigned.

ARIZONA

Edward S. Brewer, Cactus, Ariz., in place of F. V. Howey, resigned.

H. Fay Hall, Chloride, Ariz., in place of C. L. Kinsey, resigned.

Nellie C. Sawyer, Inspiration, Ariz., in place of L. L. Horan, resigned.

ARKANSAS

Woodrow M. Freeze, Jr., Cash, Ark., in place of Claude Gregory, retired.

Dallas Johnson, Pollard, Ark., in place of J. C. Latta, retired.

CALIFORNIA

Floyd M. Harvey, Adin, Calif., in place of F. M. Harvey, resigned.

Ernest W. Hutton, Agoura, Calif. Office became Presidential July 1, 1947.

Edna Stratton Hamilton, Bolinas, Calif., in place of H. I. Hoirup, deceased.

Anita V. Reid, Burrel, Calif. Office became Presidential July 1, 1947.

Florence E. Kahmar, Camino, Calif., in place of E. M. Carsten, deceased.

Charles W. Ray, Cedarpines Park, Calif. Office became Presidential July 1, 1947.

Keith L. Tobin, Cutler, Calif., in place of D. M. Tobin, resigned.

Viola S. Pambianco, French Camp, Calif., in place of V. F. Gorrell, retired.

Beatrice K. Geiger, Herlong, Calif., in place of G. E. McIntire, resigned.

Grace R. Aldridge, Joshua Tree, Calif. Office became Presidential October 1, 1946.

Fern C. Barber, Lemoncove, Calif., in place of F. J. Darby, resigned.

John L. McKindley, Lockeford, Calif., in place of J. A. Coil, deceased.

Joseph J. Joaquin, Madrone, Calif., in place of N. K. Kirby, retired.

John E. McSweeney, Mill Valley, Calif., in place of J. C. Strouss, deceased.

Louise H. Blanchard, Occidental, Calif. Office became Presidential July 1, 1947.

Mary E. Bailey, Piru, Calif., in place of F. E. Cornelius, retired.

Lillie E. Connor, Richvale, Calif., in place of LaVerne Friberg, resigned.

James W. Kern, Santa Susana, Calif., in place of L. R. Riave, retired.

Ernest D. Robinson, Willow Creek, Calif. Office became Presidential July 1, 1947.

COLORADO

Harold Iacovetto, Artesia, Colo. Office established March 25, 1946.

Richard Ernest Lemesany, Calhan, Colo., in place of C. N. Funk, resigned.

Elma N. Adams, Collbran, Colo., in place of Loudene Humeston, resigned.

Donald W. Kelly, Lafayette, Colo., in place of M. F. O'Day, retired.

Raymond H. Talbot, Pueblo, Colo., in place of C. F. Horn, deceased.

Netta M. Finch, Springfield, Colo., in place of V. L. Finch, deceased.

FLORIDA

Mary R. Buzbee, Gibsonton, Fla., in place of P. L. Buzbee, deceased.

IDAHO

Claude L. Overson, Firth, Idaho, in place of H. W. Winschell, resigned.

Mabel Logue, Stibnite, Idaho, in place of E. N. Martin, resigned.

ILLINOIS

Daniel J. Boyd, Blue Island, Ill., in place of A. J. Lagod, resigned.

William K. Armstrong, Chandlerville, Ill., in place of G. J. Armstrong, resigned.

Ray B. Brockhouse, Chapin, Ill., in place of W. R. Fisher, transferred.

Andrew J. Rogers, Jr., Cordova, Ill., in place of L. A. Cooper, transferred.

James O. Brown, Long Point, Ill., in place of G. F. Turner, retired.

John W. Bosaw, New Haven, Ill. Office became Presidential July 1, 1944.

Frank C. Spengler, Shannon, Ill., in place of A. J. Geiseman, transferred.

Besse M. Hewitt, Steward, Ill., in place of T. F. Kirby, deceased.

Beatrice E. Reck, Winslow, Ill., in place of H. M. Deam, resigned.

INDIANA

Bernice West, Castleton, Ind., in place of N. M. Sigman, resigned.

Dale M. Sands, Claypool, Ind., in place of Walter Bouse, transferred.

George W. Horan, Collegeville, Ind., in place of F. A. Hehn, resigned.

Everett J. Laun, Kingsford Heights, Ind., in place of W. J. Rash, resigned.

Robert D. Long, Millersburg, Ind., in place of W. D. Stoner, transferred.

Arnold B. Rhodes, Tippecanoe, Ind. Office became Presidential July 1, 1946.

IOWA

Robert B. Christopher, Huxley, Iowa, in place of Albert Johnson, retired.

KANSAS

Allen M. Hunter, Garden City, Kans., in place of L. N. Green, resigned.

KENTUCKY

James A. Hamblin, Buckhorn, Ky. Office became Presidential July 1, 1945.

Arthur Kelly Hearon, Clay, Ky., in place of P. L. McGraw, deceased.

Orland C. Seeley, Corbin, Ky., in place of N. M. Elliott, removed.

John M. Magee, Cynthiana, Ky., in place of S. F. Sprake, deceased.

Lillian Bodenheimer, Freeburn, Ky. Office became Presidential July 1, 1943.

Helen Jaeger, Independence, Ky., in place of A. B. Jaeger, deceased.

Roy P. Peters, Lily, Ky. Office became Presidential July 1, 1945.

John C. Ryan, Pine Knot, Ky. Office became Presidential July 1, 1944.

Robert F. Gillespie, Sadieville, Ky., in place of W. A. Marshall, transfererd.

Hodge J. Slayden, Salem, Ky., in place of Jessie Mitchell, resigned.

Mary M. Deaton, Toner, Ky. Office became Presidential April 1, 1947.

Rachel A. Galvin, Waverly Hills, Ky., in place of M. F. Beck, transferred.

George G. Wilson, Whitley City, Ky., in place of B. K. Morris, removed.

LOUISIANA

Allen J. Lorio, Hahnville, La., in place of P. D. Lorio, Jr., resigned.

Erna P. Watts, Walker, La., in place of W. A. Rheams, resigned.

MAINE

Donald F. Lord, Belgrade Lakes, Maine, in place of N. A. Harnden, transferred.

MASSACHUSETTS

William P. Stone, Jr., Monson, Mass., in place of J. R. Crowley, resigned.

MICHIGAN

Alexander S. Lynch, Carney, Mich., in place of V. R. Moran, transferred.

Ernest A. Sackerman, Grand Rapids, Mich., in place of F. C. Jarvis, retired.

Clarence F. Goerner, Howard City, Mich., in place of Sidney Reynolds, resigned.

Edward J. Murphy, Kawkawlin, Mich., in place of H. J. Staudacher, retired.

MINNESOTA

Olice S. Erickson, Willmar, Minn., in place of A. G. Erickson, retired.

MONTANA

Donald R. Lamoreux, Corvallis, Mont., in place of S. E. Dickson, resigned.

NEW HAMPSHIRE

Joseph E. Hurley, Wilton, N. H., in place of J. R. K. Kelley, retired.

NEW JERSEY

Charles M. Kammerer, Carlton Hill, N. J., in place of F. J. Baker, resigned.

Walter C. Farley, Oldwick, N. J., in place of M. D. Farley, deceased.

NEW MEXICO

Antonio J. Trujillo, Questa, N. Mex. Office became Presidential July 1, 1944.

Paul Madrid, Vaughn, N. Mex., in place of Leon Panebouef, resigned.

NEW YORK

Manuel Fisher, Harris, N. Y., in place of H. A. Monroe, resigned.

Alvah P. Saulpaugh, Red Hook, N. Y., in place of A. P. Saulpaugh, transferred.

Winston R. Reel, Schuylerville, N. Y., in place of D. J. Falvey, deceased.

Arthur J. Kane, Waverly, N. Y., in place of M. G. Baldwin, resigned.

NORTH CAROLINA

Thomas E. Bivins, Hillsboro, N. C., in place of Shepperd Strudwick, retired.

Robert H. Ballew, Nebo, N. C., in place of J. C. Parks, transferred.

William Lester Farrell, Pittsboro, N. C., in place of F. C. Mann, deceased.

NORTH DAKOTA

Richard S. Rhoades, Killdeer, N. Dak., in place of Fred Hollingsworth, resigned.

OREGON

Agnes M. Hashberger, Coldton, Oreg., in place of C. P. Hunter, retired.

Kenneth P. McCollum, Elkton, Oreg., in place of G. K. McKinney, resigned.

Myra M. Brinker, Freewater, Oreg, in place of R. O. Brinker, resigned.

Merle R. Brown, Philomath, Oreg., in place of M. M. Cummings, resigned.

Celia W. Smith, Wauna, Oreg., in place of G. E. Wright, resigned.

PENNSYLVANIA

Chester J. Kukleski, Braddock, Pa., in place of Jennie Moran, retired.

Frank W. Coughanour, Jr., Hopwood, Pa., in place of A. L. P. Lieb, resigned.

Wiley C. Hamby, Salona, Pa., in place of C. B. Herr, retired.

George L. Strausbaugh, Seven Valleys, Pa., in place of S. E. Henry, resigned.

Willis C. Latshaw, Spring City, Pa., in place of R. E. Walley, resigned.

Ida M. Christie, Starford, Pa. Office became Presidential July 1, 1945.

Charles A. Brader, Tannersville, Pa., in place of W. E. Kresge, retired.

Robert A. Lanzendorfer, Twin Rocks, Pa., in place of M. E. Ford, resigned.

Joseph Walter Petrovich, Wilburton, Pa., in place of Wilbert Larzelere, retired.

Eaton A. Hartman, Windsor, Pa., in place of E. C. Smith, deceased.

PUERTO RICO

Domingo Lopez, Maricao, P. R., in place of L. B. Lopez, retired.

Josefa G. Lorenzi, Yauco, P. R., in place of L. M. Diaz, transferred.

SOUTH CAROLINA

Jesse W. Parris, Clifton, S. C., in place of B. F. Cannon, retired.

Helen A. Geraty, Yonges Island, S. C., in place of J. W. Geraty, retired.

SOUTH DAKOTA

Leo V. Marek, Avon, S. Dak., in place of M. A. Hornstra, deceased.

Nettie A. Boatman, Columbia, S. Dak. Office became Presidential July 1, 1943.

Franklin deHaai, Corsica, S. Dak., in place of C. J. Ver Steeg, transferred.

Vernon Morgan, Pine Ridge, S. Dak., in place of Orval Ogle, resigned.

Milton B. Tracy, Pollock, S. Dak., in place of H. M. Boschker, resigned.

TENNESSEE

Lee T. McDaniel, Pittsburgh Landing, Tenn. Office became Presidential July 1, 1945.

Ross Bass, Pulaski, Tenn., in place of W. F. English, deceased.

Earnest T. Browder, Sweetwater, Tenn., in place of J. N. McGuire, resigned.

TEXAS

Glenn H. Henderson, Bryson, Tex., in place of S. C. Milburn, retired.

Walter G. Marek, Burlington, Tex., in place of F. A. Krause, transferred.

James R. Brown, Denison, Tex., in place of J. H. Parrish, retired.

Charles H. Yowell, Dodd City, Tex., in place of R. H. Mills, deceased.

Frederic E. Edgar, High Island, Tex., in place of J. H. Bugg, resigned.

Granville W. Elder, Houston, Tex., in place of John Dunlop, retired.

Harold Sparks, La Villa, Tex., in place of W. E. Cooper, resigned.

John C. Groce, League City, Tex., in place of V. L. Platzer, resigned.

Charley J. Nichols, Mansfield, Tex., in place of E. O. Driskell, retired.

Isaac E. White, Markham, Tex., in place of C. B. Fisher, resigned.

Otis Avary, Seymour, Tex., in place of J. E. McDuffey, resigned.

Joe R. Christian, Tenaha, Tex., in place of I. B. Davidson, resigned.

Wallace Fred Cannon, Thornton, Tex., in place of M. E. Cannon, transferred.

Ralph W. Palmer, Tornillo, Tex., in place of O. H. Palmer, retired.

UTAH

C. Henry Nielsen, Brigham, Utah, in place of Nello Christoffersen, resigned.

Donald L. Vance, Fairview, Utah, in place of N. S. Brady, Transferred.

Claud M. Glazier, Kanab, Utah, in place of A. C. Ford, resigned.

Andrew W. Swanson, Kanosh, Utah, in place of C. C. Cutler, resigned.

VERMONT

Kathleen H. Shove, South Woodstock, Vt., in place of Louis Bartel, retired.

VIRGINIA

Pauline B. Hatfield, Hurley, Va., in place of N. J. Carroll, removed.

Minna D. Deane, Nottoway, Va., in place of E. L. Deane, deceased.

Delia M. Lawson, White Stone, Va., in place of B. N. Hubbard, resigned.

WASHINGTON

Edward W. Schoenholz, Alderwood Manor, Wash., in place of H. L. Parker, resigned.

Daniel B. Killion, Bryn Mawr, Wash., in place of W. L. Killion, retired.

Walter A. Oliver, Hoodsport, Wash., in place of W. H. Lunt, resigned.

William Lorin McClure, Oakesdale, Wash., in place of R. V. Browder, removed.

Sherman T. Combs, Packwood, Wash. Office became Presidential July 1, 1947.

Harley E. Chapman, Prosser, Wash., in place of Paul Hamilton, resigned.

Lonnie D. Leeper, Pasco, Wash., in place of A. A. Barnes, retired.

WEST VIRGINIA

William G. Meredith, Dailey, W. Va. Office became Presidential July 1, 1945.

William W. Hammond, Kearneysville, W. Va., in place of F. O. Trump, retired.

Eulan N. Lester, Panther, W. Va., in place of Ethel Cline, resigned.

Marietta Walker, Peach Creek, W. Va., in place of A. O. Shelton, resigned.

Troy R. Swecker, Valley Head, W. Va., in place of N. S. Wood, resigned.

Walter S. Bambrick, Weirton, W. Va., in place of S. P. Shlanta, removed.

WISCONSIN

Claude A. Thomas, Forest Junction, Wis. Office became Presidential July 1, 1945.

Norbert I. Lehmann, Hustisford, Wis., in place of P. A. Panetti, resigned.

Donald L. Schulz, Irma, Wis., in place of Henry Magnuson, resigned.

WYOMING

Kenneth L. Wingo, Encampment, Wyo., in place of M. C. Corum, retired.

Roxanna M. Smith, Lingle, Wyo., in place of M. N. Hanna, transferred.

George L. Gibson, Powell, Wyo., in place of L. O. Stephens, resigned.

Silvio J. Pedri, Reliance, Wyo., in place of Naomi Grove, resigned.

CONFIRMATIONS

Executive nominations confirmed by the Senate January 30 (legislative day, January 26), 1948:

POST OFFICE DEPARTMENT

Vincent C. Burke to be First Assistant Postmaster General.

DEPARTMENT OF COMMERCE

John R. Alison to be Assistant Secretary of Commerce.

INTERSTATE COMMERCE COMMISSION

Walter M. W Splawn to be an Interstate Commerce Commissioner for a term expiring December 31, 1954.

FEDERAL COMMUNICATIONS COMMISSION

Wayne Coy to be a member for the unexpired term of 7 years from July 1, 1944.

George E. Sterling to be a member for the unexpired term of 7 years from July 1, 1943.

COAST AND GEODETIC SURVEY

TO BE CAPTAINS FROM THE DATE INDICATED AFTER THEIR NAMES

Jack Senior, January 1, 1948.
Ronald D. Horne, March 1, 1948.
Charles K. Green, March 1, 1948.

TO BE COMMANDERS, FROM THE DATE INDICATED AFTER THEIR NAMES

Henry C. Warwick, January 1, 1948.
Benjamin H. Rigg, March 1, 1948.
Albert J. Hoskinson, March 1, 1948.

TO BE LIEUTENANT COMMANDERS, FROM THE DATE INDICATED AFTER THEIR NAMES

Ernest B. Lewey, January 1, 1948.
John C. Mathisson, March 1, 1948.
George E. Morris, March 1, 1948.

TO BE ENSIGNS FROM THE DATE INDICATED AFTER THEIR NAMES

Eugene W. Richards, December 20, 1947.
Samuel D. Parkinson, December 30, 1947.
Harrison F. Dunbrook, January 7, 1948.
Ward A. Kemp, October 10, 1947.

UNITED STATES COAST GUARD

The following nominations for permanent commissions in the United States Coast Guard, which were confirmed today, were received by the Senate on January 16, 1948, and are shown in full in the Senate proceedings of the CONGRESSIONAL RECORD for that day under the caption "Nominations," beginning with the name of Gordon T. Finlay appearing on page 283 and ending with the name of Robert G. Frye appearing on page 286:

Gordon T. Finlay et al.,
Claude H. Broach et al.,
Robert E. Combs et al., and
Willard L. Jones et al.

HOUSE OF REPRESENTATIVES

FRIDAY, JANUARY 30, 1948

The House met at 12 o'clock noon.

Dr. Earl F. Nauss, Congregational minister from Rindge, N. H., Navy chaplain, retired, offered the following prayer:

Almighty God, before whom the generations of men do rise and achieve and pass away, age after age the living seek Thee and find that of Thy goodness there is no end. Grant that, as our fathers trusted in Thee and found the fulfillment of their lives and their highest dreams, we, too, in this fateful hour of the world's life may be true to our finest and noblest moral obligations, so that we can assume our rightful place of leadership in the life of our country and in the life of the world, so the truth may prevail and prejudice be set aside, and the ways of freedom and of peace and of happiness be fully known.

Almighty God, who hast given us this good land for our heritage, we humbly beseech Thee that we may always prove ourselves a people mindful of Thy favor and glad to do Thy will. Bless our land with honorable industry, sound learning, and pure minds. Save us from violence, discord, and confusion, from pride and arrogancy, and from every evil way. Defend our liberties, and fashion into one united people the multitudes brought hither out of many kindreds and tongues. Endue with the spirit of wisdom those to whom in Thy name we entrust the authority of government, that there may be justice and peace at home, and that through obedience to Thy law we may show forth Thy praise among the nations of the earth. In the time of prosperity fill our hearts with thankfulness, and in the day of trouble suffer not our trust in Thee to fail.

Now may the blessing of Almighty God be upon you, leading your minds and hearts into the way of peace, your hands that they be generous, your thoughts that they be true. Amen.

The Journal of the proceedings of yesterday was read and approved.

BOARD OF VISITORS—UNITED STATES NAVAL ACADEMY

The SPEAKER. Pursuant to the provisions of title 34, section 1081, United States Code, the Chair appoints as members of the Board of Visitors to the United States Naval Academy the following Members on the part of the House: Mr. HUGH D. SCOTT, JR., Pennsylvania; Mr. BRADLEY, California; Mrs. ST. GEORGE, New York; Mr. JOHNSON, Texas; Mr. SASSCER, Maryland.

BOARD OF VISITORS—UNITED STATES MERCHANT MARINE ACADEMY

The SPEAKER. Pursuant to the provisions of Public Law 301, Seventy-eighth Congress, the Chair appoints as members of the Board of Visitors to the United States Merchant Marine Academy the following Members on the part of the House: Mr. MCMAHON, New York; and Mr. KEOGH, New York.

The Chair lays before the House the following communication:

JANUARY 28, 1948.

The SPEAKER,
House of Representatives,
Washington, D. C.

DEAR MR. SPEAKER: Pursuant to Public Law 301 of the Seventy-eighth Congress, I am hereby appointing the following members of the Merchant Marine and Fisheries Committee to serve on the Board of Visitors to the United States Merchant Marine Academy: Hon. T. MILLET HAND, Hon. JOHN C. BROPHY, Hon. EDWARD J. HART.

As chairman of the Committee on Merchant Marine and Fisheries, I am authorized to serve as an ex officio member of the Board.

Respectfully,
ALVIN F. WEICHEL,
Chairman, Merchant Marine and Fisheries.

BOARD OF VISITORS—UNITED STATES COAST GUARD ACADEMY

The SPEAKER. Pursuant to the provisions of Public Law 183, Seventy-sixth Congress, the Chair appoints as members of the Board of Visitors to the United States Coast Guard Academy the following Members on the part of the House: Mr. SADLAK, Connecticut; Mr. FORAND, Rhode Island.

The Chair lays before the House the following communication:

JANUARY 28, 1948.

The SPEAKER,
House of Representatives,
Washington, D. C.

DEAR MR. SPEAKER: Pursuant to the act of April 16, 1937, as amended (Public No. 38, 75th Cong., 1st sess.), I have appointed the following members of the Committee on Merchant Marine and Fisheries to serve as members of the Board of Visitors to the United States Coast Guard Academy for the year 1948: Hon. EDWARD T. MILLER, Hon. MITCHELL JENKINS, Hon. EMORY H. PRICE.

As chairman of the Committee on Merchant Marine and Fisheries, I am authorized to serve as an ex officio member of the Board.

Respectfully,
ALVIN F. WEICHEL,
Chairman, Merchant Marine and Fisheries.

OLIVER WENDELL HOLMES DEVISE

The SPEAKER. Pursuant to the provisions of Public Resolution 124, Seventy-fifth Congress, the Chair appoints as a

member of the Committee of the Oliver Wendell Holmes Devise the gentleman from Pennsylvania [Mr. SARBACHER] to fill the existing vacancy thereon.

EXTENSION OF REMARKS

Mr. REED of New York asked and was given permission to extend his remarks in two instances in the RECORD and to include extraneous matter.

INDEPENDENT OFFICES APPROPRIATION BILL, 1949

Mr. WIGGLESWORTH, from the Committee on Appropriations, reported the bill (H. R. 5214) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1949, and for other purposes, which was read a first and second time, and, with the accompanying papers, referred to the Committee of the Whole House on the State of the Union and ordered to be printed.

Mr. THOMAS of Texas reserved all points of order on the bill.

EXTENSION OF REMARKS

Mr. SMITH of Wisconsin asked and was given permission to extend his remarks in the RECORD and include an article.

Mr. ROSS asked and was given permission to extend his remarks in the RECORD and include a letter.

Mr. BUTLER asked and was given permission to extend his remarks in the RECORD with reference to the St. Lawrence waterway and include therein an editorial from a New York paper and in another instance to include a statement by the Board of Supervisors of Erie County.

SPECIAL ORDER GRANTED

Mr. HESELTON. Mr. Speaker, I ask unanimous consent that, after the disposition of business on the Speaker's desk and the conclusion of special orders heretofore granted, I may address the House for 15 minutes today.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

THE OIL SITUATION—HOUSE JOINT RESOLUTIONS 311 AND 312

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Speaker, yesterday afternoon I discussed two resolutions which I introduced providing for temporary restrictions on the exportation of certain petroleum products. The text of the resolutions can be found in my remarks on page 713 of the RECORD, have been numbered House Joint Resolutions 311 and 312, and have been referred to the House Committee on Interstate and Foreign Commerce.

Yesterday I said it was my intention to prepare further references to certain material which I felt would be of interest to my colleagues. Unfortunately, I have not been able to complete that work, but I shall insert the material as soon as possible.

In the meantime, may I again call your attention to the committee's recent report which is now printed and is numbered 1270 of this session of the Eightieth Congress.

Also, yesterday I read an editorial from the Boston Post, commenting on the committee's recommendation with reference to these exports. Today I want to insert in my revision of these remarks certain other editorials commenting on the committee's recommendation.

I call your particular attention to the fact that these are expressions of opinion by people who have lived in this area of shortage and cold during the last month and who face an even worse period of discomfort and difficulty these next 2 months unless we here join in providing the only immediate source of assistance available to them.

One sentence in the editorial of the Post is significant:

> Consumers, therefore, may well ask why action was not taken when the indicated shortage first became known.

In the editorial from the Athol (Mass.) Daily News, there are these three sentences:

> As the days lengthen, and the weather gets snowier and snowier, and colder and colder, the great petroleum mystery becomes more and more mysterious. * * * To date, we know of only one really constructive recommendation that has been made by an official group. The House Interstate Commerce Committee has called for at least a temporary halt in exports of American oil.

The full editorial is as follows:

THE PETROLEUM PUZZLE

As the days lengthen, and the weather gets snowier and snowier, and colder and colder, the great petroleum mystery becomes more and more mysterious. And nearly everybody who says anything about it becomes more and more confusing. We confessed our own confusion a long time ago, and wish to report that our state of mind has not improved. Nevertheless, we feel it is our turn to say something on the subject.

The thing that troubles us the most is that persons in high official positions have not been telling the truth all through the discussion. Perhaps they told a little truth occasionally, but not all the time. For instance, they gave us a merry song and dance about the reason for the New England shortage. At first it was a lack of tankers. This reason disappeared when it became known that tankers were lying idle, and others had been turned over to foreign nations. So the practiced prevaricators in Washington dug up another one. This time it was a lack of refining facilities and a lack of materials for drilling new wells. Now they have fallen back on an explanation that has been argued for 30 years or more; that there is a basic shortage of petroleum in the ground under the United States. So Secretary of the Interior Krug wants a few billions to develop production of synthetic oil and gasoline.

No doubt it would be a good idea for Americans to get started in the production of petroleum from sources other than wells. The materials are available, but have been considered in the light of a long-range reserve. But we would like to know a whole lot more about the entire oil situation before getting into a $9,000,000,000 proposition. This time, incidentally, we would like to hear nothing but the truth, and we would like to hear most of it from persons who know their stuff and who do not hold political office.

There are some pretty able men outside that charmed circle who have been maintaining that there is no immediate shortage of oil in the ground. And there are others who have been pointing to American exports of oil and asking why they have been permitted. Japan received much oil from us before Pearl Harbor. Russia continued to receive American oil long after the shooting stopped in Europe. During the war, there were various weak explanations of why supplies in other parts of the world were not tapped to a greater extent. Among others, a question we would ask is: Where is all the oil produced outside the United States going at the present time, and is the United States getting its fair share of it?

To date, we know of only one really constructive recommendation that has been made by an official group. The House Interstate Commerce Committee has called for at least a temporary halt in exports of American oil. Representative JOHN W. HESELTON of the congressional district which includes Athol and Orange, says this recommendation is of the utmost importance. We agree with him, and hope somebody will make a few more that are as fundamentally sound.

Mr. Speaker, the news dispatches continue to bring very dismal reports as to the situation, not only in New England, but practically all over this country, including even Tennessee and Texas.

I understand that 20,000 people idle yesterday in the Detroit area will be out of work for at least a week.

It is reported that approximately 15,000 steel workers are out of work in the Pittsburgh area. In Ohio, 10,000 are out of work in Cincinnati, 3,500 in Dayton, 1,100 in Toledo, 200 in Youngstown, 1,000 in Steubenville, 2,300 in Warren, 2,000 in Massillon, 1,200 in East Liverpool, and 500 in Cleveland.

It is reported that all industrial users, schools, and most commercial establishments in 333 Texas and Oklahoma towns were cut off from their service of gas and gas supplies due to the tremendous demands arising from the fuel-oil shortages in their areas. Gas was also cut off from 900 industrial users in the Kansas City area of Missouri, apparently for the same reason.

An editorial from the Worcester (Mass.) Telegram makes very interesting reading. You will note the reference to the statement by the Assistant Area Fuel Oil Coordinator, "It is a real shortage; no one is fooling anybody."

While the editorial is entirely correct that "Embargoes, fuel policies, automobile slow-downs, and synthetic oil plants just will not bring oil to New England today," I believe sincerely that we should not relax our efforts on any score. We should continue to press the Government to conserve every drop of oil possible. We should demand that unrelenting efforts should be made to put additional tanker service into the east coast. We should act promptly in trying to conserve whatever oil is possible from our export program and turn it to the shortage areas.

The editorial follows:

OIL CRISIS DEEPENS

Probably because the administration has, in the past, cried "Wolf" too often, an unfortunate skepticism seems to exist among

some persons that the oil shortage isn't too bad.

Roscoe H. Goddard, assistant area fuel oil coordinator, has issued a statement to straighten these people out. The time has come, he said, when consumers must wake up to the fact that the oil crisis is even worse than had been predicted. "It is a real shortage; no one is fooling anybody," he said.

A succession of quick developments in Washington served to underscore Mr. Goddard's local warning. Senator BRIDGES, New Hampshire Republican, demanded an embargo on all oil exports. The House Interstate and Foreign Commerce Committee asked that a national fuel policy be established. There were suggestions made that wartime speed controls be reimposed on automobile drivers in order to save gasoline. Secretary of the Interior Krug asked the expenditure of some $9,000,000,000 over a 5- to 10-year period to build synthetic oil plants.

Whether these ideas are sound or unsound must be beside the point at the present time. Embargoes, fuel policies, automobile slowdowns, and synthetic oil plants just won't bring oil to New England today. The consumer still has the responsibility of cutting down on his own fuel consumption, while hoping that measures will be taken to relieve the situation quickly—and to make sure it won't happen again next year.

While he's shivering in his poorly heated home, he can't be blamed for thinking, however, that a little planning by the administration last summer would have saved much of his present discomfort. A few tankers allocated to this region would have helped a great deal. The cold New England resident has, indeed, had enough, and he's likely to remember this winter's oil shortage when the chilly days of next November roll around.

I have been reliably informed today that under the immediate jurisdiction of the Federal Works Agency there are 18 buildings heated by oil with a fuel oil consumption daily of 3,200 gallons. I am advised that within the District 4 buildings have been converted to fuel oil, but as yet I do not have the exact date. I cannot reconcile this with the report made by General Fleming to Mr. Steelman, but I shall try to do so over the week end.

Finally, Mr. James Terry Duce, vice president of the Arabian Oil Company, gave some extremely important testimony before the House Committee on Interstate and Foreign Commerce this morning. It is my understanding that the chairman, the gentleman from New Jersey [Mr. WOLVERTON] expects to insert the full statement in the Appendix of the RECORD so all Members may have this information immediately. In the meantime, I wish to quote a few sentences.

Mr. Duce said:

It is the impact of the scarcity of materials which results in such shortages, as we are now facing in the United States. I am inclined to believe that even this shortage would have been averted if the Maritime Commission had put in operation early this year the tankers which they had moored in their various yards. There is an abundance of oil in the world. We have immense reserves in the Middle East. If all the world produced from its reserves at the same rate as the United States is producing from its reserves, there would be a surplus instead of a shortage in oil at the present time. We have pushed our production in Arabia up from 200,000 barrels per day last year to over 300,000 barrels per day at the close of 1947.

I recognize, as all of you do, that this is not just a problem of locating fuel oil, but one of transporting it. During the December hearings, I devoted a good deal of attention to the Maritime Commission's decision to sell the remaining T–2 tankers to foreign purchasers. I remained completely unsatisfied with the explanations given in terms of the then-known increasing difficulties in this country. It has recently developed that some 11 of these tankers are on our coasts and apparently the Maritime Commission did in January make a commendable, although belated, effort to secure assurances from a number of purchasers that the tankers would be used on the east coast run north of Norfolk until spring.

EXTENSION OF REMARKS

Mr. ELSAESSER asked and was granted permission to extend his remarks in the RECORD.

Mr. HILL asked and was granted permission to extend his remarks in the RECORD and include the recommendation of the American National Livestock Association.

Mr. GILLIE asked and was granted permission to extend his remarks in the RECORD and include a resolution from the Northside High School at Fort Wayne, Ind.

Mr. TWYMAN asked and was granted permission to extend his remarks in the RECORD and include a speech by Gov. Dwight H. Green of the State of Illinois.

Mr. ANGELL asked and was granted permission to extend his remarks in the RECORD and include an article on hydroelectric power by Ivan Bloch.

Mr. PASSMAN asked and was granted permission to extend his remarks in the RECORD.

Mr. KEFAUVER (at the request of Mr. PRIEST) was granted permission to extend his remarks in the RECORD in two instances; in one to include an editorial from the Buffalo Evening News, and in the other instance to include an address on juvenile delinquency by Mr. J. Pope Dyer.

Mr. BLAND asked and was granted permission to extend his remarks in the RECORD on the Merchant Marine and to include an article from News Week.

Mr. ANDERSON of California asked and was granted permission to extend his remarks in the RECORD and include a letter.

GENERAL DEBATE ON THE TAX BILL

Mr. KNUTSON. Mr. Speaker, I ask unanimous consent that the time for general debate on the bill H. R. 4790 be extended 2 hours on Monday, the time to be equally divided between the gentleman from North Carolina and myself.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota [Mr. KNUTSON]?

There was no objection.

THE MEAT SITUATION

Mr. HILL. Mr. Speaker, I ask unanimous consent to proceed for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. HILL. Mr. Speaker, in view of the fact that so much pressure seems to be going on in the United States today concerning the return of rationing of meat, I wanted to present to the House this morning the recommendation of the American National Livestock Association at its fifty-first annual convention in Boise, Idaho, on January 14. I want to read one short portion of their recommendation:

Maximum production coupled with a sound fiscal and monetary policy on the part of the Government will provide the most effective remedy for inflation. This would insure the consumer a maximum supply of meat at equitable prices. It can be accomplished only under an economy free from rationing, price controls, or other arbitrary restrictions.

The SPEAKER. The time of the gentleman from Colorado has expired.

THE LATE FRANKLIN DELANO ROOSEVELT

Mr. JOHNSON of Texas. Mr. Speaker, I ask unanimous consent to proceed for 1 minute, to revise and extend my remarks, and to insert a brief letter.

The SPEAKER. Is there objection to the request of the gentleman from Texas [Mr. JOHNSON]?

There was no objection.

Mr. JOHNSON of Texas. Mr. Speaker, on this day, in 1882, was born a man destined to guide his country through its greatest perils. As Franklin Delano Roosevelt loved his countrymen, so they loved him. That affection of one man for the many—and of the many for one man—bound our Nation together in a unity we have missed since he left us.

The altogether personal affection so many millions of us felt for Mr. Roosevelt was brought into poignant focus when he died. In our teeming cities, in small towns, at crossroad stores, and along lonely country trails, almost unbearable grief came to the people of America.

To those shocking words, "Roosevelt is dead," men, women, and children reacted as though the news concerned one near and dear to them. Some wept. Some were swept by black despair. Some were appalled at the unfillable gap left in the world's leadership.

In the small town of Lockhart, Tex., in my congressional district, one who loved Roosevelt found some comfort in the way so many of us find it: He told his wife what was in his heart. She was away from home, and he wrote her. I lately obtained a copy of that letter, written by Fleetwood Richards, of Lockhart.

Mr. Richards has a distinguished record of public service in our Texas Legislature. Because his letter so beautifully expressed the sorrow so many of us felt on that fateful day in 1945, and expressed it in language beyond our capacity, I have presumed upon my friendship with Mr. Richards to offer the letter today as a memorial to Franklin Delano Roosevelt:

LOCKHART, TEX., *Friday, April 13, 1945.*

MY DEAREST GUSSIE: Roosevelt is dead. Sorrow and gloom shrouds the town of Lockhart, and its people. Business and people are

almost at a standstill. Golf has not been mentioned in almost a full day. The report of his death reached me in the Domino Hall. That is where Americanism lingers in the rough. There is where it is most typical. There is where Roosevelt is most loved and appreciated. There is where labor relaxes and recreates. The news stopped every game. No sounds were audible, except sighs. The leader of their hopes, the prince of their cause, their refuge, had gone. Silently, they went away. They walked slower, they talked less, and they thought more. It was the saddest moment in all American life. Their ship was without a rudder.

In his going, anxiety reached its greatest peak. Determination did not seem to falter or hesitate. It seemed to absorb vengeance. Hope was uncertain. It must wait. The future must build and sustain it. World peace took a body blow. It did not fall. It did not take the count. It is disappointed, and that disappointment should be, and must be, its inspiration and determination to work, to sacrifice and to succeed. It is humanity's only hope.

In a weak and humble way, on every occasion, and at every call, I have tried to shoulder my responsibility to him, and the cause that he represents. Maybe I have been a small part of a great undertaking. I feel so. I served him, and his cause, and the people's cause, as I see it, with an apostle's devotion, free of selfish motive.

I say, and maybe I never could have said it before, a man is dead that I never doubted or questioned. Somehow, I followed him and his leadership with a faith and confidence, free of every doubt. He gave a part of his life's span to the cause of humanity and liberty. In it all, I think that he was conscientious. To the down-trodden, he was as faithful as Paul was to Christ. He served and saved others, "himself he could not save."

I never committed an act, or spoke a word that made his road longer or his burden heavier. I never added weight to his weakened body or his troubled mind. I tried to give him strength. I might have been, and I think that I was, a little more diligent and devoted to him, and the purposes and ideals that he championed, than I have been to myself and my own soul. In it all, I am satisfied.

Love,

FLEETWOOD.

EXTENSION OF REMARKS

Mr. LYNCH asked and was given permission to revise and extend the remarks he expects to make in the Committee of the Whole today on the bill H. R. 4790, and to include therein certain data.

Mr. REGAN asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. LANE asked and was given permission to extend his remarks in the RECORD and include an article which appeared in Tom Breneman's magazine Old Age.

Mr. LESINSKI asked and was given permission to extend his remarks in the RECORD and include a copy of a letter written jointly by Mr. August Scholle and Mr. Hopkins, of the Michigan Congress of Industrial Organizations.

Mr. HUBER asked and was given permission to extend his remarks in the RECORD and include a newspaper article.

Mr. FORAND asked and was given permission to revise and extend the remarks he expects to make in the Committee of the Whole this afternoon and include therein certain quotations and tables.

Mr. SCHWABE of Missouri asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. BUSBEY asked and was given permission to extend his remarks in the RECORD and include an address by Mr. Morgan L. Fitch, retiring president of the National Association of Real Estate Boards.

Mr. BUFFETT asked and was given permission to extend his remarks in the RECORD.

Mr. SCHWABE of Oklahoma asked and was given permission to extend his remarks in the Appendix of the RECORD in four separate instances and in each to include extraneous matter.

Mr. JENKINS of Ohio asked and was given permission to revise and extend the remarks he expects to make in the Committee of the Whole and include therein certain tables.

SLACK-WATER ROUTE FROM THE GULF TO THE GREAT LAKES, PITTSBURGH, ST. LOUIS, MINNEAPOLIS, AND ST. PAUL

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. RANKIN. Mr. Speaker, you heard the remarks of the gentleman from Massachusetts [Mr. HESELTON] to the effect that the oil shortage is not only causing suffering throughout the New England States but is also having a serious effect in Detroit, Mich.

Today we are going before the Committee on Appropriations to ask for funds to begin a project that will provide a slack-water route from the Gulf of Mexico to Pittsburgh, Pa., by way of the Ohio River to Chicago, Ill., by way of the Illinois River to St. Louis, St. Paul, and Minneapolis on the Mississippi River.

If that great project were in operation today, that vast wealth of oil produced in Mississippi, Texas, Louisiana, and Arkansas could easily be transported into the Great Lakes by barges and distributed, not only throughout that area but throughout the Northeastern States as well.

You noticed where two barges arrived here in Washington yesterday with 10,000 tons of oil. If we had this great inland waterway completed, providing this slack-water route, as I said, to Pittsburgh, Pa., to the Great Lakes, St. Louis, St. Paul, and Minneapolis, there would be no shortage of oil in that area, the people in the Northeastern States could be supplied.

This great slack-water route from the Gulf to the Great Lakes, and to all points on the upper Mississippi and the Ohio, is absolutely necessary if those great industrial centers are to maintain their present positions in that respect.

The SPEAKER. The time of the gentleman from Mississippi has expired.

ADJOURNMENT OVER

Mr. ARENDS. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 11 o'clock on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

PROGRAM FOR WEEK OF FEBRUARY 1

Mr. ARENDS. Mr. Speaker, I ask uninamous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ARENDS. Mr. Speaker, in the absence of the majority leader the gentleman from Indiana [Mr. HALLECK], I take this time for the purpose of informing the House what the program will be for the following week.

Monday we hope to complete action on the tax bill.

Tuesday, unanimous consent has already been granted to take up the Consent Calendar which otherwise would have been called on Monday. Following the Consent Calendar, the Private Calendar will be called. Immediately after consideration of these two calendars we will take up the independent offices appropriation bill, which bill we hope to complete on Wednesday.

On Thursday we will start consideration of House Resolution 447, continuing investigation already begun by the Armed Services Committee under authority of H. R. 141.

At the present time Friday's business remains undetermined.

Mr. CASE of South Dakota. Mr. Speaker, will the gentleman yield?

Mr. ARENDS. I yield to the gentleman from South Dakota.

Mr. CASE of South Dakota. I recognize that the majority leader is not present today; however, I have talked to him about the possibility of the Committee on Rules reporting a rule for the consideration of a bill to extend the Synthetic Liquid Fuels Corporation. I want to express the hope that if the rule is reported it can be included in the program which the gentleman has just announced.

EXTENSION OF REMARKS

Mr. YOUNGBLOOD asked and was given permission to extend his remarks in the RECORD and include an article.

Mr. GRANT of Indiana asked and was given permission to extend his remarks in the RECORD in two instances, in each to include a newspaper article.

Mrs. LUSK asked and was given permission to extend her remarks in the RECORD and include a report from the American Council on Education in reference to a survey that has been made of veterans' education.

MAHATMA MOHANDAS K. GANDHI

Mr. KEATING. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. KEATING. Mr. Speaker, peace, perfect peace is now the reward of the

world's foremost recent disciple of peace, martyred, while on his way to prayers, in the cause to which he has devoted his life.

Mohandas K. Gandhi was more than a great political leader. He was a great spiritual leader, almost a saint, to uncounted millions of our brothers in the vast subcontinent of India. The report is that he met his death at the hands of one of the Hindu extremists who disagreed with his advocacy of nonviolence in the settlement of the raging clashes with the Muslims in his unfortunate, strife-torn country.

It may be said the course he advocated lacked realism. Most, probably all of us, would doubt the soundness of his methods. Often firmness, unfortunately sometimes a show or even the use of force, is necessary to achieve domestic tranquillity or international harmony. Nevertheless, one is bound to admire the unconquerable spirit of a figure who was willing to lay down his life, so often in jeopardy from his prolonged fasts, for the sake of a principle in which he believed.

Most recently, since the partition and creation of India and Pakistan, his crusade, waged with prayer and entreaty rather than the sword, was for the protection of the Muslim minority in predominantly Hindu India. Equally zealous was he in the preservation of freedom from oppression for those with whom he differed and the establishment of national freedom for those with whom he agreed.

During the 3 years it was my high privilege to serve my country in India and the Far East I acquired a deep respect for this spiritual giant, who, passionately devoted to the faith of his fathers, possessed a sweet religious tolerance so essential for us to emulate. To me, therein lies the essential greatness for all time of this courageous world figure. Therein the lesson of his life for us who follow Christ as our Master.

It seems fitting, therefore, Mr. Speaker, that we pause for a moment in the deliberations of this great body to pay tribute to a renowned son of a sister nation and a dauntless spiritual leader who now belongs to the ages. With this encomium, however, as the martyred Gandhi would wish it, should be uttered our fervent prayer that bloodshed may cease and that the peace for which he died may descend upon and rest permanently with his native land.

DIVERSION OF GRAIN FOR DISTILLERIES

Mr. HAYS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. HAYS. Mr. Speaker, for the information of the House, I would like to make a brief statement regarding Senate bill 1842, which would extend the President's authority to control the diversion of grain from foods to the distillation of liquor. I hope that a reconsideration of this bill may be accomplished without emotion. It is a matter of grave importance.

There are psychological factors involved and I think it would be unfortunate for the people of the world to get the impression that the American people are unwilling to reduce our supply of liquor or, at least, to suspend for the time being its rapid accumulation in reserve stocks, when there is such a critical need for this gain for food purposes.

The Committee on Banking and Currency by a close vote refused to report the bill. I am endeavoring to get in touch with our chairman who is necessarily away from the city. I believe the splendid message which the President submitted yesterday will influence his thinking to the point of giving us at least a chance to reexplore the problem.

The President's request is a reasonable one and the Senate bill should be adopted. The passage of this bill would prevent a race between the distilleries to acquire huge supplies of grain and would enable the Congress to assemble further facts on this important issue. This much I am sure of the people of the United States would approve reasonable limitations on the manufacture of liquor in a period of great scarcity when such grains might be used for food for our own people and for those abroad who are in a less favored position.

I am pleased to learn that several members of the Banking Committee who were absent when the vote was taken and even some who voted with the prevailing side have expressed the view that there should be a reconsideration of this matter. We shall request the chairman the gentleman from Michigan [Mr. WOLCOTT] to call a special meeting of the committee and I trust that he will grant this request. Otherwise, with the expiration of the President's authority to control purchases by distilleries there will be competitive buying of grain sorely needed for food.

The SPEAKER. The time of the gentleman from Arkansas has expired.

THE LATE FRANKLIN DELANO ROOSEVELT

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. McCORMACK. Mr. Speaker, on January 30, 1882, 66 years ago, there was born one of the world's great figures, our late beloved President Franklin D. Roosevelt. Down through the passage of time, as the happenings of the past are recorded in history, we find two minds or types of prominent world figures, one outstanding in the pages of history because of his constructive contribution, and the other occupying prominent mention in the pages of history because of his destructive contribution. The life of Franklin D. Roosevelt is now a part of the history of all times. I remember his last appearance in this Chamber, and my colleagues who were present on that occasion also do, when he addressed his last joint session of the Congress. He spoke for the first time from the well of the House as we, who were present on that occasion, will remember, due to the pain and suffering that the braces, that he was compelled to wear for so many years during his life, imposed upon him.

In paying tribute to his memory today it is not my purpose to recount the acts and the deeds of his great career; of his fearless and constructive contributions in time of economic upheaval or in time of war, but to make reference to the place in history he will occupy for all time as long as the past and the present is connected with the future. Franklin D. Roosevelt is this generation of Americans' contribution to the outstanding constructive figures of all time, and among them his name will appear in the top group. We, of this generation, are unable to fully grasp the significance of life and the influence his life will have upon the peoples of all lands for countless generations to come. But even today, within a few years after his death, whether one was a supporter or a critic of Franklin D. Roosevelt, they will recognize that he will be recorded in history as one of the outstanding constructive personages of all times. So, my colleagues, without regard to political affiliations or the position one may have taken on his recommendations while Franklin D. Roosevelt was with us as our President, but as Americans, we pause to pay our respects to the memory of a great man, a great American, a great President, a great figure in the history of all times.

I now yield to the distinguished leader of the Democratic Party, our former Speaker, the gentleman from Texas [Mr. RAYBURN].

Mr. RAYBURN. Mr. Speaker, it matters not how Mr. Roosevelt was appraised during his lifetime or how he is appraised at this early date after his passing. It is my opinion that he was of such a character and type that, as we move from him, his stature will grow larger and he will be one of the outstanding leaders not only in the history of his own country but in the history of the world. He had the rare gift of interpreting the inarticulate longings of vast masses of plain, simple people, and that is why so many loved him. He was truly their voice and their hope.

Mr. SABATH. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the distinguished gentleman from Illinois.

Mr. SABATH. Mr. Speaker, I shall always highly appreciate my good fortune in knowing the very great American and personality that attracted and held world renown for more than 12 years by his transcendent contribution not only in bringing the United States from the Slough of Despond but to rescuing the whole world in freedom's darkest hour, Franklin Delano Roosevelt, intimately for more than 30 very active years. Moreover, I shall never cease to be grateful for the opportunity and privilege that was mine to sustain and follow his unparalleled leadership in establishing a fair degree of equilibrium to a distraught world. For his efforts during the more than 12 years he occupied with such

singular success the highest office within the gift of a free people, history is increasingly doing him justice. It is indeed a great tribute to his marvelous accomplishment that the tongues of his erstwhile critics grow progressively weaker.

Surely nobody would deny that this good man gave his life for his country, just as a soldier at the battlefront may have given his life; and I do not believe he would have chosen a different result, so fervently did he strive to make this a better world for men of unselfish and high purpose. Indeed, he was the apostle of the so-called common man wherever found.

It is easy to believe that his efforts to promote the welfare of suffering mankind through establishment of the United Nations Organization were something closest to his tired heart.

We have had many great men at the head of our Government, Washington, Jefferson, Madison, Jackson, Lincoln, Wilson; but it seems to me that, considering the enormity of the scenes in which Mr. Roosevelt played such an important part, compared to the restricted work of other Presidents, the attributes of all his illustrious predecessors were concentrated quite largely in him.

With the passage of time this great man's work will be better understood and appreciated, and his name will properly range alongside those of Washington, founder of the Republic; Jefferson, the fountain of its idealism; and Lincoln, the exemplar of its magnanimity and the preserver of its unity, among the colossal world figures of all time.

Mr. HOLIFIELD. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the distinguished gentleman from California.

Mr. HOLIFIELD. Mr. Speaker, today is the birthday of Franklin Delano Roosevelt. On April 12, 1945, this great American passed away in his Warm Springs, Ga., cottage. He was the thirty-second President of the United States.

We have had many beloved Presidents, many who have rendered great service to their Nation in times of peace and war. But history does not record a time when problems were greater, when leadership was more needed, when faith and confidence in constitutional government was more at stake, than during the 12 years of his service.

At a time when dictators throughout the world were capitalizing on economic chaos for their own selfish desire for power, Franklin Delano Roosevelt, faced with unparalleled conditions of economic collapse, used the power of government to rebuild our shattered economy and to preserve our constitutional and civil liberties.

History will accord him greatness commensurate with his service to humanity. Long after his detractors have given up their futile effort to blacken his memory, the stature of this great man will grow in the hearts of the people, not only in our Nation but throughout the world.

It was chiefly through his encouragement that the age-old quest for universal peace was crystallized into the framework of the United Nations. No greater task remains to those of us who face the terrible responsibilities of an atomic world than that of supporting with all our heart and soul the purposes of the United Nations, which he bequeathed to us.

Mr. EBERHARTER. Mr. Speaker, will the gentleman yield?

Mr. McCORMACK. I yield to the distinguished gentleman from Pennsylvania.

Mr. EBERHARTER. Mr. Speaker, I join with those who have spoken previous to me on the subject of our beloved former President of the United States, Franklin D. Roosevelt. His memory will always be green to many, many millions of people not only of the United States but of all the world. His ascendancy to the greatest office within the gift of the American people, in my opinion, marked a new era of history not only for this country but for the world. I know that his good influence today is still great, not only among the people of this country but among the people of the world. His powerfully beneficent influence will long remain a factor in the history of the entire world to come.

Mr. McCORMACK. Mr. Speaker, I yield to the distinguished gentleman from Georgia [Mr. CAMP].

Mr. CAMP. Mr. Speaker, I wish to add a word for the people of the Fourth Congressional District of Georgia, among whom our great humanitarian leader lived and was loved and was known as a good neighbor. It was there that he came to regain his health. It was there he passed on to his eminent reward. Every man, woman, and child in that part of the country reveres him as the greatest humanitarian.

Mr. McCORMACK. Mr. Speaker, the life of Franklin D. Roosevelt was a symbol of the hopes and aspirations of countless millions of people. In death his memory will still be a symbol for countless millions of people until the history of man ceases.

Mr. Speaker, I yield to the distinguished gentleman from Georgia [Mr. Cox].

Mr. COX. Mr. Speaker, I often felt the grip of the iron hand of this great man upon my throat, but there was never bitterness on my part and there is none now. Time may prove that heaven alone is tall enough to place a wreath upon the brow of his fame.

Mr. McCORMACK. Mr. Speaker, may I say to my friend from Georgia, having been very close to the late President for many years, as I was, and as our beloved leader, Franklin D. Roosevelt had a very high personal regard for my friend from Georgia [Mr. Cox]. In conversations that I had with him, I know of the warm personal feeling that he had for him. I welcome this opportunity to express this so that the gentleman from Georgia will know it and so that his people will know it and so that the pages of the CONGRESSIONAL RECORD will record that fact. Today, my colleagues, as we did yesterday in honoring another great President, we pause to pay our respects to one who during his lifetime by his leadership and his constructive contributions has placed his name forever uppermost in the pages of history of all time as one of the great constructive leaders of men.

EXTENSION OF REMARKS

Mr. CRAWFORD asked and was given permission to extend his remarks in the RECORD and include a schedule of 1948 State primary elections.

MAHATMA GANDHI

Mr. JACKSON of California. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. JACKSON of California. Mr. Speaker, sad news is the order of today. Mahatma Gandhi, that ardent and devout exponent of universal peace, has fallen before the bullet of an assassin. It is doubtful if the Western World could every fully understand the working of Gandhi's mind, but we can understand one thing about his passing, and that is the fact that he fell victim to the one thing he abhorred above all else, violence. Not even his high motives, his strong character, his firm faith in the goodness of his fellow men, were sufficient to turn aside the fatal bullet. Force, brutal and undisguised, has for this moment won a victory over ideals and the welfare of mankind. Whether this defeat is of a permanent nature, none can say.

As there are violent fates for men who dare to plead for and live in the cause of peace, so there are like fates for nations. There are nations dedicated to peace, and others dedicated to force. The wise nation works for human happiness and human welfare in a peaceful universe, with the full knowledge of these facts, and in order that its service may not be rendered null and void in the face of brute force, goes always prepared to meet and repel that force in pursuit of its objectives.

The object lesson is clear in the tragic death of Mohandas Gandhi. I trust that we shall see and appreciate its application to present world conditions.

EXTENSION OF REMARKS AT THIS POINT

Mr. WOLVERTON. Mr. Speaker, I ask unanimous consent to insert in the RECORD a statement made before the Committee on Interstate and Foreign Commerce this morning by James Terry Duce, vice president of the Arabian-American Oil Co., which I consider of such great importance that I believe the House should have the benefit of it at this time.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. WOLVERTON. Mr. Speaker, the statement is as follows:

THE ALL-IMPORTANT QUESTION OF MIDEAST OIL

(Statement by James Terry Duce, vice president of the Arabian American Oil Co., delivered before the House Interstate and Foreign Commerce Committee, on January 30, 1948)

Mr. Chairman, gentlemen, my name is James Terry Duce. I am vice president of

the Arabian American Oil Co. I was director of the Foreign Division of the Petroleum Administration for War during the war period. I have just returned from an extensive trip to the Middle East. I assume that the committee wishes to hear the latest developments in that area and to know something of our plans.

In starting, however, I would like to make a general statement about the oil situation. A great deal of the testimony that has been given on the Hill during the last few months in respect to oil does not differentiate between the two separate problems, that of general supply in peacetime and the question of wartime supply. In peacetime when steel and other commodities used in the production of oil are abundant, no problem has ever arisen regarding oil supply. It is the impact of the scarcity of materials which results in such shortages, as we are now facing in the United States. I am inclined to believe that even this shortage would have been averted if the Maritime Commission had put in operation early this year the tankers which they had moored in their various yards. There is an abundance of oil in the world. We have immense reserves in the Middle East. If all the world produced from its reserves at the same rate as the United States is producing from its reserves, there would be a surplus instead of a shortage in oil at the present time. We have pushed our production in Arabia up from 200,000 barrels per day last year to over 300,000 barrels per day at the close of 1947.

The war supply problem is somewhat different. There we have the interaction of a great many factors—the strategic one which the military people can best tell you about, and the constant problem of supplying steel sufficient to cover the thousand and one separate requirements of waging war. If we have the necessary steel and the manpower, we can produce the oil. If we don't, then shortages appear. It was always a question during the last war as to which had priority—guns and tanks or wells and factories, and we were always faced with the question—whether you should use manpower in the Army or in manufacturing and production. In oil production itself there also arose the question as to the most efficient source of supply, where the largest amounts of oil could be produced by the smallest amount of steel, and manpower to supply a special theater of operations. The Middle East and South America used less steel in production than the United States, but processing plants were not available and some of the areas were subject to the hazards of attack. In the early stages of the last war, the Middle East was a very unsafe zone and it was hardly the place at that time to invest in steel and manpower. Later as the enemy was driven back into Italy from northern Africa, it became desirable to build up production for these military supplies.

First I present chart 1. This chart is for the purpose of showing the size of the Middle East. On it you will notice we have thrown a shadow of the United States on the same scale, so you can compare roughly the area of the Middle East to that of the United States. The prospective area for oil in the Middle East extends from the Turkish border to the southern boundary of Saudi Arabia, a distance equal to the distance from the Canadian line to Houston, Tex.

Chart II shows the concessions already held with the present interest in these concessions. You will note first the Anglo-Iranian concession in Iran owned by Anglo-Iranian Oil Co., a British corporation. Second, there is the Iraq Petroleum Co. group of concessions which include all of Iraq, part of Syria, Lebanon, Palestine, Cyprus, Oman Qatar, Trucial Coast and the Hadramout. There used to be a concession to an Iranian Petroleum Co. affiliate in Saudi Arabia, but this has been surrendered. The concession on the Sheikhdom of Kuwait is held jointly by the Anglo-Iranian and the Gulf, an American company. The Saudi Arabian concession is held by the Arabian American Oil Co., whose stock is owned by the Texas Co. and the Standard Oil Co. of California and will, as and when certain conditions are satisfied, also be owned by the Standard Oil Co. of New Jersey and the Socony-Vacuum Oil Co.; the division of ownership will then be 30 percent to the first three and 10 percent to the last. In the case of the Iraq Petroleum Co., this stock is owned 23¾ percent by Shell, a British and Dutch corporation; 23¾ percent by the Anglo-Iranian Co., an English corporation; 23¾ percent by the Near East Development Co., which in turn is owned 50 percent by Standard Oil of New Jersey and 50 percent by the Socony-Vacuum Oil Co. In addition, a gentleman by the name of Gulbenkian owns a 5-percent interest in the corporation. The areas of these concessions are shown in the chart.

Chart III shows the reserves of the world and on the same chart I show roughly the prospective areas of the world. They are marked in red. I have done some reestimating of the reserves on the basis of the discoveries during the past year, and it is to be noted for instance that we have somewhat increased the reserves in the Middle East as the Anglo-Iranian has discovered a new field in Lali and there have been extensions to the Kuwait field and in Saudi Arabia we have extended the Abqaiq field to the north and discovered a new producing horizon. The United States estimate I have used is the American Petroleum Institute estimate for 1946. I believe there will be a slight upward revision of the reserves in this country for 1947. Preliminary estimates indicate that this may mean a proved reserve of 21,345,000,000 barrels. This figure does not include distillate, casing-head gasoline, and similar hydrocarbon products not ordinarily counted as crude oil. I would like to point out that, with a reserve of 32,000,000,000 barrels in the Middle East, we are now approaching a point where the reserves are one-third greater than those in the United States. If we were producing these at the same rate as we are producing the reserves of the United States, we would be producing about 9,000,000 barrels per day. The Middle Eastern production is still somewhat under 1,000,000 barrels per day. It is divided about as follows:

Country	Production	Producing wells average
	Barrels per day	*Barrels per day*
Bahrein	29,000	426
Iran	405,000	7,105
Iraq	97,000	8,818
Kuwait	61,000	5,545
Saudi Arabia	299,000	7,119

This production comes from 189 wells, or an average of about 5,000 barrels per day per well. In the United States there are about 440,000 wells, producing 5,341,000 barrels per day, or an average of about 12 barrels per well.

The figures for South America are as follows:

Country	Production	Producing wells average
	Barrels per day	*Barrels per day*
Colombia	70,000	48
Mexico	153,000	151
Trinidad	58,000	34
Venezuela	1,250,000	244

The production comes from 9,299 wells, or an average of 164 barrels per well.

I have not at the present time in my possession full information on the number of operating strings of tools in the Middle East. In Arabia we are operating presently five strings. In Bahrein there is one string operating and there are two strings in Qatar, the peninsula south and east of Bahrein. In Kuwait, I believe there are seven strings operating, but that is subject to correction and after I have had time to make a definite inquiry, I will give the information to the committee. I do not have information on the situation either in Iraq or Iran, but at any rate, there are relatively small numbers of strings operating there. I do not believe that in the entire Middle East there are operating more than 30 strings of tools. This will be somewhat increased as the pipe-line construction goes forward.

As the average string of tools drills about 4 wells per year, you can see that the total wells completed during any single year probably is in the neighborhood of 120. I would estimate that this will not increase greatly even though the takings from the Middle East should exceed 2,000,000 barrels per day within the predictable future. In the United States we are running continuously about 4,000 strings of tools, as noted in the Oil and Gas Journal.

So much for the present production situation. There are, of course, now in planning or under construction a number of pipe-line projects in the Middle East. The one furthest along is the 16-inch line from Kirkuk to Haifa by the Iraq Petroleum Co., which will be completed during this year and will then start to run 120,000 barrels per day to the Mediterranean. Following the construction of this line is the trans-Arabian pipe line. This has now been surveyed and pipe is being moved to the Middle East for its construction. It will be a 30–31-inch line running a distance of 1,040 miles from the Abqaiq field to Sidon on the Lebanese coast. The initial capacity of this line will be approximately 300,000 barrels per day, but it can be increased to 450,000 barrels per day by the addition of some five pump stations. It will consume 287,950 tons of steel. Of this amount 235,250 tons is main-line pipe, 2,700 tons is small pipe incidental to the construction of the line and 50,000 tons of other steel which includes tanks, piling, and structural steel. It may be that we will reroute the line slightly in the south in order to facilitate the dispatch of oil either from the Mediterranean or the Persian Gulf, which would have certain strategic advantages. If so, an additional 8,360 tons of steel may be required in late 1949 in which case the total requirements for the line will be 296,310 tons.

Theoretically, it would require 59 T–2 tankers to carry 300,000 barrels per day to Suez from Saudi Arabia. The construction of this number of tankers would require 337,000 tons of steel. If the pipe line is brought up to its ultimate maximum capacity of 450,000 barrels per day, an additional 29 tankers would required, or 168,500 tons of steel, making a total steel requirement of 505,500 tons to construct this many tankers. I must, however, warn you in giving these figures for T–2 tankers that they require completely efficient operation and that there is very little allowance made for stand-by and other time-consuming operations and that this is the minimum number of tankers required to produce the same result as the pipe line. In talking of the steel requirement for the pipe line, I might point out to you that the American Iron and Steel Institute recently published figures that 2,500,000 tons of new steel-making capacity is being added in the United States during the year 1948. The production of steel for 1947 exceeded the production of any other peacetime year by 17,000,000 tons. The requirements of the pipe line are approximately 1.7 percent of this increase or 10 percent of

the new capacity to be added during this year.

Some time ago I also gave some figures to Mr. Averell Harriman, the Secretary of Commerce, on the subject of the requirements of steel per well in Saudi Arabia compared with the United States average. This steel refers to tubular goods, both casing and connections. Abqaiq wells require about 247 tons per well. The average production per well is something over 10,000 barrels per day, so roughly they produce 3,000,000 barrels per year or 12,146 barrels per ton of steel. The United States average well requires 49 tons of steel for casing and other tubular goods. The production per new well is about 36,500 barrels, or 745 barrels per ton per year. I would not, however, submit to this committee that these are the only factors to be considered. They are, however, the factors which you might well consider in relation to the present situation.

Last week the production in Saudi Arabia was 315,000 barrels per day. We have, however, about reached the capacity of our present facilities. Of this amount of oil, 107,000 barrels per day goes to the island of Bahrein for processing and an additional 120,000 barrels per day goes to our refinery at Ras Tanura. That leaves 88,000 barrels per day to be shipped offshore. Our capacity to ship offshore is limited by our loading facilities and also by our stabilizer capacity. Saudi Arabian oil contains an appreciable percentage of hydrogen sulphide and it is necessary to remove this by a preliminary distillation process which boils off the hydrogen sulphide and reconditions the oil. Oil thus treated is harmless on tankers. We used the unstabilized oil, however, in our refinery without serious results, but it is the stabilizer capacity which at the present time limits our offshore shipments. We are increasing our stabilizer capacity 17,000 barrels per day at Dhahran as of the 17th of March. We are starting to build a new stabilizer at Abqaiq and expect to build another new stabilizer at Abu Hydriya. When this stabilizer capacity is completed we expect to be able to still further step up our shipments of crude through our sea terminals on the Persian Gulf, if it is desirable to do so. We are making plans already to increase the shipments of crude and products to 500,000 barrels per day by July 1, 1949, and could relatively easily increase the available crude 100,000 barrels per year if we are given permission to export the steel necessary to construct stabilizer, pipe line, and port facilities.

I am sure similar conditions apply to the Kuweit Oil Co. in Kuweit and to the Anglo-Iranian production in Iran. The production in Iraq, of course, depends upon the pipe-line outlets from the Kirkuk and other fields to the Mediterranean.

With this background, I would now like to talk a little bit about other pipe lines. Probably the next line to be built will be the Middle Eastern line which will run from Abadan, and probably Kuweit, to a point on the Levant coast, probably in Syria. The pipe line will pass through the Houms Gap in the Lebanese Mountain Range. This line will be a 34–36-inch line, with a capacity of about one-half million barrels per day. It will be built by the Anglo-Iranian Oil Co. in partnership with the Standard Oil Co. (New Jersey) and the Socony-Vacuum Oil Co. It is scheduled for completion about 1953. The Iraq Petroleum Co. is also considering a major line from Kirkuk and some of the fields in that area to the Levant coast. It will probably be a 30–31-inch line with an ultimate capacity of somewhere in the neighborhood of 400,000 barrels per day. In addition, the Gulf Oil Corp. and the Shell Co. are considering the construction of a line from Kuweit to the Levant coast. Size and capacity of this line is still under discussion. I might add also that the Iraq Petroleum Co. affiliate in Qatar is developing a new field and that may mean an additional capacity on the Persian Gulf. This field, the Dukan field, would, from the preliminary information we have on it, appear to be one of major consequence. When all of these lines are completed, there will be at least one and one-half million barrels of oil delivered daily upon the shores of Lebanon, Palestine, and Syria and this will be available for European markets and will enable the producing companies in Venezuela and Colombia to ship oil to the United States of America instead of to the European markets. If part of Middle Eastern oil were available at the present minute, there would be a better supply situation on the eastern seaboard of the United States in that Middle Eastern oil would be brought to the European market and substituted there for oil now sent to that area from Venezuela, Trinidad, and Colombia.

The construction of the Trans-Arabian Pipe Line Co. has been disturbed this winter by the outbreak of cholera in Syria along the route of the line. It was further interrupted by the riots and civil disturbances incident to the UN decision to partition Palestine. Nevertheless, we will strive to complete the construction of our line on time, as we believe the construction of this line is in the interest of all the people in the Middle East and of the people of the United States, and is a prime essential in the implementation of the Marshall plan.

Now I have stated that it is in the interest of the people of the United States that this line be built and I think it is now up to me to give you some information on the oil situation which will substantiate that opinion. I submit chart IV. This chart shows the consumption of petroleum products, crude-oil production and refinery runs for the latest available period compared with similar forward estimates for the year 1951. These estimates were made by the statistical department of the Standard Oil Co. (New Jersey). The estimate shows that the present total world petroleum demand is in the neighborhood of 8,000,000 barrels per day and that this will reach 10,000,000 barrels per day by the year 1951. Now how will we supply this oil? I am making assumptions here that the United States crude oil production will be maintained at the present level and that the added requirements will have to come from foreign sources. I might remark in passing that if the United States crude oil production continues to increase, I still believe it will only be enough to allow the necessary leeway in such estimates as I am here laying before you. You will note, therefore, that we now estimate that the Western Hemisphere is producing 6,931,000 barrels per day and that this will increase by the year 1951 to 7,337,000 barrels per day or an increase of 406,000 barrels per day. We believe this will come mainly from Venezue'., with some additions from Colombia. Production in the Marshall plan countries will increase but slightly. In the Middle East we expect to increase from 872,000 barrels per day to 1,624,000 barrels per day by 1951, or an increase of 752,000 barrels per day. The Eastern Hemisphere, including India, Japan, and the Dutch East Indies, will increase from 219,000 barrels per day to 379,000 barrels per day or an increase of 160,000 barrels per day, coming mainly from the Dutch East Indies. We believe that there will also be some increase in natural gasoline and synthetic petroleum products amounting to 86,000 barrels per day. There is one point which I should emphasize and that is that all of these estimates are dependent upon a continuous and prompt supply of essential materials to the operating fields. These results are also dependent upon the refining capacity available. There is no use in building the facilities to bring crude to refineries unless we further increase the refinery capacity of the world, for the refineries of the world are working almost at capacity at the present time, the efficient and the inefficient. The bulk of the Middle East production will be required for the European recovery plan, where it is expected that consumption will increase to 1,375,000 barrels per day and most of this oil must be processed in refineries to be built in Europe. Conversely, there is no available crude for the European refineries to operate on unless Middle Eastern crude oil supplies are made available to them. The crude oil sources in the Western Hemisphere cannot supply both the increased demand in the Western Hemisphere and the requirements of the European recovery plan.

Our figures indicate that net exports from the Western Hemisphere to the Eastern Hemisphere will decline from a figure of 690,000 barrels per day in 1947 to 390,000 barrels per day in 1951, and as more refining capacity is installed in the Eastern Hemisphere beyond this period, it is expected that exports from the Western to the Eastern Hemisphere will be reduced to a nominal figure and will be mainly lubricating oil and similar special products. The present drain on the Eastern Hemisphere runs about 700,000 barrels per day or is equivalent to a billion barrels every 4 years. So new refineries and new crude are essential.

I now turn to chart V. This shows the world demand and production and refinery runs in 1947 versus 1951. You will note that this provides an increase in Western Hemisphere production from 6,931,000 barrels per day to 7,337,000 barrels per day and in the Eastern Hemisphere from 1,760,000 barrels per day to 2,464,000 barrels per day. Taking the last quarter of 1947 as an index crude refinery runs in the Western Hemisphere will increase from 6,624,000 barrels per day to 7,299,000 barrels per day, while the Eastern Hemisphere will increase from 1,173,000 barrels to 1,926,000 barrels per day. The net exports from the Western Hemisphere will drop from 694,000 barrels per day to 392,000 barrels per day. All of this is dependent upon steel allocations and judging from such estimates which have been made in the past will be subject to considerable variation in actual practice. If more serious disturbances occur in the Middle East, they will interrupt production and an impossible load will be thrown on the petroleum resources of the Western Hemisphere. Further than that, the tanker situation may affect the transportation of petroleum. If the demand continues to increase, there will be need also for additional tanker construction despite the pipe lines built in the Middle East. This will depend partially upon the policy of the Maritime Commission and also upon the opening of the European yards for the construction of the tankers where tanker construction has always been cheaper than in the United States. I am not an expert on this matter, but I think if war were to break out tomorrow, we would find we were desperately short of tanker capacity. The construction of the pipe lines in the Middle East is in itself a contribution to the solution of this question, for as long as they are available, tankers will not have to travel around Arabia to the Mediterranean and back, 7,200 miles.

As to the present shortage in the United States, I cannot plead to be an expert on the many complex factors which have resulted in this situation. I point out to you that the estimates of consumption made at the close of the war were on the conservative side with the result that the construction of facilities did not proceed as rapidly as might have been expected. I would like to recite to you a story of my own. During the tail end of the war period we built a refinery at Ras Tanura with a capacity of 50,000 barrels per day. A great many estimates were made of the markets which this refinery would reach and the general conclusion was that if we did not have war business, the refinery would stand on the Ras Tanura Peninsula as a monument to the folly of the men who built it, and I am now quoting the words of

a major executive of one of the large oil companies. We opened the refinery. We never operated at less than 100-percent capacity and we have now pushed this 50,000-barrels-per-day refinery up to something over 120,000 barrels per day, and we could sell more oil if we could process it. I believe the gentleman who made this statement about the refinery being a monument to our folly was entirely sincere. I was a little more optimistic and thought we might run at one-half capacity. I believe the statisticians who made these estimates were entirely honest, but they simply did not allow for the astounding increase in demand.

The oil industry, gentlemen, is a vast and complex affair. Oil from the Middle East is absolutely essential to the implementation of the Marshall plan. The middle eastern reserves should be so developed that the people who wish to use oil should have it without any great to do. The industry must create the ways and means of getting this oil to the markets where it can be used. To do this, there are only two requirements, peace and a supply of those essential materials necessary to get the oil out of the ground to process and transport it. The nub of the materials question at the present time seems to be steel, particularly tubular goods. I would like to impress the committee with one thing and that is that you cannot regulate the export of steel satisfactorily unless you at the same time consider its use in the United States. I see people building ornamental steel fences, using steel for cans where bottles would do while at the same time we get complaints that the essential industries which are dependent upon steel are short. We cannot continue to supply areas abroad with essential crude oil and products unless we have the steel to produce it. We can make efficient use of that steel.

Furthermore, abroad we have the problem of housing. It has been difficult at times for us to get licenses for building material. The housing of Americans abroad, largely ex-GI's is just as much a problem as at home. As a matter of fact, we can build houses abroad with less steel and less products of other types than we can at home because as far as possible we use native material. We expect to do our job in the Middle East. We expect to present our plans to the constituted authorities in the United States and I hope that we will get the necessary materials to carry out the plans which we have which are an essential in the plans for European recovery.

EXTENSION OF REMARKS

Mr. HAND (at the request of Mr. CANFIELD) was given permission to extend his remarks in the RECORD and include a radio address.

THE TAX-REDUCTION BILL

Mr. KNUTSON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (H. R. 4790) to reduce individual income-tax payments, and for other purposes.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill H. R. 4790, with Mr. HOEVEN in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. The Chair wishes to state the gentleman from Minnesota [Mr. KNUTSON] has used 2 hours 7 minutes; the gentleman from North Carolina [Mr. DOUGHTON] has used 1 hour 20 minutes.

Mr. DOUGHTON. Mr. Chairman, I yield such time as he may care to consume to the gentleman from Georgia, [Mr. CAMP].

Mr. CAMP. Mr. Chairman, I regret exceedingly that the committee has been unable to bring before the House at this time a more comprehensive tax-revision bill than the one now before us. I also regret that we must consider the bill under a closed rule. I in no way criticize the Committee on Ways and Means or the Rules Committee for the rule. I know it is the same rule under which we have considered tax legislation for many years, but our tax system at this time is so complex and so replete with inequalities and injustices that I deplore the fact that we cannot be more comprehensive in this legislation.

During the great war just closed, when we were making every effort to pay at least half of the war expense as we went along, not only for that economic reason but in order to prevent inflation, we resorted to every means we could conceive of to raise money by taxation. We levied a great number of excise taxes. We placed $5 stickers on everybody's automobile. We placed a tax on telephone messages; on railroad tickets; on trunks and luggage; on auto parts. Every conceivable article in interstate commerce was taxed. We were taxing the pots and pans of the poor. We had a 60-cent tax, and we still have it, on a $3 lady's handbag. Many of those taxes are not only unjust but some of them are confiscatory.

We have put out of business a very fine little industry in the United States, that of raising fur-bearing animals. We have practically paralyzed one of the great industries of one of my southern neighbor States, that of trapping. I am convinced that this Congress should, without great delay, make these taxes more real and less confiscatory and less burdensome.

If this bill which is before us is passed reducing as some say the national revenues by $7,000,000,000, what hope do we have of making any further revision of these excise taxes unless we operate this Government in the red? It is deplorable to think of this Congress in this year when our national income is at the highest level in all history, with corporate profits double what they were a year ago and 10 or 12 times what they were in 1939, with more people employed than ever before in our history, operating this Government in the red. Deficit spending in the years 1948 and 1949 ought not to be even considered or thought of. Because of the high levels of taxation which now exist, to my mind I think it necessary that we have tax revision, and tax revision necessarily means some tax reduction.

It did not matter so much about the inequality of the privilege which the community-property States enjoyed when tax rates were low; nobody said much about it. However, at present levels this is such an injustice to the residents of the common-law States that we must in all conscience grant that same privilege to the people of all the States. I favor that part of the bill that is before us. It ought to be made the law.

There is another group of citizens in this country who need and should have at once some tax relief. Why, we are taxing under our present system people who make as little as $50 a month. With eggs at a dollar a dozen and meat nearly that high, how can that man live? Some relief ought to be given to people in those low brackets. In that direction this bill in my opinion does not go far enough. Raising the exemption only $100, from $500 to $600, I believe is not enough relief for those people.

Another class of citizens about whom we do not think much is the man who makes around $5,000 a year on the main streets of these little American towns, the backbone of the country, the man who has to support the church in that town and pay the city taxes, keep up the schools. That man's tax burden at the present time is high. Something ought to be done to lower it, and yet we cannot in good conscience grant reduction here which will endanger the financial integrity of our country.

Any bill which reduces our national income as much as six or seven billion dollars will prohibit any payment on the national debt. During the war we actually asked for the pennies of the school children. We sold our bonds and securities in every school in this land. It is estimated that 80,000,000 of our people hold these bonds and with this large national debt and with our national securities all over our land, anything which might affect their value 1 cent might produce national calamity. I do not think this Congress can consider for a moment failure to make a payment on the national debt this year. As a matter of fact, I would like to support the proposition mentioned here on the floor yesterday of our setting aside a certain percentage of the national income and place the confidence of our people even higher in these securities.

Mr Chairman, I am not one of those who criticize this bill too much. There are two features in it I am heartily in favor of. I am in favor of granting some reduction, but I just cannot see how you can cut taxes $7,000,000,000 and pay anything on the national debt.

Mr. KNUTSON. Mr. Chairman, will the gentleman yield?

Mr. CAMP. I yield to the gentleman from Minnesota.

Mr. KNUTSON. The gentleman is one of the valued members of the committee.

Mr. CAMP. I thank the gentleman.

Mr. KNUTSON. I do not know of a fairer man in the House, and I say that in all sincerity. The gentleman from Georgia is always fair. His figures are based on an income of $200,000,000,000. The Department of Commerce estimates the income at $205,000,000,000 for the next fiscal year. Now, we have a very good staff that is not given to going off half-cocked. Their figures are always reliable. I know the gentleman will concede that. The staff figures are based on an income of $209,000,000,000. It depends upon what base one argues from.

Mr. CAMP. Absolutely. I understand that there are various estimates of the

national income and I also understand that no matter how competent or how expert these people are they cannot guess it exactly, but some of these experts tell us that it may result in a reduction of $7,100,000,000. We know what the budget request is. A speaker who preceded me explained that 80 percent of the budget is in such items that we cannot effect any reductions. We cannot reduce the amount that we will have to pay back to our taxpayers who have overpaid their taxes. That cannot be reduced 1 cent. I do not believe the Congress will consider for a moment repealing any of the laws we have passed granting veterans hospitalization and other benefits. I know that we are going to pass an appropriation bill for national defense affecting the Army and Navy and we may actually increase the amount proposed for our atomic energy defense. We have only $7,500,000,000 within which to make any reduction.

I just cannot in conscience consider any bill which will reduce our income and our Federal revenues to the point where we must have deficit spending.

Mr. GRANGER. Mr. Chairman, will the gentleman yield?

Mr. CAMP. I yield to the gentleman from Utah.

Mr. GRANGER. I compliment the gentleman on the fine statement he is making on this important bill, but I am wondering about this, knowing, as I do, your interest in the small taxpayer. How is it that your great committee has not up to now given any consideration—at least, as far as I know, they have not—to reduce some of these burdensome taxes that are plaguing the little fellow and the big fellow, the excise taxes?

Mr. CAMP. I have been clamoring for it and discussing it for the last year and a half.

Mr. GRANGER. The telegraph, the telephone, railroad freight rates, and passenger tickets are not luxuries any more. Why are they not removed?

Mr. CAMP. I think my friend knows the answer to that.

Mr. GRANGER. No; I do not.

Mr. CAMP. I think you will find that one of the first acts of the Eightieth Congress was to pass a resolution that we would not do anything about excise taxes.

Mr. GRANGER. We may have passed it, but I cannot see any rhyme or reason for worrying about the little taxpayers when every one of them has to pay taxes for the cheap amusements they have, their telephones, and their telegrams, and nearly everything else, such as talcum powder and similar articles for the care of children. It would mean a whole lot more than this trifling reduction they will get on taxes under this bill.

Mr. CAMP. I agree with the gentleman 100 percent, and I believe the gentleman knows that I have worked toward that end.

My friends, our people are willing to pay taxes in this country. Their response to the call of this Nation during the last 10 years has been one of the grandest defenses that we have ever shown to the rest of the world. The world knows that America is going to preserve her integrity, but the people of this country are relying on you to do justice. Who is representing them here in the preservation of their fiscal policy and their financial integrity? It is you and I. We are the chosen representatives of our people. What are our businessmen going to think of us if we reduce the Federal income to the point where we have to borrow money in the good years 1948 and 1949? Do you reckon they will have the same respect for or confidence in their chosen representatives that they do now?

I regret exceedingly that there is not a reduction of excise taxes in the bill that is here before us. Any consideration of reducing taxes that leaves out those revenues is not comprehensive and will not be understood by our people. You can look for criticism wherever you go. A lady's handbag is just as necessary a part of her wardrobe and her daily necessities as a man's hat, and perhaps more so, and there is 60 cents tax on the lowest-priced bag. We are forgetting those things. They ought to be in this bill. I will go along for some tax reductions so long as it enables us to meet our fiscal requirements, to make a substantial and a decent payment on the national debt, and leave us free to go home uncriticized.

Mr. HOBBS. Mr. Chairman, will the gentleman yield?

Mr. CAMP. Gladly, sir.

Mr. HOBBS. I wonder if the gentleman will answer this question or if it should not be addressed to a member of the committee? Was there a serious effort made by the committee to increase the deduction or exemption based upon the increased cost of living? Does the gentleman think that $100, about the price now of one Christmas dinner for a family of four or five, with all the "trimmings," is a sufficient deduction?

Mr. CAMP. I do not. I would favor raising the present exemption from $500 to $700.

Mr. HOBBS. Has the committee seriously addressed itself to that problem?

Mr. CAMP. I think so, but not too seriously. I think the bill was too well prepared when we started, and I do not think they wanted to change it very much. I deplore the fact that we have not changed it.

Mr. HOBBS. I thank the gentleman.

Mr. GEARHART. Mr. Chairman, I yield such time as he may desire to the gentleman from North Dakota [Mr. ROBERTSON].

Mr. ROBERTSON. Mr. Chairman, last year I supported the tax-reduction bills because I recognized the need for tax reduction not only in the lower brackets, which is important, but in all brackets. It is unhealthy for any nation to tax its people to a point where taxation means confiscation of property, and that is the situation which confronts us today, 3 years after the termination of war. These wartime taxes must be reduced so that those in the lower brackets can better meet the cost of living and so that other capital will be released for investment and expansion in business enterprise. Only in this way can we increase production and maintain full employment. For these and other reasons, I will support the tax bill before Congress today.

COMPARISON BETWEEN TAX LAWS IN CANADA AND THE UNITED STATES

Recently I read the budget speech of the Honorable D. C. Abbott, Minister of Finance for the Dominion of Canada. In comparing Canada's finances and tax pattern with ours, some very revealing facts have come to light, and I should like to bring some of these facts to your attention. First I should like to include a table taken from page 16 of Minister Abbott's budget speech of April 29, 1947, comparing proposed taxes in Canada with existing tax rates in the United States, and also H. R. 1 as passed by the House of Representatives March 24, 1947:

Comparison of personal income tax—Canada and United States—Married taxpayer, no children

Income	Canadian tax at new rates	U. S. A. tax at present rates [1]	U. S. A. tax at rates in bill passed by House of Representatives
$1,200	----------	$15	$11
$1,300	----------	32	23
$1,400	----------	49	35
$1,500	----------	67	47
$1,600	$10	84	59
$1,800	36	118	82
$2,000	70	152	105
$2,250	120	195	138
$2,500	170	238	183
$2,750	220	289	224
$3,000	270	323	258
$3,500	370	411	329
$4,000	470	505	404
$5,000	670	694	555
$7,500	1,260	1,292	1,034
$10,000	1,990	2,024	1,619
$20,000	6,140	6,142	4,913
$30,000	11,315	11,676	9,340
$50,000	23,043	24,453	19,562
$75,000	38,968	42,707	34,166
$100,000	56,143	62,714	50,171
$200,000	132,493	147,697	118,157

[1] The U. S. A. taxes shown are Federal taxes only; most States have income taxes in addition to the Federal tax. In Canada no personal income tax is levied now by any province. Under the United States income tax law every taxpayer is allowed a deduction of 10 percent of income up to a maximum of $500 in lieu of deductions for medical expenses, charitable donations, etc., and this is taken into account in calculating the taxes for United States; Canadian taxpayers who can claim such deductions would pay less tax than shown by this table, since no allowance has been made for such deductions in calculating the Canadian tax.

NOTE.—In calculating the above Canadian taxes it has been assumed that all incomes up to $30,000 are entirely earned incomes, and that incomes of more than $30,000 include earned income of that amount and additional investment income to make up the total. No distinction is made between investment and earned income under the United States tax.

It is obvious that the tax proposals offered last year, and the one now being considered, are not extreme, when we study the foregoing table. Since the war's end, the Dominion of Canada has enacted two tax reductions, one averaging 22 percent and one averaging 29 percent, aggregating 51 percent. During this same period of time, the people of the United States were granted two Presidential vetoes, the only vetoes handed down and sustained during the 160 years of United States existence since the Constitution, through article I, gave the revenue power to Congress.

Our Secretary of the Treasury, Mr. Snyder, contends that a tax reduction in 1948, 3 years after the war, would

produce a Treasury deficit. Canada's Minister of Finance, on the other hand, reported that instead of producing a deficit, the first tax cut of 22 percent yielded $500,000,000 more revenue than advance estimates and resulted in "a surplus larger than the accumulated total of all the previous surpluses in our history."

Much is made of the theory enunciated by the President in his veto messages that tax reduction would increase inflationary pressures. This did not occur in Canada. From August 1939 to September 1947, a period of 8 years, Canada's cost-of-living index rose 38.3 percent. In that same period here in the United States the cost-of-living average rose 66.1 percent. It is interesting to note that prices increased more than 15 points on the cost-of-living index in the 90-day period immediately after the President's two tax vetoes. Whether there is a relation between the vetoes and the price boom is debatable, but nevertheless the facts indicate that the boom occurred after such vetoes. There are many sound economic arguments which indicate that there is a definite connection. Farmers, merchants, industrialists, and labor all concede that increased production is the true answer to high prices. Yet, when we take money to maintain government, which is nonproductive in the material sense, and take this money from the people who would invest it in productive enterprise, then we are thwarting production and adding to inflationary pressures. If business expands more revenue can be obtained even though the tax base is lower, for the tax base broadens from the creation of more jobs and more taxable property. Canada seems to have proved this basic theory.

FARMERS LOSE BY FAILURE OF GOVERNMENT TO REDUCE TAXES

We need not rely upon statistics from Canada to prove the direct relation between prices and taxes. Hark back to the days following World War I. It was not until 1924 that Congress began cutting taxes on a broad scale. The "bust" in 1921–22 hit the farmer especially hard. He is in better shape today primarily because he has had record crops, record production per man and per farm, and the need for his products has been exceptionally high. He does not have the same farm indebtedness on real and personal property. However, he will be the first to feel another depression, and the wage earner's plight will quickly follow. After a long delay after World War I three tax-reduction acts were passed in a row: the Revenue Acts of 1924, 1926, and 1928. These acts were followed by the greatest prosperity boom—without price inflation—in modern times. National income increased by $20,000,000,000 over 1922. Pay rolls in factories, cash farm income, every phase of our economy established new and healthy records. Tax reduction netted American farmers $2,000,000,000 as the economic effect of three tax reductions after the First World War. It can be done again, and not only the farmer, but the entire Nation will benefit, through passage of bill 4790.

Mr. GEARHART. Mr. Chairman, I yield 20 minutes to the gentleman from Ohio [Mr. JENKINS].

Mr. JENKINS of Ohio. Mr. Chairman, I have a great deal of sympathy for the position taken by my distinguished colleague from Georgia [Mr. CAMP], who has just preceded me, in his discussion with reference to excise taxes. There is no question but that we must reduce excise taxes. This is a major task and belongs in a category of its own. The Ways and Means Committee decided that it would be wise to consider only personal income tax at this time. Tax legislation divides itself into about four categories, as follows: Personal income taxes, corporation income taxes, excise taxes, and estate and gift taxes, and so forth. The Ways and Means Committee should by all means, in the near future, give consideration to the matter of reducing excise taxes on some of the commodities the gentleman named and some other commodities. I should be glad to give consideration to the reduction of taxes on telegrams, telephone calls, railroad tickets, ladies' handbags, medium-priced cosmetics which are in great general use, and other commodities.

The bill that is before us today has come before us in a most natural way. It is inevitable that we have this bill. The country is looking to Congress for tax relief. I am going to give you briefly the progress of this legislation.

Last year, in the first part of the first session of the Eightieth Congress, the Ways and Means Committee brought in a bill just like this bill in principle and in purpose, but not, of course, exactly like it as far as the rates and exemptions and so forth are concerned. We brought in what was then known as H. R. 1. H. R. 1 passed this House by a tremendous vote. It went to the Senate and passed by a tremendous vote. The President vetoed it. It came back and failed of passage in this body by a two-thirds vote. As you know it is a very difficult matter to pass a bill by a two-thirds majority over the veto of the President. The members of the President's party usually want to stand by their President.

At that time the President and those who were close to him took the position that there should be no tax reduction at all. I do not mean to imply that all the Members on the Democratic side favored that position at all, because I know they did not. However, the Administration itself took the position that it was not in favor of any tax reduction. Maybe that is not a bad position, and I am not condemning it, but the people of the country think we should have tax reduction. I am just stating historically what happened in connection with the progress of this legislation.

The people of the country, we thought, were demanding tax reduction, so when Congress came back into session we brought H. R. 1 back into the House again for consideration under another number, with a few amendments to it. What were these amendments? How did H. R. 1 differ from the bill that we passed a little later? There was no great material difference in principle; about the same amount of tax reduction was involved. I think maybe we gave some consideration to giving a little more advantage to those in lower brackets. One change that we made was to change the date when the bill should become effective. The first bill would have been effective January 1, 1947, while the second bill was to be effective on January 1, 1948. This second bill passed the House by a tremendous vote. It then went to the Senate where it was passed by a tremendous vote. It then was sent to the President who vetoed it. It came back to the House and we passed it over the President's veto by a two-thirds vote. Many Democrats must have voted to override the President's veto. What is the use now of these, or any of us straining at a gnat as we discuss this matter? Let us stand as we did when we voted to override the President's veto.

Many on the Democratic side, many of the leaders on the Democratic side, have heretofore taken a position in favor of tax reduction, and voted to override the President's veto. I do not find fault with my colleagues on either side with reference to their position on this tax matter. But let us place the responsibility where it should be. Who is responsible for this program? Who is responsible for our being here now? It was the action of the President of the United States in vetoing a tax bill. Of course he had a perfect legal right to do that. But no President in the history of the Nation ever vetoed a tax bill except Mr. Roosevelt, who on one occasion vetoed a tax bill with a great deal of gusto. That was the time that the famous incident of "Dear Alben" occurred. And President Roosevelt was at that time overwhelmingly overridden in both branches of the Congress by a two-thirds vote. That taught Mr. Roosevelt a lesson which he learned well enough not to attempt it again. No other President ever vetoed a tax bill except our present President, Mr. Truman. Why do I seem to speak so earnestly and with so much zeal on this question? I will tell you. Under the Constitution of the United States, the House of Representatives has been given some prerogatives above the President and above the Supreme Court and above everybody else. One of those prerogatives is the right to control the purse strings of the Nation. That is our right and more than that, it is our duty under the Constitution. That duty was given to us solemnly and up to this time, we have been able to carry that duty out with only one exception. And that was last year when President Truman intervened and exercised his veto. He took advantage of his right to veto a bill. It never was intended in principle that the President should veto tax bills. The House of Representatives and the Senate of the United States representing the people are charged with the duty of managing the finances of the country. It is not primarily the business of the President. His responsibility is to wisely and honestly manage the spending of the money that the Congress appropriates to him.

I am sorry that this bill may contain some provisions that will not permit some of you to vote for it. That is only proof that it is good legislation. You stand up one after the other and you

say, "I would like to do this but the amount of the reduction is too much," "Something else ought to be done." That only proves that this is good legislation and that it was carefully prepared and is fundamentally right, although it may not meet the desires and wishes of everybody concerned. I want to call to your attention again and I do not want to be obnoxious about it, but I want to put the responsibility where it belongs.

What is the reason that we have to consider tax legislation at all? What is the reason that we have to collect so much more in taxes now than we formerly did? Just before the last World War the national budget was about eight or nine billion dollars. The President now asks for a budget four or five times that much. What is the reason for all this increase? It was brought out yesterday that we have gone through a great war. Certainly we have, but that war has now been over for several years. But we still have in the White House and in the many other branches of the executive department of the Government an apparent irresistible tendency to spend money. That is the real trouble. I have said this on the floor repeatedly, and I challenge anybody today to point to a single instance when Mr. Roosevelt ever demanded economy. I will go further and say that you cannot show me where he ever even suggested that economy should be practiced. Nobody has ever met that challenge. I ask you again today, Where has the present incumbent at the White House ever indicated that he wants to save any money? Is there anybody who wants to stand up and tell me that Truman has orally or in writing ever advocated economy in Government spending? I honestly do not know of any instance. Why do I say with some degree of boastfulness that nobody will say that I am wrong? Reason with me while I ask you, Why is the President's budget this year larger than it was last year by several billions of dollars? Is the time ever going to come when anybody in this New Deal administration is ever going to try and save some money? Is it always going to be spend, spend, spend?

During the last 16 years nobody at the White House has ever said a word about economy. Now, we have to do something about this economy business, just as sure as you live. It would be small of me to say that the President shows his desire to spend by defiantly building that little balcony down there at the White House. That is a small item to refer to. I love my distinguished friend from North Carolina [Mr. DOUGHTON] because he has always stood for economy. He has been compelled to swallow a lot of extravagant expenditures that he did not like, and so have I; but, by nature, by reputation, by character, he is economical. If he were in the White House, he would not build that veranda. No, sir. He would take that money and pay it on this debt, and so would I. But the President is different. I say to you in all solemnity and sincerity that the President must show some economy, and if he does not we have little hope of reducing our national debt as we go along.

The President at this time has now recommended some tax reduction. He is now willing for it although last year he was against it. I wish to compliment the Secretary of the Treasury. When he comes before the Ways and Means Committee he indicates that he wants to do the right thing. I know that in his heart he does not favor this $40 suggestion that the President so "boyantly" recommends. Nobody in the Treasury has ever stood up and admitted that he is the father of this $40 idea. Just who is the father of it? Strange as it may seem I have heard that a woman is the father of that $40 idea. Be that as it may I do not chastize the Secretary of the Treasury for he should stand by the President. They owe him an obligation to stand by him or else resign.

Now, what kind of a tax expert is this President of ours? Is he a tax expert? Has he shown by his capacity since he has been in the office of President that he knows more about taxes than does the gentleman from North Carolina, [Mr. DOUGHTON], or the gentleman from Tennessee, [Mr. COOPER], or the gentleman from Texas, [Mr. RAYBURN], or the gentleman from Massachusetts [Mr. MCCORMACK], or Members on our side. Has he shown anything like that? If he has, why has not somebody stood up on this floor and defended the $40 payment completely and enthusiastically? Nobody has. The gentleman from Tennessee [Mr. COOPER] would not do it, because he is a scientific tax man and he is a good tax man and he knows whereof he speaks. The gentleman from North Carolina [Mr. DOUGHTON] would not do it. Nobody has done it. Never before in my experience in this Congress have I seen the President's party turn him down on his recommendation for taxes. They have done that in this case. Nobody champions the President's suggestions. He surely has not shown himself to be such a tax expert that any sound thinking Member of Congress should follow him should he veto this bill.

Mr. LANHAM. Mr. Chairman, will the gentleman yield?

Mr. JENKINS of Ohio. I yield.

Mr. LANHAM. Is there any real difference in the President's proposition of a $40 credit and raising the exemption to $700? Is there any real difference?

Mr. JENKINS of Ohio. Yes. I should be glad if the gentleman would ask some of the tax experts on his side of the aisle to tell him the difference——

Mr. LANHAM. I am asking you to tell me.

Mr. JENKINS of Ohio. Well then, I will answer the gentleman. Taxation is a science. It is not a hodgepodge. You cannot say, "Eeny, meeny, miney, mo, $40." It does not work that way. Taxation is a science; Congress has built up a symmetrical tax structure, and tax experts recognize certain principles in taxation. One is that all taxes must be just and fair, and they must be general in their application. For many, many years men on both sides of the aisle have recognized what we call progressive taxation, graduated taxation. That is the only way I can explain that this provision is not in consonance with good tax legislation. In other words, we must make those pay who are able to pay. Whenever you adopt a scheme like this $40 pension it is almost childish. I dare say you cannot find a tax expert anywhere who will approve that suggestion of the President.

Maybe I have not answered the gentleman to his own satisfaction. He may be one of those who wishes to insist on the $40 across the board. Now I will give the gentleman another answer to it. Under our tax systems for many years we have given different rates and different advantages to certain people down in the lower brackets as against those in the higher brackets, but under the President's program a man gets a $40 credit and no more; the relief quits at $40. A person whose taxes amount to only $40 gets just as much relief as a man whose taxes amount to $400 or $4,000 or $40,000. Their is absolutely no sense to such a program. I believe that the man who only has a $40 tax to pay should have a much higher percentage reduction than the man who pays $40,000 in taxes. But a reduction of only $40 would not amount to anything to one called upon to pay $40,000 in taxes.

Mr. LANHAM. The gentleman has not answered my question at all as to what difference there is between a $40 reduction and a lifting of the exemption from $500 to $700.

Mr. JENKINS of Ohio. I have just told the gentleman.

Mr. LANHAM. The gentleman has not answered my question at all.

Mr. JENKINS of Ohio. I repeat, that nobody gets more than $40; that is all.

Mr. LANHAM. Suppose the exemption were raised, would anybody get more than $40?

Mr. JENKINS of Ohio. Certainly.

Mr. LANHAM. I do not follow the gentleman if the exemption were raised.

Mr. JENKINS of Ohio. I am not talking about just one exemption, I am talking about a whole symmetrical tax bill. I think I have answered the gentleman and now, if you please, I shall go ahead.

There are two important problems at stake in the consideration of this bill. I do not find any fault with those who say we should not make such a big reduction as is provided in this bill. That is a matter to be debated, a matter to be discussed. Many people are sincere in that belief.

We have heard a good deal about the effect of the program we have before us, two widely differing sets of figures as to the amount of tax reduction. But for the moment let me discuss the statement of my good friend the gentleman from Tennessee [Mr. COOPER] and my good friend the gentleman from Georgia [Mr. CAMP], who has just spoken. They say we are going to have to borrow money to pay taxes. I most respectfully and emphatically disagree with them, that we are going to have to borrow money to pay taxes; that is just not true at all. That is a very catchy statement because a lot of people do not stop to figure it out. The truth is that we are going to have plenty of money to do more than pay our expenses, and I am going

to prove that with the figures shown in the report.

Mr. GRANGER. Mr. Chairman, will the gentleman yield?

Mr. JENKINS of Ohio. I shall be glad to yield.

Mr. GRANGER. The gentleman spoke of his tax experts a short time ago. That is a thing that confuses me, how people can arrive at these two vastly different answers. Am I to understand that the gentleman has a group of tax experts that got the answer he wanted and that the Democrats had a group that got the answer they wanted?

Mr. JENKINS of Ohio. No; I can explain that. There is an important and a very good reason for it. The gentleman knows that the Treasury under every administration has always been very conservative. Their guess must go out to the country. When they make their guess it goes out to the country as the Treasury's guess, as the administration's guess, as the Government's guess. They have always underestimated. I have never found fault with that, but that is the fact, they have always underestimated. Here we are talking about the facts and we have got to deal with the facts, and we want the opinion of these other experts whose opinions have been more accurate time after time and upon whom we rely. They are employed for that purpose, employed by the Ways and Means Committee of the House and by the Finance Committee of the Senate, employed to give us the best basis for legislation, not for politics, not to save the administration, but what is best for now. Nobody knows what their politics is. As far as I am concerned I do not know how any of them voted or whether they voted, nor do I know where they live.

Mr. GRANGER. All the more I cannot understand how the gentleman from Ohio and the gentleman from Tennessee are so far apart.

Mr. JENKINS of Ohio. I do not know how far apart we are. Wait until I get through with these figures and then see what the situation is. Let us take first the fiscal year 1948–49. I have a chart here which I shall have printed in the RECORD at the end of this statement. I appreciate that it is not easy to get all that we might say about these figures into the RECORD, but we can understand each other as I point out these figures to you. Here are the estimated receipts for 1946. They are given by our experts. I do not have room to put the figures of the Treasury on the blackboard, but they are in the report and the same explanation would follow.

Here are the estimated receipts for 1948 as given by our experts, and they have proven to be more accurate always than the other estimates.

Mr. CRAWFORD. Mr. Chairman, will the gentleman yield?

Mr. JENKINS of Ohio. I yield to the gentleman from Michigan.

Mr. CRAWFORD. In using the term "our experts" does the gentleman mean the experts of the Joint Committee on Internal Revenue Taxation?

Mr. JENKINS of Ohio. I mean the Nation's experts in a legislative way, not that they belong particularly to our Ways and Means Committee.

Mr. LYNCH. Mr. Chairman, will the gentleman yield?

Mr. JENKINS of Ohio. I yield to the distinguished gentleman from New York.

Mr. LYNCH. In arriving at the estimated receipts what was the amount of the total personal income that the gentleman worked on? Was it $209,000,000,000?

Mr. JENKINS of Ohio. Yes; $209,000,000,000 which is different than the amount taken by the Treasury, and my answer. Why do we take that? The Treasury estimates two hundred billion. We have long since passed $200,000,000,000. The figures if issued today by the Treasury would, I feel, be up to $209,000,000,000 because that is what they are, and every safe prediction indicates that they are going to keep up at that rate. Here is what the President's estimate was.

Mr. FORAND. Mr. Chairman, will the gentleman yield?

Mr. JENKINS of Ohio. I yield to the gentleman from Rhode Island.

Mr. FORAND. I would like to know what the gentleman's authority is for saying that the Treasury is for saying that the Treasury would give us the figure of 209?

Mr. JENKINS of Ohio. I assume they will tell you the truth. I did not say I spoke to or for the Treasury.

Mr. FORAND. The gentleman stated that if you called up the Treasury they would give you this figure. I want the gentleman's authority for that.

Mr. JENKINS of Ohio. I would have as much authority for it as the gentleman would have.

Mr. FORAND. I would not get the 209.

Mr. JENKINS of Ohio. Why not?

Mr. FORAND. Because I know that the gentleman would not get it either.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. REED of New York. Mr. Chairman, I yield the gentleman such additional time as he may desire.

Mr. JENKINS of Ohio. Mr. Chairman, there is no use quibbling about this. I maintain that the figure should be 209 billion, and my figures are based on that amount. This is not a fake figure. This is a figure that is wholly justified. Of course, I have not the time to go through all of the ramifications to show how it is justified.

Here is a figure that is also justified. The President's estimated expenditures for 1948 are $37,728,000,000. He estimated first either 35.7 or 37.5, and then increased it two or three hundred million dollars during the session. That is the kind of economy I am complaining about.

Here are the figures. This leaves a surplus of $8,762,000,000. Now, how do we propose to reduce the taxes here? Some say 6 billion, some say 7 billion, some say 7.1 billion. Why the difference? The difference is that they estimate in the year when the taxes are paid. You know, of course, that the heavy part of the taxes are not paid in the first part of the year. They are paid in the last part of the year. The estimated amount of taxes to be paid in the year 1948 between now and June is $1,040,000,000. This will leave a surplus in the Treasury of $7,772,000,000.

What will they do with that money? That money will carry over until next year, into 1949; but the Secretary of the Treasury has the power to pay on the debt any time he wants to. Any time he has surplus cash in the cash drawer he may pay on the debt, but he cannot pay on it when there is a President spending all the time and finding some other place to spend the money. Until we have cooperation and coordination, we will not have real economy. We are not going to pay our debt off very fast.

Let us take 1949. What are the estimated tax receipts for 1949? $47,317,000,000. The budget has already come up with a total of $39,669,000,000. It is much more than the budget last year. At that rate we will go into debt. That is why we will have to borrow money if we do have to do it. If the President spends more year after year, of course we are going to have to borrow the money. If he is going to spend $2,000,000,000 more next year than this year we might as well give up the ghost. But we have to do our duty, we have to economize and get the facts.

When we make this deduction there is a surplus of $7,648,000,000. This is the surplus for 1949.

Mr. FORAND. Mr. Chairman, will the gentleman yield?

Mr. JENKINS of Ohio. I yield to the gentleman from Rhode Island.

Mr. FORAND. How is the President going to spend money if Congress is not going to appropriate it?

Mr. JENKINS of Ohio. Because you fellows will vote with him.

Mr. FORAND. But you fellows are in the majority. If this Congress does not vote the money, the President cannot spend it.

Mr. JENKINS of Ohio. Certainly, that is all right, but he can run out and make a lot of obligations and bind the country, and the country feels obligated to carry on. I am one who likes to respect the President, and whenever the President makes a deal, I like to stay with him, especially if the honor of the country is at stake, and we had to do that many times under the Roosevelt administration, and many commitments were made on matters we did not know anything about. We trusted him, and now we find out that things were not done the way we thought they were.

Mr. REED of New York. Mr. Chairman, will the gentleman yield?

Mr. JENKINS of Ohio. I yield to the gentleman from New York.

Mr. REED of New York. There is nothing to prevent the President from borrowing, is there?

Mr. JENKINS of Ohio. No; that is right. He has a right to borrow under laws already passed, and sell bonds, and so forth.

Now, let us go back where I was. There is a good round $7,648,000,000 of surplus, and here we take $7,100,000,000 off of that. Now then, that is the biggest tax-reduction figure that we can get from these computations. I could slip a figure in there and say $6,000,000,000, or I could take $6,000,000,000 for this year and $6,000,000,000 for next year and divide

the 2 years, but we wanted to be fair, because this is what we are going to have to pay. This tax reduction is going to come off just about that time in 1949. Deducting this figure of $7,100,000,000, we will have a balance. That will give us a balance of $548,000,000 saving in money. We get this much of a balance without cutting anything from the President's budget. We would save that much even if we paid out everything that the President has been able to think of. Now, how much money are you going to save? Do you think we will save any? Someone said here yesterday, "We have not saved any in the last session of Congress." But some other person said, "We saved $6,000,000,000." You heard the gentleman from New York, JOHN TABER, the chairman of the Committee on Appropriations, say yesterday on this floor that he was going to cut the budget this coming year by $4,500,000,000. Add $4,000,000,000 onto this figure of $548,000,000 and you will have approximately $5,000,000,000 that they ought to pay on the debt, and that should be a handsome payment on the debt. I would like to go down with you some day, Mr. DOUGHTON, to the Treasury and say, "We expect you to pay that amount on the national debt because it is a surplus. How much more will be there? Well now, do you think that we are going to spend $6,000,000,000 on this foreign business, that we call this Marshall plan business? Your guess is just as good as mine. But, we are not going to spend that $6,000,000,000 this year on this Marshall plan. I repeat, no; we are not. The temper of the House is not going to stand for it, and you on that side are not going to vote for it, either. It will not be that much. Suppose it will be $3,000,000,000. Add the $3,000,000,000 which you will thus save to the $548,000,000 and you will have quite a surplus. What else will we do? We do not know. We do not know if we are going to spend all these items that the President has in his budget, and we surely know that the gentleman from New York, JOHN TABER, and his crowd will save us three or four billion dollars. So, I would not be surprised; in other words, I will be very much disturbed and disappointed if we do not have a balance of about eight or ten billion dollars. Of course, we cannot have this much if we do not try to economize and if we give it away.

Now, you talk about this business of borrowing money with which to pay taxes. Let us be fair and take the figures, and take the honest-to-God figures, and be courageous. Let us go ahead and cut some taxes. I would prefer to have the amount a little less than it is, but we cannot change this bill. What will you take out? You surely do not ask me to take away from these poor people at the bottom $1,000,000,000. You do not want me to do that. You do not want me to take out the community-property program that the country is demanding, do you? You do not want me to take off from the blind, do you? You do not want me to take off for the old school teachers and elderly people who get some consideration in this bill? What do you want me to do? Well, I will tell you. I would like to cut, too, but we cannot cut in a reasonable way unless we just cut the tree clear out of shape. I want to see a symmetrical system built and I want to keep up the economic strength and then have a well-balanced budget and pay off on the national debt, and we will reduce taxes, and business will be satisfied and the people will be happy.

Now I yield to the gentleman from Michigan.

Mr. CRAWFORD. I think the gentleman should point out—and I think I am correct in this—that included in the $39,669,000,000 is this $4,440,000,000 which the President put in the budget, anticipating that the Congress would probably support that amount for foreign aid.

Mr. JENKINS of Ohio. Yes; and $1,500,000,000 besides that. But, it never has been voted on yet, and we are going to save some money on that if I guess right.

Mr. WINSTEAD. Mr. Chairman, will the gentleman yield?

Mr. JENKINS of Ohio. I yield to the gentleman from Mississippi.

Mr. WINSTEAD. This includes an additional $600 for the blind, does it not?

Mr. JENKINS of Ohio. Yes.

Mr. WINSTEAD. Take the physically handicapped who are barred from civil-service employment, why were they not included in that?

Mr. JENKINS of Ohio. Well, sir, my good friend, it is a long story, but let me give you this story. When the social-security bill was passed in 1935—that is a long time ago and many of you were not here then—that was a great piece of legislation. That legislation came up from the President of the United States, Mr. Roosevelt. And, do you know, he did not have a provision in that proposed legislation making any provision for the blind. There was no provision in there for the blind. I want to claim the honor of having such a provision placed in the bill, if you will permit me to do so without seeming egotistic, for it was largely by my efforts on this floor and in the Committee on Ways and Means that the blind got the first legislation giving them a pension. I am willing to give the handicapped some attention and give them some consideration, but it is a big, long story. You go back and start with the question of how much you will give a man with one leg off or with two legs off, or with two eyes gone. Where are you going to stop? That is a serious situation to contemplate.

Mr. ROBSION. Mr. Chairman, will the gentleman yield?

Mr. JENKINS of Ohio. I yield to the gentleman from Kentucky.

Mr. ROBSION. When the social-security bill was under consideration, your humble servant that is speaking now offered an amendment to that bill to give a Federal pension of at least $25 a month to the needy blind and the needy totally and permanently disabled. Nearly all the Republicans voted for it, but our Democratic friends, who had a three or four to one majority in the House at that time, stuck to their bill and defeated that amendment.

Mr. JENKINS of Ohio. The gentleman is right.

Mr. ROBSION. After that, the gentleman from Ohio did the very thing he told you he did.

Mr. JENKINS of Ohio. When the Senate took up the legislation it inserted my amendment, word for word, in the bill, and it became part of the law. It was a long battle and it took a lot of work and a lot of trouble to get the provision for the blind into that bill. I hope we may sometime be able to do something for the handicapped.

For the benefit of the Members, Mr. Chairman, and for ease of reference, under permission previously secured in the House I include these blackboard figures in tabular form, as follows:

[In millions of dollars]

	Fiscal years	
	1948	1949
1. Estimated receipts	46,490	47,317
2. President's estimated expenditures	37,728	39,669
3. Surplus before tax reduction	8,762	7,648
4. Tax reduction, H. R. 4790	1,040	7,100
5. Surplus after tax reduction	7,722	548

Mr. KELLEY. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Fennsylvania?

There was no objection.

Mr. KELLEY. Mr. Chairman, during this period when there is so much discussion of tax reduction and tax relief for low-income groups, it is a good time to reflect upon the status of a group that has been entirely neglected in the last few years. This is the group over 65 years of age who come under the social-security program and those who have never been covered by the program.

The time has long since passed when the benefits for these people should be increased. It is difficult to understand how those responsible for tax relief could overlook these vast numbers of our aged and dependent people. The increased cost of living has placed their meager income in the bracket of the almost nonexistent.

It is incumbent on the Congress to give some relief here and to do so without delay. If it is not advisable to increase social security payments and broaden the coverage, then let us make some other provision for these people. It is hard to imagine that they can keep their bodies and souls together, as matters now stand. I know I have had many come to me with tears in their eyes, appealing for help, and I am just one Member of Congress and not even on the committee with jurisdiction over such legislation. Surely it is the same with every other Member of this body, and I take this means to urge the committee to give immediate attention to the needs of this group.

Mr. DOUGHTON. Mr. Chairman, I yield 20 minutes to the gentleman from New York [Mr. LYNCH].

Mr. LYNCH. Mr. Chairman, the enactment of the Knutson bill into law means the wrecking of the Marshall plan

for foreign aid and rehabilitation and the certain weakening of our national defense. These results will follow as surely as night follows day. When you vote for this bill it seems to me that it is a vote either for the sabotage of the Marshall plan and the crippling of national defense or for an uncontrolled inflation that will pay off our Government bonds with 50-cent dollars or less. Mark well my words. Those who vote for this bill will go down in history as the hatchet men of the Marshall plan.

The majority is assuming a cut in Federal expenditures of two or three billions in the President's 1949 budget. We all want to see expenditures cut to the lowest amount consistent with the efficient operation of our governmental functions on the domestic scene and sufficient to accomplish effective aid on the foreign scene. We can judge from the experience of the past year how successful the Congress may be this year in making substantial reductions below the President's budget of $39,700,000,000.

You will recall that with great fanfare it was declared last year that the House would cut the President's budget by $6,000,000,000. The legislative body at the other end of the Capitol was not so enthusiastic and limited their boasts to four and five-tenths billions. We were told, during the course of hearings on the present bill, by the Director of the Budget, that actually the expenditures of Government for fiscal 1948, instead of being reduced below the President's budget, will exceed the original estimates by $200,000,000 by June 30 of this year. I know that the majority exerted every effort to fulfill their boast of drastic reductions in the 1948 budget, but the result was the verification of the accuracy of President Truman's estimate on expenditures during the present fiscal year. With that experience in mind, is there any reasonable ground for belief that in fiscal year 1949, which commences on July 1, 1948, that the majority will be able to cut expenditures $3,000,000,000, or even $2,000,000,000? Upon both these assumptions they predicate a surplus to justify the tax loss the Government would incur under this bill.

Assuming an inflated personal income of $209,000,000,000 in calendar year 1948 and assuming a cut in the President's budget of two billion, it is claimed by the proponents of the bill that there will be then a surplus of $2,500,000,000 which can be paid off the national debt. Let us find out the basis for such an assumption and then determine, as practical businessmen, whether we can take the financial risk involved.

Personal and corporate incomes were as follows—and these figures are furnished me by Mr. Colin F. Stam, Chief of Staff of the Joint Committee on Internal Revenue Taxation:

First half 1948:	
Personal	$212,000,000,000
Corporate	31,000,000,000
Second half 1948:	
Personal	205,000,000,000
Corporate	25,000,000,000
First half 1949:	
Personal	195,000,000,000
Corporate	20,000,000,000

You will note that the first half of 1948 is the anticipated high-water mark. At the hearing I made special inquiry of the joint staff's economist as to whether this $212,000,000,000 personal income for first half of 1948 was due in part to inflation and not to real productivity, and I was advised in the affirmative. This inflation is likewise reflected in the average of $209,000,000,000 for calendar year 1948, so it must be evident that for this bill to work out successfully, we must have either or both continued inflation or a reduction in Government expenditure below the President's budget, which the majority tried to effect in this present fiscal year and failed miserably. I might state here that the estimate made by Secretary Snyder with respect to personal incomes, and assuming that a determined effort is made to stem inflation, is $200,000,000,000. Will we hold the line against further inflation, or will we—as we must under this bill—hope for and encourage further inflation so that total personal incomes will hold to the swollen $209,000,000,000 figure.

Under the Republican theory that when this bill passes, assuming $209,000,000,000 of personal income and a $2,000,000,000 reduction in Government expenditures, there will still be a $7,100,000,000 tax reduction, resulting in a $2,500,000,000 surplus. Let us look at the second half of the proposition, viz, reduction of $2,000,000,000 in expenditures. Can the Republicans do more cutting on the President's 1949 budget than they did on the 1948? I doubt it. Seventy-nine percent of the 1949 budget of $39,700,000,000 goes to five big functions: First, national defense; second, international affairs; third, veterans affairs; fourth, interest; fifth, tax refunds. Let us take them in reverse order. Tax refunds—are we not going to pay the claims of persons who have proper tax claims against the Government? Are we going to tell the taxpayer whose withholding collections exceeded the tax due, "We are sorry. We can't pay your claim. We must reduce taxes before we pay claims." What about interest on War Savings bonds—can the interest be cut down or can we fail to pay interest in order to have a tax cut. I think not. What of the veteran? Are you going to cut down on the President's estimate of what the veterans' program requires? If so, what becomes of the recent announcement that the bill to increase subsistence pay and on-the-job training pay for veterans will come before the House this very week. So thus we come to national defense and international aid. There is where the two or three or more billions of dollars must be cut, if you put through this bill. You cannot cut anywhere near two or three billion dollars on the 21 percent of the remaining budget. You tried last year and failed. You cannot do it this year. Your cut, if any, must come in national defense or the Marshall plan. Every dollar that you fail to give to the effective implementation of the Marshall plan is a dollar that you must needs give to national defense in payment of your folly. Every dollar that you fail to give for the needed rehabilitation of western Europe and China is going to be spent manifold, not alone in money, but mayhap again in sweat and toil and blood. I regret that I cannot entertain the hope that the Republican majority will place our national defense and foreign aid, which is another form of national defense, above the political expediency of a tax-reduction program in a Presidential election year, when we in the House also run for reelection.

I call your attention to an article that appears in today's New York Herald Tribune, a strongly Republican paper. It is entitled "Real Issue in the Tax-Bill Debate Is Viewed as Russia's Cold War." The article reads as follows:

REAL ISSUE IN THE TAX-BILL DEBATE IS VIEWED AS RUSSIA'S COLD WAR—MARK SULLIVAN SAYS THAT, EVEN THOUGH WE MAY NOT LIKE IT, WE MUST GIVE AID TO EUROPE, AND THIS RAISES ISSUE OF NO TAX CUT

(By Mark Sullivan)

WASHINGTON, January 29.—The House is debating a tax-reduction bill formulated by the Republicans, with the practical certainty it will be passed early next week. From that point on, developments can only be estimated. The bill as passed by the House will be changed in the Senate. If the bill ultimately passed approximates the present House measure, President Truman is likely to veto it. Throughout the process there will be further complications. Democrats in Congress, reluctant to make a record which looks like outright opposition to any tax reduction whatever, may propose or endorse a measure not greatly unlike the one now before the House but with the amount of the reduction much smaller.

Somewhere along the line—probably when and if there is a veto and Congress is debating whether to override the veto—the basic question will come to the front. This is, should there be tax reduction at this time?

Tax reduction is to be distinguished from tax revision. Tax revision is a need crying to heaven. The structure and details of the existing tax laws, as distinguished from the amounts laid and collected, are a monstrosity. Among other harms, too complex for discussion here, it puts difficulty in the way of small businesses growing and otherwise creates a motive for them to sell their businesses, hence to make big businesses bigger. However, tax revision as such is not pertinent here. What is before us is tax reduction and the amount of it.

BARUCH'S PROPOSAL

A school of thought which holds tax reduction at this time to be unwise is reflected by, among many other thoughtful persons, Mr. Bernard M. Baruch, who says tax reduction should be postponed for 2 years at least. His recommendation on this point is one in a program of related steps designed to meet what he called the Siamese twins of our over-all problem—the stopping of inflation coupled with aid for European recovery.

Our over-all problem begins with our relation to Russia. The leaders and government of that country are conducting a "cold" war upon us—meaning, as forthrightly described by officials of our Government and as coming to be recognized by our people—an everything-short-of-shooting war. For meeting this war we need to be strong in every respect, including financial strength on the part of our National Treasury.

The need for financial strength is double. For the economic and ideological war that is actually on we need financial strength in order to aid European countries toward economic help. We want them to have economic help in order to enable them to resist the advance of communism and Russia domination across western Europe towards us.

We need financial strength for a related purpose, to the same end of defense against the Russian threat to us. We need it, that is, for military preparedness. Not only must we take into account the possibility that the everything-short-of-shooting war may come to a stage which includes shooting. Further than that, military strength on our part is a deterrent to the Russian threat even so long as it remains economic and ideological. If the Russian and Communist heads felt that we were militarily weak or were likely to become so, they would already have been bolder and would have advanced farther.

There is a phrase used by lawyers to forestall alternative contingencies, "and/or." But in our resistance to Russia and communism, there is no "or"; the word is "and." At one and the same time we must lay out money for European recovery and for strengthening our Military Establishment.

AIR POLICY REPORT

The latter need was stated explicitly and starkly early this month by a group of distinguished citizens whom President Truman had appointed as an Air Policy Commission. Their report, entitled with somber emphasis, "Survival in the Air Age," said that if we are to have relative security against atomic air attacks we should spend on our air forces in 1948 and 1949 the amount of $1,300,000,000 each year more than now planned in the budget. The report added, "The Air Force is inadequate even for this (period) when we are relatively free from danger of * * * attack."

Meanwhile, the need of funds for aid to Europe is essential to defense against the economic and ideological war already on. We may not like it, we may see the disadvantages of it; we may argue over the amounts and the methods of administration, but we must go on with it and probably enlarge it.

Whether, in this condition, we should reduce taxes, and if so how much, or use the whole of any surplus revenue for strengthening the Treasury or for reducing the national debt, is the real base of the debate now going on in Congress.

Mr. Chairman, thus far I have confined myself to the statistics and optimistic assumptions of the Republican majority. Very briefly I shall give you the contrast as I see it from the minority view.

Briefly, we base our position on the Treasury and Bureau of the Budget analyses that the personal incomes for 1948 will approximate $200,000,000,000, assuming the holding of inflation within present confines. On that basis and assuming no cut in the President's budget, at the end of June 30, 1949, the Government would be in the red by $2,100,000,000. Imagine in the years of greatest national income, that the Government would have to go out to borrow money in order to reduce taxes. It is just too fantastic. It is contrary to every sound fiscal policy. It is dangerous; it is imperiling our national solvency; it is jeopardizing the earnings of 85,000,000 American citizens who, during the war, patriotically invested every thin dime they had in war stamps and war bonds. It is almost unbelievable that any tax proposal such as this would be advocated by responsible legislators that would produce a budget deficit and an increase in the public debt at a time when the country is not at war, where personal and corporate incomes are at their highest, and where unemployment is at its lowest ebb.

From all estimates, these high personal and corporate incomes will not continue if we control inflation. It is estimated that personal incomes will drop from an estimated $212,000,000,000 in the first half of 1948 to $195,000,000,000 in the first half of 1949, a decrease of $17,000,000,000, which means a loss in income to the Government of approximately $4,250,000,000. Corporate revenues are anticipated to drop from $31,000,000,000 in the first half of 1948 to $20,000,000,000 in the first half of 1949, a decrease of $11,000,000,000, a revenue loss to the Government of approximately $2,750,000,000.

Again repeating the figures so that you may note the downward trend:

[In billions of dollars]

Calendar year	Personal income	Corporate profits
1948 (first half)	212	31.0
1948 (second half)	205	25.0
1949 (first half)	195	20.0

These figures were officially sent me by the counsel for the Joint Committee on Internal Revenue Taxation and are partially set forth in the majority report. They lead to the inescapable conclusion that the downward trend of personal and corporate income will soon be upon us. For every $4,000,000,000 loss of national income there is a $1,000,000,000 loss in Government revenue.

This shows that instead of the estimated deficit under the Knutson bill the deficit will be increased to $4,000,000,000. If there is a falling off of 10 percent of the estimated personal incomes there will be a deficit of $6,000,000,000, and if there is a falling off of 15 percent there will be a deficit of $8,000,000,000 instead of the original anticipated deficit of $2,500,000,000.

Therefore, if we pass this bill—and assuming no reduction in the President's 1949 budget—at the end of June 30, 1949, we will have a deficit of $2,100,000,000, according to the Secretary of the Treasury, or a small surplus of $500,000,000, according to the figures of the majority, to pay on the national debt. What will happen to the country after July 1, 1949, or do not the Republicans feel that they will have any responsibility at that time?

The CHAIRMAN. The time of the gentleman from New York has expired.

Mr. LYNCH. Mr. Chairman, I ask unanimous consent to insert the remarks of the gentleman from New York [Mr. KLEIN] on this subject at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. KLEIN. Mr. Chairman, I have listened to the debate on this soak-the-poor tax proposal with increasing amazement.

So far as I can discover, the gentlemen on the other side want to reduce taxes, reduce the debt, reduce prices, reduce inflation, and reduce everything except corporation profits, all at the same time.

The Republican Party has tried to draw an analogy between a family budget and a governmental budget. It cannot be done, because they are two different things, but there are points of comparison.

Suppose for a moment, Mr. Chairman, that you are just a private citizen working for a living, and not too good a living, with a big family. Almost imperceptibly you slip into debt. Along comes the opportunity of a lifetime, but just for a limited period. For say 5 years you have a guaranty of an income just double what you are making. When it ends it ends, and you have to go back to the old income.

Now, if you are a smart and prudent householder, Mr. Chairman, you will pay off your debts, increase your savings, pay your insurance premiums in advance, and maybe pay cash for things you absolutely have to have, even if it means a little squeezing and cutting down on luxuries. At the end of your 5 years of clover you are prepared.

THE PRODIGAL SON

Your debts are paid. You have money in the bank. You are ready to return to the old inadequate income free of worry and able to work toward a secure old age.

With this bill, Mr. Chairman, you are proposing that the American people do just the opposite of what prudence tells us we should do.

You are willing to play the role of the prodigal son, to spend our substance and let our debt ride.

This is not the time to cut taxes.

This is the time to cut debts.

We know that right now the national income is the highest in all history. We also know that the cost of living and corporation profits are the highest on record.

How long will it last?

We do not know. I do not know, you do not know, the wisest men in our land do not know.

We do know that we have a staggering debt load—a debt which many of the Republican who now support this bill said would smash our economy.

Why have they changed their minds? Is it because retirement of the debt would mean that some people who are receiving a comfortable income from investments in Government securities would have to find new places to put their money?

NO END TO GREED FOR PROFITS

Is it because the big corporations, the wealthy money barons, the bankers and merchants and manufacturers have no end to their greed, and hey want more and more profit, less and less responsibility for government?

Again, I do not know the answer.

I do know that not one argument advanced in support of this bill makes sense. It is inflationary; it is against public policy; it is inconsistent with high statesmanship and even good business methods; it discriminates against the poor and gives special benefits to the rich.

If the Republican leadership really wants to help the great mass of our people, then send this phony tax-reduction bill back to committee to die, and bring out instead a real price-control bill to stop inflation, reenact the excess profits tax, raise minimum wages to 75 cents

an hour, and repeal the Taft-Hartley Act just for a start.

Mr. DOUGHTON. Mr. Chairman, I yield 15 minutes to the gentleman from Rhode Island [Mr. FORAND].

Mr. FORAND. Mr. Chairman, I am one of those who has for many months been urging a reduction of taxes in this country with the one proviso that the tax reduction be made so as to help those little people who have not enough left today to meet the needs of their families. Proof of that fact lies in the introduction last March of my bill, H. R. 2577, to increase exemptions from $500 to $700 for all taxpayers and their dependents. This was before H. R. 1, the first Knutson tax bill, was brought to the floor.

I followed that up with an expression of my views when I offered a motion to recommit the second Knutson bill, H. R. 3950. In the hope that my colleagues would give some study to the matter, I introduced, last July, in behalf of the gentleman from Michigan [Mr. DINGELL], the gentleman from Pennsylvania [Mr. EBERHARTER], and myself, H. R. 4405, proposing a different approach to tax reduction.

In considering the question of income-tax reduction we should bear in mind the inflationary spiral now prevalent in this country. The over-all effect that a tax cut will have on prices people will have to pay for the things they purchase merits our most serious consideration.

An over-all tax reduction at the present time would means billions of dollars added to the purchasing power of the people; it would mean billions of dollars in the stream of commerce in this country at a time when people with money are bidding against one another for goods that are in short supply.

I think we ought to note just where the bidding comes from. It does not come from the 29,000,000 taxpayers whose weekly pay is less than $20. Nor does it come from the other 14,000,000 taxpayers whose wages are from $20 to $27 a week. And very little of this bidding up of prices comes from the 9,000,000 who earn from $27 to $77 a week.

In other words, the bidding comes from the 1,700,000 whose annual income is above the $4,000 mark, and it is for that reason that I stand on record and shall continue to do what I can to see that the tax on the low-income taxpayer is relieved to a marked degree. I am urged to move on in that direction, particularly now that we have the result of the studies made by the Bureau of Labor Statistics recently, which show that for a family of four the minimum budget requirement in the city of Washington, for example, is $3,562 a year.

I am not going to go into a great deal of detail as to how much deficit financing the bill under consideration will mean, because that has been discussed at great length, but I concur with my colleagues on this side of the aisle in their statement that if the bill now under consideration should ever become law, as it is now written, there will be deficit financing, and, as the Secretary of the Treasury testified before our committee, at the end of the fiscal year 1949 we would be in the red by something around $2,000,000,000. You know and I know that if we are short $2,000,000,000 in budget revenue, that means an increase in the public debt by that amount. I am seriously concerned regarding that point. I think that we should pay a reasonable amount on the public debt every year in order to get away from paying that enormous interest which is now running at the rate of $5,200,000,000 a year, and the sooner we eliminate the payment of such huge interest the sooner we will be in a position to reduce taxes for all concerned. But at the present moment I think that we should be reasonable. I think that we should strive to help those who need help, but that we cannot afford to lose any of the revenue.

The proponents of this bill argue that there is an actual need today for a tax reduction in the higher brackets in order to provide incentives for risk capital, for new business, and so forth. Now, what is the record as of today? Figures produced by the Treasury Department show that in 1939 there were 3,316,000 operating businesses in this country. That dropped during the war to 2,860,000 in 1943. In 1945 there were 3,134,000 operating businesses. In 1946 there were 3,503,000 operating businesses. As of June 1947 there were 3,783,000 operating businesses, an increase in the period of 1 year of 200,000 new businesses. Are people scared? Proponents of this bill talk about the bad effect that the proposed reinstatement of the excess-profits tax would have upon business. I hold in my hand here part of a survey that was made of 50 corporations in this country. That shows that the one that made the least profit in 1947, over and above its profit in 1946, after taxes—remember, after taxes—made a net profit over 1946 of 25.9 percent. I also have in this list another corporation whose profits, after taxes, in 1947 were 246.9 percent over its net profits, after taxes, in 1946. I do not think they are doing bad at all for themselves. Do you?

They talk about the lack of investment capital, and so forth, but according to a press release of the Securities and Exchange Commission dated January 13, 1948, expenditures for new plants and equipment of business in the United States, and that includes manufacture, mining, railroad transportation, and all others, amounted to $15,680,000,000 as compared with $5,200,000,000 in 1939.

We also have a very, very interesting statement made by the Secretary of Commerce before our committee on that point, and this I am going to quote verbatim. I take this from page 10 of the mimeographed copy of the Secretary's statement before our committee. It reads as follows:

> So much for the current and prospective rate of investment. Let me turn now to the question raised by your committee about the availability of funds. We have two sets of data which bear on this point. The first shows the various sources of savings which make the investment of the economy as a whole possible; that is, how much of the saving is made by persons, by corporations, and by governments. The second shows the various direct sources of funds used for investment by corporations; that is, the amount arising from internal sources and the amounts obtained from bank loans, bonds, common stock, etc.
>
> Table 3 on the following page presents the first set and shows the sources of saving and their use for investment purposes in 1947. Total investments amounted to $39,000,000,000, of which $30,000,000,000 was domestic investment referred to in the discussion of table 1, and the remaining $9,000,000,000 represented our net foreign investment. The foreign investment includes, it should be noted, $5,000,000,000 of goods financed by Government loans.

Then, going over to page 16 of this same document, we find the Secretary saying:

> In 1947, corporations expended $14,500,000,000 on plant and equipment, $7,000,000,000 on enlarging their inventories, and added roughly $5,000,000,000 to their trade receivables. This aggregate of $26,000,000,000 was financed by approximately $15,000,000,000 of retained profits and depreciation reserves, $4,000,000,000 of net new capital issues—that is, new issues in excess of pay-offs—and $3,500,000,000 of bank loans, as well as by a $1,000,000,000 increase in trade payables, a $2,000,000,000 increase in other payables, and a $1,000,000,000 reduction in liquid assets.
>
> In liquid assets, of course, is included Government bonds.
>
> It appears, therefore, that to finance $26,000,000,000 in capital requirements, corporations needed to raise not much over $7,000,000,000 through new issues and bank loans, nor were they compelled to reduce their liquid assets to a significant extent, as had been the case in the previous year.

What does business think of the future? The proponents of this bill seem to think that business is scared. Well, I will quote from that Republican bible, the New York Herald Tribune:

> Corporate profits for 1947 after taxes are estimated at about $17,000,000,000. In 1946 they were $12,500,000,000. In 1939 they were $5,000,000,000.

They failed to show this additional point, which is very interesting:

In 1932, the last year under a Republican President, corporate profits after taxes were zero.

In fact, corporate losses after taxes were $3,400,000,000.

That same newspaper, in its review of 1947, says that farm income in 1947 was $18,000,000,000, while in 1946 it was $15,000,000,000. But in 1939 it was only four and a half billion dollars.

They show that the gross national production for 1947 is about $235,000,000,000.

The national income for 1947 exceeds $200,000,000,000, and the final figure will probably reach $225,000,000,000.

Much has been said about lack of savings being available for capital. I have said repeatedly that your drop in savings is a real one. But let the New York Herald Tribune of January 2 speak on that subject. I quote:

> The 131 savings banks of New York grew from $5,500,000,000 in 1941 to $9,700,000,000 in November of 1947, an increase of 76.5 percent. The peak rate of increase for net savings deposits was reached in 1945 when increases amounted to $1,100,000,000. In 1947 the gain was only $470,000,000, or 48 percent below the gain in 1946.

This is attributable to people in the low-income groups withdrawing their

savings in order to meet their daily expenses instead of being able to continue banking savings.

How does business look upon the future? General Electric in 1947 exceeded all peacetime production records. Its sales in 1947 exceeded their estimated goal by $1,000,000,000. This is according to Charles E. Wilson, president of the corporation, and he estimates that 1948 will exceed 1947 by another 20 percent.

Westinghouse Electric reached a production peak of $800,000,000 in 1947 and expects greater gains in 1948. The entire electric manufacturing industry's total output for 1947 was 50 percent higher than it was in 1946. It was 40 percent above the peak war year of 1941 and surpassed 1940 production by 150 percent.

The machine tool industry had a volume of $300,000,000 in 1947, and expects to surpass that in 1948.

The freight car builders have set a target of 10,000 a month during 1948. On December 1, 1947, they had orders for 125,395 cars.

That, my friends, is the picture. So those of you who fear that your corporations will not fare well need not be afraid of imposing the type of excess-profits tax recommended by the President.

After all, we will collect excess-profits taxes only from those corporations that actually make excess profits. Someone has said, "You are going to hit only 22,000 of these corporations out of all the corporations in the United States, and that is discrimination." Let me tell you, those corporations in that category have been discriminating against the American people, and they deserve to be discriminated against, if that is your interpretation.

Mr. Chairman, I yield back the remainder of my time.

The CHAIRMAN. The gentleman from Rhode Island yields back 1 minute.

Mr. DOUGHTON. Mr. Chairman, I yield such time as he may care to consume to the gentleman from North Carolina [Mr. BARDEN].

Mr. BARDEN. Mr. Chairman, we have once again arrived at the time to discuss that all-important, universally unpopular subject of taxation. I think the American people expect some definite action and would like to have it as nearly unanimous as possible. Personally, I am going to vote for a tax-reduction bill. I would prefer a bill along the lines outlined by our distinguished colleague the gentleman from North Carolina [Mr. DOUGHTON], who for many years was chairman of the Committee on Ways and Means. I think his views are conservative, safe, and sound. I would like to see a reduction in the tax bill of from $3,500,000,000 to $4,500,000,000. I think the country is expecting that. I think we can safely rely on that much reduction and at the same time take care of the necessary expenditures of the Federal Government and pay an appreciable amount on our national debt.

Now, that opinion is the result of what reading I have done, the debates to which I have listened, and the best conclusions I can deduce.

I would be more disturbed than I am at this particular moment if I thought the majority side really expected this bill to go through as now written. I do not think it will. I do not think they expect it will. I think it will be changed and I think my friends will be greatly disappointed if it is not changed, because we cannot afford to get too close to the border line with our Government balance. We cannot play with red ink when we are financing a great Government.

As far as expenditures are concerned, I am not one of those who subscribe to the theory that the principal job of the Federal Government is to collect all the money it can from the people and then spend it. I think the Federal Government owes the same type of good common sense and economy in the handling of the people's money as is expected of any other trustee, real or theoretical. If we apply that principle and occupy the position of a trustee and practice the principles and rules that we are supposed to, Government expenditures can be reduced. I do not know how much is expected to be cut from our so-called foreign expenditures, but I do know that the American people are looking more and more each day and are lifting their eyebrows a little higher each day as they gradually realize how much a billion dollars is, and how many billions we expect to send abroad. It is highly probable that that amount will be considerably reduced. If so, then I think it is timely, I think it is safe, sane, and sound that the American people be given that credit on their 1948 tax bill.

For a long time I have been in favor of the community-property provisions. Up until this good hour it has been a very unfair arrangement in this country. This bill seeks to level that off. Of course, we are in favor of increasing the exemption, because at the outset that exemption was supposed to be what you might term bread and meat money—actual living costs. That was the idea that was back of that exemption, but we kept trimming it down until there is not one single man in this House who would dare to say he thought $400 or $500 was an honest exemption. It simply does not represent what we started out to do. So I am definitely in favor of those provisions.

I cannot go along with the $40-per-man proposition. I get some consolation out of the fact that the overwhelming majority of the democratic members of the Ways and Means Committee share that same view. I think the Republicans are of the same opinion, that that will not work and is not the best solution. So I cannot go along.

It looks now that some kind of a motion to recommit will be offered. I do not know just what it will include but, as I said in the outset, I want it to be sound; I want it to be safe for my Government; I want it to provide for what we may term a reasonable amount for application on our national debt; a reasonable reduction in taxes for the American people generally, because when we legislate in this body we do not indulge in class legislation. We legislate for all the American people.

I am not irritated at any particular group. I think there should be a tax reduction in the full sense of the word. Not knowing just what the motion to recommit will include, I may find myself voting for the bill offered by the majority, not with the idea that that bill is going to pass as is—I do not believe it will—but with the fervent hope that the bill will be put in line, that it will draw back just a little bit away from the danger line, and that it will provide for approximately $4,000,000,000 reduction. Then we will have that little safety margin we so often need and yet so seldom see a year or two ahead.

With the expression of these few views I hope we will continue this debate and when the bill comes back that it will be a bill in the general interest of the American people and provide for payment of our debt a reasonable amount, and provide some real tax relief because the American people are getting a little tired. They have been carrying a burden, they have been through a hard war, and they have paid a lot. So let us begin to take them into consideration and not get frightened over this subject of inflation. I do not know why the argument has turned so much on that point because in one breath some say that even though we turn loose some $6,000,000,000 or $7,000,000,000 to foreign lands for purchases in this country that will not produce inflation, yet in the same breath they say if we give our own taxpayers $3,000,000,000 or $4,000,000,000 credit on the payment of their taxes that will create inflation. My mind is not that limber; it just cannot take curves that sharp; I cannot reason that way.

I heard the statement of the gentleman from North Carolina [Mr. DOUGHTON], and I congratulate him on his very reasonable and sound views, and I hope we shall have an opportunity to express ourselves in favor of the propositon he has outlined.

Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. The gentleman from North Carolina has consumed 11 minutes.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, I yield such time as he may desire to the gentleman from Michigan [Mr. MICHENER].

Mr. MICHENER. Mr. Chairman, in the beginning may I say that I am in agreement with much that the gentleman from North Carolina [Mr. BARDEN], who has just preceded me, has said. This does not mean that I subscribe in toto to his remarks.

Mr. Chairman, in arriving at the attitude which I am to assume toward this bill, three questions present themselves: First, should there be Federal tax reduction at this time? Second, in case the first question is answered in the affirmative, then how much should the reduction be? And, third, how should the reduction be applied?

When President Truman vetoed two tax-reduction bills in the last Congress and opposed any tax reduction of any name or nature at this time, I gave much

thought to his objections. However, recent experience convinced me that the administration will spend all of the money made available by the Congress, and that there seems to be a perfect willingness on the part of the executive branch of the Government to take from the people as much tax money as possible with little regard for the ability of those same people to continue war taxes in peacetime.

With a national debt of $258,000,000,000, with a larger Presidential budget for the ensuing year than was even asked for in the current year, I am forced to the belief that unless the amount of money provided by taxes is reduced there is little prospect of any reduction of Government spending. Yes, I believe in reducing the national debt and the report of the Ways and Means Committee, buttressed by tax expert testimony as shown in the hearings, shows that there can be tax reduction without interfering with the essential functions of government and at the same time make payment on the public debt. In short, it seems to me that a case has been made for adequate money to support an efficient government with assurance that there can also be made a sizable payment on our national indebtedness.

The amount of tax reduction cannot be determined by guess and by golly. The tax experts in the Treasury Department have submitted income estimates for the coming year. The tax experts of the Ways and Means Committee of the House and the Finance Committee of of the Senate have also submitted estimates. The Treasury estimates are more conservative; however, the Treasury is naturally under obligation to the administration of which it is a part. The congressional experts are nonpartisan and serve as our advisers during Republican administrations and Democratic administrations alike. We have no knowledge as to their politics and no one will question their sincerity and their expert ability. Their job is to get the facts, whatever they are. Long experience has taught us that the congressional tax experts have over a period of years been more accurate in their estimates than have the Treasury experts. As I recall, the Treasury experts base their submitted figures on a contemplated $200,000,000,000 national income. The congressional experts base their figures on a prospective $209,000,000,000 income. Now somebody is wrong here and generally I believe in deciding honest differences of this kind on the side of caution. If the figures which have been presented on the blackboard by the very careful and efficient gentleman from Ohio [Mr. JENKINS], a member of the Ways and Means Committee, are correct, then there can be tax reduction and debt retirement, irrespective of whether there is any reduction in the President's budget. Members of the Ways and Means Committee, as well as the Appropriations Committee, give assurance that there can be a reduction in the President's budget somewhere between $2,000,000,000 and $6,000,000,000 for the coming year. Personally, the $6,000,000,000 mark seems too ambitious to me; however, certainly there can be a cut of $2,000,000,000 or $3,000,000,000 in the budget without curtailing necessary activities on the part of the Government.

Now I would like to go into further detail; however, time will not permit. My thought is that we will not be doing violence to a sound fiscal policy by reducing income taxes at this time.

I have always believed that in the levying of taxes ability to pay should be an important factor. At the same time, I realize that we all enjoy the blessings of our Government and that we should all be willing to contribute to its support. While the President is opposed to any tax relief at this time, he demands, however, that if any reduction is made everybody from the humblest wage earner to the wealthiest millionaire be given a deduction of $40 each in income tax. This violates the philosophy of levying taxes according to the ability to pay and is in every way unsound from a tax standpoint. It is purely a political suggestion. Give everybody an exemption of $40 and then make the business of the country pay the amount of that exemption in additional taxes. This economic royalist and soak the rich and the corporations talk just does not appeal to me. It is production, jobs, wages, and income that the American people must have if we are to continue as the greatest nation on earth, with our people enjoying a standard of living undreamed of in the Old World.

The tax bill now before us follows the ability-to-pay principle. Exemptions are raised. Taxes are reduced more on the lower income and less on the higher income. The graduated bracket system is invoked and I have heard no one criticize the soundness of this principle from a tax-collecting standpoint. Let us think these things through in a business way and eliminate all demagogic thinking.

Above all else we must be sure that tax legislation provides enough money to operate the Government, maintain our national commitments, and make a reasonable payment on the national debt the coming year. We have already had too much deficit spending. Indeed, that has been the habit since 1930. Each year the national debt is larger. Each year the spending on the part of the Government is greater and each year it has taken more red ink to balance the Treasury's books. This deficit spending must stop or our country will be bankrupt. It is easy to talk about cutting expenses but talk is not enough.

Mr. Chairman, within a few days the Congress will again be called upon to estimate the over-all budget for the coming year. This responsibility must be approached on a sound basis. Personally, I am opposed to promising something in the way of governmental spending that cannot be realized. This is not only unfair but it is also injurious politically. Let us be candid and only approve a budget that will do the job which must be done. The Congress in the end will be measured by what it does and not by what it promises. Possibly I am a little conservative. I know that the people whom I represent are demanding more economy in Government, and the more economy we practice the less money we will be compelled to take out of the pockets of the taxpayers and the more money we will have to apply on the national debt. All the people are asking of Congress is that it use the same judgment in carrying on the Government business that common, everyday, sound businessmen, big and little, use in their own affairs. I want to do that very thing. To this end I shall support this tax bill. Maybe the estimated reduction of present taxes is a little large. I am sure that many Members have this feeling. Be it remembered, however, that all tax legislation must originate in the House, and this bill is what the Ways and Means Committee gives us. Therefore, if we believe in tax reduction at this time we will vote for this bill and send it on its way to the Senate. In that body the bill will be reviewed, amendments will possibly be added, and eventually the bill will come back from the Senate. Then a conference committee will iron out differences, if any there be, between the House bill and the Senate bill. At that juncture we will all be given a final vote on the perfected bill. Feeling as I do, Mr. Chairman, I shall vote to send this bill on its way to the end that there may be an early vote on a final bill.

Mr. DOUGHTON. Mr. Chairman, I yield such time as he may desire to the gentleman from Pennsylvania [Mr. EBERHARTER].

The CHAIRMAN. The gentleman from Pennsylvania [Mr. EBERHARTER] is recognized.

Mr. EBERHARTER. Mr. Chairman, the gentleman from North Carolina [Mr. BARDEN], who just preceded me, made an observation which I think is worthy of attention. He said that should this present bill become law he would be fearful of the consequences. He also stated that he believed the majority who are sponsoring this bill would be fearful of the consequences if this proposal became law. I believe the gentleman from North Carolina is absolutely correct in his observation that the sponsors of this proposition hope that it does not become law in its present form, because I believe they agree with the minority that it would be bad for this country not only for this fiscal year but for ensuing fiscal years. If my memory is correct, it used to be that the Ways and Means Committee of the House was very jealous of its prerogatives in writing tax bills. It used to come before the country and before the House membership and say: "We have labored long and diligently on a bill and we think we have something that will stand up, something that is right, something that is good for the country." But the attitude seems to have changed. In effect they now say: "We will get a start on a tax-reduction bill, then we will let the other body perfect it."

I hope that when the Democratic Party takes over control of the House we will assume and resume the responsibility which correctly belongs in the House of Representatives of proposing

tax legislation that is sound, that is timely, that is equitable, and that will be to the best interests of the country as a whole. This bill is not timely, this bill is not sound, this bill is not equitable, and I intend this afternoon to devote most of my time in an endeavor to prove to you beyond any question of doubt that it is not equitable, that it is unfair, that it gives relief where relief is not needed and denies a proper amount of relief to those who are entitled to and need relief.

First, let me take a few minutes to review what occurred since the Republicans took over control of the Congress on January 1 of last year. There was introduced H. R. 1, that famous H. R. 1, that bill which is unlamented now. "H. R. stands for House of Representatives. It could also stand for "House Republicans No. 1" proposal because it was the first bill introduced by the Republicans in the Eightieth Congress.

We all remember the proposition of the 20-percent reduction in taxes across the board. It sounded pretty good; it looks like a fair proposition when you say 20 percent across the board; it sounds like everybody gets the same reduction. But when we began to examine the effect of a 20-percent reduction across the board, when we began to understand the import of it we were all astounded. We found and the country as a whole found, and the Republicans agreed with us, that it was unfair, that those in the high income brackets, the people who have a real high income, would have a reduction in the payment of taxes to a less sum than they paid before the war. I repeat, they would be reduced to paying less taxes than they paid in 1939. While on the other hand the wage earner, the white-collar worker, the professional man not in the high brackets, and the great majority of taxpayers would have been faced with the proposition of paying taxes amounting to several hundred percent greater than they paid in 1939, several hundred percent greater than they paid before the war.

What would be the result? We have a debt of $257,000,000,000 or $258,000,000,000. The result would be that the lower-income groups would be saddled with that debt and the higher-income groups reduced to paying less taxes than they paid before the debt was incurred. That was the result of the proposed 20-percent across the board reduction, House Republican proposal No. 1. It would have resulted in the veterans and their children being saddled with the war debt. The Republicans could not get that across. The Democratic Members of Congress and President Truman are entitled to the thanks of the people of this country, not only the people living today but their children, for rejecting that proposal.

Well, the second bill came along and they changed their original proposal a little bit. They made it a 10-percent, a 20-percent, and a 30-percent reduction instead of a straight 20-percent-across-the-board reduction. That was a little bit of an improvement, but it was not much of an improvement; because an examination of the figures again demonstrated that there would be the same end result, and they can get up all the charts they want and all the figures they want, and it would still be found that the 10, 20, and 30 proposition that was embodied in the second proposal of the Republicans had the same end result of putting the burden of paying the war debt on the shoulders of the veterans and the low-income groups; and reducing the tax payments of those in the upper income groups to close to the low level of 1939. So, for the second time President Truman and the Democratic Members of Congress are entitled to the thanks of the people for saving them from such unhappy consequences.

Now, Mr. Chairman, we are in the midst of considering their third attempt to reduce taxes, and I can show you, and that is going to be my endeavor right now, that the end result will be almost the same and in some respects worse. This bill makes three principal changes in the present tax structure. The first important change is the increase in the per capita exemption from $500 to $600. The second is the feature of permitting married persons to split their incomes and pay on the basis of one-half of the income of the husband, if he earns the entire income, instead of paying on the principal amount, thereby reducing him to a lower bracket. The third important change is the reduction in estate and gift taxes to the extent of about 50 percent. As for the first proposition, Mr. Chairman, I have no particular quarrel with that. I think the Democrats, as they have shown last year and this year, have consistently fought for a tax program at the proper time that would increase the exemptions above their present levels. It was not embodied in the first or second Republican proposals, and it is only embodied in here to a very slight degree because it has been forced on them. It is a recognized principle that if you increase exemptions a great deal of benefit does go to those who are not receiving high incomes. The Republicans were practically forced by the action of the President and the Democrats in Congress to include this increase of $100 in exemptions. But now as to the second proposal, a lot of people all over the country are hailing with a good deal of satisfaction the proposal to permit a husband and wife to split their total incomes and thus be placed in a lower tax bracket. I wonder if the people of this country know who it is that gets the benefit of that provision? Mr. Chairman, unless you make over $5,000 a year and are married, you do not get any benefit whatsoever from that provision. You do not get one cent tax reduction from that splitting provision. Who gets the benefit? When your income is at $6,000, $7,000, $8,000, $10,000, $12,000, $15,000, then you get a great benefit. But, as to those wage earners making $50 a week, $60 a week, $75 a week, those making $90 a week, if they are married, this provision does not help them in the slightest degree. The benefits go to those making more than that. So, in that respect, Mr. Chairman, the bill does not give any relief where it is most needed.

Mr. FORAND. Mr. Chairman, will the gentleman yield?

Mr. EBERHARTER. I yield to the gentleman from Rhode Island.

Mr. FORAND. I believe it would be wise for the gentleman to tell the House that 97 percent of the benefits of the split-income provision go to those with incomes in excess of $5,000.

Mr. EBERHARTER. I thank the gentleman. That is exactly correct. Ninety-seven percent of the benefits of this split-income provision go to people who make more than $5,000 a year. Of course, below that, there is no possibility whatever of getting any benefit.

Mr. GRANT of Indiana. Mr. Chairman, will the gentleman yield?

Mr. EBERHARTER. I yield to the gentleman from Indiana.

Mr. GRANT of Indiana. I think it might be well to point out as well that more than 70 percent of the benefits of the entire bill go to those with incomes under $5,000.

Mr. EBERHARTER. Yes, you give a few small crumbs to those in the lower income groups, but the big benefit goes to those making a lot of money. That is where the savings are.

Mr. REEVES. Mr. Chairman, will the gentleman yield?

Mr. EBERHARTER. I yield to the gentleman from Missouri.

Mr. REEVES. The gentleman represents a district in the State of Pennsylvania. Did not Pennsylvania last year adopt the community-property system for the express and avowed purpose of helping people with incomes exceeding $5,000?

Mr. EBERHARTER. I am glad the gentleman brought that subject up. That is correct. But what I am pointing out now is that the total effect of this bill is to give the big relief to the big-income group. That is true with respect to taxpayers living in Pennsylvania. It is fair in a lot of respects, because 13 States already have that provision. But I say that the benefits go to those who are above the $5,000-a-year income bracket.

Mr. REEVES. Does the gentleman feel that we should perpetuate this discrimination in favor of the 11 remaining community-property States and against the other 37 non-community-property States?

Mr. EBERHARTER. No, I do not say that. The split-income provision is all right, but at the same time the way it should be corrected is to put that provision in but make an adjustment of the percentages so that benefits to the same extent would also go to the lower income groups. This Knutson bill provision is an unscientific way of doing it, giving special relief just to one group of taxpayers.

Mr. REEVES. May I ask if the gentleman considers that it is scientific from the standpoint of tax theory to continue to require a married man in a common-law State to pay as much as 40 percent more Federal income tax on his income than a married man in a community-property State?

Mr. EBERHARTER. No; I said when you put any split-income provision in a tax bill you should make some provision so that those in the lower-income group can get commensurate relief with those in the upper-income groups.

Mr. Chairman, I think the main provision of this bill is a reduction in the

personal-income tax, the so-called 10-, 20-, and 30-percent reduction. What is the true measure of tax reduction? What is the proper yardstick? The proper yardstick of tax reduction, in my opinion, is how much more money will a taxpayer have to spend, how much will his spending money increase by reason of a tax reduction? How much will he have left after he pays his taxes? That is the true measure of how much relief is being given to the taxpayers of the country.

I call your attention to page 69 of the committee report, table 3. Under the Knutson bill, if a married man, who has no children makes $1,200 a year, he will get an increase in his spending money of $38 a year, a 3.3-percent increase, a little over $3 a month. It will give a man earning $2,000 a year $84 more to spend per year, $7 a month, a 4.6-percent increase in his spending money. The fellow making $4,000 a year is given $164 a year more to spend or $14 a month or about 6 percent more. Is not that a lot of relief to give to a man making $1,200 a year if he is married—to give him $3 a month; and to give the $2,000-a-year married man $7 a month more to spend; and then cry out to the country that we are giving relief where it is needed?

To the $10,000-a-year married man it gives $730 a year more to spend or 9 percent more, which is about $60 a month more.

But they take a little better care of the $25,000-a-year man, too. The fellow that needs it so bad—they give him $3,493 more a year to spend, which is $300 a month more, or 21.9 percent more. That is what they are giving in this bill. Yet they give the little fellow 3 percent more to spend. They give the $25,000-a-year man 21 percent more to spend. Let us go along to the $100,000-a-year man. They give him $18,163 a year more to spend, which is $1,500 a month—that poor fellow—he needs that money. They increase his spendable income by 49.3 percent. And yet they increase the $1,200-a-year man by 3 percent. Let me give you one more example. The $500,000-a-year man gets $62,590 a year more to spend, which is $5,000 more a month, or 67.6 percent more than he had before. Relief for the poor, relief for the fellows who need it? Relief for the married man, the workingman, or even the fellow making $5,000 a year? They give the poorest fellow 3 percent more and give the chap who has a $500,000 income 67 percent more.

We have a chart here in our report, No. 1 on page 68. Note that this is a chart by percentages. The line indicates percentages. Right here is the $1,000 figure and it goes on up to the $2,000, $3,000, $4,000, and $5,000 figure. Notice how the percentages go almost straight up when they get to the $15,000 and $20,000 bracket. The percentages with reference to those fellows go way up high. That is very graphic, Mr. Chairman, and very informative. This bill is truly a windfall for the wealthy and those who do not need relief.

Mr. KEAN. Mr. Chairman, will the gentleman yield?

Mr. EBERHARTER. I yield.

Mr. KEAN. How would the gentleman increase the percentage of these little men with $1,200 a year that he is crying about so much? How would the gentleman increase the percentage more than that 3.3 percent of this little man with $1,200 a year income that he is crying about so much? The figure is 3.3 percent, because we are taking away all his taxes by the Knutson bill. That is why the percentage is small. Do you want to give him a bonus?

Mr. EBERHARTER. Take the $2,000-a-year man. You give him only $84 a year or $7 a month.

Mr. KEAN. I was asking you how you could increase the fellow getting $1,200 a year about whom you are crying so much.

Mr. EBERHARTER. You can increase the exemption so that he would not have to pay any tax.

Mr. KEAN. He does not have to pay anyway under the Knutson bill. The little fellow you are talking about pays no taxes under the Knutson bill.

Mr. EBERHARTER. The chap making $2,000 a year gets the percentage that I have indicated.

Mr. KEAN. You are talking about the fellow with $1,200 a year income.

Mr. EBERHARTER. I am talking about the fellow making $2,000 a year.

Mr. KEAN. Now you are talking about a new one.

Mr. EBERHARTER. No, I said take the fellow with $2,000 a year income. You give him $7 a month relief. That is not much money. He should not have to pay any taxes. Instead of giving the fellow who makes $500,000 a year $5,000 a month more to spend, you should help the person in the lower income bracket. The people in the higher income brackets do not need such relief. This bill is worse than the original bill, H. R. 1.

Under H. R. 1, a man with a $50,000 income had his spendable money increased by 19.7 percent, but under the bill before us today, instead of having an increase in his spendable income of 19.7 percent, he gets an increase of 32½ percent. So as bad as H. R. 1 was, this is a great deal worse.

Take the $100,000-a-year man. Under the original H. R. 1 he got an increase of 34.2 percent, but in the bill under consideration today you are going to give him an increase of 49.3 percent. Oh, yes; they are giving relief where it is needed.

Mr. REEVES. Mr. Chairman, will the gentleman yield?

Mr. EBERHARTER. I yield.

Mr. REEVES. In the case of a man with a $100,000 income, the gentleman understands that in the community-property State he pays an income tax of nearly $13,000 less than in the non-community-property States.

Mr. EBERHARTER. Oh, yes. I appreciate that.

Mr. REEVES. So that a great majority of the reduction which he gets comes from the income-splitting feature, which the gentleman's State adopted last year. So that your $100,000 taxpayer is already safe.

Mr. EBERHARTER. That act in Pennsylvania was declared unconstitutional. You just confirm any statement I have made that all relief is going to the big fellow. It is not only the result of one provision of the bill; it is the result of a combination of all these provisions; adding a little here and a little there as you go on.

Mr. REEVES. I would like to make one more observation, if I may. The majority of that difference results from the income-splitting feature which, as I understand, the gentleman has endorsed in this debate.

Mr. EBERHARTER. Mr. Chairman, I call the committee's attention to the chart on page 71 to verify what I have previously stated with respect to reducing the taxation to nearly the level of the prewar period for those in the very high brackets, and increasing it by several hundred percent in the low-income brackets. The $4,000-a-year man, under the Knutson bill under consideration today, would pay 868.2 percent more taxes than he paid in 1939, before the war; whereas the millionaire would pay only 8.1 percent more. All the figures along the line show that the higher the income bracket the more his percentage of reduction is in comparison with what he paid in 1939. So here, Mr. Chairman, they are trying to reverse the historic principle under which taxes have been levied in the past, particularly under Democratic administrations; the principle of taxation based on ability to pay. That is a sound principle. That is a principle on which this country should operate. Let those pay who can afford to pay—pay their fair share. So this bill is wrong in principle. This House should not, by its vote, sanction a reversal of that principle which I have just mentioned. I cannot subscribe to a measure of this sort. It is unfair.

There are other provisions in the bill. I do not want to take up too much time. But, for instance, if you leave a large estate, if you leave $60,000 to your children, you do not have to pay any Federal tax, but if you leave more than $60,000 you will be taxed on everything you leave over $60,000. That is the present law. What do they do in this bill? Instead of making you pay as you did before you only pay on 50 percent of what you leave over $60,000. Is that relief for the poor? Is that an equitable thing? Giving, according to the Treasury, $245,000,000 more every year to those people who leave more than $60,000 when they die? That is not relief for the needy, Mr. Chairman. That is not relief for the needy. The benefits there go to those who die and leave more than $60,000 to their children or whoever they leave it to.

O, Mr. Chairman, there are lots of other provisions in here. This bill is not going to help those who need it. It is not going to help cut down the high cost of living. It is not going to reduce the inflationary spiral. It is giving the money where it is not needed. It is dictated solely by political considerations, political expediency. It will further devalue the dollar. The dollar is not worth very much now but it is certainly going to be worth less if this proposal should become law.

It is not going to contribute to better relations between labor and management. Union labor leaders know what this bill is doing. Do you think they are going to be less demanding for an increase in wages for the workingman when they know what this bill provides? They will say: "No; we will go on strike." That will retard production. This bill will not help increase production.

Mr. Chairman, this bill is untimely, it is unsound, it is not equitable, it should not pass, and I am certain it will never become law.

The CHAIRMAN. The gentleman from Pennsylvania has consumed 28 minutes.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, I yield to the gentleman from West Virginia [Mr. LOVE] such time as he may desire.

Mr. LOVE. Mr. Chairman, I rise in support of H. R. 4790, and I shall vote for this legislation. The terms of the present bill are particularly pleasing to me as I do not believe that the same yardstick should be used in measuring a fair tax relief to taxpayers in all brackets. In my opinion, a percentage reduction, although helpful, is not sufficient relief to those in the lower-income groups. Neither do I believe that increased exemptions are sufficient relief to those in upper-income brackets. I firmly believe the total amount of taxes should be cut, not shifted, and exemptions should be increased for all, and that a percentage should be cut from all tax payments.

In February 1947, I introduced H. R. 2171, to increase exemptions to $700 and cut all payments 10 percent. The present bill substantially follows these principles. All exemptions are increased to $600, relieving those of the lower-income groups, in particular. All taxes are cut from 30 to 10 percent, relieving the burden in the upper brackets, in particular, and thereby fostering venture capital, increased production, and additional jobs. The bill also provides additional $600 exemptions for those over 65 years of age and for the blind. Married people are also permitted to split their income for tax purposes as provided in the community-property States. Seventy-two percent of the tax relief in this bill goes to those having net incomes, after exemptions, of less than $4,000.

Due largely to the economy of the Eightieth Congress, we are approaching a sound fiscal policy. We have been cutting Federal expenditures. Incidentally, we have not cut deep enough, in my opinion. It is sound economy to make substantial payments on our national debt and it is sound economy to relieve the wartime tax burdens of our people. The time is at hand to legislate and execute all three of these basic principles.

Continuing the economy measures of the Eightieth Congress, it may be conservatively estimated that the Federal surplus for the fiscal year 1948 will be $8,800,000,000, and for the fiscal year 1949 a surplus of $10,000,000,000 is probable. The present bill would reduce Federal revenue by $7,100,000,000 in fiscal 1949. It follows, therefore, that we could have an actual tax reduction this year by passing H. R. 4790 and also pay approximately $10,000,000,000 toward our national debt during the fiscal years of 1948 and 1949.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, I yield such time as he may desire to the gentleman from Washington [Mr. TOLLEFSON].

Mr. TOLLEFSON. Mr. Chairman, we, as citizens and taxpayers, must be honest and realistic in our approach to the problem of national financing. We must fully realize that we cannot cut our national revenues by a large arbitrary figure and still request and obtain full appropriations for western reclamation and power projects, adequate Federal aid to our public schools which are in great need of funds at this time, and adequate funds for construction of necessary public buildings which many of our communities need desperately.

Last year I voted for the tax-reduction bill. A new issue has arisen this year, however, which completely changes our national financial picture. I refer, of course, to the need to adequately finance necessary features of the Marshall plan in order that we may lay the ground work for a lasting peace throughout the world. I feel that we should make every honest effort to determine the exact cost of our domestic and foreign programs before we arbitrarily cut our national revenues.

And there is another matter which disturbs me greatly. We taxpayers are paying a yearly interest, largely to private financial institutions, of $5,225,000,000 on our public debt. Think how much more good an expenditure of this size could bring if it were channeled in the direction of aid to our schools and development of our resources. It is sound economic practice that we use every possible surplus of Government revenue to retire our huge national debt and eliminate, therefore, this tremendous yearly interest charge.

I strongly favor higher exemptions than H. R. 4790 provides for low-income groups and those living on annuities such as pensions and blind benefits. Equitable taxation reforms which are not included in H. R. 4790 are needed for partnerships and small businesses. The percentage cut on surtaxes should be made more equitable than that presently advocated in H. R. 4790 so that in terms of dollars the increased purchasing power will be placed in the hands of those who need it most, namely, the low-income groups.

The income-tax reduction of $4,000,000,000 as proposed by several Republican Senators is more realistic than the $6,000,000,000 reduction proposed by H. R. 4790. It would be realistic, also, from the standpoint of veto-proof legislation. I shall support a more equitable and workable tax-reduction bill which undoubtedly will result from the House-Senate compromise, and which actually could be made law.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, I yield such time as he may desire to the gentleman from New Jersey [Mr. KEAN].

Mr. KEAN. Mr. Chairman, under the present Democratic tax structure the chief burden of income taxes is on the lower-income group. The Knutson bill, while reducing the burden of all classes of taxpayers, shifts the chief burden to the higher-income group so that those with incomes over $4,000 are in aggregate paying more income taxes than those in the group below $4,000.

Under the present law those with incomes under $4,000 pay $11,987,000,000, while those with incomes over $4,000 pay $9,293,000,000. Under the Knutson bill those with incomes under $4,000 will pay only $7,284,000,000, while those with incomes over $4,000 will pay $7,446,000,000.

This is a well-balanced bill and that is the reason why our friends on the other side of the aisle are finding it so hard to settle on a proposal which will reduce the cost and still be fair to all classes of taxpayers.

The cuts for the low-income group are substantial, and while the percentage cuts in the medium- and higher-income brackets are small, they at least lend some encouragement and hope to those in these brackets upon whom we must rely to provide the jobs which employ the great mass of our people.

I suppose there is not much use in burying dead cats any deeper, but I want to again call your attention to the statement of Leon Keyserling, of the President's Council of Economic Advisers on the Town Meeting of the Air the other night. Keyserling has been reputed to be the author of the fantastic $40-cost-of-living bonus for everyone except those who need it most.

When one of the speakers stated that an increase in corporation taxes would increase prices, Keyserling said that this would be prevented by the price controls which the President had recommended.

Of course this would not mean only selective-price control, but price control for the products of 22,000 corporations.

So, evidently, this proposed corporation tax is part of the pattern for regimentation of our people which the smart boys around the President are trying to put across.

The gentleman from North Carolina—the esteemed former chairman of the Ways and Means Committee, for whom I have the greatest affection and respect—has suggested that the percentage reduction be cut in half. This would reduce the estimated loss to the Treasury by $1,859,000,000. I wonder if he realizes that $1,314,000,000, or 70 percent, of this reduction would be taken out of the hides of the lower-income group—those whose incomes are under $4,000?

The gentleman from Rhode Island [Mr. FORAND] has just tried to prove that there is ample capital available for risk investment.

Let us look at the record as supplied by the Department of Commerce. In 1946 out of corporate funds available of $23,600,000,000, only $900,000,000, or about 4 percent, was derived from new investments in their common stocks.

In 1947 out of corporate funds available of $26,000,000,000, only $800,000,000, or about 3 percent, was derived from new investments in their common stocks, and of this amount more than 50 per-

cent was invested in relatively riskless public-utility stocks.

But in this same year, 1946, these corporations borrowed four and one-half billion, while in 1947 they borrowed approximately six billion.

Do you think for a moment that these corporations would have sold bonds and borrowed money from the banks if they could have fulfilled their needs by selling common stocks?

The gentleman from Rhode Island is a good enough businessman to know that this is so.

Mr. FORAND. Mr. Chairman, will the gentleman yield?

Mr. KEAN. I yield to the gentleman from Rhode Island.

Mr. FORAND. Is the gentleman questioning the statement I read from the testimony of the Secretary of Commerce?

Mr. KEAN. I am certainly questioning the Secretary's conclusion as I did when he appeared before us.

Mr. FORAND. What the gentleman from Rhode Island said on that score was a quotation from the Secretary of Commerce and if the Secretary of Commerce is wrong then I am wrong.

Mr. KEAN. He is wrong.

Mr. FORAND. I do not think he is wrong.

Mr. CRAWFORD. Mr. Chairman, will the gentleman yield?

Mr. KEAN. I yield to the gentleman from Michigan.

Mr. CRAWFORD. We should also bear in mind that interest rates are advancing with respect to future capital construction. Your corporations have substantially diminished their liquid assets with respect to cash on hand and Government bonds in order to increase the inventories the Secretary has referred to, in order to partially pay for the expansion in plant which they have already accomplished. Now they move into a tightening credit market, higher interest rates, higher cost of production. I wish I could believe what the Secretary of Commerce has said through the gentleman from Rhode Island [Mr. FORAND], but I cannot come to an agreement with his forecast.

Mr. KEAN. Neither can I.

Mr. REEVES. Mr. Chairman, will the gentleman yield?

Mr. KEAN. I yield to the gentleman from Missouri.

Mr. REEVES. The gentleman made the point that there was a measurable shift in new corporate financing from equity financing, that is, the issuance of common stock, to debt financing. I think it is particularly significant that between 1946 and 1947 there was a drop of from 58-percent equity financing to only 29-percent equity financing in 1947, indicating that the necessary capital for new venture and new investment is not available, and all business is now obliged to resort to debt financing, which is manifestly an unhealthy condition and inflationary.

Mr. KEAN. The gentleman is correct.

Mr. FORAND. Mr. Chairman, will the gentleman yield?

Mr. KEAN. I yield.

Mr. FORAND. I will ask the gentleman if it is not true that the Secretary of Commerce also testified that it is not so much the difficulty of obtaining capital as it is the difficulty of obtaining materials that are in short supply now?

Mr. KEAN. He said that, and it is true in some cases.

Mr. FORAND. I thank the gentleman.

Mr. KEAN. The gentleman from Tennessee [Mr. COOPER] and the gentleman from New York [Mr. LYNCH] based their objections on the impossibility of further cuts in the budget. This is a doctrine of despair.

Every speaker seems to have acknowledged that taxes are too high for every segment of our population. They are too high for the employee trying to support his family in a decent way in the face of the high cost of living.

They are too high for the small businessman, and the junior executive who is trying to set up a competence to protect his family.

They are too high for the well-to-do. There is no reason to be especially sorry for this group, but confiscatory taxes destroy their historical function which is to supply capital to expand business and thus provide more wages.

It has been estimated that it takes from seven to ten thousand dollars of capital to provide one job in industry. This must come from some source. If individuals cannot supply it the only recourse is the Government itself, and you have socialism and all that it implies.

If we are going to take the attitude that it just cannot be done, it is most discouraging for I doubt that we can continue the dynamic economy which has built up our country with a Federal expenditure of $40,000,000,000 a year.

Present taxation is a millstone around the neck of anyone who is trying to get ahead, and cannot help but lower our American standard of living of which we are so proud.

But I am glad that the gentleman from Tennessee and the gentleman from New York have brought out the fact that the key to reasonable taxes is a reduction in Government spending.

If we are going to carry out our many commitments, we must have a powerful United States—a Nation which is economically strong.

I refuse to accept the premise that we cannot under a free competitive system fully develop our resources—both human and material. We must prove to the doubting nations of the world that we have here that system which will bring the greatest welfare to the average man.

Mr. VURSELL. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. VURSELL. Mr. Chairman, last year in 1946 the Republican leadership in Congress passed a tax-income-reduction bill in an effort to relieve the American taxpayers of about $4,500,000,000 in taxes. The President vetoed the bill, and not quite enough courageous Democrats voted with us Republicans to get the two-thirds majority necessary to pass that tax bill over his veto.

We, who promised relief from these high wartime taxes to the American people in the last campaign and who were prevented from carrying out that promise by the Presidential veto, are back again this year attempting to keep our promise by passing this tax bill, H. R. 4790, that will give the people about $6,000,000,000 in tax relief. As usual, the President is against this bill and is asking the members of his party in the House and Senate to line up solidly against it. We will pass this bill in the House and send it to the Senate. The Senate will pass it with possibly some revisions, and then it will go again to the White House for the President's decision.

Mr. Chairman, the people in the third year after the war are demanding a reduction of the highest taxes they have ever been called upon to pay. We can give the people a $6,000,000,000 tax reduction, balance the budget and have $3,000,000,000 left over to pay on the national debt. If we can cut the $42,000,000,000 budget request of the President for the running expenses of the Government in the next year by $3,000,000,000, we can have more billions for payment on the national debt. If the President would cooperate with the Republican House and Senate, we could cut his request over $3,000,000,000. Of course, it is too much to expect that he will cooperate when we recall that 1 year ago when we attempted to cut the budget by $5,000,000,000 he and his entrenched administrative bureaucrats opposed every reduction we sought to make at that time.

Mr. Chairman, the Members of Congress, both Democrats and Republicans, know that this is a fair, just, and equitable tax bill. Were it not for the pressure of the administration on the Democrat Members of this House, it is my firm belief that they would join almost solidly in support of the measure before us, and I predict when the bill comes back from the Senate and they are placed in a position on the final roll call where they will have to vote for or against tax reduction, that enough of them will vote for this bill to carry it over a Presidential veto. A great majority of the Democrat Members as well as the Republicans, are anxious to give their people tax relief. The greatest obstacle in the way of the Democrat Members of the House, is the effort and the power of the President to prevent them from joining with us to give the people they represent the tax relief this bill offers.

Mr. Chairman, the administration raises the old cry of a year ago that if $6,000,000,000 in tax relief is left in the pockets of the American taxpayers the spending of it will be inflationary. They want to keep this amount of the taxpayers' money and have the Government spend it. How will the Government spend it? The administration intends to give this money to European and other countries. What will these countries do with it? The administration has already planned through the Marshall plan for these foreign countries to spend this money here in the United States buying the grain, food,

farm machinery, fertilizer, and manufactured products, which is more inflationary than to let the taxpayer spend his own money for the food, clothing, doctor, and dental bills, and the things he needs for the comfort of his own family.

To deny the taxpayer who earns this money by the sweat of his brow the right to spend it himself, or save it for a rainy day by claiming such use of it by him would be inflationary, and on the other hand, take the taxpayers' money and give it to foreign countries to spend in this country, which is twice as inflationary, is a policy of sacrifice and punishment against the American people never before attempted in the history of this Nation by any administration.

WHAT THIS BILL DOES

Mr. Chairman, this bill raises the exemption on every taxpayer and his dependents from the present exemption of $500 to $600. The man with a wife and two children will get an extra $100 exemption on each of the four. While this will benefit every taxpayer, over 90 percent of the benefit in this exemption raise will go to those whose net incomes are $5,000 or less.

The raising of these exemptions alone will free 6,000,000 small taxpayers from paying any taxes whatsoever.

The taxpayer who, after taking these exemptions, has a net of $1,000 or less on which he must pay taxes will then get a 30-percent tax reduction.

First. He gets a large percentage in relief by the $100 extra exemption and then he gets a 30-percent relief in the amount upon which he must pay. This will give probably a general 40-percent relief to the little taxpayers who pay on any amount up to $1,000. There are 25,000,000 taxpayers in this group in the low-income brackets who will get this big reduction in addition to over 7,000,000 in the lowest-income group who will pay no taxes whatsoever. This high percentage rate of reduction for those in the low-income bracket is an attempt to give them much greater relief because we realize that they need greater relief to help meet the present rise in the cost of living.

Second. The taxpayer, after exemptions, who pays on a net of from $1,000 to $1,396 will receive in addition to his added $100 per capita exemption a sliding scale reduction of from 30 percent to 20 percent. This will give substantial relief to 13,000,000 taxpayers.

Third. The taxpayer who, after exemptions, will pay on a net of $1,396 up to $4,000, will receive in addition to the increased per capita exemption of $100, a reduction of 20 percent. There are 7,000,000 taxpayers in this group.

Fourth. Taxpayers who, after exemptions, pay in excess of $4,000 will receive a reduction of 20 percent on the first $4,000, and above that in earnings, only 10 percent. There are 2,000,000 taxpayers in this group. Even though this group is relatively small as compared with the other groups these 2,000,000 taxpayers will pay 44 percent of the total income tax of the Nation. And, out of the over $6,000,000,000 of tax relief provided in this bill this group that pays 44 percent, only receives a reduction of 28 percent of the over $6,000,000,000, while those in the lower brackets will get 72 percent of the over $6,000,000,000 in reduction which they can use and spend as they like.

This bill also gives great relief to those over 65 years of age, as follows: Those 65 years of age will get an added exemption of $600, making a total exemption of $1,200.

This should wipe out the tax on many of the school teachers of the Nation who are now paying either taxes on their salaries, or taxes on their annuities.

It practically wipes out all tax against the blind of the Nation by raising exemptions higher for them than any others.

It provides for married people to divide their incomes and will give relief to a great many married couples.

Mr. Chairman, yet, when the figures prove that those in the lower brackets get 72 percent of the reduction, yet the President when he gets ready to veto this bill will most likely make the same charge that he made against a similar bill a year ago, that this bill benefits the rich and penalizes the low-income group. Of course, there was no truth in his statement a year ago, and will be none if he repeats it as to this bill.

Those in the highest brackets are allowed a 10-percent reduction because we Members of the Congress and everyone who has thought tax legislation through realizes that you cannot take from 50 to 75 percent in taxes away from those who must replace worn-out machinery and keep their machinery repaired and in good condition year after year, without finally throwing millions of laboring men out of employment. They must have this encouragement now to renew equipment and expand plants if we are to keep 60,000,000 people employed. This 10 percent which will encourage risk capital to be spent, is probably worth more to the employees in the lower-income groups by way of insuring them employment than the big tax reduction we give them in the beginning of this bill.

Mr. Chairman, this is not a political tax bill like the $40-a-vote bill offered by the President, which is so worthless that neither the Democrat Members of the House nor Senate have attempted to substitute it for this bill. This is an American equity tax bill seeking to push the economy of the United States Government forward for continued employment and greater production. This is not an inflationary tax bill. It is a tax bill to combat inflation. Greater production is the only real cure for inflation. This bill will greatly increase production. And, as we greatly increase production, more wealth is made against which these lower tax rates will operate, and by the expansion and creation of greater production and greater wealth the passage of this tax bill will not likely cut $1,000,000,000 out of the revenue of the Government, while at the same time it will give $6,000,000,000 relief from these high wartime taxes to the taxpayers who are carrying this terrific load.

Mr. Chairman, after the last World War when the Republicans came into power when a depression was on, they passed a tax-reduction bill every year for three successive years. Every time they reduced the tax levies business expanded so much that they collected more money with the result that they balanced the budget and reduced the national debt by a billion dollars a year for 10 successive years. Sound policies written into this tax bill will not only give the people the relief they seek but will continue employment at a high peak, the production of wealth at a high peak, will expand business and probably bring in more extra revenue at these lower rates than the $6,000,000,000 in relief we insist the American people shall have in 1948.

Mr. DOUGHTON. Mr. Chairman, I yield such time as she may desire to the gentlewoman from California [Mrs. DOUGLAS].

Mrs. DOUGLAS. Mr. Chairman, I regret that I cannot support the tax bill before us.

Inflation—that is the No. 1 problem in America today.

Inflation is the monster that is eating up wages and savings.

How to pay for milk, meat, bread, rent, and still pay the doctor and buy a pair of shoes is the constant worry of the mothers and fathers living on limited and low incomes.

If prices are allowed to continue unchecked, no one will escape the final debacle, not even the corporations which today are enjoying profits 67 percent higher than they were during the peak war year of 1943.

Mr. Chairman, what have the Members of this body done to protect the living standards of the people they represent? Whistled in the wind, sung lullabies, or offered poison—unadulterated poison—sugar-coated, of course. That is what this tax bill is—poison, sugar-coated.

The Knutson bill will cut your taxes—that is the sugar.

The poison the sugar covers is that the bill is economically unsound and socially immoral.

We cannot whistle away our $258,000,000,000 war debt, the debt we incurred to remain freemen.

We ought to pay that debt out of swollen profits today and not out of the mouths of men tomorrow.

We cannot pay off the war debt and at the same time cut taxes the way this bill proposes we cut them.

We must balance our budget if we are not to further accelerate the inflationary spiral. And it is nonsense to talk of balancing proposed tax cuts with cuts in the budget.

How can one talk of reducing the budget, 79 percent of which directly reflects the cost of the war, the effects of the war, and our efforts to prevent a future war, a budget which leaves only 21 percent for national housekeeping? To cut this 21 percent would retard the expansion and development of our economy and would seriously threaten a reduction in our national income.

Of course, everyone wants his taxes cut, but not if taxes are cut in such a way that it places an unbearable burden

tomorrow on the shoulders of those least able to carry it.

And that is what this tax bill will do.

There are many ways taxes can be cut. The 10–20–30 plan is not the only one. Taxes can be cut for the benefit of those who have the most or those who have the least.

Historically it has been the American principle to tax according to the ability to pay.

Are the low-income groups who are being priced out of the durable market and who are struggling with the cost of food, clothing, and rent helped in this tax bill before us?

Oh, yes; they are given a few dollars relief, but those in the high brackets are given a windfall.

Since I fall in the high-income bracket that ought to seem attractive, but my common sense tells me that what is not good for the country as a whole cannot, in the long run, be good for me either.

If we continue as we are going, our economy is in danger of pulling apart. As prices rise, walls are built between the producer and the buyer.

How to keep the buyer in the market and pull prices down?

That is the answer we should be seeking.

The President has outlined a tax program that would give relief without jeopardizing our ability to balance the budget or pay off our war debt.

I introduced a bill along these same lines in the special session. I would have given a cost-of-living credit of $100 to every taxpayer and each of his dependents.

My bill would restore a tax on excess profits. Restoration of the excess-profits tax would hold Government revenues up where they are needed to keep our house in order.

This tax is not punitive, indeed, it is highly desirable. It is a positive step toward controlling runaway prices and a positive step toward saving business—big and little. Federal Reserve indexes show that the volume of physical production is 20 percent below wartime level. Profits are not based today on increased production but on unfair and inequitable prices. Inflated prices if allowed to continue will destroy the savings of the people and business itself.

If we needed an excess-profits tax during the war to control inflation, how much more do we need it now? An excess-profits tax now would go a long way to finance the Marshall plan of aid to Europe, to pay off the debt, and to provide the basis for reducing the tax on low-income groups which are suffering most from inflation.

My bill would have also removed excise taxes on telephone and telegraph and on transportation of property and persons—taxes which are discriminatory against the consumers of the West, and even ruinous to many businesses.

It is all very well to talk of stimulating management incentive and piling up investment capital, but how much stimulating and how much piling up of capital do we have to have, and at what cost?

Surely we must think, too, just a little about keeping the consumer in the buying market.

Increasing taxes on swollen corporation profits would remove the incentive to charge all the market can bear.

The President's proposal of a cost-of-living credit of $40 for every taxpayer and each of his dependents is an honest, straight, across-the-board tax reduction—with the same amount of tax relief for everybody.

Surely the rich man does not need more tax relief than the poor man at this time. And the more money we release in the high-income brackets the more we add to inflation.

The profit incentive is very important but the incentive to keep on living is also important. I cannot support the Knutson tax bill. I hope that the recommittal motion will contain basically the President's recommendations.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, I yield 10 minutes to the gentleman from Nebraska [Mr. CURTIS].

Mr. CURTIS. Mr. Chairman, the Republican tax bill before the Congress today is the ARP. It will revitalize America. It adheres to the principle that free men may work and toil, earn, save and have, and be unhampered by unreasonable demands from their Government. It will restore a proper incentive for Americans to think, to dream, to invent, to build, to dare, and to undertake. It promises a reward for those who have the courage to take a risk. It means more enterprise, more production, more jobs, more of the products of civilization at reasonable cost, more revenue for the Government, and more take-home pay for all the workers of the land.

This bill is the only proposal that will bring tax relief to all of the American people. It is an honest bill. It does exactly what it purports to do.

All citizens are entitled to fair and equitable treatment. The sons of the poor and rich alike fought and died in the recent war. The honest and ethical thing to do is to grant a proportionate tax reduction to all the taxpayers of the Nation. This the Knutson bill does.

It calls for the most generous reduction for those people in the lowest income-tax bracket. We are told that the average American family consists of the taxpayer, his wife, and two children. The Republican bill would increase the personal exemptions for such an average family by $400. In addition to that, it calls for a 30-percent tax reduction for those taxpayers whose surtax net income is a thousand dollars or less. In this group are found half of the taxpayers of America.

At the present time a married taxpayer in a non-community-property State whose income is $10,000 pays a tax of $2,640 annually. If that same man lived in a community-property State, half his income would belong to his wife and the total tax paid by the two of them would be $2,000, or $640 less. Is that fair? Should it be corrected? This bill corrects the inequity which now exists between the community-property States and the non-community-property States.

Among our older citizens, some now receive a retirement check that is tax free. Others pay taxes on their retirement checks. Still others receive no retirement check and continue to work and pay taxes to pay somebody else's retirement check which is tax free. The pending proposal gives an additional $600 personal exemption to all persons over 65 years of age. It is especially helpful to the older person who still must work to eat. It is sound; it is fair—and no other tax proposal carries it.

The approximately 250,000 blind taxpayers in this Nation will, under the Republican proposal, have their personal tax exemption raised from $1,000 to $1,200.

It is tax relief for all. It does bring more relief to the poor than to the citizen a little better off, but it is not of exclusive benefit to any one income group. It might be argued that the handful of extremely wealthy people in America need no tax reduction, but it can never be argued that the great middle class does not need tax reduction. The Republican bill is the only one that brings a noticeable tax reduction to that group.

Businessmen, office workers, skilled artisans, doctors, editors, leading farmers, and like citizens who are neither rich nor poor are the group who make America what it is. America is the land of the middle class. In every community in this Nation it is they who carry on, managing and supporting our schools, helping our churches, the Red Cross, the Boy Scouts, and every other worth-while thing. The Republican tax bill is the only one which would bring an equitable reduction in taxes to the middle class.

A tax-reduction bill can be given to the country and we will still be able to make a substantial payment on the national debt. The Treasury Department contends otherwise, but it seems to have a set of figures to justify any argument that it wishes to make. Last year the Treasury Department made an error of approximately six and one-half billion dollars in its estimate of the national income. Other estimating authorities revised their figures following the income-tax payments in March 1947. But the Treasury stuck by its erroneous figures until after Congress had adjourned.

High taxes create an atmosphere that invites excessive spending. Tax reduction is an essential part of budget reduction. The objectives of tax reduction are greater production, more goods at less cost, more jobs, more take-home pay, and a greater incentive for new enterprises, new plans, and new jobs for the citizens of America. This tax proposal will relieve our citizens of part of their wartime taxes; it will provide incentive capital and will be the structure for new dreams, new plans, new undertakings, more jobs, greater production and more good things in life within reach of all. The payment of the national debt requires, more than anything else, a strong, vigorous, forward-looking economy that will produce more from which taxes can be paid to get America's economic job done. Unless we have tax reduction, the sources of our private enterprise will dry up and socialism will be upon us.

Mr. DOUGHTON. Mr. Chairman, I yield such time as he may desire to the gentleman from California [Mr. HOLIFIELD].

Mr. HOLIFIELD. Mr. Chairman, I do not take the well of this House to try

to bring any light to the experts of the Ways and Means Committee on the subject of taxation. I do not consider that I am qualified to bring them figures which they do not have; but I do take the floor to express the way this tax problem looks to me. I have listened attentively to the debate and I have read the different tables which were printed in the committee hearings and the report. To me this problem is not so much a matter of percentage or a matter of charts as it is a matter of human beings. When I think of a tax bill—and I can modestly say that I approach it as a man who is in the upper income tax brackets, having business interests outside of my Congressional income—I think of it from the standpoint of the 300,000 people in my district and the maintenance of their standard of living. We often use these phrases without reducing to the terms of whether a family of four will have two bottles of milk delivered this morning or only one bottle of milk; whether they will be able to eat three pounds of hamburger meat this week or no hamburger meat; and then I think of most of the people in my district who receive $3,000 a year or less. I will take the figures from your own chart of 52,000,000 taxpayers in the United States, and tell you that 40,000,000 of those taxpayers make less than $3,000 per year. The families of those taxpayers have less than $3,000 a year to spend for food and clothing and medical attention; and I am not going to be facetious and refer to the recreational opportunities of life because when they pay for food, clothing, and medical attention they have a deficit at the end of the year and they dip into their savings to maintain even the semblance of a decent standard of living. I said semblance, not a real standard of living.

If the President's proposal of a $40 credit to each dependent were given to a family of four making $3,000 a year it would mean it would eliminate from the tax roll approximately 8,000,000 families or 10,000,000 taxpayers. That would mean they would have $160 a year more with which to buy shoes for their children, to buy food for their children to eat, possibly to get a little dental work done and have some medical attention. That is what it would mean, and therefore I unhesitatingly state that when you get through with all of your charts and all of your figures you come back to the proposition: Do you want to give to a family of four, the families of 40,000,000 American taxpayers, the difference between a $2,520 a year standard of living—and I will explain that figure in a minute—and a $2,680 standard of living?

Let me explain that. The family with $3,000 income in June of 1946 can buy today with the 26-percent increase in the cost of living $2,520 worth of food, clothing, and medicine. In other words, that family has already received a reduction in their standard of living of 26 percent. Those figures are unassailable and cannot be questioned. So when we give them a $40 credit per person per family of 4, we do not give them the standard of living they had in June 1946, when the OPA price controls were removed. We merely raise the actual wages or actual purchasing power in terms of commodities from $2,520, plus $160, up to $2,680 per year. In other words, they are $320 per year behind their standard of living of June 1946.

Mr. Chairman, remember that applies to 40,000,000 taxpayers out of the 52,000,000. So I say that I am for giving tax relief where it is needed, where it means food to eat, clothes to wear, medicine to cure the sick. I want to make it very plain at this time that I am not for a tax reduction from the over-all tax income figure. I believe that the over-all taxes should remain at their present total and that such relief as is given from a humane standpoint to the 40,000,000 taxpayers should be assessed in the higher brackets, and I am talking about myself when I say that, and the other 12,000,000 taxpayers who earn over $3,000 per year, I think they should make up the difference and any surplus that accrues therefrom should be paid on our national debt. That is the only way you are going to stop this inflationary rise.

Do not worry about inflation when you give a family of four another bottle of milk a day. Do not worry about inflation when you allow them to have meat four times a week instead of three times a week. The thing that you should be worried about is the maintenance in America of a decent family standard of living. You can save money for those in the high-income brackets, you can take it out of the living standards of the poor, and you will widen the gulf between the 40,000,000 people and the 12,000,000 people. May I point out to you that when that gulf becomes wide enough the middle ground vanishes and you have economic chaos on the one hand and over-privileged classes on the other. That naturally brings about a condition that was brought about in the nations of Europe, when the middle ground vanished and the people, because of economic desperation, turned to the man on horseback, the man in the public square, the man on the soap box who offered them the palliative of communism or some other form of totalitarian government.

Mr. KEAN. Mr. Chairman, will the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman from New Jersey.

Mr. KEAN. The gentleman comes from California?

Mr. HOLIFIELD. That is right.

Mr. KEAN. The gentleman today has the benefit of the community-property law?

Mr. HOLIFIELD. Yes.

Mr. KEAN. Would not the gentleman give to the common-law States the same benefits?

Mr. HOLIFIELD. I am glad the gentleman brought up that point because I intended to speak on that point. I do not believe there is any moral argument against extending to the other 37 States besides the 11 that have it at the present time, the same split income tax privilege. I say that as a man coming from a community-property State. However, I did not pass the law. It was there. It is a hold-over from the Napoleonic code which all the Spanish areas, such as Texas and California, had at the time they became States in the Union. I certainly agree with the gentleman that the split income privilege should be extended to every State in the Union. I might point out, however, that in return for that split income privilege certain laws which apply to property relations between husband and wife, and husband and wife and children, occur in the State of California, which I think might well be also extended in other States for the protection of the American family which is, after all, the basic element in our civilization.

Mr. KEAN. The gentleman knows that the largest part of the increase in benefits given to the upper income group under this bill is due to the community-property provision.

Mr. HOLIFIELD. No; I do not know that. I have heard the figure that approximately $800,000,000 relief would be given to the other 37 States. I think that that relief should be given to them. I think it is just a question of moral equity, of adjusting an inequitable tax situation, which has existed for many years.

Mr. KEAN. As the gentleman knows, that benefit goes to the group of married men with children. It does not benefit anybody unless he has an income of $4,450.

Mr. HOLIFIELD. There are many points in the tax law, of course, which apply only to certain brackets. In all fairness, I think that the split income tax privilege should go to the people in the higher brackets in other States, the same as in the community-property States, and I will apply the same principle to them that I applied to the relief of the low income bracket families. I believe that that amount which is reduced from tax income should, in turn, be levied against excess profits, in the high corporate income brackets. About 22,000 corporations would be affected by such a change, I understand.

Mr. CURTIS. Mr. Chairman, will the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman from Nebraska.

Mr. CURTIS. I am glad to hear the gentleman say that he favors this tax reduction for these non-community-property States. By the same token, if the Congress does that, does the gentleman not think that they should extend some tax reduction to the middle class of persons, for instance, the widow or widower, who have no one with whom to split their income, toward adjusting all the burdens of the household?

Mr. HOLIFIELD. Of course, that is a complication which might be taken care of by your honorable committee. I have no particular thought on that subject. It would introduce an additional principle which I do not think at present is in the law in the community-property States.

Mr. CURTIS. I think if you examine the pending bill it does that very thing, and that if you try to do equity to all the groups you will find it most difficult to cut down the cost of the bill. When you deal with 50,000,000 taxpayers and Fed-

eral revenue amounting to 45, 50, or 55 billion dollars, if you are going to extend equity to all the groups you are going to have to deal with some big figures.

Mr. HOLIFIELD. I certainly agree with the gentleman that it is a complicated matter, but as I said in the beginning of my talk, I did not expect to bring a great deal of light to the members of the committee who have studied this law. But I wanted to give my own opinion in all honesty.

Mr. SIMPSON of Pennsylvania. Mr. Chairman, will the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman from Pennsylvania.

Mr. SIMPSON of Pennsylvania. Under the bill we are now considering, in excess of 52,000,000 of our taxpayers have incomes of less than $5,000 on which they receive tax reductions of $4,691,000,000. In view of what the gentleman has stated about the need for increased funds for that group under $5,000, with which I have no disagreement whatever——

Mr. HOLIFIELD. Under $3,000.

Mr. SIMPSON of Pennsylvania. The figure I gave, sir, was under $5,000.

Mr. HOLIFIELD. I see.

Mr. SIMPSON of Pennsylvania. I thought the gentleman would have no objection to those people obtaining that relief.

Mr. HOLIFIELD. No objection at all. I want them to get every bit of relief which is put in the Knutson bill and more, too. I would like to see that relief given strictly on the basis of the need of human consumption for the necessities of life, that is all.

Mr. SIMPSON of Pennsylvania. Excepting the need for that $4,691,000,000 for those under $5,000, and the community-property provision, and a little bit to equalize those who are widows or widowers with one dependent, perhaps, you practically get all the benefit included in the Knutson bill; the gentleman is in favor of it. I think we have really got a very good argument for the Knutson bill if you include those items.

Mr. HOLIFIELD. I certainly want to tell the gentleman that so far as the Knutson bill goes toward relief in the lower-income brackets that I certainly will go along with it. The only place that I would part with him would be in the fact that it does not go as far as the President's proposal, and in the overall reduction, which would not allow a payment on the public debt. I think it is just a prime business principle that each individual should pay his debts out of his income just as soon as he can. This principle should apply to our Nation also.

Mr. SIMPSON of Pennsylvania. Under the President's proposal of allowing $40 reduction to each, the aggregate reduction would be somewhere around $3,000,000,000 for the taxpayers with incomes of less than $5,000. Under the Knutson bill that total is $4,600,000,000-odd. Therefore, under the bill we are now considering there is substantially more dollar relief for individuals with incomes of less than $5,000 than there is under the proposal of the President to give $40 to each taxpayer and dependent.

Mr. HOLIFIELD. The figure the gentleman used of $5,000 is different from the figure I used of $3,000. I applied my reasoning to those with incomes of $3,000 or less. It may be true that what the gentleman says about $5,000 or less is right. I cannot argue with him on that. I applied my figures to $3,000 or less because out of the 52,000,000 taxpayers in the United States 40,000,000 are making $3,000 or less. That is the point I made.

Mr. SIMPSON of Pennsylvania. Under the $3,000 limit there are 38,000,000 people. Under the Knutson bill their saving will be $2,900,000,000.

Mr. HOLIFIELD. Which would be less than the $40 tax credit application to people of that income bracket.

Mr. NICHOLSON. Mr. Chairman, will the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman from Massachusetts.

Mr. NICHOLSON. May I ask where the so-called middle class comes into this picture? What salaries do they get? Is it $3,000 to $12,000, or $4,000 to $10,000? Are not they in the majority?

Mr. HOLIFIELD. If I understand the gentleman right, he wants to know about the middle class. I consider the middle class as among the 40,000,000 taxayers. I do not judge the middle class by the income brackets; I judge the middle class by the 40,000,000 taxpayers out of the 52,000,000, which is a preponderant majority, and which I think includes people such as our firemen, policemen, school teachers, the little professional men, the wage earners in the factories that produce the wealth of America, and their wives and their children. Eighty percent of the people of the United States I include in the bracket under $3,000 per year.

May I ask the gentleman if he would not rather see a family of four get $160 relief than have the percentage of relief which the Knutson bill will give him in the bracket he is in.

Mr. NICHOLSON. In answer to the gentleman, may I say that all I know——

Mr. HOLIFIELD. It is a simple question. I know the gentleman will be glad to answer it yes or no.

Mr. NICHOLSON. I cannot answer it yes or no. All I know is that the middle class of the people are the people who pay the taxes in this country. Under this bill, as I see it, we middle-class people are getting the advantage of it. The poor pay in proportion, yes. There are so many of them, and we will always have them. There are only a few rich people, but there are so many of us middle-class people. That is where we are protecting them. That is what I think we are doing. I am asking the gentleman if he can give me any figures on it.

Mr. HOLIFIELD. The gentleman has had figures. He can read my speech tomorrow and he will see that the 40,000,000 taxpayers I speak of who subsist on less than $3,000 a year need the $160 a year more than the gentleman needs the reduction this bill will give him in his tax bracket, or that I would get in my tax bracket.

Mr. KNUTSON. Mr. Chairman, will the gentleman yield?

Mr. HOLIFIELD. I yield to the gentleman from Minnesota.

Mr. KNUTSON. As I understand the gentleman's argument, he proposes to rob Peter to pay Paul.

Mr. HOLIFIELD. That depends. If the gentleman speaks of robbing the man in the high-income bracket to feed the children of the people under $3,000 a year of annual income, the children that grow up to be the soldiers who fight the battles to preserve this Nation, yes, I will be glad to rob Mr. Rich Peter to pay Mr. Poor Paul, so his children can have an adequate diet and adequate medical attention.

Mr. KNUTSON. I am a little hard of hearing. Will the gentleman repeat that?

Mr. HOLIFIELD. I merely started to say that I hope I am not taking too much time.

Mr. KNUTSON. I will yield the gentleman more time since he is making such an interesting statement.

Mr. HOLIFIELD. The gentlemen on my side have not asked me to leave the well of the House as yet. I will do so if they ask me, or I may be glad to take advantage of the gentleman's kind offer.

Mr. KNUTSON. We have some right to hear the gentleman even if they do not want to hear him. Besides, the gentleman is making an interesting statement.

Mr. HOLIFIELD. I thank the gentleman. I am sure the gentleman would be interested in my remarks.

Mr. KNUTSON. Just what was the gentleman's reply about "robbing Peter to pay Paul"?

Mr. HOLIFIELD. I know the gentleman would like to have a full answer on that. There are 12,000,000 taxpayers above the $3,000 bracket. I will select the classification of a man who makes $100,000 a year. He gets approximately an $18,000 reduction in his taxes. Under the present law he has a tax of $55,000 and under the Knutson bill as I understand it he will have a tax of roughly $36,000. Now I would gladly take from that gentleman some of the $18,000—not all of it, but some of the $18,000—benefit which he gets under the gentleman's bill and distribute it at the rate of $40 per person, thus affecting 40,000,000 families in America who are under the $3,000 per year annual income. If the gentleman says that that is "robbing Peter to pay Paul," then I say that I am perfectly willing to do a little robbing of that kind.

Mr. KNUTSON. Does not the gentleman think that if Jim Pendergast knew that any member of his party——

Mr. HOLIFIELD. I hope the gentleman will not get political when we are engaged in an economic discussion.

Mr. KNUTSON. Does not the gentleman think that if Jim Pendergast knew that any member of his party was increasing the price of votes from $2 to $40, he would roll over in his grave?

Mr. HOLIFIELD. I was hoping that the gentleman would not get political.

Mr. KNUTSON. I am not getting political. I am merely making an observation. I think we must be practical.

Mr. HOLIFIELD. I would not be unkind enough to bring up the name of Joe Pew and some of the other sponsors of the gentleman's party.

Mr. KNUTSON. I would be glad to bring up Joe Pew's name.

Mr. HOLIFIELD. I would not want to associate the gentleman with some of the fine men who finance the gentleman's party and who under the gentleman's bill will get the highest take-home percentage of anyone in America.

Mr. KNUTSON. I deny that statement, and if the gentleman would read the bill he would not make that statement.

Mr. HOLIFIELD. I did not say percentage of relief but I said percentage of take-home pay, so let the gentleman correct that in tomorrow's RECORD if he wishes.

Mr. NICHOLSON. Mr. Chairman, will the gentleman yield?

Mr. HOLIFIELD. I yield.

Mr. NICHOLSON. I think that the middle-class people in the United States pay the bill. I do not believe that any middle-class person objects to taking care of the poor. Furthermore, we middle-class people have fought this war that you are talking about. I was in it and my two children were in it and that is all that they had to give, and yet we are willing to take care of the poor people that you are talking about. It is the great middle class that is in this picture.

Mr. HOLIFIELD. If the gentleman wants to identify himself with the 40,000,000 taxpayers, that is perfectly all right with me. I feel that they are honorable people. I feel that they are the ones who are in need and that they should have more help than the people in the upper-income brackets. I am sure my friend is in that bracket because I know that his salary as a Congressman raises him into the 12,000,000-taxpayer class out of the 52,000,000. Although the gentleman may be middle class in other ways, he is not middle class in his income earning.

Mr. GEARHART. Mr. Chairman, will the gentleman yield?

Mr. HOLIFIELD. I yield to my friend from California.

Mr. GEARHART. I want the gentleman from California to understand that I share with him the desire to give greater benefits to the people in the lowest-income tax brackets. In other words, proportionately they should share more in that relief for the simple reason that they are greatly the more in need of it.

Mr. HOLIFIELD. That is right. I am glad the gentleman takes that position and I am sure that he will vote for the recommittal motion in order to achieve that purpose.

Mr. GEARHART. I wonder if the gentleman will remain as firm in that conviction in the light of my further inquiries. Of course, I don't know what the motion to recommit is to contain. I do not want to foreclose myself the opportunity.

Mr. HOLIFIELD. I hope the gentleman does not get too complicated in his tax knowledge. I have heard him make some wonderful speeches on this floor on the theory of taxation. Frankly, I have not been able to follow him, and I do not think the Members on his side have been able to follow him as far as supporting his ideas on tax matters is concerned, but I will be glad to listen to the gentleman's question.

Mr. GEARHART. With that prelude, for which I thank the gentleman—for a part, at least—I would like to comment upon the gentleman's statement of a moment ago in which you stated that you would cut down the tax benefits of certain groups in the higher brackets and credit the money saved in that way to the poorer people in the lower brackets.

Mr. HOLIFIELD. That is correct.

Mr. GEARHART. I was wondering if the Dingell bill, the President's proposals in legislative form, is not subject to the same critcism that you level upon the Knutson bill. Would you not take the $40 cost-of-living credit from John D. Rockefeller and Henry Ford, Jr., and the many big taxpayers like them, and spread it among the poor people at the other end of the tax rolls?

Mr. HOLIFIELD. My understanding of the President's proposal was that John D. Rockefeller would be allowed $40 credit on his tax bill.

Mr. GEARHART. You, it would seem, are willing to grant this cost-of-living credit to John D. Rockefeller, and others like him. Would it not be better to give the rich less and the poor more, as would the Knutson bill under its 30-, 20-, and 10-percent formula?

Mr. HOLIFIELD. I do not follow the gentleman. I am surprised to hear the gentleman's opinion of the Knutson bill. He certainly did not speak today in defense of the Knutson bill but on his own economic theories, which may or may not be right. But I believe in a straight-across-the-board credit to John D. Rockefeller and also to the man who is working in the rubber factory or the steel factory in my district. When you get into the higher brackets, I feel that in the higher brackets a graduated tax, according to ability to pay, is certainly equitable from all moral standpoints, because it takes from the surplus of those people. It does not take from their standard of living or their necessities of life. I am willing to have John D. Rockefeller have $40 credit on his exemption, along with the worker in my district.

Mr. GEARHART. That is because it is so denominated in the bond, as they say in Shakespeare—in the Dingell bill, in this instance. I have just one thought in my mind upon which I would like to have the gentleman's opinion. I am not indulging in any invidious comments on the gentleman's position. I am merely seeking enlightenment. I am wondering about some of the comments the gentleman has made and I really would like to have his views because I value them. In the Dingell bill the $40 deduction is denominated a "cost-of-living credit." The theory behind it is that the cost of living has gone up, and that it hurts the people in the bottom brackets the most. If I understand you correctly you want to give each of them a $40 credit to help them meet these increased costs.

Mr. HOLIFIELD. Now, the gentleman realizes that the cost of living has gone up 26 percent.

Mr. GEARHART. Oh, I am assuming that. But let us not lead ourselves up a blind alley.

Mr. HOLIFIELD. Well, the gentleman said it was a theory. It is an acknowledged fact.

Mr. GEARHART. I quite agree, it is a fact. I am now endeavoring to point out that the $40 deduction is granted on the theory that it is a cost-of-living credit, on the ground that these people at the bottom are poor and are in dire need of relief; that they should have, for a family of four, $160 additional spending power. That is true?

Mr. HOLIFIELD. The gentleman has already said that he agrees with that principle.

Mr. GEARHART. I am not disagreeing with it. Let us assume that, and pass on. That credit you are speaking of is needed by this group.

Mr. HOLIFIELD. I think so.

Mr. GEARHART. But there is another group that needs it more than any of those in the lowest income brackets. I am referring to the 19,500,000 gainfully employed who earn so little that they are not on the income tax rolls at all. Now what does the Dingell bill do for them?

Mr. EBERHARTER. Mr. Chairman, will the gentleman yield?

Mr. HOLIFIELD. In just a moment. Of course the status of the people who do not pay any taxes under the Knutson bill or under the President's bill is not changed by either bill. The gentleman knows that.

Mr. GEARHART. I know that, but I also know that the Knutson bill is a tax reduction bill and it only reduces taxes for people who pay taxes; but the President's, or the Dingell bill, as we call it, is more than that. It is a cost-of-living credit relief bill. It is supposed to afford a special benefit to people because of the rise in the cost of living. If you are dealing with the cost-of-living hardship from which the poor taxpayer suffers, I ask you, Why should you not do something for the 19,500,000 who are suffering far more than the group for which you are now pleading?

Mr. HOLIFIELD. I will be glad to join with the gentleman in doing something for that group. I can only say to the gentleman that I have no power. I am not a member of the Ways and Means Committee. If the gentleman will secure the help of his colleagues and bring out a bill to do something for those people, I will be glad to join with the gentleman. I thank him for his contribution.

Mr. EBERHARTER. Mr. Chairman, will the gentleman yield?

Mr. HOLIFIELD. I yield.

Mr. EBERHARTER. The answer, of course, to the question of the gentleman from California [Mr. GEARHART] is that we are discussing, and the Democrats are attempting to defeat, a tax bill. The Ways and Means Committee, however, has nothing to do with a relief bill. The gentleman is talking about relief. That goes to a different committee of the Congress.

Mr. GEARHART. I hesitate to inject myself again, but the distinguished gentleman from Pennsylvania has placed his finger upon the fundamental difference between the two bills. One, the Dingell bill, is a relief bill and the other, the Knutson bill, is a tax-reduction bill.

The Dingell bill falls far short of granting relief to those who are most in need of it, while the Knutson bill scientifically reaches the objective it was designed to achieve.

Mr. EBERHARTER. The proposition of giving relief to those who are in need of relief is something this Congress has acted on since 1933. We have always given help where help was needed and we will do so again.

Mr. HOLIFIELD. I thank the gentleman for his contribution. I appreciate the generosity of the chairman of the committee in extending my time far beyond that which I requested.

The CHAIRMAN. The gentleman from California has consumed 31 minutes.

The Chair wishes to state at this time that the majority side has now consumed 3 hours and 24 minutes; the minority side 3 hours and 39 minutes.

Mr. KNUTSON. Mr. Chairman, I yield 15 minutes to the gentleman from Iowa [Mr. MARTIN].

Mr. MARTIN of Iowa. Mr. Chairman, I vigorously support the Knutson bill, H. R. 4790, which provides for badly needed tax reductions. The Knutson bill is well developed and it is fair. It should be enacted into law without delay.

I have just completed my first year of service on the Committee on Ways and Means and consequently I do not have at my command first-hand recollections of the experience of the committee in the handling of the President's estimates of revenue. I do have many recollections of the President's estimates as presented during debate on the House floor, and I have very strong recollections of the use made of the President's estimates of revenue last year to discourage passage of the Knutson bills, H. R. 1 and H. R. 3950. I have always favored conservative estimates of revenue, but I do not favor the use of overconservative estimates for the purpose of prolonging a tax schedule that is grinding the wheels of industry down to a stop. I think it is important to judge the present estimates of revenue for the fiscal year 1949 by the record of like estimates for recent years and because of the abnormal and unpredictable expansion of our wartime industry in the early years of World War II, I have limited my comparison of such estimates with actual collections to the last 5 years.

The President's first estimate of revenue for the fiscal year 1944 was $33,081,000,000, whereas actual collections were $44,149,000,000. In other words, the President's estimate was off 25.07 percent. For the fiscal year 1945, the President's first estimate of revenue was $40,769,000,000 and actual collections proved to be $46,457,000,000, an error of 12.25 percent. For the fiscal year 1946 the President's first estimate was $41,255,000,000 and actual collections $43,037,000,000, an error of 4.14 percent. For the fiscal year 1947, the President's first estimate was $31,513,000,000 and actual collections $43,259,000,000, an error of 27.16 percent. For the fiscal year 1948, the President's first estimate made in January 1947 was $37,730,000,000 and the latest revision of the estimate for the current fiscal year ending next June 30 is $45,210,000,000, or an error by the President of 16.55 percent. The average error made by the President for the last 5 years is 17.23 percent. If we apply the President's average percentage underestimate of revenues to his first estimate for the fiscal year ending June 30, 1949, it would increase estimated revenues for the next fiscal year by $7,663,000,000.

I do not predict a definite percentage of error in the President's estimates. I am giving you the foregoing information to counteract the apparent determined effort of the President and certain Democratic Members of Congress to use these underestimates of revenue as a leverage for forcing the further extension of wartime tax rates.

In addition to the underestimate of revenues, I have witnessed during the past year a determined effort by certain Democratic Members of Congress to prevent any reduction in expenditures below estimates. Furthermore, we have heard on this floor during the current debate charges by senior Democratic members of the Committee on Ways and Means that little or no reduction in expenditures below budget estimates can be achieved by the Eightieth Congress. The underestimation of revenues and the preaching of a policy of futility in the matter of reducing expenditures have for their common purpose the continuation of the New Deal program of spend and spend and tax and tax regardless of the possible disastrous effect of high taxation on agriculture, business, and industry.

High taxation has already helped to produce dangerous trends in our domestic economy. There has seldom been a time when these trends have been more dangerous and more manifest.

For a healthy agriculture we must preserve above all else a good home market maintained by full employment and the ability to buy enough food to maintain a good American diet.

Jobs and full employment mean much to me. I listened with interest to the discussion of the gentleman from California [Mr. HOLIFIELD], who just preceded me, and I think he will agree with me that it is quite important to keep the wheels of industry turning, and jobs available for all who need them.

Full employment can be maintained only if the wheels of business and industry are kept turning by the investment of new money and especially the use of new money as risk capital. An examination of table No. 7 on page 14 of the committee report shows a trend to bonded indebtedness carrying fixed interest obligations and some reduction in preferred stocks and a sharp reduction in common stocks. There has in fact been an inadequate supply of risk capital notwithstanding unprecedented demand for goods. There has also been a dangerous reduction in the net purchases by individuals and an enforced reliance of business and industry upon life insurance companies, commercial banks, and mutual savings banks for the purchase of new securities. There is shown also an increase in the percentage invested in public utilities as compared with investments in industrials. To me this indicates an unwillingness of investors to invest venture capital in industrials to the extent we need new capital in these industrials if we are to provide jobs and increase our industrial production to the extent needed.

The dangerous shrinkage in net purchases of new corporate securities by individuals cannot be charged entirely to any one factor. It is more likely to be the result of a combination of factors such as the drying up of individual savings by those who customarily invest their money in venture capital and by the discouragement and fear of loss that goes hand in hand with the President's threat of penalizing corporations. With a sellers' market and a backlog of waiting orders and unsatisfied demand for new goods, it is little short of amazing that adequate venture capital has not been forthcoming. The low level of individual investments in new capital and especially in venture capital is literally driving business and industry into the camp of large investors and away from the great body of small investors who have contributed so much to the health of our domestic economy in years gone by. I commend rather than condemn the large investors for supplying the needs for new capital as they have supplied them in this crisis, but I deplore conditions that have the effect of driving the great body of middle-income earners of our Nation out of business and industry in this way. Such concentration of our business and industry in the hands of large investors will seriously weaken the economic health of our Nation. High individual income taxation has contributed to this trend and the constant threat of warfare against the corporations has disturbed their ability to secure venture capital when they need it so badly to provide jobs and to produce goods to meet our needs.

I was interested in Dr. George Gallup's analysis that appeared in the Iowa newspapers of Wednesday, January 14, 1947, showing that heavy taxation is blamed by the British for low initiative. The British Institute of Public Opinion asked this question: "What do you think is the main reason why many people are not prepared to work harder than they are doing at the present time?" The high level of taxation was given as the principal reason by one-fourth of those who expressed an opinion and this factor was given by more people than any other. While the British income-tax rates have been higher than the American rates, our people have other kinds of taxes such as State and city taxes and on a per capita basis the Americans pay more in all forms of taxes than the British. Incentive is, in fact, a strong point in national productivity in any country operating under a system of free enterprise.

In the recent report of the President's Council of Economic Advisers, Americans were shown to have cut their savings operations in 1947 by $3,600,000,000 under 1946. This figure was reached by the world staff of the Associated Press by deducting consumer expenditures from disposable income. Disposable income in effect is income after taxes, and the difference between consumer expenditures

and disposable income each year presumably is saved.

We must modify our tax structure and our attitude toward business and industry if we are to maintain a sound competitive private-enterprise system. If we fail, these trends can precipitate our Nation's plunge into socialism, economic chaos, and collapse.

Early in my discussion I gave you some averages on estimated receipts. I would like in the few minutes I have remaining here to call the attention of the gentleman from Tennessee [Mr. COOPER] to a further carrying out of his discussion of yesterday. He discussed the subjects of national defense, veterans' service and benefits, international affairs and finance, interest on the public debt, and refunds of taxes, and he argued that these items were irreducible and that they made up more than 80 percent of the 1949 budget. I would like to add, however, that we have still other items in the general budget of expenditures and that we can make comparisons of these items over the years gone by with today's budget estimates. If you take those five items that he discussed completely out of the actual expenditures for the years 1940 to 1947, inclusive, and the estimates for 1948 and 1949, you will find that the estimated balance of estimated expenditures for 1949, taking out those five items, is higher for 1949 than for any of the last 10 years. That shows a very dangerous trend in the expenditures for these other expenses of our Government. I have those figures here. For 1940, taking out the five items, actual expenditures were $6,067,000,000; for 1941, $5,493,000,000; for 1942, $4,901,000,000; for 1943, $6,990,000,000; for 1944, $7,946,000,000; for 1945, $7,658,000,000; for 1946, $4,867,000,000; for 1947, $6,460,000,000; for 1948, only estimates are yet available and they are $7,568,000,000; and for 1949 they go up to $8,293,000,000. The average for the 9 preceding years, 1940 to 1948, inclusive, for all those other items in the budget was $6,461,000,000. The President's estimate of expenditures for 1949 is $8,293,000,000. If you are looking for $2,000,000,000 budget savings, you would not have to look further than the reduction of the budget estimates for 1949 to the average budget for the last 9 years for these other items to find that much. By taking out the five items I am not committing myself to the endorsement of the full estimates of the President on the five items the gentleman from Tennessee [Mr. COOPER] gave us yesterday. I add this discussion only to show you that there is a very high budget of expenditures in the other items that can be reduced without too great hardship. I think we must examine the entire budget most carefully. That is the answer I gave Mr. Snyder, the Secretary of the Treasury, when he was before the committee on tax legislation. I had suggested that it was most inequitable and dangerous to single out one small field for imposing the entire load of additional taxes to offset reductions in personal income-tax revenues. Mr. Snyder finally answered me and said, "If the gentleman will help us find other revenues I will be glad to look into the matter." I said, "Would you mind my looking to the budget and my examining the budget of expenditures?" I had in mind the continued increases in estimated expenditures for 1949 over the average expenditures for the 9 preceding years. Holding the line against this constant increase of Government expenditures is the challenge we should meet effectively and without delay. Some of those five items can be challenged also, but I am talking now principally about the items outside the five. We must examine the budget of estimated expenditures from top to bottom if we are going to do a good job in representing and protecting the American taxpayers and the American economy.

Mr. DOUGHTON. Mr. Chairman, I yield such time as he may desire to the gentleman from California [Mr. HAVENNER].

Mr. HAVENNER. Mr. Chairman, I believe in the homely American philosophy—sometimes called the code of the grass roots—which holds that the time for a man to pay his debts is when he has the money to do so.

By a strange perversion of this philosophy the bill now under consideration would have the American people do just the contrary. This bill would set a precedent which would lead to permanent repudiation of our national debt. If the Congress refuses to make a sizable debt reduction at a time when the national income has reached the highest point in history, it will certainly refuse to do so in future years when income levels will inevitably diminish.

Proponents of this strange measure attempt to justify it by saying that the American people prefer tax reduction to debt reduction, so that they may have plenty of money to spend as they see fit in the immediate future. Will someone please picture for me any conceivable situation at any time in the future when human beings will not want to have their taxes reduced?

Let us imagine, if we can, that the American people had borrowed $250,000,000,000 from some private banking institution, instead of from their own Federal Treasury, and had promised to tax themselves over a period of years in a sufficient amount to repay the debt. Let us suppose further that in a short while the taxes had produced a sufficient revenue to enable an important payment to be made on the debt. Then let us imagine, if possible, that the American people said to the banking institution, "We do not want to reduce the debt now; we prefer to spend this money as we see fit." What do you suppose the bank would say?

This is precisely the situation which exists in America today with the exception that the creditor is the United States Government instead of a private banking institution. And yet the leaders of the majority party in the House of Representatives, who control the purse strings of our Nation and are responsible for its solvency, have the effrontery to make this preposterous proposition to our people.

The pending bill has been denounced during this debate as a dishonest measure. It is exactly that, because its proponents are appealing to the cupidity which is inherent in human nature, and attempting at the same time to delude the American people into the belief that any important debt reduction may safely be postponed until some future time. They certainly know that postponement of adequate debt reduction in a period of great national prosperity can only mean permanent repudiation of the debt in the years of lesser prosperity which will inevitably ensue. Such a proposition can only be characterized as wholly dishonest.

There are other reasons why this bill has been denounced as dishonest. Its proponents in the House are obviously proceeding on the theory that its proposed $6,000,000,000 tax cut, which they know cannot be accomplished, will be cut back by the other body to a more rational figure. What a strange code of ethics to be followed by the leadership of a legislative body which is supposed to have primary responsibility for the Nation's purse.

The proposed $6,000,000,000 tax cut is being railroaded through the House of Representatives before Congress has even decided on the size of the Government's spending budget for the next fiscal year. No one knows how many unforeseeable necessities for great Federal expenditures may occur between July 1, 1948, and June 30, 1949. But all of us do know that the President's budget for the present fiscal year, which was bitterly attacked as extravagant and excessive when it was sent up to this body a year ago, has proved to be not an overestimate but an underestimate of the necessary Federal expenditures for the current fiscal period.

Mr. Chairman, I will support tax relief in the lower brackets to enable wage earners, veterans, pensioners, and social security beneficiaries to exist on their meager incomes, but I submit that it would be sheer fiscal dishonesty, in this critical period in our national history, to legislate large tax reductions for our more prosperous citizens in order to buy their favor at the polls.

Far more important than tax reduction at this time, Mr. Chairman, would be effective legislation to reduce the high cost of living in this country. I believe that the Congress should restore at least half of the repealed excess profits taxes, enact adequate price-fixing and rationing laws, restore rent control, increase social security benefits, repeal excise taxes, and adopt practical anti-inflationary measures. Such a program would attack the causes of economic distress among our people, and would not be a mere political palliative.

Mr. DOUGHTON. Mr. Chairman, I yield such time as he may desire to the gentleman from Louisiana [Mr. BROOKS].

Mr. BROOKS. Mr. Chairman, I rise at this time to say that I am committed to a program of tax reduction—committed by speeches I have made in my district, by letters I have written to many of my constituents, and by news letters I have issued from time to time. I am definitely committed to a program of tax reduction.

It is true my idea has been to accomplish this in part by raising the personal income-tax exemption. I think it is un-

fortunate that we have pursued the program of the past by placing that personal exemption at such a low point as it is today. We are now reaching an era where we have a country of only small families. The day of the large family is rapidly disappearing.

A low tax exemption for children especially is not in the interest of the country as a whole. I have a child of my own, and I know that you cannot rear a child on any five or six hundred dollars personal tax exemption, and if you have two, you cannot do it on a thousand, or three on fifteen hundred dollars. We are definitely working against the best interests of the country as far as encouraging larger families. A poor man cannot afford to raise a large family. The economy of the country is against him, and the struggle to properly take care of his children, send them to school, and start them off in life is too much under our present income-tax laws. The tax rate in the lowest bracket is too much to permit this to be done. As a result of this fact, and other economic laws, the people of this Nation are no longer providing themselves with large families but are content to bring into this world one or two children and give them the best they can afford. I think we should all study this situation and try from the national level to change our tax structure in the interest of those with larger families.

There are those who have suggested an increase of one or two hundred dollars in the personal tax exemption for each person. This is not enough. In my judgment, it should be increased to $1,000 for each living person in this country.

Mr. Chairman, I do not suggest this as the sole means of giving tax relief. I suggest it as an urgent need. I do not mean to preclude other changes which will reduce the burden upon the great masses of average people throughout the Nation. A reasonable reduction by percentage is necessary, always bearing in mind the fact that taxes should be in accordance with ability to pay.

Mr. DOUGHTON. Mr. Chairman, I yield such time as he may desire to the gentleman from Arkansas [Mr. GATHINGS].

Mr. GATHINGS. Mr. Chairman, during the war the taxpayer dug deeper and deeper into his pocket for taxes, and more taxes. The war was costly. We had to pay that cost. The taxpayer understood that.

But the time has now arrived, it is more than ripe, for the tremendous wartime tax burdens to be lightened, most especially for those millions of Americans whose incomes are in the low or middle brackets but who pay as much for a pound of meat as anybody else.

These people are in no position to continue to support excessive taxation and spending by the Government—spending that is much too high for peacetime operations.

In other words, we have got to give the taxpayers relief. He has reached and passed his saturation point.

Here is the sort of thing I am talking about. The other day I had a letter from one of our fine women of Arkansas. She cited her own record of the income tax she has paid in the past few years. She wrote me that in 1940 she paid an income tax of $10.21. The next year, 1941, her tax had almost trebled to $28.73. The following year, her tax burden was 10 times greater and by 1944 she was paying a total of $415 in income taxes. Her taxes dropped slightly in 1946 but she estimated that for 1947 she would still be carrying a tax load of $339.

Now, this good woman wrote me:

> This increase has been so great that with repairs and insurance I find I am rapidly heading toward the confiscation of what little real estate I have.

Then she added something that a great many of us here in the House cannot help agreeing with. She wrote:

> I do not think that the President's suggestion to deduct $40 from the tax is worth the time it would take to write it off.

In my opinion and, I sincerely believe, in the opinion of many distinguished colleagues on this side of the House, Mr. Truman's so-called $40 tax bonus is merely an admission on his part that taxes should be reduced. The President has found that he must abandon his former untenable position that the time is not ripe for a tax reduction. But how can he ask the taxpayers of this country to be satisfied with so little?

I hope that the American people can soon obtain relief from excessive income taxes. I have voted before to reduce the Federal income tax. I have also voted to override the veto of the President when he sent the tax-reduction proposals back to Congress. I shall continue to fight for the needed tax reductions.

I do not know, nor does anyone know, the form and the scope of the inevitable tax-reduction bill which Congress is going to pass. But whatever is in the bill that Congress sees fit to pass, I shall support it. And I expect again to exercise my legislative privilege of casting my vote to override a veto, if Mr. Truman should see fit to return it to Congress without his signature.

As I see it, the country can stand a reduction in income taxes of between $4,000,000,000 and $5,000,000,000 and pay a goodly sum of the national debt. But to do it, we must carefully cut out every penny of unnecessary Government spending. That may mean trimming Mr. Truman's budget, but if it does, then I must support efforts to trim it.

I do want to say here and now, however, that I favor giving Americans in the low- and middle-income brackets their deserved tax relief before we undertake any costly aid program for the European nations. After all, charity begins at home.

I do not, however, believe we can afford to economize at the expense of our military preparedness, our agriculture, and our flood-control programs. The reductions in Government spending can readily come from other sources.

I hope that this Congress will write a tax-reduction bill which will raise the individual exemptions and reduce the tax rate somewhat. And I consider it most important that the measure also include a community-tax provision.

My own State of Arkansas is caught in this wicked web of tax discrimination which stems from nonuniform community-property laws. It is surrounded by States where the laws are more favorable for tax purposes. Louisiana, Texas, and Oklahoma all have such laws, and to be bordered by such States works to the disadvantage of Arkansas in attempting to attract and hold capital within its borders.

The Federal tax laws must wipe out, as far as it is possible, these deplorable discriminations. It is not right, it is not just, and it should not be tolerated that residents of one State should pay more Federal income taxes than those who live in another State.

I do not believe that the Government can much longer expect the citizens of this country to continue to bear their tax burdens with which they are now confronted. They are already complaining; they are begging for relief and I shall do all in my power to help those in the lower and middle brackets to get it. I sincerely trust and firmly believe that the Congress will work out the solution in a manner that is best for all without weakening one bit the solid foundation of our economic well-being.

Mr. KNUTSON. Mr. Chairman, I yield 15 minutes to the gentleman from Indiana [Mr. GRANT].

Mr. GRANT of Indiana. Mr. Chairman, the merits of the bill H. R. 4790 have been well explained by those members of the majority of the Committee on Ways and Means, who have preceded me on this floor. Indeed, some members of the minority have taken the floor to say that they, too, believe in the urgent need for relief for the 52,000,000 individual income-tax payers of America.

I hope that over the week-end recess the Members will have an opportunity to re-read the record of this debate. In particular the report of the Committee on Ways and Means ought to be required reading for every Member. The majority report points out the urgent need that exists for tax relief, and furthermore, points out how real tax relief can be accomplished, and all within a balanced budget and with assurances of a substantial payment upon the national debt.

Last evening I first had an opportunity to read the report of the minority Members of the committee. A careful reading of the minority report readily discloses the mistaken assumptions on which the case of the minority has been built.

I have read this minority report with great interest and am struck far more forcefully by what it omits than by what it contains. This report is devoted exclusively to a series of ill-founded criticisms of H. R. 4790. It is almost entirely negative in character.

The minority report contains nothing at all about the President's tax program. Not a single line is written in its defense. This can mean only one thing. The minority cannot bring itself to support that program. It is important that this failure to support the President be recognized by all, because it must mean that H. R. 4968 is not the tax program of the Democratic Party in Congress. It is merely the President's tax program.

At the very heart of the minority's argument is the contention that the 1949 budget will not absorb the tax reduction provided by H. R. 4790. A deficit is predicted if the bill is enacted. In support of this contention, the estimates presented in the President's budget message are cited. They seem to show that H. R. 4790 would produce a deficit of $2,100,000,000 in the fiscal year 1949. This conclusion is incorrect. The revenues used are understated substantially, and it is assumed incorrectly that Congress will make no reduction in the President's budget.

The reasons why the President's revenue estimates are much too low are set out at length in the majority report and I need only summarize them here. His estimates are based on an assumed level of personal income of $200,000,000,000. This is a flat estimate applying to the entire 18-month period, January 1, 1948, to July 1, 1949.

It is alleged that $200,000,000,000 represents "current levels." This, of course, is not so. Personal income during the last quarter of the calendar year 1947 was $205,000,000,000. The level presented in December 1947 is now estimated at $206,500,000,000. In other words, the $200,000,000,000 assumption is actually substantially below current levels.

Moreover, the President's estimators have ignored the rising trend in personal income, a trend which can reasonably be expected to continue for at least a few months in the spring of 1948. This trend is very important for tax collections in the fiscal year 1949. Yet, this trend—this fact—is ignored completely in the assumption upon which the President's revenue estimates are based. This fact contributes materially to the understatement of the estimated tax collections in the fiscal year 1949, upon which the minority's whole case depends and has been built.

The majority believes that the revenue estimate of $47,300,000,000 prepared by the staff of the Joint Committee on Internal Revenue Taxation is based on far more reasonable assumptions, and should be the estimate used in discussing this basic question of policy.

With respect to expenditure cuts, the minority assumes that Congress will make no reduction in the President's budget for 1949. In this the minority ignores the fact that by the President's own admission Congress made a reduction of $1,500,000,000 in the 1948 budget. The 1949 budget is even larger. It contains no less than $5,000,000,000, which represents proposed legislation—unauthorized items—while all but about $400,000,000 in the 1948 budget was based on existing legislation. Therefore, the majority believes that it is reasonable to forecast a cut of at least two to three billion dollars in the President's budget for 1949.

I would like to call your attention to table 5 on page 7 of the majority report. This table makes it clear that if the 1949 expenditures are cut by $3,000,000,000, there will be a surplus of $3,500,000,000 even after allowing for the full effect of H. R. 4790 on revenues in that year. Even if expenditures are cut by only $2,000,000,000, a surplus of $2,500,000,000 will remain.

Thus, the minority is clearly wrong when it says that H. R. 4790 threatens a deficit in 1949. This is very important because there are inferences in the minority report that if it were not for the possibility of a deficit in 1949 the minority would support a tax cut.

For instance, on page 65, they say:

> The minority Members believe that the capital requirements of industry, and the maintenance of a healthy stimulus of managerial incentive and investment capital, do not call for tax reduction which might require deficit spending for fiscal year 1949.

Evidently they believe that the capital requirements of industry, managerial incentives, and investment capital do call for tax reduction, if deficit financing can be avoided. If this inference is correct, I believe that the minority on the Ways and Means Committee should support H. R. 4790.

Despite the hedging which takes place in the statement from the minority report just quoted, the minority spends much of its time attempting to minimize the need for tax reduction now. Apparently they are willing to ignore the pressure of the high cost of living, to deny the restrictive effects of the high individual income-tax rates upon investment and enterprise, and to disregard the pressing need for an adequate solution to the problem of the difference in tax burdens between community-property and common-law States.

The pressure of rising prices on the incomes of persons in the lower-income brackets is so real and so generally appreciated that it is unnecessary for me to belabor this point. Did not the President ask us to enact legislation specifically designed to relieve the lower-bracket-income taxpayers who are suffering from the high cost of living? We have made provision for such relief in H. R. 4790. We have raised the per capita exemption by $100. To a family of four this means an increase in the breadwinner's personal exemption, in his wife's exemption, and in the dependency credits from $2,000 to $2,400 a year.

We have also made special provision for the low-bracket taxpayer in the percentage tax reductions provided by the bill. Persons with net incomes of $1,000 or less after exemptions receive a 30-percent reduction in tax in addition to the increase in exemptions. Persons with larger incomes receive percentage reductions which grow smaller as the income grows larger, the minimum reduction being 10 percent. This applies to income in excess of $4,000. Taxpayers with incomes below $5,000 receive no less than 71 percent of the relief provided by this bill.

The minority's contention that the present high tax rates on individual incomes do not impede production is also fallacious. The minority argues that since production has reached a maximum, no material increase can occur, even though the incentives for investment and managerial effort are increased. Apparently the minority thinks that bottlenecks are no longer a problem, and that no possibilities for improvements exist in the utilization of our labor supply, in the techniques of production, or the patterns of business management. In this they are at odds with the administration's own Council of Economic Advisors which has set as a goal for 1948 a net increase in production of 3 percent.

The minority claims that there is no shortage of savings or investment at the present time and cites testimony of the Secretary of Commerce in support of this contention. If you will look at pages 13 through 16 of the report on H. R. 4790 you will find a summary of evidence presented at the hearings on this bill which demonstrates conclusively that there is a shortage of the most essential element in investment, namely, risk capital. Even if it is so that we have enough savings, and this, of course, I do not admit, it would still be true that the people who do most of the saving are showing an increasing tendency to prefer investment in relatively riskless securities.

May I call your attention to an exhaustive study on the subject which appeared in the United States News in its issue of January 23, 1948? That article states that $700,000,000 in corporate stock issues, which were filed for approval, have been withdrawn because of unfavorable market conditions. Other issues that were planned were not even submitted for approval, all because of the scarcity of venture capital.

I quote from that article:

> Records of the Securities and Exchange Commission show that $700,000,000 in corporate stock issues, which were filed for approval, have been withdrawn because of unfavorable market conditions. Other issues that were planned were not even submitted for approval.
>
> The mystery deepens when a study is made of some of the other sources of capital for investment.
>
> Total issues of new securities in 1947 amounted to $6,700,000,000, biggest year since 1929 and $2,300,000,000 more than securities issued in 1946. There is no evidence that capital has dried up. But there is a sign that capital is not eager to take today's risks in common stocks.
>
> State and municipal bonds issued last year established a record at $2,200,000,000. That was more than double the local-government issues of 1946.
>
> Corporation bonds floated during the year totaled $3,300,000,000—another record—and a gain of $1,300,000,000 over 1946.
>
> Stocks issued by corporations, on the other hand, amounted to $1,200,000,000, a $300,000,000 decline from 1946.
>
> This trend in financing is a sign that investors prefer securities that carry specific and fixed promises to pay over issues whose earnings depend upon profits. The tendency to borrow money rather than to issue new shares of stock also shows up in another direction.
>
> Bank loans in 1947 jumped $7,000,000,000 to reach a record of $42,600,000,000. Commercial banks have become a major source of new money for United States business enterprises, a more important source than the security markets.
>
> Insurance companies also have loaned heavily to industry and to public utilities to finance expansion.
>
> Business investment in plant, equipment, and inventory in 1947 is estimated at $25,000,000,000. Most of this came from earnings that were plowed back into industry. During 1947, new money raised in the investment

markets provided only a sixth of the total funds required by business.

A different situation prevailed in the earlier boom in 1929. In that year, three-fifths of industry's financial requirements came from investors, and investment markets were tapped for a total of $8,000,000,000, of which $5,900,000,000 was in corporate preferred and common stocks.

The 1929 boom was reflected strongly in security prices. At that time investors were willing to put money into stocks that were yielding an average of 3.5 percent, although bond yields were as high at 5.2 percent. Confidence in future earnings appeared to be high. When stock prices broke in that period, the boom ended.

Today there is no boom in the stock market. Stocks are selling at prices that yield 5.4 percent and still fail to attract buyers. The prices of shares at the end of 1947 averaged about the same as at the beginning of the year, despite the earnings records of corporations in that period. Federal Reserve Board officials find some comfort in the fact that security markets are the one place that inflation has bypassed.

What is developing, however, is a situation where new money is becoming harder to get. Banks and insurance companies are stiffening their terms and are more cautious in advancing loans. Corporations have drawn heavily on cash reserves and cannot get all the money they need—or think they need—from retained earnings. Bond prices have declined, raising the average interest yield from 2.4 percent in 1946 to 3.13 percent late in 1947. That means new issues will have to carry higher interest rates.

These are signs that corporations soon may face a condition where they cannot get as much money as they want at terms they would like. It could lead to a postponement of plans for expansion and cause the boom to weaken.

Causes of sluggish investment markets are found to be many by people who analyze conditions and trends.

Uncertainty about the business outlook appears to be the major factor. Persons with money to invest obviously have little confidence that the boom will persist. A majority apparently hold the opinion that the present inflation in prices and earnings will lead to trouble and that, during the trouble, they can pick up securities at lower prices. This opinion evidently has dominated investors since August of 1946, when the business boom really took hold and when stock markets entered a slump.

Investment money, partly as a result of this uncertainty, is running strongly into insurance companies, savings banks, building and loan societies, and other investment institutions. Flow of savings into stocks and into enterprises that carry risks has been reduced to a trickle.

Suspicion also appears to be widespread that industry expansion at the present level of prices is unwise. Often when a company announces expansion plans, the value of its outstanding shares drops.

Current profits also fail to impress investors. Apparently people with money are looking behind profits at high-wage rates, high prices, and high-cost inventories. Break-even points for most corporations are believed to have gone up, so that a relatively moderate downward adjustment in output could turn profits into losses.

Speculation in securities is at a low ebb. The shift of speculative funds from stocks to commodities is viewed by stock-market analysts as a factor that weakens the market for stocks. Lack of speculation to support stocks is regarded further as an influence that works against business financing through risk-bearing equities rather than through debt obligations, such as bonds or bank loans.

Credit for speculating in stocks also is harder to get. Federal Reserve officials require a speculator in stocks to put up 75 cents for every dollar's worth of securities he buys. Money can be borrowed more cheaply to speculate in commodities, where the margin is only 33⅓ cents on the dollar, or in housing and real estate, where Government guaranties sometimes run almost as high as 100 percent of building costs.

Tax policy is another factor that is regarded as discouraging investment in securities.

High individual taxes, particularly in the upper income brackets, leave less money, after living expenses, for saving and investment. At $16,000 of net income, for example, taxes begin to take a 50 percent bite, and that bite deepens as incomes rise, going to 86.5 percent at the topmost bracket. These groups provide the bulk of individual investment funds. A number of plans for tax reform call for lower surtaxes in order to stimulate private investment. The capital-gains tax also is viewed as a contributor to sluggish security markets by discouraging both buying and selling. Thus, some tax reformers suggest a lower rate on gains.

Corporation taxes are widely regarded as having a depressing effect. A corporation pays 38 percent on its net profit, and shareholders in that corporation are taxed again when they receive dividends. This form of double taxation is held to discourage investors. Also, a corporation that borrows money, either from banks or in the form of bonds, can deduct as a business expense the interest payments on its loans. But no deduction is allowed on dividends distributed to stockholders. This feature of the tax laws encourages companies to borrow, rather than to seek investment funds.

The doldrums in the stock market continue at a time when industry needs large amounts of new capital. Electric utilities, steel and oil industries are being forced to expand. But one major source of funds for expansion is about closed, and other sources—bank loans and bond issues—are narrowing. This raises a question as to whether needed new money will be forthcoming.

Mr. Chairman, this makes it very difficult to finance the relatively speculative ventures which produce the new products, the new processes, and the new managerial techniques upon which increased production and economic progress depend. Behind this increasing shortage of risk capital lies the extremely heavy taxes imposed on the incomes of the people who would ordinarily provide the required funds. The marginal rates are so severe that the savers do not think it worth their while to take any substantial risks. By ignoring this essential element in the picture, by concentrating attention on the over-all figures, the minority reaches the completely erroneous conclusion that tax reductions are not required.

The minority's objection to tax reduction at this time is hard to reconcile with their quite evident satisfaction over the income-splitting portion of H. R. 4790. As a matter of fact, the minority go to some length to explain how it was all their idea in the first place. We would be happy to let them share in the credit for this highly desirable reform if they will support H. R. 4790. However, a few Senate Democratic votes for a hastily drawn piece of legislation, presented with no idea of its ever being passed, hardly represents support for income-splitting. We shall be glad to share the credit, however, with those Democrats who vote for H. R. 4790.

In spite of their evident satisfaction over the income-splitting portion of the bill, the minority takes exception to one of the subordinate features of the present bill. I refer to the fact that they list as one of the so-called inequalities resulting from the bill, the increase to $1,000 of the maximum standard deduction for single persons. In fact, from the relative amount of space devoted to this point one could easily conclude that this is what they consider to be the principal so-called inequality in the bill.

Because of the prominence given this item in the minority report, let us examine closely the major argument they present.

After admitting the necessity of increasing the maximum standard deduction for married couples to $1,000, they say that such an increase is not necessary for single persons. Although their report is confusing on this point, they apparently mean the following: Married couples in common-law States must be given a maximum standard deduction of $1,000, because married couples in community-property States at present have a combined maximum standard deduction of $1,000. However, they apparently believe that since single persons in community-property States cannot receive a maximum standard deduction of over $500, single persons generally do not need an increase in their standard deduction.

This is a remarkable admission on the part of the minority. It indicates that they are interested in equal tax burdens only between one married couple and another married couple. They evidently are wholly unconcerned with the relationship of the tax burden between married couples and single individuals. They are wholly unconcerned with the fact that under their suggestion the maximum standard deduction for a married couple would be $1,000, and that for a single person, only $500.

This is such an unusual admission that I can hardly believe that the distinguished Members of the minority fully realized what was being written in the minority report. Were the minority Members aware of the implications of putting this in their report? I would be glad to yield a minute of my limited time to get their assurance on this point.

The two remaining arguments presented on this standard deduction can be disposed of briefly. In the first of these, the minority report specifies the maximum tax saving this increased deduction will bring a single person. I do not know whether the statistics are correct or not. However, in any case, is the minority unaware of the fact that increasing the standard deduction for married couples, with similar incomes, of which they approve, will result in a similar tax saving? In this connection I wish to emphasize that I am not speaking of the advantages gained from income splitting, but only the standard deduction.

Finally, the minority say that increasing the standard deduction for single persons will not aid those with incomes under $5,000. This should be obvious to anyone. Of course, it will not, and

neither will the increase in the standard deduction for married couples, of which they approve, aid those with incomes under $5,000.

The minority does not like the special exemption of $600 for persons aged 65 and over. The minority is unwilling to acknowledge the perfectly obvious fact that persons over 65 cannot adjust themselves to high taxes and a higher cost of living as easily as younger people can. Small fixed incomes occur far more frequently among taxpayers over 65 than among persons in lower-aged groups. These people need special relief and special relief is being provided.

The minority argues that if the $600 exemption for the aged is adopted, there will of necessity be a flood of similar exemptions for teachers, veterans, retired civil servants, the partially and totally disabled, and other groups. In this the minority is deliberately overlooking the fact that the special exemption for persons aged 65 and over was developed as a substitute for the extension of the very troublesome system of exclusions of particular types of pensions, annuities, and retirement pay which characterizes existing law. The special exemption for the aged is the reason why it will not be necessary to institute specific exclusions for the benefit of teachers, veterans, and retired civil servants.

We have already made provision for the relief of the blind. That action has been applauded by our blind citizens from one end of the land to the other. Following is a letter which I have received from the American Foundation for the Blind:

AMERICAN FOUNDATION
FOR THE BLIND, INC.,
New York, January 28, 1948.

HON. ROBERT A. GRANT,
New House Office Building,
Washington, D. C.

DEAR MR. GRANT: I have just received word that the Ways and Means Committee has removed the age limit on the exemption on account of blindness.

I want to thank you most sincerely for this correction.

I was very concerned about this matter as I know that blindness carries with it as much additional expense over expenses incurred by seeing people after a blind person reaches age 65, as it does before.

I also want to say that I appreciate your changing the blind "deduction" to an "exemption." This will simplify reporting for the blind people and will be of some financial advantage to them also.

Here's hoping the bill now receives kind treatment from Congress.

Very sincerely yours,
ROBERT B. IRWIN,
Executive Director.

If it were administratively possible to do so, it would be appropriate to extend this same relief to physically handicapped persons.

The minority takes strong exception to the portions of the bill and to the proposed floor amendment which will apply the splitting technique to the estate and gift taxes. In so doing the minority ignores the unequal impact of the existing law which is spelled out on pages 24 to 26 of the report on this bill. We all seem to be agreed on the necessity for the equalization of the impact of the income tax. The minority's unwillingness to follow through and equalize the estate and gift tax as well, apparently stems from the fact that most of the beneficiaries of this equalization will be persons of substantial means. This seems to me to be a ridiculous kind of argument. The fact that the benefits are limited to persons of considerable property is an inevitable result of the fact that the gift and estate taxes are concentrated on such persons. Moreover, the fact that the taxpayer who suffers under an inequality is a person of means does not make the inequality any less painful.

The minority argues that the adoption of H. R. 4790 would preclude any further tax revision. This seems to imply that the current level of expenditures will persist indefinitely. I sincerely hope that this is incorrect. We cannot go on forever on $40,000,000,000 budgets. The present level of spending is clearly excessive, and the majority will make every effort to see to it that this forecast which the minority is making just simply is not true. It is our firm conviction that expenditure reductions will make possible additional tax reduction and revision in the future.

Moreover, in their concern over the need for general tax revision, the minority ignore the fact that the first step in revision is being taken in the bill. I refer, of course, to the equalization of the income, estate, and gift taxes.

The minority report on H. R. 4790, like the minority report which accompanied the revenue-reduction bills of the first session of this Congress, makes a great noise over the relationship between the rate reductions provided in this bill and the increases in taxes which occurred between 1939 and 1945, when the wartime tax system had reached its peak. We pointed out last year, and we say again, that this comparison is fallacious and downright misleading. Lurking behind it is the assumption that the tax system which we had in 1939 is the right kind of a tax system for 1949, 1950, and 1951. But the tax system of 1939 was the end product of a long series of New Deal tax-reform measures. The policies of the New Deal are no fit pattern for us to follow now. This is particularly true of the New Deal tax policy which deliberately set out to reduce the volume of savings and which paid little or no regard to the important relation between risk capital and the increase of production which is basic to the development of the American standard of living.

There is at the conclusion of the minority report a section in which the minority complains about the so-called administrative complexities which H. R. 4790 will produce. Your committee went into this matter with the Commissioner of Internal Revenue at the time of the hearings on this bill. If you will refer to pages 254 to 258 of the hearings on H. R. 4790 you will find an interchange between the gentleman from New York [Mr. REED] and the Commissioner, Mr. Schoeneman. You will note first of all that Mr. Schoeneman registered a complaint about the fact that H. R. 4790 splits the first bracket. You will note, however, that Mr. Schoeneman admitted that the splitting of the first bracket is in accordance with the principle of ability to pay, and also that a proposal to divide the first bracket into four parts was sponsored by the Treasury Department itself in 1943. Note also Mr. Schoeneman's statement that the net result of splitting the bracket will be the addition of only three lines to the income-tax form.

The minority report reproduces a portion of the form now in use, as well as a proposed form submitted by the Commissioner and intended for use after the enactment of H. R. 4790.

The form used after the enactment of the bill looks far larger and far more complicated than the one now in use. This is supposed to prove the minority's case. This is supposed to show why H. R. 4790 will produce intolerable administrative burdens.

May I point out first of all that almost all of the expansion in the form is due to the introduction of the income-splitting proposal which is now generally regarded as highly desirable. The small additional amount of work which income-splitting will impose upon the taxpayer who is filling out his form, is minor in comparison with the improvement in equity which income-splitting will produce.

I think particular attention should be given to the minority's complaint that the tax reduction in H. R. 4790 results in extreme complexities. On this point the Commissioner advanced a positive suggestion. He recommended that a revised rate schedule be substituted for the percentage reductions in tax which are an integral part of this tax-reduction bill. But upon examination it turned out that the tax-rate schedule which the Commissioner was offering had rates in it which were carried out to the third decimal place. I am quite willing to agree to the desirability of incorporating the tax reductions into a new rate shedule. It is certainly true that generally this would simplify the tax form slightly and perhaps reduce the taxpayer's labor. but I do not think that a rate schedule which involves rates carried out to the third decimal place is a satisfactory solution. Therefore, I am unwilling to accept the Commissioner's proposal, and I reject the minority's contention that the form which H. R. 4790 takes is inappropriate. May I point out again, that the great increase in complexity which the tax reduction involves actually amounts to the addition of three lines to the form, and no taxpayer has to use any more lines as a result of the rate reduction than he does now. It seems to me that the minority's complaint on this score is, to say the least, trivial.

In closing, I should like to say a few words about the statistics used in the minority report.

I must admit considerable amazement when I first examined these statistics. To say the least, the use made of them must be considered rough and ready rather than accurate. Let me give you a few examples.

On page 63 of the report the minority states that the staff of the Joint Committee on Internal Revenue Taxation

estimates a deficit of $400,000,000 in the fiscal year 1949, after the tax reduction provided by H. R. 4790, using the same income level predicted by the Secretary of the Treasury. By the way, I am interested to learn from the minority report that this $200,000,000,000 is a prediction. This must mean that it is a forecast rather than a mere assumption.

In using this $400,000,000 deficit the minority somehow failed to grasp what the staff of the joint committee emphasized at some length, namely, that an income level of $200,000,000,000 for the calendar year 1948 is unreasonably low, and, therefore, estimates based on it are unrealistic. Any adequate presentation of a staff estimate at this level would, therefore, at least require that this fact be indicated.

Again on page 63 the minority report says that any surplus in the fiscal year 1949 must be decreased by—I quote: "any revenue loss from the prospective 30-percent reduction in estate and gift-tax labilities."

This does not, of course, actually say that there will be a large reduction in fiscal year 1949 collections, but the implication is certainly there. Yet surely the minority must know that the estate- and gift-tax amendments do not go into operation until the effective date of this act. They also must know that the estate-tax returns which will reflect the bulk of any possible revenue loss from this provision need not be filed until 15 months after the death occurs. If the minority appreciates these facts, and I cannot help feeling that they must, it is hard for me to see how they could help but agree that the estate- and gift-tax amendments would have no appreciable effect on the fiscal year 1949 collections.

Another inaccuracy occurs on page 67 of the report. The minority refers to, I quote, "the $25,000 of public funds expended for the report of the Special Tax Study Committee."

I have been informed that almost none of this money has been expended. If the minority has any facts to back up the statement made in the minority report, I should appreciate receiving them.

Again, on page 67, the minority refers to the percentage increase in spendable income at different income levels resulting from H. R. 4790. I thought we made it clear last year that such percentages were only a statistical trick. I did not think we would see them try it again. Nevertheless, there it is.

To show the indefensibility of using such percentages, let me draw upon a homely illustration:

If I already have nine-tenths of a pie and am given the remaining one-tenth, it is obvious that the amount of pie that I have is increased by only about 11 percent. However, if in the beginning I have only one-tenth of the pie and I am given an additional one-twentieth, it is obvious that the amount of pie I have is increased by 50 percent. Yet, assuming I am fond of pie, am I not better off in the case where I am given the 11-percent increase than where I am given the 50-percent increase?

I am sure that if the minority will substitute—for the pie held in the beginning in the illustration—will substitute the words "spendable income before a tax reduction," and think of the remainder of the pie as the taxes presently paid by a taxpayer, it will become obvious to them that the percentage increase in spendable income is an absolutely meaningless term.

On page 64 of the report the minority refers to the present high level of private gross capital formation, and implies from this that the present rate of business investment is adequate. Surely they must recognize that something like one-third of the $30,000,000,000 figure represents residential housing and that a sizable portion of the remainder represents the change in the value of inventories. Surely this is not business investment.

The minority must also recognize that only $800,000,000 of the remainder, or 2⅔ percent of the total, represents investments in net issues of common stocks. The portion of the total which represents risk capital is therefore very, very, very small.

On page 58 of the report the minority attempts to belittle the expenditure cuts made by Congress last year. To do this they quote the original expenditure estimate of the President and show that the current estimate is $200,000,000 above this. Surely the minority must recognize that the President's total requests for expenditures for fiscal 1948 were far and away above the original $37,500,000,000 that President Truman started out with. How much were they in all?

During the hearing on this bill I asked the Director of the Bureau of the Budget, Mr. James E. Webb, if he could give us the answer to the question.

He replied that it would require a great deal of work to make such a calculation. However, he said that he would "give us something on that." He did supply them for the RECORD.

On page 238 of the hearings you will find Mr. Webb's figures showing additional amounts totaling almost $2,000,000,000 were requested by the President for fiscal '48 following the presentation of the original budget for that year.

The table follows:

Changes in the 1948 budget, January to December 1947

[Millions]

Type of change	Authorizations: Appropriations[1]	Authorizations: New contract authorizations	Estimated expenditures
January budget	$31,292	$1,542	$37,528
A. Revisions due to changes in recommendations:			
1. Amendments to the Budget through December (net)	1,671	498	1,044
2. Anticipated supplemental recommendations to be considered by 2d sess. of Congress	7,627	179	901
Subtotal	9,298	677	1,945

Changes in the 1948 budget, January to December 1947—Continued

[Millions]

Type of change	Authorizations: Appropriations[1]	Authorizations: New contract authorizations	Estimated expenditures
B. Revisions due to changes between fiscal years and in program outlook:			
1. 1947 appropriations delayed to 1948	$360	-------	$63
2. Transfers of expenditures between fiscal years	-------	-------	245
3. Changes in estimates of outlook for Government programs and revisions of related permanent and indefinite appropriations	301	-------	−518
Subtotal	661	-------	−210
C. Revisions due to Congressional action:			
1. Reductions in authorizations which may be regarded as final	−1,691	−$3	−1,272
2. (a) Reductions in authorizations which will require offsets by deficiency appropriations	−1,074	-------	−913
(b) Estimated offsets by deficiency appropriations (or anticipated contract authorizations)	955	75	57
3. Reductions in Government corporation expenditures	-------	-------	−345
4. Rescissions of authorizations of earlier years	-------	-------	−153
5. Substitution of contract authorizations for appropriations	-------	181	-------
6. Increases initiated by Congress	373	148	291
Subtotal	−1,438	401	−1,535
Total, 1949 Budget	39,813	2,621	37,728

[1] Includes reappropriations and appropriations to liquidate contract authorizations. Totals may not add because of rounding.

In other words, the total expenditures requested by the President for fiscal 1948 were not 37.5 billion, but were in the neighborhood of $40,000,000,000. In any case, as I pointed out before, the President himself admitted last August that Congress had cut expenditures in the fiscal year 1948 by $1,520,000,000. The Bureau of the Budget now admits that savings enforced by this Congress are another $15,000,000 more than that.

On page 63 of the report, the minority refers to the "85,000,000 individual bondholders who share in the public debt." It seemed to me that it was peculiar that there were more bondholders than taxpayers, so I checked up on this. I was informed that the 85,000,000 represents the number of bond purchasers in the Seventh War Loan drive, and that that figure is a considerable overstatement of the number of individual bondholders today. There is a lot of double-counting behind the 85,000,000 figure which the minority uses, and many of the purchasers of the Seventh War Loan bonds have long since cashed them in. I challenge the minority to show us any current statement of the Treasury stating that

there are 85,000,000 individual bondholders.

It is obvious that this "free-wheeling" use of statistics in the minority report casts considerable doubt on the conclusions which the minority reached by the use of statistics. Unfortunately for them, it appears that almost their whole case is based on statistics. Like a house built on sand, it must fall when the sand is washed away.

Mr. KNUTSON. Mr. Chairman, I yield 15 minutes to the gentleman from Wisconsin [Mr. BYRNES].

Mr. BYRNES of Wisconsin. Mr. Chairman, I have served but a very short time on the Committee on Ways and Means and therefore do not pretend to appear before you in the expert capacity of many of the Members who have preceded me and who have served on that committee and studied tax matters over a long period of years. I do, however, want to express a few sentiments that have occurred to me in the study of this particular tax bill at this particular time.

I think too often many of us are inclined to look at a tax-reduction bill or tax-reduction legislation as if we were voting a gift to the American people. I think it was probably in that light that the President made his tax proposal under which he proposed to give every taxpayer a cost-of-living bonus of $40 for himself and each of his dependents. The President tried to picture himself before the American people as a Santa Claus who was giving them something for nothing. Of course in this way the President makes use of that principal tactic that has been used by the New Deal since its inception to keep itself in office, namely, to make the people believe you are giving them something for nothing. I am convinced the American people have a better concept and knowledge of the tax question than the President gives them credit for having. I am convinced that they know, no matter what form the tax credit or adjustment takes, that they are not getting something for nothing. They know that what the President was attempting to do was purely and simply to play politics with their own money.

A tax reduction is not a gift. It is simply saying to the American people "We are not going to take away so much money from you." By this tax bill the Congress is not saying "We are giving $6,000,000,000 to the American taxpayer." What the Congress is saying is that the people need that $6,000,000,000 more than the Government needs it and the people are going to keep it for their own needs.

In considering any tax legislation, Mr. Chairman, I believe that the Congress should weigh the needs of the people individually against the needs of the Government. What do the people need? Today the needs of people in the low-income group and the old people to purchase the necessities of life are apparent to all of us. They certainly cannot afford the high extractions being made from them by the Federal Government today. They must be given not only relief from the high cost of food, clothing, and shelter but relief from the high cost of Government. Their need for food, clothing, and shelter is greater than is their need for some of the operations now being carried out by the Federal Government. This bill recognizes this fact. Exemption for taxpayers and each of their dependents is increased by $100. An additional exemption of $600 is provided for the persons over 65 years of age. The amount of the tax is further reduced for these persons by from 30 to 20 percent. I call your attention at this point to the fact that 71 percent of the reduction made by this bill is reflected in the taxes of this group.

What do the people in the middle and upper income groups need? The needs of this group can more accurately be described as the needs of our economy. If private enterprise is to continue strong and virile, its needs must be recognized. If American enterprise is to carry us to victory over the forces that are today opposing the American way of life and a free world, as it carried us to victory in the war, if it is to produce to lick inflation, if it is to produce to keep our people employed and raise our standard of living, if it is to produce to aid in the rehabilitation of the devastated areas of Europe and Asia, if it is to produce to win the battle against communism, we must recognize its needs. That need is to be relieved from the shackles of taxes which discourage investment and expansion. Its need is to be relieved from taxes which discourage the operation of our productive system at the highest possible capacity.

The need of our economy for this relief is greater than is the need for many of the present and proposed activities of the Federal Government.

The question that we are to decide here today is, How much can the people of this country and our economy afford to pay for the operation of the Federal Government? It is the position of your committee by reporting out this bill that the maximum that our people and our economy can afford to pay is $40,000,000,000 during the fiscal year 1949. I concur in that position. That is no small sum. That figure of $40,000,000,000 is the absolute maximum. You may inquire as to where this $40,000,000,000 figure comes from. It is estimated by the staff of the Joint Committee on Internal Revenue Taxation that receipts under our present revenue laws will amount, during the fiscal year 1949, to $47,300,000,000. Assuming that H. R. 4790 becomes law, the collections during the fiscal year will be reduced by $7,100,000,000. Thus, should this bill become law, the total receipts will amount to $40,200,000,000. By using the figure $40,000,000,000 we are also providing a cushion of $200,000,000 to absorb any errors in the estimates. So let us take this figure of $40,000,000,000 with which to work. This, in my opinion, is the most that the people can afford to pay for the operation of the Federal Government during the fiscal year 1949. Let us realize very frankly that in voting for this bill we are obligating ourselves to certain responsibilities beyond the tax bill itself. We are obligating ourselves to certain very grave responsibilities.

First, we must keep our governmental expenditures under $40,000,000,000 during the fiscal year 1949. We must do this in order to keep our Government income and expenditures in balance. We certainly do not believe in deficit financing. Therefore, that is our first responsibility. I do not believe the contention has been made any place or at any time during this debate that our expenditures during 1949 are going to exceed $40,000,000,000. I think everybody is agreed up to that point.

Mr. KNUTSON. Mr. Chairman, will the gentleman yield?

Mr. BYRNES of Wisconsin. I yield.

Mr. KNUTSON. The distinguished chairman of the Committee on Appropriations, the gentleman from New York [Mr. TABER], stated yesterday that the budget will be pared by not less than $3,000,000,000, and he hopes to make it more.

Mr. BYRNES of Wisconsin. I am acquainted with that fact, Mr. Chairman; but what I am pointing out is that even looking at the gloomiest picture that can possibly be painted and, of course, we recognize that the minority is doing just that, painting the gloomiest picture possible, we will under all circumstances have a balanced budget. But another and very grave responsibility we assume by voting for this tax-reduction bill is to keep governmental expenditures safely enough below $40,000,000,000 to provide for payment on the national debt. I believe that not only should this be done but that it must be done. Now let us look at what we can pay on the national debt and what we can do with expenditures of Government. I am pleased that the gentleman from Tennessee is here. I would like to refer now to the figures which he used in addressing this House yesterday in connection with his argument that it was impossible to reduce the expenditures of the Federal Government as called for by the President's budget at all. He called particular attention at that time to the five big categories of expenditure that the minority takes such pride in pointing to and calling the "untouchables," the "sacred cows." Those categories are: National Defense, International Affairs, Veterans' Affairs, interest, and tax refunds. Those expenditures under the President's budget will amount to $31,000,000,000. Now, I am going to assume for a minute that cuts cannot be made in those items. I am willing to go to that extent for the sake of argument and assume that that amount cannot be cut although I do not agree with the assumption. I will, therefore, eliminate $31,300,000,000 from the President's budget of $39,700,000,000. This leaves a figure of $8,300,000,000. That apparently is the field the minority will grant us the privilege of cutting. The gentleman from Tennessee used 1939 figures and showed how tremendously these five untouchable items have increased, ascribing that as the reason for the big budget we have today. He compared national defense figures of 1949 of $11,000,000,000 against 1939 figures of $1,000,000,000. The 1949 cost of international affairs of $7,009,000,000 to the 1939 cost of $19,000,000, the 1949 cost of veterans' affairs of $6,102,000,000 to the 1939 cost of $559,000,000, the 1949 cost of interest on the debt of $5,250,000,000 to the 1939 cost of $941,000,000, and the cost

of tax refunds of $1,990,000,000 to the 1939 cost of $68,000,000. The total expended in the five categories in 1939 was $2,661,000,000. I think it is permissible to substract that total from the total of all expenditures during 1939 so as to make an analogous situation in determining the cost of those functions of Government with which we can deal in cutting the expenditures of Government. When we subtract this $2,600,000,000 from the total cost of operating the Government in 1939 of $8,700,000,000, we have an expenditure in 1939 of only $6,000,000,000; but in this figure we have some very interesting items. I checked this morning to determine what some of these items were that constituted this $6,000,000,000, and I found that $290,000,000 went for CCC; $78,000,000 for NYA; $306,000,000 for PWA, and that WPA got $2,161,000,000. This makes a total of $2,835,000,000 spent in 1939 that we shall not have to spend in 1949. We thereby reduce our balance further and find that the expenditures in 1939 for the other function was only $3,000,000,000. This makes a difference between the 1939 figures of the gentleman from Tennessee [Mr. COOPER] and his 1949 figures of better than $5,000,000,000.

It may be that we cannot cut back 100 percent to 1939 in these functions. It may be we cannot cut out the complete $5,000,000,000 that has been added in the last 10 years to these items, but we certainly can take steps in that direction and long steps ir that direction.

And may I remind our minority friends who at this time take so much glee in supporting the cause of a balanced budget, in supporting the cause of payment on the national debt, that every cent by which those expenditures of Government can be reduced will be available for application upon the national debt and should be applied on the national debt.

I just hope that fact is remembered when the Appropriations Committee comes in with its appropriation bills reducing the President's budget, and that they will remember that every cent saved under the President's budget can go to this great cause which I believe in; namely, payment on the national debt.

Those are our responsibilities, Mr. Chairman, and that is the direction that we can go. I intend to carry out the responsibility that this tax bill involves, namely, to vote consistently to cut out all expenditures of Government that are not absolutely necessary and essential. If we limit governmental expenditures to only those things that are necessary and essential there is no question but what we can attain a balanced budget and make a substantial payment upon the national debt.

It is my hope that others will be stimulated by the needs of the people as contrasted with the needs of the Government, the needs of the people for tax relief and that they will be stimulated by the need for making a reduction in the national debt to be consistent in their demands for economy and their vote for economy. If you do not desire to be consistent by supporting every possible economy in our expenditures you should not support this bill. If you intend to support every possible economy in our expenditures, then you can honestly vote for this bill.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. COOPER. Mr. Chairman, I yield myself such time as I may desire.

Mr. Chairman, I simply want to invite the attention of the distinguished chairman of the Committee on Ways and Means and those present to an article appearing in today's Washington News. The chairman stated a few moments ago that his party is certain they are going to reduce the budget by $3,500,000,000 or $4,000,000,000, is that correct?

Mr. KNUTSON. Not less than three billion.

Mr. COOPER. I invite the gentleman's attention to this news item:

GOP'S FIRST BUDGET SLASH HITS FEW JOBS

(By John Cramer)

The House Appropriations Committee today reported out the new 1949 independent offices appropriations bill—but, surprisingly, recommended little or no personnel reductions for the 19 agencies involved.

Under the committee's bill, minor cuts in some agencies would be balanced by minor increases in others, and over-all personnel would be left at just its present level.

The new bill was the first of the 1949 appropriation measures.

In reporting it, the committee trimmed $56,215,313 from the $1,047,798,864 recommended by President Truman, but allowed $196,686,000 more than the same 19 agencies received last year, mainly because of a mandatory increase of $195,599,000 in public roads funds.

Mr. KNUTSON. Of course, we are not going to debate an appropriation bill on news stories. On this side we are going to wait until the bill has been reported to the House, and I can promise the gentleman that there will be some substantial reductions in the independent offices bill, the newspapers to the contrary notwithstanding.

Mr. REED of New York. Mr. Chairman, will the gentleman yield?

Mr. KNUTSON. I yield to the gentleman from New York.

Mr. REED of New York. I just wanted to say that I did not know it was a crime to reduce expenditures in Government, even if you did not reduce them quite as much as you tried to.

Mr. KNUTSON. Of course, we cannot discuss appropriation bills before we receive them or before they have been reported to the House.

Mr. Chairman, I yield to the gentleman from Tennessee [Mr. JENNINGS] such time as he may desire.

Mr. JENNINGS. Mr. Chairman, the House of Representatives now has under consideration the bill, H. R. 4790, the purpose of which is to reduce individual income-tax payments and to raise revenue for the Federal Government.

This is the third bill providing for the reduction of the income taxes of the individual taxpayers during the life of this Congress. In 1947, two bills giving income tax relief to people of this country, were passed by the Congress. Each of these bills were vetoed by President Harry S. Truman.

As you know, when the President vetoes a measure passed by Congress, such veto kills it unless two thirds of both the House and the Senate vote to pass it over his veto. The Republicans do not have a two-thirds majority in either the House or the Senate. The House voted by a two-thirds majority to pass the second tax-reduction measure of 1947 over the President's veto, but the Senate sustained his veto of it. The first of these 1947 individual income tax-reduction measures would have saved the individual income taxpayers $4,000,000,000; the second which would have applied to the last half of 1947 ,would have saved them only $2,000,000,000.

The President's arbitrary, petulant, and unprecedented use and abuse of the veto power thus continued in force against the people of this country, the poor, the people of moderate incomes, the fairly well to do, and those better off—and the wealthy, the burdensome wartime high rate of income taxes notwithstanding the war had ended more than 2 years previous to the time he vetoed these tax-reduction measures.

President Truman thus earned the name of High Tax Harry, and gained the unenviable distinction of being the only President to successfully veto and thereby defeat a tax-reduction measure passed by Congress.

He is threatening to veto the present measure. This bill will be passed by both the House and the Senate. Under its provisions, it will leave in the pockets of the American people more than six billion dollars of their income with which to protect themselves against the high cost of living. And it will leave in the pockets of those earning moderate to high incomes, money that they can and will invest in their business and in new business enterprises. Only by putting earnings back in the business concerns of the country and into new business ventures can the solvency and expansion of our present manufacturing plants be preserved and new ones constructed and put in operation.

Now let us examine the provisions of the measure we are about to vote upon. It provides to the citizens of this country what the President has twice denied them by his abuse of the veto power.

It gives to the men and the women of this country who are staggering under the paralyzing burden of war-tax rates, lower taxes, and equalization. The tax rates Mr. Truman seeks to rivet on the limbs of our people are wartime tax rates. He seeks to perpetuate them in time of peace.

The passage of this measure will increase the production of goods, materials, furniture, machinery and the food, clothing and fuel the American people so desperately need. This will reduce the high cost of necessities and it will permit our people to keep and use their own money. The average man and woman in this country are convinced of one thing above all others. They feel that they are more competent to use the money they earn than Mr. Truman or any bureaucrat or set of bureaucrats under him. They feel they can put their money to a better and

more intelligent use than he can suggest or devise.

Relief from the ever-increasing Truman era of inflationary high cost of living is provided by an increase in the exemptions given individual taxpayers. This relief is extended to those who most need it—to those whose incomes are low. This bill, if enacted, will remove more than 7,000,000 low-income people from the tax rolls. Of the total reduction in taxes provided in the bill 72 percent will go to taxpayers with net incomes under $5,000 and only 28 percent to taxpayers with net incomes above $5,000.

Additional relief is granted to those who are 65 and over and to the blind.

Equalization is extended to married people in common law and community property States. In other words, husband and wife in all States, under this bill will be permitted, for purposes of computing and paying their individual income taxes, to divide the sum of their joint incomes, and each will then pay on one-half of their joint incomes. This will reduce the tax of each and will put the married couples of Tennessee on an equality with married couples in the community-property States.

When, and if this bill becomes law, collections in the fiscal year of 1949 will be reduced by as much as at least $7,000,000,000. This will leave a surplus of more than two and one-half billion dollars. This will make possible the payment on the national debt during the years 1948 and 1949 of from ten to eleven billion dollars.

The individual income taxpayers under this bill, if Truman does not succeed in killing it with another veto, will get the following relief:

First. Personal and dependency exemptions will be increased from $500 per capita to $600 per capita.

Second. Tax reductions ranging from 30 percent to 10 percent according to the amount of income, are provided all taxpayers. The following relief is given:

(a) Persons with net income of $1,000 or less after exemptions receive a 30 percent reduction in their tax.

(b) Persons with net incomes of $1,000 to about $1,400 after exemptions receive a reduction of from 30 percent to 20 percent in their tax.

(c) Persons with net incomes of from $1,400 to $4,000 after exemptions receive a reduction of 20 percent in their tax.

(d) Persons with net incomes in excess of $4,000 after exemptions receive a reduction of 20 percent on the tax imposed on their first $4,000 of net income after exemptions, and 10 percent on the tax imposed on any remaining net income after exemptions.

A blind person 65 or over may claim an exemption of $600 for both blindness and on his age.

Under this bill, if it survives a Truman veto, the individual taxpayers of the country will have a saving of from six to seven billion dollars on what they would have to pay under existing law.

That this proposed law is far better than the bill proposed by President Truman is demonstrated by the fact that neither the former chairman of the Ways and Means Committee, the gentleman from North Carolina, Representative ROBERT L. DOUGHTON, nor the ranking Democratic member on that committee in the Seventy-ninth Congress, the gentleman from Tennessee, Representative JERE COOPER, introduced the bill proposed by President Truman. Both the gentleman from North Carolina, Representative DOUGHTON, and the gentleman from Tennessee, Representative COOPER, are men of the highest integrity and ability and have the admiration and respect of their colleagues, both Democrats and Republicans. The beloved former chairman of the committee, Uncle BOB DOUGHTON, fully realizes the necessity for individual income tax relief and he along with the distinguished Democrat from Georgia, Judge EUGENE COX, have the intellectual honesty and the courage to let their views be known.

Tax relief for the Federal taxpayer is long overdue.

I know how the people of my district feel, both Democrats and Republicans. They are demanding relief. This is not a partisan matter.

By this bill Congress is proposing to carry out a mandate from the people. This measure proposes to write into law the right of the men and women who toil in industry, in business and on the farms to retain and enjoy the fruits of their toil.

I shall support the bill. It merits the support of every Member of the House, both Democrat and Republican.

The people who think, and most of them do, are getting increasingly weary of those who are seeking to destroy free enterprise in this country by endeavoring to array class against class and who daily sow the seeds of hatred, envy, and strife in the hearts of our people.

We have heard in this debate from those who oppose any tax reduction the exulting boast that the despoilers of this Republic and the wasters of the people's money have gotten this Nation so hopelessly in debt that from now on there can be no tax relief for the man or the woman who is engaged in business.

When these apostles of the New Deal discover a man, a woman, a company who is making a profit, they raise a hue and cry against such person or company.

Under our system of free enterprise, which is the envy and admiration of the world, the American people have enjoyed more of the good things of life and a higher standard of living than has been attained by any other people on earth.

In the eyes of those who fight this bill the people who have made this possible are guilty of a crime—the crime of success. The answer to those who would swap this country for socialism or communism is: In America prosperity and success are not restricted to any privileged class. Prosperity and success are within the reach of all.

Who are the people the champions of high taxes would tax out of existence? For the most part, the men and the women they seek to destroy came up from scratch through their own industry, thrift, and ability.

Mr. COOPER. Mr. Chairman, I yield such time as he may desire to the gentleman from Texas [Mr. RAYBURN].

Mr. RAYBURN. Mr. Chairman, I ask unanimous consent that the gentleman from Virginia [Mr. GARY] may be permitted to extend his remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. GARY. Mr. Chairman, we have heard considerable discussion on the floor of this House of the cold war, which is now in progress in Europe. Anyone who visits that continent is impressed with the fact that we are engaged in a war of ideologies between totalitarianism and democracy. In a war of that nature, psychology plays an important part. If we are to win that war we must strengthen our allies and at the same time remain strong and virile at home. To do this we must not only maintain our military strength, but we must remain strong economically and financially as well. Any evidence of weakness on our part at the present time will deprive us of our position of leadership and will have tremendous repercussions abroad which might easily lead to world chaos.

Moreover our domestic prosperity and tranquillity are contingent upon our economic and fiscal stability. We have today a stupendous Federal debt of $256,500,000,000. This debt in less prosperous times might easily become a threat to our national security.

It is estimated that as of October 1947, there were oustanding $256,300,000,000 of interest-bearing securities issued or guaranteed by the United States Government. Of these securities $69,800,000,000 were owned by commercial banks, $12,200,000,000 by mutual savings banks, $22,200,000,000 by Federal Reserve banks, and $24,900,000,000 by insurance companies. The Federal securities owned by commercial banks constitute 60 percent of their assets. Those owned by mutual savings banks constitute 62 percent of their assets. Those owned by Federal Reserve banks constitute 47.3 percent of their assets. Those owned by insurance companies constitute 45 percent of their assets.

You will recall that after World War I, Federal securities depreciated in value to such an extent that at one time $100 bonds sold on the market as low as $80. If we were to suffer a similar experience now, the solvency of every bank and insurance company in the United States would be seriously jeopardized. We cannot permit this to happen. To prevent it we must maintain the faith of the American people in the fiscal stability of their Government and this can be accomplished only by adopting sound fiscal policies.

Our present fiscal condition, therefore, demands a balanced budget and a definite program of substantial debt retirement. Unless some progress is made toward debt reduction during the period of prosperity and inflation, through which we are now passing, we will inevitably face disaster in the lean years which are certain to follow.

If the Knutson bill is adopted, we will increase, rather than diminish the debt during the fiscal year 1949. Nothing that we could do would bring greater discouragement to our own people and

greater encouragement to the communistic forces of Russia.

Mr. KNUTSON. Mr. Chairman, I yield 10 minutes to the gentleman from Kentucky [Mr. ROBSION].

Mr. ROBSION. Mr. Chairman, nearly 53,000,000 persons, under our present heavy, wartime revenue laws, are paying Federal, individual income taxes. We are now in our third peacetime year since the war, but these heavy individual income taxes are still on the backs of housemaids, workers in factories, shops, mills, mines, small farmers, teachers, other with small incomes, and persons with higher incomes. The people of the Nation were willing to pay these heavy taxes to prosecute successfully our war efforts. For more than 2 years now, there has been a general demand on the part of the American people for a reduction of unnecessary governmental expenditures and a reduction of their tax burdens.

Both parties and Members of Congress of both parties in the campaign of 1946 pledged themselves to a reduction of expenditures and a reduction of taxes. I heard no Member of this House, before the election in 1946, express opposition to the program—neither Democrat nor Republican. I promised the people of my district that I would work to cut out waste, balance the budget, pay on the national debt, and reduce taxes. The Republican Party, its members, as well as myself, and I might say, many Democrats, have been doing their utmost to keep this pledge. The Republicans, on this platform at the November elections, 1946, won control of the House and Senate, and one of the first bills to be introduced in the new Eightieth Congress by the Republicans attempted to carry out these pledges. This bill, with appropriate amendments, was passed by an overwhelming majority of the House and Senate, but President Truman vetoed it. The Republicans were unable to get a two-thirds majority in the House and Senate to override his veto and later on in 1947 a similar bill was introduced by Republicans and passed by a big majority in the House and Senate. It, too, was vetoed by the President. The House passed this second bill over the veto, but it lacked a few votes of receiving a two-thirds majority in the Senate, and President Truman and his leaders were able to deny this tax relief to the nearly 53,000,000 individual income taxpayers in 1947.

The first bill introduced in the present session of the Eightieth Congress was by Mr. KNUTSON, chairman of the Ways and Means Committee. The Ways and Means Committee, after having spent a year in studying this problem, reported the bill favorably to the House by a vote of 16 to 9. Of course, each and every Republican on the committee voted to report the bill favorably. The bill, as reported, is H. R. 4790, now before us for consideration. This bill does not deal in any respect with excise taxes or corporation taxes. The Ways and Means Committee is making a careful study and survey of these taxes, and are very hopeful that they can report and have considered and adopted at the present session of Congress a bill that will cut out many of these excise taxes and reduce others and that corporate taxes will be treated in a way that will be to the best interest of the people of this country and at the same time, be just and fair to those who have invested their money.

H. R. 4790—SANE, FAIR, HONEST, AND SOUND

This bill meets the requirements of sane, fair, honest, and sound taxing principles.

(A) It recognizes that the American people, 3 years after their war sacrifices, are justly entitled to relief from these excessive war taxes.

(B) It strikes from the rolls approximately 7,500,000 taxpayers now in the lower brackets.

(C) It gives relief to all of the 53,000,000 income taxpayers, according to their ability to pay.

(D) The reduction comes out of surplus taxes.

(E) There will be a surplus to make a substantial payment on the national debt.

(F) There will be a surplus remaining to carry on the expenses of the Government and avoid a deficit.

TAXES CUT $6,500,000,000

H. R. 4790, the Knutson bill, gives relief to approximately 53,000,000 Federal individual income-tax payers.

First. Let us see in what way the nearly 53,000,000 taxpayers are benefited by this bill:

(a) It increases the personal exemption for each and every taxpayer and his or her dependents to $600. The husband and wife will be entitled to $1,200 for themselves and $600 for each other dependent. They are also entitled to such other exemptions and deductions for medical care and contributions, and so forth.

(b) It gives an additional $600 exemption for each person above the age of 65 years. If the husband and wife are both 65 years of age or over, this additional exemption will amount to $1,200 also, and with the other exemptions allowed to all income taxpayers, they would have $2,400 exemption.

(c) There is a double exemption allowed for blind persons.

Second. These increases in exemptions will remove, according to the statement of the gentleman from Minnesota [Mr. KNUTSON], author of H. R. 4790, 7,500,000 Federal individual income taxpayers from the rolls who are now paying Federal income taxes. Under this bill these will not be required to make any return or to pay any taxes. These seven and one-half million are now in the lower income brackets. One hundred and two thousand of these who will be removed from the rolls under this bill reside in Kentucky. This measure will save the Federal individual income taxpayers of the State of Kentucky $55,000,000.

Third. Twenty-five million others in the low-income brackets will receive a cut of 30 percent—nearly one-third—on whatever income taxes they may owe as well as their personal exemptions for themselves and their dependents and other deductions that are now provided by law.

Fourth. There are many millions of taxpayers whose net taxable income, after all deductions and exemptions are made, is as much as $1,000 or not more than $1,396. These would receive reductions ranging from 30 percent to 20 percent and also the increased personal exemptions and other deductions.

Fifth. Those with net taxable incomes between $1,396 and $4,000 would receive a 20-percent reduction in their taxes after allowances for increased exemptions. There are several million of these. There are approximately 40,000,000 Federal individual income taxpayers of this Nation, the taxable income of whom is $4,000 or less. These millions of taxpayers will receive increased exemptions, and for nearly 2,000,000 of them who are 65 years of age or over, or blind, will receive double exemptions, and they will also have a cut on whatever taxes they may pay ranging from 30 percent in the lowest group, to 20 percent for low middle group.

Sixth. There are several million income taxpayers whose incomes are $4,000 or more. They will receive a 20 percent reduction on the first $4,000 and 10 percent on the remainder of their taxable income.

It can be seen at once that this bill benefits each and every one of the 53,000,000 income-tax payers and gives just and fair consideration to each individual according to his ability to pay taxes. All in all, it takes a burden of $6,500,000,000 from the backs of these 53,000,000. Under present law, the Federal income tax rates go to 87½ percent in the higher brackets, and on down to 20 percent for those whose incomes are between $4,000 and $8,000. It can be seen at once that those with net incomes of $4,000 or less are the chief beneficiaries under this act.

PRESIDENT TRUMAN AGAINST ANY TAX REDUCTION

While President Truman has taken the lead in giving to foreign countries over $24,000,000,000 since the shooting war closed and now proposes to aid foreign countries with $17,000,000,000 to $25,000,000,000 more, he opposes any over-all tax reduction for the American people although England, Belgium, France, Australia, and many other countries that have been the beneficiaries of our bounty, have made more than one tax reduction. Canada is considering a fourth tax reduction. They have greatly relieved their taxpayers. The Republican Party and many Democrats now insist that we give to the American people some relief.

The President in his message to Congress proposed a so-called "cost of living" tax bill whereby he would give to each income taxpayer and each of his or her dependents $40. He would give the Rockefellers, the Fords, and other persons of great wealth, and the housemaids, the workers, and others of low incomes, the same $40. He would increase the taxes of business concerns enough to cover the sums paid out under his $40 proposal, so that as an over-all matter he does not favor any reduction in the taxes of the people of the United States. The President's proposal was at once denounced generally by the press, the radio, and the people, in which many Democrats in and out of public life joined. It was generally denominated as an open bid for votes at $40 per head.

None of the Democratic leaders in the House would introduce the President's tax bill. I have heard scores of persons speak on the tax bill before us and only two persons, both Democrats, spoke in favor of the President's tax proposal. Many other Democrats, directly or indirectly, condemned his proposal. There was no effort made to have the President's bill adopted, as I understand, either in the Ways and Means Committee or by a motion to recommit in the House. I have never known of a proposal of a President of the United States being given so little consideration as his tax bill proposal.

We have observed that the President and his advisers are thinking up new ways to spend money. They now are planning to give Greece and Turkey another helping of approximately a billion dollars. The President is determined to consume every dollar of the American people's tax money. The people must look to Congress alone to give them relief.

WE CAN NOW CUT TAXES SIX AND A HALF BILLION

The Republicans of the House, of course, favor this bill and perhaps not more than one of them will vote against the bill. A great many Democrats favor a substantial cut in taxes but not the President's plan. They agree with the Republicans' proposal as laid down in the Knutson bill, H. R. 4790, but they insist that the cut is too much. The President does not want taxes cut. He has submitted a budget calling for nearly $40,000,000,000—many billions greater than any request made by any President in peacetime in this country or in any other country. President Roosevelt was considered some spender and waster in peacetime. The highest amount he ever asked for was approximately twelve and one-half billion for a peacetime year. Last year, President Truman asked for thirty-seven and one-half billion—three times as much as President Roosevelt ever asked for in a peacetime year. The American people were astonished when President Truman made that demand but they are much more so this year when he calls for nearly forty billion to spend in the fiscal year beginning July 1, 1948, our fourth peacetime year. The Democrats insist that if we pass this bill, we will have a deficit. The Republicans deny this charge.

Of course, we can and must cut the budget several billions of dollars. The amount of revenues for the present and the next fiscal year will depend upon our total national income. On a basis of a national income of two hundred billion, the Treasury Department states that we will have net revenues and receipts for the fiscal year ending June 30, 1948, of forty-five billion, but our national income is now running at more than two hundred and five billion and it is estimated by the experts in the Commerce Department, as well as the special revenue committee, whose members are experts in the income and revenue field, that our total national income will reach two hundred and nine billion. If it is two hundred and five billion the net receipts and taxes for the present year will be forty-six billion four hundred and ninety million and if it is two hundred and nine billion for the fiscal year ending June 30, 1949, the net tax receipts will be forty-seven billion three hundred million.

The President's budget calls for thirty-nine billion six hundred million but this includes six billion eight hundred million as a down payment on the Marshall plan for the fiscal year ending June 30, 1949. It will be some time before any type of Marshall plan will be approved by the Congress, in my opinion. Those who know state that it will be 6 months to a year before an organization could be developed and information gathered to put the Marshall plan into actual operation. Former President Hoover insists that there should not be appropriated for the first year of the Marshall plan more than three billion and should be limited to 1 year so that we may determine what our financial situation is as of June 30, 1949. I think it can safely be said that this six billion eight hundred million for the first year of the Marshall plan will be reduced to at least three and one-half billion. That will cut the President's budget back to approximately thirty-six billion and that would leave a surplus of something like eight or nine billion, but there are other cuts of the budget that can and will be made. Many useless officeholders will be removed from the rolls. Much waste will be cut out and there likely will be a surplus for each one of the present and also the next fiscal year of ten billion to take care of the tax reduction and pay at least three billion on the national debt.

It is somewhat amusing to hear leaders of the Democratic Party express fear of having a deficit or increasing the national debt. Their party has been a party of debts and deficits in peacetime. The Republicans have always favored a balanced budget, reduction of the national debt, reduction of taxes, and economy and efficiency in Government, and this tax bill was prepared with that policy in mind. President Cleveland, 60 years ago, had a deficit in peacetime. President Wilson had deficits in peacetime. Presidents Roosevelt and Truman have followed in their footsteps. They believe in—spending, borrowing, and taxing.

In October 1945 with a Democratic Congress, President Truman and his party put through a tax-reduction bill. They cut taxes six billion with a certain percentage straight across the board—for the great corporations and for the housemaid, the workers, teachers, and small farmers. Each one got the same percentage cut. Their tax-reduction bill contained a provision to repeal the excise-profits tax and gave another mighty lift to the great corporations of the country. Were Mr. Truman and his party alarmed in October 1946 that there might be a deficit and the Government might have to borrow money to carry on its operations? They certainly were not. The Ways and Means Committee, controlled by the Democrats, in reporting that bill, pointed out that there would likely be a deficit of as much as thirty billion at the end of the fiscal year, June 30, 1946. There was an actual deficit of twenty-one billion but Mr. Truman and his party put the bill through and also repealed the excess-profits tax. At the time this bill was being considered in October 1945, Mr. Truman's Secretary of the Treasury put on a bond sale throughout the Nation and sold more than $15,000,000,000 worth of bonds to borrow money to carry on the Government, but they went ahead with their tax-reduction bill. That bill gave four billion relief to the corporations and only two billion to the individual income taxpayers and how inconsistent it is for them now to oppose tax reduction when we know we are going to have a surplus of billions this fiscal year and the next fiscal year ample to take care of this tax reduction and pay several billions on our national debt.

Their tax-reduction bill of October 1945, of course, was a phony. There can be no real tax-reduction bill unless there is a surplus out of which to make the tax reductions. Our Democratic friends are schooled in the policy of creating debts and increasing taxes. It has always been true that the Republican Party reduces taxes and reduces debts created by the Democrats and that is the very thing that the Republican Party is doing in the passage of H. R. 4790. President Truman is willing to give relief to anybody and everybody in the world but is unwilling to give relief to the overburdened taxpayers of our own country. He is willing to pour billions of dollars of the American taxpayers' money into countries whose governments have given more than one tax reduction to their people since the war was over.

REDUCE TAXES AND LIVING COSTS

We must cut the President's budget. We must eliminate all unnecessary expenditures. We must give to the American taxpayers one dollar in value for every dollar of taxes taken from them. The cost of government is too great. The American people this year will pay approximately $55,000,000,000 to carry on their Federal, State, county, and city governments. That is approximately $1,600, on an average, for each and every family in this Nation. The cost of food is high, but the American people will spend about $42,000,000,000 a year for food. The cost of government to the American people is about $55,000,000,000.

If we follow President Truman and his group we will continue to increase the cost and burden of government. There is no good reason on earth why the American people should be called upon to pay more for government than they pay for their food and clothing.

President Truman does not help the American people when he gives them $40 tax reduction in income taxes and then places it on the business concerns that prepare the raw material, process, transport, and distribute it, because corporations can pass on to the consumers these taxes. These become what is known as concealed taxes. Every consumer then becomes a taxpayer. So Mr. Truman takes the $40 taxes off of the individual income-tax payers and puts it on the corporations, and they in turn, in the way of concealed taxes, get it back from the

American people in increased prices. The individual income-tax payer cannot pass his tax on to the consumer.

In October 1945 President Truman, as we have pointed out, favored giving the same percentage of reduction to the big and little income taxpayers alike, and let us not forget his bill repealed the excess-profits tax, and now he talks long and loud about excess-profits tax. There would be such a law on the books now perhaps if he and his party had not repealed it in 1945.

If we favor sane, fair, honest, and sound tax relief we must vote for this bill.

Mr. COOPER. Mr. Chairman, I yield such time as he may desire to the gentleman from Texas [Mr. RAYBURN].

Mr. RAYBURN. Mr. Chairman, I was very much interested in the remarks of my friend from the hills of Kentucky. He and I have come from similar neighborhoods. I happened to be born over in the hills of east Tennessee. He was talking about tax reduction. It will be remembered that at the end of the last war, the national debt was about $26,000,000,000, including what we had spent and what we had loaned to our allies. But this time our debt is about $256,000,000,000. This is in the statement that I inserted in the RECORD at the instance of the gentleman from Virginia [Mr. GARY]. Today the commercial banks of the United States own $69,800,000,000. The mutual savings banks own $12,200,000,000. The Federal Reserve banks have $22,200,000,000, and the insurance companies, $24,900,000,000. After the last war many of these bonds and Federal securities dropped from their par value of 100 cents on the dollar to 80 cents on the dollar. I just wonder how many banks, commercial, and otherwise, as well as insurance companies, could keep their doors open if bonds that they own now dropped to 80 cents on the dollar.

Mr. ROBSION. Mr. Chairman, will the gentleman yield?

Mr. RAYBURN. Mr. Chairman, I am asking the gentleman from Kentucky a question.

Mr. ROBSION. The same alarm was expressed in 1921 as it is now by your side of the House. We did reduce taxes and we did pay $1,000,000,000 on the national debt and we did have a surplus when the prediction was that we would have a deficit. In 1922 the same thing was done and in 1924 and '25 and '26 and '27 and '28, and so on.

Mr. RAYBURN. Of course, to go one step further, the gentleman from Kentucky knows there is no more chance for a $6,500,000,000 tax-reduction bill to become law or a $7,200,000,000 tax-reduction bill to become law, because the House will never have a chance to vote on any such thing in the conference report.

Mr. ROBSION. Our national debt was larger in 1945 than it is now.

Mr. RAYBURN. That is correct.

Mr. ROBSION. Yet it was predicted that there would be a deficit of $30,000,000,000 at the time the bill was brought here and rushed through cutting taxes at the time the gentleman was the distinguished Speaker of the House. There was an actual deficit of $21,000,000,000. How can the gentleman complain about this bill when he helped to put a bill of that kind through as Speaker of the House?

Mr. RAYBURN. Of course, I remember also when we got excited about the statements made by somebody downtown in some of the departments that there were going to be six or eight million unemployed in the United States in April and May 1946, and we repealed the excess profits tax in response to that.

In the spring of 1946 there were fewer unemployed people in the United States than there had ever been before.

In the spring of 1947 there were fewer unemployed people in the United States than ever before.

Mr. ROBSION. Who was it who gave you those exciting statements? Perhaps the same folks downtown are exciting you now.

Mr. RAYBURN. The National Association of Manufacturers joined in the chorus, as I remember it.

Mr. KNUTSON. And so did Mr. Vinson, who is now Chief Justice of the Supreme Court, and a very valuable member.

Mr. RAYBURN. Even I have made mistakes in the past, I may say to the gentleman.

Mr. KNUTSON. Impossible.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. MONRONEY. Mr. Chairman, I arise to express my opposition to this Knutson tax bill. My objection to it is that this Nation, with a $253,000,000,000 war debt, cannot stand a cut in its revenue which will total between six and seven billion dollars per year.

The biggest task before the Congress today, I believe, is to preserve the economic security of this Nation. The hope of the world for recovery along the lines of freedom rests in the United States and the way we guard its economic security.

The public debt is the cornerstone of our financial security. On the soundness of this debt rests the soundness of our banking and insurance enterprises, the personal savings of 85,000,000 owners of Government bonds.

Today the national debt is far greater than the debt ever carried by any nation in the world's history. It totals about $7,000 per family or about $1,900 per capita. Never before has it ever exceeded $400 per capita.

From the study made by the committee on public-debt policy, a committee composed of the Nation's leading bankers and insurance executives, comes startling evidence of the enormity of this debt.

An apt comparison of the per capita debt during representative periods of our history is contained in the following tables based largely on their debt studies:

Per capita national debt

War of 1812	$15
Civil War	78
World War I	240
World War II	1,900

Figured another way, the comparison of the national debt, even to our staggering national income, gives like reason for concern:

Percent of debt to national income

Revolutionary War	20
War of 1812	20
Civil War	50
World War I	45
World War II--approximately	130

Our ability to carry this record-breaking debt is measured on that portion of our national income required for interest charge on the debt. It, too, has varied greatly through our history as shown by these sample periods:

Percent of interest cost to national income

Revolutionary War	0.5
War of 1812	.8
Civil War	2.5
World War I	2.0
World War II	2.6

Thus, it is clear, that even with the all-time low interest rate that now obtains on carrying the debt, $2.60 out of every $100 earned in this country must go for the never-ending cost of interest on the debt.

Should interest rates return to their more historic normal rate of 4 percent, instead of its present 2.1 percent, the interest charge in relation to national income would take more than $5 out of each $100 earned.

Charts on the interest charges through our history show how abnormal the present 2.1 percent interest on the public debt is.

Interest rates on national debt

	Percent
Revolutionary War	4.8
War of 1812	5.5
Civil War	6.0
World War I	4.3
World War II	2.1

Throughout the years of our history, only one other period shows any comparable low-interest rate similar to the one we now have. That was for a brief period from 1910 to 1914 when the rate was 2.3 percent.

The best way I know to insure low interest is to pay off the debt as rapidly as is humanly possible. This is proven by the historic charts, which, during the brief period of our country when the debt was eliminated in 1835, the interest rates dipped from 5.5 to 3.9 percent as the bonds were being retired. By retiring the bonds as rapidly as we can, we help to prevent added costs to all not for just a year—but from now on. And, further, we help to insure a continuing favorable interest rate on this debt charge.

Should interest rates rapidly climb, the problems of financing and refinancing this enormous public debt would be tremendously increased. Since the individual savings bonds are redeemable at par by the Treasury, a strong increase in the rate would start an endless chain of demands for cash from the Treasury—if for no other reason than to reinvest them in bonds bearing the new higher interest rate.

The open-market operations of the Federal Reserve bank, which has supported all negotiable bonds at par, also would be thrown into confusion, if not

destroyed altogether. New issues bearing a greatly higher rate, would quickly drop the market price of older and lower yielding bonds and result in a difficult and very troublesome refinancing job.

SEVENTY-NINE PERCENT OF BUDGET

If the present income of the Government can be maintained, even with the vast demands made on the United States for military preparedness of more than eleven billions; for foreign aid, seven billions; for veterans' programs, six billions; for interest on the public debt, five billions; and for refunds of taxes, two billions—we can still retire four billion eight hundred million of the public debt.

The following table shows the breakdown of the President's budget defining the most urgent expenses—almost all of which cannot be substantially reduced without seriously affecting our military or foreign policy:

	Most urgent expenses
National defense	$11,000,000,000
Foreign policy	7,000,000,000
Veterans program	6,100,000,000
Interest on debt	5,300,000,000
Tax refunds	2,000,000,000
Total	31,400,000,000
Debt retirement	4,800,000,000
Remainder of entire budget, including all governmental expenses	8,300,000,000

Seventy-nine percent of the President's budget of thirty-nine billion seven hundred million is included in military costs, veterans' programs, foreign aid, interest on the public debt, and tax refunds. As much as can be reduced from other programs, from the remaining eight billion three hundred million in the budget, should be reduced, but in view of the tremendous cost of paying for the last war and trying to prevent the next, it is doubtful if enough can be saved to permit a six-billion tax reduction and any sizable debt reduction as well.

BARUCH'S RECORD

Mr. Bernard Baruch, who has been right more often than any other leader in the United States on the problems of inflation, has urged against any tax cuts at this time—and urged instead the imposition of additional excess-profits tax in order to help preserve our national economy.

Surely Mr. Baruch's advice is worth more than the pigeonhole treatment given it by the Ways and Means Committee. The sanity of his advice to pay your debts while you have the national income to do so—to reduce the never-ending interest cost as much as possible, presented a challenge to this House which deserves serious consideration—rather than the treatment given it.

CONFIDENCE HARD TO REGAIN

National confidence in our economic stability once lost is most difficult to regain. Witness the years of tedious effort and slow recovery that took place after the crash of 1929.

Yet in the callous disregard of danger signals that are flying throughout the country, the Congress is trying to take the place the stock market had in 1929 as the major force in bringing about our insecurity.

The country is threatened with even more serious inflation—the falling purchasing power of the dollar. Yet this bill would send this Nation into the fiscal year 1949 faced with a deficit of two billion in our budget if we pass this bill. What greater contribution could the Congress make to the collapse of our economy than to steer such a hazardous course.

A WEAPON AGAINST INFLATION

We have dozens of examples of worthless or near-worthless currencies of other governments today. At the base of most of their difficulties is the always-present fact that they are spending more than they are willing to collect in taxes—that they are increasing their indebtedness—not reducing it.

I do not know of any nation that went completely through the wringer of inflation that went that way on a balanced budget and was making a substantial reduction in its national debt. Reduction of the national debt is the one effective thing that this Congress could do to help lessen present inflationary pressures—yet instead this bill proposes reducing revenue and foregoing any appreciable debt retirement.

If pressing living costs for the low-income group require, as is claimed, a reduction of their tax, the prudent policy is to shift this burden and make up this loss elsewhere—but surely not to reduce Government revenue and thus invite financial instability.

CHART A SOUND COURSE

Mr. Chairman, I urge that the House defeat this dangerous legislation. If a tax cut is to be considered—or economies are to be gained in the cutting of appropriations—then let the tax reduction be made after—after but not before—these economies are effected. To cut revenue in the anticipation that drastic reductions can be made, is not borne out by our experience of last year—no matter how bright the promises.

Within the next 90 or 120 days, all of the appropriation bills will be acted on by the Congress. Surely, the time for a tax reduction at this moment is not nearly as important as to chart a well-planned fiscal course. After these appropriations have been made, we can know, not guess, what our governmental expenses will be.

In addition, at that time we can tell better what the national level of income will be—and how much money the Government is likely to receive over the next fiscal year. To rush headlong into this ill-considered bill at this time is to disregard every sound financial practice—and to invite grave fiscal danger.

Mr. KNUTSON. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. HOEVEN, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill H. R. 4790, had come to no resolution thereon.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Carrell, one of its clerks, announced that the Senate had passed a concurrent resolution of the following title, in which the concurrence of the House is requested:

S. Con. Res. 38. Concurrent resolution extending the time for the submission of the report of an investigation of consumer goods prices.

EXTENSION OF REMARKS

Mr. GRANT of Indiana asked and was granted permission to extend the remarks he made in Committee of the Whole and include certain tables and a letter.

Mr. REED of New York (at the request of Mr. GRANT of Indiana) was granted permission to extend his remarks in the RECORD and include certain extraneous matter.

Mr. ARNOLD (at the request of Mr. ARENDS) was granted permission to extend his remarks in the RECORD and include a newspaper article.

Mr. TAYLOR (at the request of Mr. ARENDS) was granted permission to extend his remarks in the RECORD.

Mr. LANE asked and was granted permission to extend his remarks in the RECORD and to include a letter from James C. Petrillo, president of the American Federation of Musicians, together with a newspaper item.

Mr. SADOWSKI asked and was granted permission to extend his remarks in the RECORD in two instances.

AMENDING SENATE CONCURRENT RESOLUTION 19

Mr. ARENDS. Mr. Speaker, I ask unanimous consent for the immediate consideration of Senate Concurrent Resolution 38.

The Clerk read the resolution, as follows:

Resolved by the Senate (the House of Representatives concurring), That section 2 of Senate Concurrent Resolution 19, Eightieth Congress, first session, is amended by striking out "February 1" and inserting in lieu thereof "March 1."

The resolution was agreed to.

A motion to reconsider was laid on the table.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. GWINN of New York, Mr. OWENS, and Mr. LUCAS, on account of official business, from Tuesday, February 2, to Friday, February 5, 1948.

The SPEAKER. Under previous order of the House, the gentleman from Massachusetts [Mr. HESELTON] is recognized for 15 minutes.

FUEL-OIL SITUATION

Mr. HESELTON. Mr. Speaker, I am glad to report that at 4:30 o'clock this afternoon the Department of Commerce announced a revised program on exports of fuel oil.

I have not had an opportunity to examine the report in terms of the resolution I introduced yesterday, and particularly in terms of the countries of destination, but at least it is an encouraging development. The report in part reads as follows:

In view of the serious shortage of fuel oils in certain areas of the United States, the Department of Commerce announced to-

day in its revised downward report, the first quota of petroleum products for foreign export from 11,850,000 barrels to 9,650,000 barrels, a reduction of 18.5 percent.

I might add parenthetically that a similar announcement was made in the previous quota program, but it turned out that the major reductions were in articles of petroleum products that are not in shortage here and were not involved in this question of heating and industrial use.

The release says also:

In addition, the Department announced it would eliminate licenses for export of petroleum products to exports from those areas of the country where fuel can best be spared during this emergency period.

The Department announced also that a separate quota of gas oil, and distillate fuel oil, which had been established for the first quarter for shipments to Japan and the Ryukyus had been drastically reduced from 1,600,000 barrels to 1,000,000 barrels. The difference would be met from oil-producing areas outside the United States.

That is very significant in terms of a report made to the Senate last week that we were shipping into certain areas of the Pacific a greatly excessive quantity of these kinds of fuel oils, when as a matter of fact historically those areas had been obtaining their oils from available sources in the Pacific.

My best information is that, exclusive of Japan and the Ryukyus, this means a saving of 1,500,000 barrels of desperately needed heating and industrial oils. Adding the 600,000-barrel savings in the Japanese and Ryukyus, we have a total saving of 2,100,000 barrels. The tabulation follows:

	Barrels
Aviation gas:	
Original first quarter quota	700,000
Revised quota	700,000
Motor gasoline:	
Original first quarter quota	5,250,000
Revised quota	4,550,000
Kerosene:	
Original first quarter quota	900,000
Revised quota	600,000
Gas oil and distillate fuel oil:	
First quarter quota	3,200,000
Revised quota	2,800,000
Residual fuel oil:	
Original first quarter quota	1,800,000
Revised quota	1,000,000

This is an obvious concession of the merits of the recommendation made December 19 by the House Committee on Interstate and Foreign Commerce. It is regrettable that the recommendation was ignored in setting up the program announced in January. But that is "spilt fuel," so to speak.

Nonetheless 18.5 percent reduction is a far cry from the voluntary 50 percent reduction made by Canada. This action strengthens the arguments for immediate action on House Joint Resolutions 311 and 312. I am beginning to wonder who, in the executive department, is charged with any responsibility for the welfare of the American people. Still it is encouraging to have this cautious, belated, and insufficient step taken. At least there is now recognition of "the serious shortages of fuel oils in certain areas of the United States." But let me assure you that as far as I am concerned this is only round one. The bell for round two will ring as soon as I can get an official copy of the revised program.

I have also a press statement here adding that the Department of Justice approves a steel industry agreement between the steel industry and freight-car manufacturers on a voluntary allocation program for production of 10,000 freight cars a month. The report says:

Tom Clark has O. K.'d it.

I suppose that means the Attorney General. The agreement calls for 1,000,000 tons more steel in 1948 than went into freight cars in 1947.

So far, so good; but this is the bad news: I have a telegram signed by the Governor of Massachusetts, received this afternoon. It reads as follows:

Regarding telegram and telephone conversation the estimate for the first 10 days of February indicates a worse condition particularly on available kerosene supply.

As I have previously said, Mr. Speaker, this is the supply upon which the people with small incomes depend, the people who do not have money enough to buy a whole winter's supply of oil, the people who do not have storage facilities, and the people who buy only a 5-gallon can at a time which they take down to the depot every week and try to get their next week's supply.

Continuing, the Governor in his telegram states:

For the month of January figures indicated an 87.7 percentage supply of demand.

In other words, we were down 12.3 percent below normal.

For the first 10 days this figure has changed to 80 percent approximately.

So we are down 20 percent within the last 10 days.

On No. 2 fuel oil the figures indicate a slightly better condition but no major improvement. There is no apparent change in the industrial oil situation.

In the afternoon press from a reputable news service appears an article headlined: "United States tankers leased abroad at 100 percent profit."

The article states:

Despite the acute shortage of ships to carry petroleum for domestic users, some American companies are leasing oil tankers to foreigners at, roughly, 100 percent profit, informed sources said today.

These companies are leasing or buying tankers from the United States Maritime Commission, it was said, and then are turning the same ships or their own over to foreign interests at "roughly twice" the Maritime leasing fee.

This was brought to light shortly after Chairman CHARLES A. WOLVERTON, of the House Interstate Commerce Committee promised an investigation into the leasing of tankers abroad.

WOLVERTON said he intends to find out who has bought Maritime tankers and on what terms. He said the Petrol Corp., a Philadelphia concern now running out of oil—

And, incidentally, that is the same company now complaining that they cannot supply the people of Washington, D. C., with their needed oil—

has leased one Maritime tanker to a foreign government for 3 years.

Table I furnished the House Interstate and Foreign Commerce Committee showed that Petrol Tankers Industries, Inc.—wholly owned subsidiary of Petrol Corp.—chartered one T–2 tanker on June 11, 1947, to French Government for 3-year period. It adds:

Replaced by another T–2 tanker purchased from USMC.

That table indicates that another major oil company transferred a T–2 from domestic to foreign service on June 27, 1947, which is expected to return to domestic service when spring arrives, on April 10. It transferred another T–2 from domestic to foreign service, according to the table on June 26, 1947, but the date of anticipated return is not stated.

While we are discussing tankers, this announced revision of foreign exports should result in releasing approximately 14 long overseas voyages to the short voyage, coastwise service—another step in the right direction. If they can be added to the possibility of release from naval service and the holding on coastwise service of the T–2s sold foreign in December by the Maritime Commission, as recommended by the House Committee on Interstate and Foreign Commerce, December 19, we may be able to furnish the industry with the 40 tankers it says it needs to relieve the shortage in the Northeast.

I call your attention again to the fact that an informed witness this morning, the president of the American-Arabian Oil Co., stated flatly to the Interstate and Foreign Commerce Committee that if we had sufficient tankers there would be no shortage in this country or in the world. Rather, there would be, as he described it, a surplus.

Secondly, I want to call attention to two or three other significant statements made by him:

If part of Middle Eastern oil were available at the present minute, there would be a better supply situation on the eastern seaboard of the United States in that Middle Eastern oil would be brought to the European market and substituted there for oil now sent to that area from Venezuela, Trinidad, and Colombia.

The construction of the Trans-Arabian Pipe Line Co. was disturbed this winter by the outbreak of cholera in Syria along the route of the line. It was further interrupted by the riots and civil disturbances incident to the UN decision to partition Palestine.

If the demand continues to increase, there will be need also for additional tanker construction despite the pipe lines built in the Middle East. This will depend partially upon the policy of the Maritime Commission and also upon the opening of the European yards for the construction of the tankers where tanker construction has always been cheaper than in the United States.

Here is a statement that is mighty terrifying for a man who is well informed to make:

I am not an expert on this matter, but I think if war were to break out tomorrow, we would find we were desperately short of tanker capacity.

That whole statement, I hope, will be inserted in the Appendix of the RECORD early next week by the gentleman from New Jersey [Mr. WOLVERTON] chairman of the committee, so that each of you might have full opportunity to immediately study it. I know of no member of my committee who is interested in hunting scapegoats. We are interested in getting at the facts in the interest of

the American people we represent. If someone has made an error, be it in the executive department, among ourselves, or by industry, those errors should teach us a lesson. We do not want to face the next 4 or 5 years with this continuing threat. It is a matter of sheer national security.

Mr. LODGE. Mr. Speaker, will the gentleman yield?

Mr. HESELTON. I yield to the gentleman from Connecticut.

Mr. LODGE. Mr. Speaker, I want to associate myself once again with my colleagues who have from time to time come to the well of this House to voice complaints over the failure of the administration to take appropriate action in the current fuel-oil shortage.

As a member of the committee appointed by the Speaker to seek information relative to the powers of the Maritime Commission in the sale of tankers, I have been privileged to participate in an effort to relieve the transportation difficulties in connection with the fuel crisis. As a result of our efforts, quite a number of additional tankers were assigned by the Navy and the Maritime Commission to relieve the emergency.

But the shortage continues and is aggravated by substantial shipments abroad. I should have thought that recent weather conditions in Washington would serve as a reminder to those in authority that the people in our Northern States are really suffering from intense cold because of the lack of fuel. The citizens of Connecticut are suffering, and the people of Fairfield County want immediate relief.

In November the President was asked to use his authority to curtail the export of fuel oil to foreign nations. The President has failed to act. I believe the situation to be such that immediate steps must be taken with regard to exports of oil while this severe fuel shortage in the United States continues. We cannot meet the great demands which the European crisis makes upon us unless the American people are able to work at their highest efficiency. We cannot meet the challenge of European recovery if the American people are unheated and if the great American workshop lacks adequate petroleum products for production and transportation. Accordingly, it is also in the interest of those nations who hope to receive American aid that our economy should remain strong. It is to their advantage that the American worker should be adequately heated. No reasonable man can deny that in considering the requirements of European recovery, we must take our own essential needs into account.

In view of the intimate relationship between foreign aid and domestic needs, I regret very much that the President has seen fit to blame the Congress for this fuel shortage. Surely we must be as nonpartisan in considering the needs of our own people as we are in considering the needs of others. The Congress is not responsible for the present fuel oil crisis. The solution to this problem has for a long time rested in the hands of the President. The President has the power to relieve this distress.

Since he has failed to exercise his authority, the Congress must take action. We must compel the Executive to take the necessary steps. This is urgent. It is imperative. It is vital not only for the health and comfort of the American people, not only to assure a full functioning of our economy, but in order that we may remain at all times strong enough to meet the problems which face us in a very dangerous world.

EXTENSION OF REMARKS

Mr. HAYS (at the request of Mr. ARENDS) was given permission to extend his remarks in the RECORD.

SENATE ENROLLED JOINT RESOLUTION SIGNED

The Speaker announced his signature to an enrolled joint resolution of the Senate of the following title:

S. J. Res. 179. Joint resolution to change the date for filing the report of the Joint Committee on the Economic Report.

ADJOURNMENT

Mr. ARENDS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 26 minutes p. m.) the House, under its previous order, adjourned until Monday, February 2, 1948, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1266. A letter from the Secretary of State, transmitting the eighth report of the Department of State on the disposal of United States surplus property in foreign areas; to the Committee on Expenditures in the Executive Departments.

1267. A letter from the Under Secretary of the Interior, transmitting a draft of a proposed bill to authorize the withdrawal of public notices in the Yuma reclamation project, and for other purposes; to the Committee on Public Lands.

1268. A letter from the Comptroller General of the United States, transmitting a report on the audit of Federal Deposit Insurance Corporation for the fiscal year ended June 30, 1946 (H. Doc. No. 514); to the Committee on Expenditures in the Executive Departments and ordered to be printed.

1269. A letter from the Secretary of State, transmitting a draft of a proposed bill to amend the act of August 5, 1947, entitled "The Institute of Inter-American Affairs Act" (Public Law 369, 80th Cong.); to the Committee on Foreign Affairs.

1270. A letter from the Secretary of the Treasury, transmitting the Fourteenth Quarterly Report on Contract Settlement, covering the period October 1 through December 31, 1947; to the Committee on the Judiciary.

1271. A letter from the Acting Comptroller General of the United States, transmitting a report on the audit of the Tennessee Valley Associated Cooperatives, Inc., for the fiscal year ended June 30, 1947 (H. Doc. No. 515); to the Committee on Expenditures in the Executive Departments and ordered to be printed.

1272. A letter from the president, Washington Gas Light Co., transmitting a detailed statement of the business of the Washington Gas Light Co., together with a list of stockholders for the year ended December 31, 1947; to the Committee on the District of Columbia.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WIGGLESWORTH: Committee on Appropriations. H. R. 5214. A bill making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices, for the fiscal year ending June 30, 1949, and for other purposes; without amendment (Rept. No. 1288). Referred to the Committee of the Whole House on the State of the Union.

Mr. COLE of New York: Joint Committee on Atomic Energy. First report of the Joint Committee on Atomic Energy; without amendment (Rept. No. 1289). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. VAN ZANDT:

H. R. 5213. A bill to provide pensions for disability and age under Veterans Regulation No. 1 (a), part III, in the same amounts as now provided for veterans of the war with Spain, the Philippine Insurrection, and the Boxer Rebellion, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. WIGGLESWORTH:

H. R. 5214. A bill making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices, for the fiscal year ending June 30, 1949, and for other purposes; to the Committee on Appropriations.

By Mr. ANDERSON of California:

H. R. 5215. A bill to amend section 138 of the Legislative Reorganization Act of 1946 so as to provide for the reduction of the public debt by at least $2,500,000,000 during each fiscal year; to the Committee on Ways and Means.

By Mr. COLE of New York:

H. R. 5216. A bill to amend the Atomic Energy Act of 1946 so as to provide that no person shall take office as a member of the Atomic Energy Commission or as general manager of such Commission until an investigation with respect to the character, associations, and loyalty of such person shall have been made by the Federal Bureau of Investigation; to the Joint Committee on Atomic Energy.

By Mr. CUNNINGHAM:

H. R. 5217. A bill to prohibit the exportation of crude petroleum and certain petroleum products until domestic requirements are being currently met; to the Committee on Interstate and Foreign Commerce.

H. R. 5218. A bill to extend the applicability of certain provisions affecting the price-support program for agricultural commodities, and to extend the life of the Commodity Credit Corporation; to the Committee on Banking and Currency.

By Mr. HERTER:

H. R. 5219. A bill to amend the Federal Unemployment Tax Act so that it will apply to fishermen who are paid wages and will not apply to fishermen who are compensated by sharing in the catch; to the Committee on Ways and Means.

By Mr. SCHWABE of Missouri:

H. R. 5220. A bill to amend the Fair Labor Standards Act of 1938, as amended, to clarify provisions of the act relating to employees of establishments engaged primarily in local activities; to the Committee on Education and Labor.

By Mr. SCHWABE of Oklahoma:

H. R. 5221. A bill to exempt from estate tax national service life insurance and United

States Government life insurance; to the Committee on Veterans' Affairs.

H. R. 5222. A bill to provide additional options with respect to endowment contracts under the National Service Life Insurance Act of 1940 which mature by reason of the completion of the endowment period; to the Committee on Veterans' Affairs.

By Mr. BENDER:

H. R. 5223. A bill to cover appropriation items for the National Advisory Committee for Aeronautics in the 1949 budget which may be subject to points of order; to the Committee on Expenditures in the Executive Departments.

By Mr. BRADLEY:

H. R. 5224. A bill to provide that Federal grants-in-aid to States for the purpose of assistance to dependent children be based in part on the economic capacity of the States rather than on a fixed percentage for all States; to the Committee on Ways and Means.

By Mr. BRAMBLETT:

H. R. 5225. A bill to permit judicial determination of the title to sec. 36, T. 30 S., R. 23 E., Mount Diablo base and meridian, in Elk Hills, Kern County, Calif.; to the Committee on the Judiciary.

By Mr. McDONOUGH:

H. R. 5226. A bill fixing rank of retired Army officer war veterans; to the Committee on Armed Services.

By Mr. MILLER of Nebraska:

H. R. 5227. A bill to provide that children be committed to the Board of Public Welfare in lieu of being committed to the National Training School for Girls, that the property and personnel of the National Training School for Girls be available for the care of children committed to or accepted by the Board of Public Welfare, and for other purposes; to the committee on the District of Columbia.

By Mr. HUGH D. SCOTT, JR.:

H. R. 5228. A bill to authorize the construction of a research laboratory for the Quartermaster Corps, United States Army, at or in the vicinity of Philadelphia, Pa.; to the Committee on Armed Services.

By Mr. REEVES:

H. R. 5229. A bill to provide that at least 10 percent of all amounts collected as income taxes from taxpayers other than corporations shall be applied to the reduction of the Federal debt, and for other purposes; to the Committee on Ways and Means.

By Mr. BATTLE:

H. R. 5230. A bill to raise the ceilings on wages and allowances payable to veterans undergoing training on the job, and for other purposes; to the Committee on Veterans' Affairs.

H. R. 5231. A bill to provide increased subsistence allowance to veterans pursuing certain courses under the Servicemen's Readjustment Act of 1944, as amended, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. CANNON:

H. R. 5232. A bill to amend section 301 (a) (1) of the Agricultural Adjustment Act of 1938, as amended, and the first sentence of paragraph (1) of section 2 of the Agricultural Adjustment Act of 1933, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, approved June 3, 1937, as amended, so as to include the cost of all farm labor in determining the parity price of agricultural commodities; to the Committee on Agriculture.

By Mr. DAWSON of Utah:

H. R. 5233. A bill to authorize the Secretary of the Interior to construct, operate, and maintain the central Utah project; to the Committee on Public Lands.

By Mr. GRANT of Indiana:

H. J. Res. 314. Joint resolution authorizing the President of the United States of America to proclaim October 11, 1948, General Pulaski's Memorial Day for the observance and commemoration of the death of Brig. Gen. Casimir Pulaski; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BOGGS of Delaware:

H. R. 5234. A bill for the relief of Alvin Smith; to the Committee on the Judiciary.

By Mr. DONDERO:

H. R. 5235. A bill for the relief of the Jansson Gage Co.; to the Committee on the Judiciary.

By Mr. DOUGHTON:

H. R. 5236. A bill for the relief of Davis Hospital; to the Committee on the Judiciary.

By Mr. JACKSON of California:

H. R. 5237. A bill for the relief of Mr. and Mrs. Charles Fuxman and their three daughters; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1248. By Mr. GRAHAM: Petition of 36 residents of Beaver County, Pa., urging legislation establishing a system of universal military training; to the Committee on Armed Services.

1249. By Mr. HAND: Petition of members of the American Legion and others, in support of legislation establishing a system of universal military training; to the Committee on Armed Services.

1250. By Mr. HART: Petition of Beacon Unit, No. 419, American Legion, of Jersey City, N. J., urging the establishment of a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1251. By Mr. JENISON: Petition of the American Legion Auxiliary, Watseka Unit, No. 23, Watseka, Ill., signed by 23 persons, petitioning the Congress to enact legislation establishing a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1252. Also, petition of the American Legion of Georgetown, Ill., signed by 37 persons, petitioning the Congress to enact legislation establishing a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1253. Also, petition of the American Legion of West Union, Ill., signed by 80 persons, petitioning the Congress to enact legislation establishing a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1254. Also, petition of American Legion Auxiliary, Unit No. 85, Kankakee, Ill., signed by 85 persons, petitioning the Congress to enact legislation establishing a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1255. Also, petition of Kankakee Post, No. 85, American Legion, Kankakee, Ill., signed by 73 persons, petitioning the Congress to enact legislation establishing a system of universal military training, as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1256. Also, petition of American Legion, Post No. 643, Ashkum, Ill., signed by 71 persons, petitioning the Congress to enact legislation establishing a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1257. Also, petition of the American Legion, of Watseka, Ill., signed by 24 persons, petitioning the Congress to enact legislation establishing a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1258. Also, petition of the American Legion, of Momence, Ill., signed by 62 persons, petitioning the Congress to enact legislation establishing a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1259. Also, petitions of the American Legion, of Danville, Ill., signed by 136 persons, petitioning the Congress to enact legislation establishing a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1260. By Mr. REED of Illinois: Petition of Mrs. Belle Dreymiller, president, Auxiliary Unit No. 680, the American Legion, Hampshire, Ill., containing the signatures of 24 residents of Illinois, urging the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1261. Also, petition of Miss Laura Steffen, Hebron, Ill., containing the signatures of 23 residents of Hebron, urging the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1262. Also, petition of Arnold N. May, Spring Grove, Ill., containing the signatures of 36 residents of Spring Grove, urging the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1263. Also, petition of Milan C. Hromadka, commander, Frank H. Nagel, Jr., Post, No. 119, American Legion, of Fox River Grove, Ill., containing the signatures of 19 residents of Fox River Grove, urging the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1264. Also, petition of Ray E. Bassett, Joliet, Ill., containing the signatures of 29 residents of Illinois, urging the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1265. Also, petition of Mrs. S. S. Schmieding, Auxiliary Unit No. 13, Marine Post, the American Legion, Plainfield, Ill., containing the signatures of 13 residents of Plainfield, urging the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1266. Also, petition of Raymond O. Miller, West Chicago, Ill., containing the signatures of six residents of West Chicago, urging the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1267. Also, petition of Mrs. G. R. Janak, of Algonquin, Ill., containing the signatures of 104 residents of Illinois, urging the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1268. Also, petition of Mrs. Gail Pertiet, secretary, Dundee-Carpentersville Auxiliary Unit, No. 679, the American Legion, Dundee, Ill., containing the signatures of 54 residents of Illinois, urging the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1269. Also, petition of American Legion Auxiliary, Alexander Bradley Burns Unit, No. 80, of Downers Grove, Ill., containing the signatures of 40 residents of Illinois, urging the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1270. Also, petition of Lombard Post, No. 391, American Legion, Lombard, Ill., containing the signatures of 40 residents of Illinois, urging the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1271. Also, petition of Alexander Bradley Burns Post, No. 80, American Legion, Downers Grove, Ill., containing the signatures of 76 residents of Illinois, urging the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1272. Also, petition of Perrottet-Nickerson Post, No. 76, American Legion, Wheaton, Ill., containing the signatures of 100 residents of Illinois, urging the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1273. Also, petition of Wood Dale Post, American Legion, Wood Dale, Ill., containing the signatures of 51 residents of Illinois, urging the enactment of legislation to establish a system of universal military training; to the Committee on Armed Services.

1274. By Mr. SMITH of Wisconsin: Petition of Richard Ellis Post, No. 205, American Legion, Janesville, Wis., urging legislation to establish a system of universal military training; to the Committee on Armed Services.

1275. By the SPEAKER: Petition of American Automobile Association and others, petitioning consideration of their resolution with reference to the repeal of special Federal excise taxes; to the Committee on Ways and Means.

SENATE

MONDAY, FEBRUARY 2, 1948

The Chaplain, Rev. Peter Marshall, D. D., offered the following prayer:

Lord, we are finding that without Thee we can do nothing. Let not foolish pride or stubborn will keep us from confessing it.

Help us, O Lord, when we want to do the right thing, but know not what it is. But help us most when we know perfectly well what we ought to do and do not want to do it.

Have mercy upon us, Lord, and help us for Jesus' sake. Amen.

THE JOURNAL

On request of Mr. WHERRY, and by unanimous consent, the reading of the Journal of the proceedings of Friday, January 30, 1948, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had agreed to the concurrent resolution (S. Con. Res. 38) extending the time for the submission of the report of investigation of consumer goods.

ENROLLED JOINT RESOLUTION SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled joint resolution (S. J. Res. 179) to change the date for filing the report of the Joint Committee on the Economic Report, and it was signed by the President pro tempore.

LEAVE OF ABSENCE

Mr. McCARRAN asked and obtained consent to be excused from attendance on the Senate for a period of 2 weeks.

MEETING OF SUBCOMMITTEE ON VETERANS' AFFAIRS OF THE COMMITTEE ON LABOR AND PUBLIC WELFARE

Mr. MORSE. Mr. President, I ask unanimous consent that a meeting of the Subcommittee on Veterans' Affairs of the Committee on Labor and Public Welfare be held this afternoon at 2 o'clock.

The PRESIDENT pro tempore. Without objection, the order is made.

BOARD OF VISITORS TO MERCHANT MARINE AND COAST GUARD ACADEMIES

The PRESIDENT pro tempore. In accordance with the provisions of the act of May 11, 1944, the Chair appoints the Senator from California [Mr. KNOWLAND] as a member of the Board of Visitors to the United States Merchant Marine Academy.

Also, in accordance with the provisions of the act of July 15, 1939, the Chair appoints the Senator from Connecticut [Mr. BALDWIN] as a member of the Board of Visitors to the United States Coast Guard Academy.

Mr. WHERRY. Mr. President, in behalf of the acting chairman of the Committee on Interstate and Foreign Commerce [Mr. TOBEY], I desire to announce that the Senator from Kansas [Mr. REED] and the Senator from Arizona [Mr. MCFARLAND] have been appointed to the Board of Visitors to the United States Merchant Marine Academy, and the Senator from Mr. Hampshire [Mr. TOBEY] and the Senator from Tennessee [Mr. STEWART] have been appointed to the Board of Visitors to the United States Coast Guard Academy. Under the law, the chairman of the committee [Mr. WHITE] is an ex officio member of the Boards.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT ON CONTROL AND ERADICATION OF FOOT-AND-MOUTH DISEASE

A letter from the Under Secretary of Agriculture, transmitting, pursuant to law, a report on cooperation of the United States with Mexico in the control and eradication of foot-and-mouth disease for the month of December 1947 (with an accompanying report); to the Committee on Agriculture and Forestry.

REPORT OF UNITED STATES ATOMIC ENERGY COMMISSION

A letter from the Chairman and members of the United States Atomic Energy Commission, transmitting, pursuant to law, the third semiannual report of that Commission (with an accompanying report); to the Joint Committee on Atomic Energy, and ordered to be printed with an illustration.

PROGRESS REPORT OF WAR ASSETS ADMINISTRATION

A letter from the Administrator, War Assets Administration, transmitting, pursuant to law, the fourth quarterly progress report for the calendar year 1947 of that Administration (with an accompanying report); to the Committee on Expenditures in the Executive Departments.

REPORT OF POTOMAC ELECTRIC POWER CO.

A letter from the president of the Potomac Electric Power Co., transmitting, pursuant to law, a report of that company for the year ended December 31, 1947 (with an accompanying report); to the Committee on the District of Columbia.

REPORT OF WASHINGTON RAILWAY & ELECTRIC CO.

A letter from the president of the Potomac Electric Power Co. (successor in interest of Washington Railway & Electric Co.), transmitting, pursuant to law, a report of the Washington Railway & Electric Co. for the year ended December 31, 1947 (with an accompanying report); to the Committee on the District of Columbia.

PETITIONS, ETC.

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the PRESIDENT pro tempore:

A resolution adopted by the Engineering Association of Hawaii, Honolulu, T. H., favoring statehood for Hawaii; to the Committee on Interior and Insular Affairs.

By Mr. GREEN:

A resolution of the General Assembly of the State of Rhode Island; to the Committee on Public Works:

"Resolution memorializing Congress to have included in the forthcoming rivers and harbors bill the project of dredging Bullock's Cove in the town of East Providence

"Whereas the United States Army engineers held a public hearing upon December 1946 which was attended by over 100 representatives of the commercial fishing industry, business interests, yachting clubs, and other prominent groups, at which hearing evidence was presented to show that if the dredging of Bullock's Cove in the town of East Providence could be undertaken and completed it would be of inestimable value to said town and to the State of Rhode Island; and

"Whereas, following said public hearing, the United States Army engineers then recommended to Congress that the dredging of Bullock's Cove as proposed should be undertaken: Now, therefore, be it

"*Resolved*, That the General Assembly of the State of Rhode Island and Providence Plantations now urgently requests the Members in the Congress of the United States of America and in particular the Senators and Representatives from Rhode Island in said Congress to use their utmost efforts to have included in the forthcoming rivers and harbors bill the proposed project of dredging Bullock's Cove in the town of East Providence; and be it further

"*Resolved*, That the Secretary of State be and he hereby is authorized and directed to transmit duly certified copies of this resolution to the Senators and Representatives from Rhode Island in the Congress of the United States of America and to Hon. JOSEPH W. MARTIN, JR., Speaker of the House of Representatives."

PRESSURE GROUPS IN THE FIELD OF RECLAMATION—RESOLUTIONS BY NEBRASKA RECLAMATION ASSOCIATION

Mr. WHERRY. Mr. President, the Nebraska Reclamation Association, at its recent annual meeting at Kearney, Nebr., adopted five resolutions, with particular significance and, I think, interest to Congress. I present the resolutions and ask unanimous consent that they be printed in the CONGRESSIONAL RECORD.

There being no objection, the resolutions were received, referred to the Com-

mittee on Interior and Insular Affairs, and ordered to be printed in the RECORD, as follows:

Resolution 1

Whereas we recognize that the greatest obstacle to progress in the field of reclamation is the subversive influence of special-interest groups; and

Whereas these groups operate under various pretenses as interested in the public welfare and under names often misleading; and

Whereas associations with genuine interest in progress are frequently infiltrated with a purpose to hamper their efforts: Now, therefore, be it

Resolved, That we urge State associations and the National Reclamation Association to safeguard democratic processes in their activities and to avoid undue influence of special-interest groups seeking selfish ends.

Resolution 2

Whereas a Nation-wide as well as a State-wide shortage of electrical energy exists: Now, therefore, be it

Resolved:

1. The Nebraska Reclamation Association reaffirms its faith in public-power development as a corollary of irrigation as the most beneficial and efficient means of providing ample electrical energy for every use.

2. We commend the Nebraska public power and irrigation districts for the efforts they have put forth to meet the emergency involved in the current shortage of electrical energy and for their effective coordination and planning under the most difficult conditions.

3. We ask the utmost of cooperation from both State and Federal governmental bodies in the efforts of the Nebraska hydros to erect additional facilities for the production of electrical energy and we, as an association, pledge our complete cooperation toward that end.

Resolution 3

Whereas the conservation and effective use of water resources is undeniably essential to the welfare of all of the people of Nebraska; and

Whereas the harnessing of the tributaries of the Missouri River flowing through Nebraska is an integral part of the development of the whole Missouri Valley; and

Whereas the solution to the most beneficial use of water in Nebraska can only be achieved through the mechanism of such an over-all program as the Pick-Sloan plan, which already has been given the approval of the Federal Congress; and

Whereas attempts to obstruct the development of the Missouri Valley can only serve to delay the further application of water to Nebraska acres: Now, therefore, be it

Resolved:

1. We endorse the Pick-Sloan plan and we call for an acceleration of that plan in conformity with Nebraska law in Nebraska, as well as in conformity with the laws of other States in the entire Missouri Valley, so that we may enlarge our available supply of electrical energy, bring more acres under irrigation, and strengthen our existing means of flood control.

2. We recommend the construction of a high-level dam at Fort Randall so that the maximum amount of electrical energy may be produced there to help alleviate the present power shortage, and contribute materially to the repayment of reclamation district construction costs, thus reducing the cost of irrigation to the farmers.

Resolution 5

Whereas in the expenditure of Federal funds for the reclamation of lands by the application of water from a Government-financed project, the national policy under which the Bureau of Reclamation functions has been to limit the acreage owned by individual persons, before construction costs are paid, to 160 acres: Now, therefore, be it

Resolved, That the Nebraska Reclamation Association favors a policy of limitation of acreage of individual farmers on family-sized farms and opposes the application of water from Government-financed projects to large tracts of land under centralized ownership farmed by tenants under corporate management.

Resolution 6

Whereas the need for an adequate knowledge of the supplies of ground water in the State of Nebraska has long been recognized; and

Whereas the various State and Federal agencies studying ground water have collected immense amounts of data and are diligently continuing their surveys: Now, therefore, be it

Resolved, That we commend the substantial progress that has been made and urge the various agencies involved to fully coordinate the data obtained so that the greatest possible benefits may be derived therefrom; be it further

Resolved, That we urge the Nebraska delegation in Congress to continue diligently to seek adequate appropriations for the further development of this investigation to the end that at the earliest possible date we may have a subsurface map of our State which will not only give information as to water levels but also the permeability of materials and the rate and directions of movement of our ground water.

PEACETIME RENT CONTROL

Mr. O'DANIEL. Mr. President, I am unalterably opposed to peactime rent control. It is un-American, unconstitutional, and unnecessary. I receive many letters on this subject. One of my replies to an advocate of rent control attracted so much attention that I have received requests for thousands of copies of it. I therefore ask unanimous consent that a copy of my letter be printed in the CONGRESSIONAL RECORD at this point as part of my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

UNITED STATES SENATE.

DEAR FRIEND: Nobody could be more sympathetic toward the rank and file of our people than I am, because I was brought up in poverty. My parents were tenant farmers. I have worked hard at manual labor much of my life. I have no desire to do anything that would benefit landlords as a group at the expense of any other group.

I beg of you to look at my appraisal of the rent-control situation from the standpoint of a lawmaker for this great Republic. I cannot find in the Constitution of the United States any power delegated to the Government by the people, that gives the Government the right to take sides in personal affairs or welfare of any group of people, whether they be poor or rich, high or low, saint or sinner, white or black. The tenants are citizens of this Nation, just the same as are the landlords. The subject of what amount of money should be paid by one American citizen to another American citizen is no business whatever of the Federal Government. It is strictly a matter between landlords and tenants. If you were a landlord, it would be no concern to the Federal Government whether you received $10 rent or $100 rent, and the same thing applies to a tenant.

Of course, you know that if the Government has a right to tell you what you must charge for rent of property you own, it has the right to tell the farmer what he must charge for a pound of butter, or a pig, and it has the right to tell a laborer what he must charge for an hour's work. And, the Government, by the terms of our Constitution, simply does not have that power. When our forefathers wrote the Constitution, they delegated certain powers to their government, and then they specifically wrote into the Constitution that all powers not delegated to their government were retained by the people.

Now there are other nations which have different forms of government, and those other forms of government permit the public officials to regulate and regiment the people in every line of endeavor. If the people of this Nation want to change their form of government, they can do it by the legal process of amending our Constitution, and if the people amend our Constitution so as to give the Federal Government power to set the price of rent, or the price of anything else, I, as a public official, will uphold that amended Constitution just the same as I now uphold and defend the Constitution we now have. In other words, I believe the people should rule themselves by constituted law. If they want to change their Constitution, they have the right to do so, but I want our Constitution obeyed as it is now, or as it may be amended in the future by the people themselves.

May I tell you something else. I am here on the ground, and I know what I am talking about. The only reason that some of our high public officials want rent control is because there are more tenants who vote than there are landlords, and the main objective of most public officials is to do the thing that will get themselves reelected and reelected and reelected so they can continue to live and grow fat off of the Government pay roll the rest of their lives.

Now you know that selfish deceitful public officials like that will always try to favor the group which has the most votes, so whenever it comes to pass that the census records show that there are more landlords than there are tenants, this same group of public officials now voting to keep the rents low for the tenants, will still want rent control, but they will use it for another purpose. They will use it for the purpose of boosting the rents to make the landlords happy. So people who advocate Government control of rents, or food, or anything else are only subscribing to a policy that may at some later date be very damaging to them.

Our Nation has grown strong because we have had a Government which grants the people the God-given right to pit their own ability, talents, experience, and energy against each other, without taking sides in the competition. I think it is the best form of Government ever devised by human beings, and so long as I am a public servant of the people I am going to uphold and defend our Constitution.

I trust I have made my position clear.

Sincerely yours,

W. LEE O'DANIEL,
United States Senator, Texas.

REIMPOSITION OF RATION AND PRICE CONTROLS—LETTER FROM A. C. CLAASSEN

Mr. CAPPER. Mr. President, I desire to call the attention of the Senate to a letter received by me from A. C. Claassen, of Golden Rule Farms, Whitewater and Potwin, Kans. Mr. Claassen is president of the Butler County Farm Bureau. He writes me in opposition to the reimposition of ration and price controls.

Just how the powers that be in Washington expect to get increased production of food,

clothing, and other consumer goods by resorting to rationing and/or price controls is beyond our simple reasoning powers—

Mr. Claassen writes.

It is quite true that if price controls, or rationing, or both were imposed, that, as far as agricultural products are concerned, there would be a temporary liquidation which would temporarily increase supplies of food for perhaps 60 to 90 days after such controls were imposed. But that would inevitably lead to a scarcity immediately thereafter that would make the wartime scarcities seem a period of plenty by comparison.

The present ratio between feed grain prices, and the market price for hogs, cattle, and sheep, certainly precludes finishing animals to prime or even choice grades, and anyone with reasonable intelligence should know that without being told.

For the consumer, the present situation contains dynamite if the matter is tampered with by legislation. Recent control history is too vivid in the producers' memory, and he is going to, if the controls are imposed, profit by past experience, or should one say, learn how quickly to avoid former losses.

Mr. President, I ask unanimous consent to present Mr. Claassen's letter for appropriate reference and request that it be printed at this point in the RECORD as part of my remarks. I urge Senators to read the letter. I want to say that I think Mr. Claassen is entirely right, and I certainly shall oppose reimposition of price controls and rationing, and certainly the proposal to impose rationing on meat only. Such action would be decidedly opposed to the public interest. I send the letter to the desk for inclusion as part of my remarks at this point.

There being no objection, the letter was received, referred to the Committee on Banking and Currency, and ordered to be printed in the RECORD, as follows:

GOLDEN RULE FARMS,
WHITEWATER AND POTWIN, KANS.,
January 9, 1948.

HON. ARTHUR CAPPER,
Chairman, Senate Agriculture Committee, Senate Office Building, Washington, D. C.

MY DEAR SENATOR CAPPER: Recent news in the daily press seems to indicate that the Republican-controlled Congress is seriously considering submitting to the President's and the administration's demands, and passing some sort of price control, rationing, and allotment measure at this session of Congress.

Of course, being this far removed from Washington and the political scene, perhaps we do not see all the political implications or expediences involved, but we can scarcely believe that the press is right, and that Congress would even consider such legislation seriously.

This letter is written to you both as an individual, and in my official capacity as president of the Butler County Farm Bureau. At the regular monthly executive board meeting last Saturday, by motion, I was instructed to officially let you know the views of the local farm bureau in this matter in no uncertain terms.

Let me say at the outset, that being farmers and producers of more products than we consume, that our viewpoint may be both prejudiced and biased. However, viewing this matter from the standpoint of the consumer alone, we must certainly arrive at these basic conclusions:

1. If price controls are to be instituted, and benefit the consumer at all over his present status, then retail prices will somehow have to be reduced from present levels.

2. It follows that price control calls for rationing if anything like equitable distribution is to be even approached.

3. If No. 1 above is achieved it then follows that prices to producers will have to be lower than present levels.

4. If we cannot get adequate production of food and fiber at the present high level of prices how can we reasonably expect even greater production if prices are rolled back?

5. Meat seems to be one of the biggest scapegoats just now, especially beef, due to its high price and scarcity. Does it never occur to bureaucratic Washington that the present scarcity of beef could be directly blamed upon the continuance of price ceilings and rationing for such a long period after hostilities ceased?

Just how the powers-that-be in Washington expect to get increased production of food, clothing, and other consumer goods, by resorting to rationing and/or price controls, is simply beyond our simple reasoning powers. It is quite true that if price controls, or rationing, or both were imposed, that, as far as agricultural products are concerned, there would be a temporary liquidation, which would temporarily increase supplies of food for perhaps 60 to 90 days after such controls were imposed, but it would inevitably lead to a scarcity immediately thereafter, that would make the wartime scarcities seem a period of plenty by comparison. The plea has been made in the press that as far as farm commodities are concerned, controls are necessary to conserve our dwindling grain supplies. The farmer has been accused in the past of being quite dumb, and perhaps with reason, but he is scarcely so dumb that he will deliberately squander and feed grain to livestock beyond the stage where it is profitable for him to do so. The present ratio between feed-grain prices and the market prices of hogs, cattle, and sheep, certainly precludes finishing animals to prime or even choice grades, and anyone with reasonable intelligence should know as much without being told.

The ratio of 13 to 1 has been generally accepted by the trade as the minimum of where pork production is profitable, and will increase. In the case of beef, the ratio of 15 to 1, while not as generally accepted or known, is a very conservative estimate of the cost of gain on beef cattle in the feedlot. Now if you will take the trouble of multiplying the Kansas City or Chicago market quotations on corn by 15, and then turning to the price of finished beef on the hoof on either market, you will find how small a percentage of each day's receipts are paying for their feed costs. This does mean that the feeder has not or is not making a profit on his operations, but it does mean that his profit must be made on margins and not in the feeding operation. In other words his profit, if any, derives from the fact that his stocker or feeder steers were purchased over a year ago at an average of around 17 cents per pound. If they had to be purchased at today's prices he certainly could not afford to feed cattle, and that is the reason that he is not feeding as many as last year, as even the United States Department of Agriculture is finally finding out now, and raising the cry of "wolf, wolf."

In the even price controls and rationing are imposed, what will the end result be? The answer: Temporarily large supplies of meat and grain for 60 days, followed by a dearth that will make wartime shortages pale into insignificance. There is no shortage of meat now, the city press to the contrary notwithstanding, as United States Department of Agriculture figures show, but there is a larger per capita demand than ever before. The present seeming shortage of meat is directly traceable to wartime ceilings and controls, which made it unprofitable for too long a time to produce meat. This would have been much worse were it not for the fact that farming and livestock production is relatively inflexible, and individual producers tend to continue usual practices from year to year. For the consumer, the present situation contains dynamite if the matter is tampered with by legislation. Recent control history is too vivid in the producers memory, and he is going to—if controls are imposed—profit by past experience, or should one say, learn how quickly to avoid former losses.

We hope that if control and rationing legislation does come before the Senate, you can see fit to vigorously oppose such legislation, both by voice and with your vote. We believe such action will not only be to the present interest of your constituency, but in the interest of the country as a whole in the years to come.

Very truly yours,

A. C. CLAASSEN,
President, Butler County Farm Bureau.

ENROLLED JOINT RESOLUTION PRESENTED

The Secretary of the Senate reported that on today, February 2, 1948, he presented to the President of the United States the enrolled joint resolution (S. J. Res. 179) to change the date for filing the report of the Joint Committee on the Economic Report.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. McCARRAN:

S. 2097. A bill to amend the Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755) as amended, to provide that regulations for any area, section, or flyway of the country shall be based on conditions and needs existing within such area, section, or flyway; and

S. 2098. A bill to amend the Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755) as amended, to provide for an advisory committee; to the Committee on Interstate and Foreign Commerce.

By Mr. LANGER:

S. 2099. A bill for the relief of the estate of Cornelia Mayr; to the Committee on the Judiciary.

S. 2100. A bill to amend the Civil Service Retirement Act of May 29, 1930, as amended; to the Committee on Post Office and Civil Service.

By Mr. BUTLER (by request):

S. 2101. A bill to extend the public-land laws of the United States to certain lands, consisting of islands, situated in the Red River in Oklahoma; to the Committee on Interior and Insular Affairs.

By Mr. BUSHFIELD:

S. 2102. A bill to repeal the act entitled "An Act to Facilitate and Simplify the Administration of Indian Affairs," approved August 3, 1946; to the Committee on Interior and Insular Affairs.

By Mr. CORDON:

S. 2103. A bill conferring jurisdiction upon the United States District Court for the District of Oregon to hear, determine, and render judgment upon the claims of J. N. Jones, and others; to the Committee on the Judiciary.

S. 2104. A bill to provide for a preliminary examination and survey of Beaver Creek, Lincoln County, Oreg., for the purpose of determining what action should be taken to control floods of such creek and to make it adequately drain the area through which it flows; to the Committee on Public Works.

By Mr. CAIN (for himself and Mr. McCARRAN):

S. 2105. A bill to amend the Tariff Act of 1930, as amended; to the Committee on Finance.

By Mr. IVES:

S. 2106. A bill for the relief of Elza Friedrych; to the Committee on the Judiciary.

By Mr. CAPPER:

S. 2107. A bill to establish a Division of Cooperatives in the Department of Agriculture, and for other purposes; to the Committee on Agriculture and Forestry.

S. 2108. A bill to exempt from taxation certain property of the American Friends Service Committee; to the Committee on the District of Columbia.

(Mr. MARTIN (for himself, Mr. WHERRY, Mr. CAIN, Mr. IVES, and Mr. ELLENDER) introduced Senate bill 2109, to relieve the critical shortage of iron and steel scrap, and for other purposes, which was referred to the Committee on Banking and Currency, and appears under a separate heading.)

By Mr. ECTON:

S. 2110. A bill authorizing the Secretary of the Interior to issue a patent in fee to Plays With Himself;

S. 2111. A bill authorizing the Secretary of the Interior to issue a patent in fee to Mary One Goose;

S. 2112. A bill authorizing the Secretary of the Interior to issue a patent in fee to Richard Cummins, Sr.;

S. 2113. A bill authorizing the Secretary of the Interior to issue a patent in fee to Florence Badboy (Florence Badboy Old Dwarf);

S. 2114. A bill authorizing the Secretary of the Interior to issue a patent in fee to James Laforge;

S. 2115. A bill authorizing the Secretary of the Interior to issue a patent in fee to Ruby Good Horse;

S. 2116. A bill authorizing the Secretary of the Interior to issue a patent in fee to Thomas Charles La Forge;

S. 2117. A bill authorizing the Secretary of the Interior to issue a patent in fee to Josephine Good Horse;

S. 2118. A bill authorizing the Secretary of the Interior to issue a patent in fee to Edward Badbear; and

S. 2119. A bill authorizing the Secretary of the Interior to issue a patent in fee to Alice Little Light; to the Committee on Interior and Insular Affairs.

By Mr. KILGORE:

S. 2120. A bill for the relief of William E. Gillespie, Jr.; to the Committee on Finance.

By Mr. WATKINS:

S. 2121. A bill authorizing the issuance to Mountain States Development Co. and Crescent Eagle Oil Co. of patents for certain placer-mining claims located in Grand County, Utah; to the Committee on Interior and Insular Affairs.

CRITICAL SHORTAGE OF IRON AND STEEL SCRAP

Mr. MARTIN. Mr. President, on behalf of myself, the Senator from Nebraska [Mr. WHERRY], the Senator from Washington [Mr. CAIN], the Senator from New York [Mr. IVES], and the Senator from Louisiana [Mr. ELLENDER], members of the Subcommittee on Steel of the Special Committee to Study Problems of American Small Business, I introduce for appropriate reference a bill to relieve the critical shortage of iron and steel scrap. The Senator from Florida [Mr. HOLLAND] would have joined in the introduction of the bill, but he is now away from the Senate on official business.

The bill (S. 2109) to relieve the critical shortage of iron and steel scrap, and for other purposes, introduced by Mr. MARTIN (for himself, Mr. WHERRY, Mr. CAIN, Mr. IVES, and Mr. ELLENDER), was read twice by its title, and referred to the Committee on Banking and Currency.

Mr. MARTIN. Mr. President, I ask unanimous consent that I may be permitted to make a brief statement relative to the bill.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Pennsylvania? The Chair hears none, and the Senator may proceed.

Mr. MARTIN. Mr. President, the unanimous report of the Steel Subcommittee of the Senate Small Business Committee which I introduced on the floor of the Senate on Friday, January 16, had as one of its recommendations the following:

> Section 6, page 2, the subcommittee recommends that the committee do all in its power to develop immediate sources of ferrous scrap. The best potential for immediate recovery of scrap is in Government surpluses and inventories. To assist in expediting the declaration of surplus military and industrial equipment and its subsequent determination as scrap, the subcommittee recommends that legislation be prepared to amend the Surplus Property Act of 1944, in order (1) to set a time limit for the sale of all remaining consumer and producer durable goods in War Assets Administration surplus stocks; (2) to effect a prompt determination and sale of all Government-owned obsolete and unserviceable materials of ferrous content, whether in War Assets surplus stocks or held by other Government agencies. The subcommittee further recommends that the Military Departments bend every effort to secure the prompt return of all war-generated scrap from overseas. The Steel Subcommittee is absolutely opposed to the export of scrap to foreign nations, or the export of unfinished steel whereby a loss of home scrap would occur.

The bill introduced to carry out this recommendation in section 1 makes a finding that the lack of adequate scrap is holding back production of steel and steel products which is necessary to the security and economy of the United States. A subsection of section 1 of the bill declares it to be the policy of the United States to increase supplies of ferrous scrap by liquidating surplus stocks of ferrous material under the control of the United States Government and by return of scrap to this country from foreign shores.

Section 2 of the bill defines the terms used in it.

Section 3 of the bill requires all Government agencies which are holding materials declared to be surplus and consisting wholly or in principal part of ferrous metals, to be offered for sale within 60 days after the bill's enactment. This section also requires that any materials consisting principally of ferrous content and declared to be surplus after the enactment of the bill, must be offered for public sale within 60 days of their designation as surplus. Such surplus property of ferrous content remaining after sales under such offers must, within a further 60-day period, be offered for sale and sold as scrap, according to the terms of the bill.

Section 4 of the bill provides that scrap in the custody or control of United States Government agencies in foreign lands must be offered for sale within 6 months after the date of the enactment of the bill and must be returned for use in the United States not later than 1 year after the date of sale. The reason for this section is that it has been brought to the attention of the steel subcommittee that there are currently large quantities of war-generated iron and steel scrap located in foreign countries throughout the world, which scrap is not being returned as promptly as it should be.

Section 5 of the bill amends section 33 of the Surplus Property Act of 1944 to allow importation of surplus ferrous scrap to the United States.

Section 6 of the bill provides for quarterly reports to the Congress by the President of ferrous surplus property so that the Congress may determine the location of such property and the speed of liquidation of it to see that the intent of the bill is carried out.

FLOW OF VENTURE CAPITAL—ADDRESS BY SENATOR MILLIKIN

[Mr. MARTIN asked and obtained leave to have printed in the RECORD an address on the subject, The Flow of Venture Capital, by Senator MILLIKIN, before the forum of the Investors' League, Inc., in Philadelphia, Pa., January 29, 1948, which appears in the Appendix.]

OUR MONETARY AND CREDIT PROBLEMS TODAY—ADDRESS BY M. S. SZYMCZAK

[Mr. COOPER asked and obtained leave to have printed in the RECORD an address entitled "Our Monetary and Credit Problems Today," by M. S. Szymczak, member of the Board of Governors of the Federal Reserve System, at the annual stockholders' meeting of the Federal Home Loan Bank of New York, New York City, January 22, 1948, which appears in the Appendix.]

CHALLENGES TO DEMOCRACY—ADDRESS BY SENATOR ROBERTSON OF VIRGINIA

[Mr. ROBERTSON of Virginia asked and obtained leave to have printed in the RECORD an address entitled "Challenges To Democracy," delivered by him at the annual meeting of the Danville Chamber of Commerce, January 30, 1948, which appears in the Appendix.]

I BELONG HERE—ADDRESS BY ARCHBISHOP CUSHING

[Mr. LODGE asked and obtained leave to have printed in the RECORD an address entitled "I Belong Here," delivered by the Catholic archbishop of Boston, Richard J. Cushing, before the Ninth Constitutional Convention of the CIO, which appears in the Appendix.]

FLOOD CONTROL—PORTION OF ADDRESS LT. GEN. R. A. WHEELER

[Mr. OVERTON asked and obtained leave to have printed in the RECORD a portion of an address recently delivered by Lt. Gen. R. A. Wheeler, Chief of Engineers, on the subject of flood control, before the annual meeting of the Mississippi Valley Association, in St. Louis, Mo., which appears in the Appendix.]

PRAYER BY MINISTERS REPRESENTING THE NATIONAL FRATERNAL COUNCIL OF NEGRO CHURCHES

[Mr. LANGER asked and obtained leave to have printed in the RECORD the national prayer offered by the ministers representing the National Fraternal Council of Negro Churches, on the steps of the Capitol of the United States, which appears in the Appendix.]

DISLOYALTY TO AMERICAN CONSUMERS—LETTER FROM BENJAMIN C. MARSH

[Mr. LANGER asked and obtained leave to have printed in the RECORD a letter from Benjamin C. Marsh, executive secretary of

the People's Lobby, entitled "This Congress Must End Disloyalty to American Consumers," which appears in the Appendix.]

WHISKY OR BREAD?—EDITORIAL FROM THE CHRISTIAN SCIENCE MONITOR

[Mr. ROBERTSON of Virginia asked and obtained leave to have printed in the RECORD an editorial entitled "Whisky or Bread" from the Christian Science Monitor of January 31, 1948, which appears in the Appendix.]

THE ERP TOBACCO PROGRAM—ARTICLE FROM THE CHRISTIAN SCIENCE MONITOR

[Mr. ROBERTSON of Virginia asked and obtained leave to have printed in the RECORD an editorial entitled "ERP Tobacco Program Linked to World Trade," from the Christian Science Monitor, which appears in the Appendix.]

KEEPING GUARD ON OUR FISHERIES—EDITORIAL FROM THE SEATTLE POST INTELLIGENCER

[Mr. CAIN asked and obtained leave to have printed in the RECORD an editorial entitled "Keeping Guard On Our Fisheries," from the Seattle Post Intelligencer of January 16, 1948, which appears in the Appendix.]

THE DRIFT TO WORLD WAR III—EDITORIAL BY DR. CLARENCE POE

[Mr. HOEY asked and obtained leave to have printed in the RECORD an editorial entitled "How Can We Stop the Dangerous Drift to World War III?" by Dr. Clarence Poe, which appears in the Appendix.]

PARTICIPATION OF GARFIELD'S MOTHER IN HIS INAUGURATION AS PRESIDENT—ARTICLE BY E. E. PATTON

[Mr. McKELLAR asked and obtained leave to have printed in the RECORD an article entitled "Eliza Garfield—First Woman To See Son Sworn In as President of United States," by E. E. Patton, which appears in the Appendix.]

THE TENNESSEE VALLEY AUTHORITY—HISTORY OF APPROPRIATIONS, BY EARL W. COOPER

Mr. McKELLAR. Mr. President, so much has been said recently about the inauguration and management of the Tennessee Valley Authority, and so many falsehoods have been told in reference to how it came to be organized that I ask that a history of the appropriations made for the Tennessee Valley Authority, prepared by Mr. Earl W. Cooper, an employee of the Senate Appropriations Committee, be reprinted in the RECORD. So many statements of a misleading nature have been published that the true facts should be given.

I merely wish to say that I saw in two papers in my State recently editorials containing the statement that I was the enemy of the TVA. Mr. President, I was one of the first Members of Congress, if not the earliest, to introduce a bill providing for the building of the dams along the Tennessee River and its tributaries, some 30 years ago.

If I recall aright, I became a member of the Appropriations Committee of the Senate more than 20 years ago, and during all these years I took the lead in getting appropriations for the construction of this great project. The record I am asking to have printed as a part of my remarks shows that I took the lead in getting every dollar of the money that went into the Tennessee Valley Authority, and that Authority was vigorously and continuously opposed by some of the leading Members of the Senate.

I ask that Mr. Cooper's compendium giving the records be printed as a part of my remarks.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

HISTORY OF APPROPRIATIONS MADE BY CONGRESS FOR THE TENNESSEE VALLEY AUTHORITY

FOREWORD

In order to better understand the history of the appropriations made by Congress for the Tennessee Valley Authority, it is helpful to follow the events over the years which led to the formation of the Authority by the Federal Government. The interest in the development of the Tennessee River evidenced by Senator McKELLAR during the course of these events is particularly noteworthy, since on February 1, 1926, he introduced in the Senate the prototype of the Tennessee Valley Authority Act and then, after the formation of the Tennessee Valley Authority, he became the leading proponent of the appropriations necessary to carry out the Government's program of development on the Tennessee River.

ORIGIN AND BACKGROUND OF TENNESSEE VALLEY AUTHORITY

The Report of the Joint Committee Investigating the Tennessee Valley Authority, made April 1, 1939, pursuant to Public Resolution No. 83, Seventy-fifth Congress (S. Doc. 56, 76th Cong., 1st sess.), contains on page 11 a chapter on origin and background of the Tennessee Valley Authority, from which the following excerpts are quoted:

"The Tennessee Valley Authority statute enacts no radical or even novel program. The Tennessee Valley Authority is, rather, the latest stage of a long revolutionary process in the development of the policies of the Federal Government in navigable rivers. To understand the Authority it is necessary to trace this development, culminating in the synthesis of what were once thought of as divergent uses—navigation, flood control, power—into a single unified river control.

"The interest of the Federal Government in rivers, and particularly in the Tennessee, goes back more than a century. Federal control over navigation was established in the case of *Gibbons* v. *Ogden* in 1824. Shortly thereafter President Monroe sent to the Congress a report by Secretary of War Calhoun recommending a national plan for roads, canals, and river improvements, including a survey of Muscle Shoals, as one of the most important projects for improvement of navigation.

"Several attempts were made to build a canal around Muscle Shoals. Between 1852 and 1918, 17 surveys and projects were authorized on the Tennessee and 10 on its tributaries. As early as 1909, Congress authorized a survey for a 6-foot channel from Knoxville to Chattanooga and a 9-foot channel from Chattanooga to Paducah.

"The idea of a dual project appeared in 1899 when the Congress granted an application to construct a canal and power stations, which was not, however, undertaken. President Theodore Roosevelt, 4 years later, in vetoing a similar project, expressed the principle of combining different utilities in the same project: * * *

"The principle of allocation, that the receipts from power should be made to cover the costs of the improvement so far as practicable, is here stated in clear terms. * * *

"In 1906 the Muscle Shoals Hydro Electric Power Co. proposed a joint investment with the Government in a navigation and power project, but this and other similar plans were rejected by the Congress. * * *

"In 1912 the National Waterways Commission recognized that the Federal Government would be required to combine the conflicting interests of navigation, flood control, water power, and irrigation on the great rivers: * * *

"This principle of combining multiple uses in single structures is to be taken in conjunction with the previously stated principle of using power to help pay for the project. * * *

"A report from the Corps of Engineers in 1916 showed that nearly $10,000,000 had been spent on the river, with some improvement to navigation but without completing the work. An exhaustive study over a 5-year period led to a plan adopted in the River and Harbor Act of 1930, looking to a 9-foot channel to be obtained by building 32 low dams or 7 high dams.

"The leasing of surplus water power by the Secretary of the Interior at dams operated by the Reclamation Service was authorized in 1906 in an amendment to the Reclamation Act of 1902. Flood control was recognized as a proper feature of multiple-use dams, in the report of the Inland Waterways Commission appointed by President Theodore Roosevelt in 1907. Reforestation of headwater areas was mentioned as an element in stream regulation in the comprehensive statute of 1911 and in a report of the Geological Survey in the same year. Fertilizer as a means of soil conservation was noted by the Bureau of Soils under President Taft, with the observation that—'Fertilizers * * * involve problems * * * which obviously call for governmental assistance." Thus, the various elements that were to be combined in the Authority were appearing as public responsibilities even before the World War.

"The problems of national defense presented by the World War changed the picture and brought definite action. In 1916 the Chief of Engineers suggested that the plans of Muscle Shoals Hydro Electric Power Co. for developing Muscle Shoals be held up for consideration of the possibility of nitrate production, in view of our dependence on imported nitrates."

At this stage of events, in 1916, Senator McKELLAR was then a Member of the House of Representatives and ranked third on the Military Affairs Committee of the House, of which James Hay, of Virginia, was chairman. He had served in the House from 1911, when he was elected to fill the unexpired term created by the death of General Gordon, until 1916, when he was elected to the United States Senate.

FORMATION OF SECTION 124 OF THE NATIONAL DEFENSE ACT OF 1916

The House Committee on Military Affairs began hearings in January 1916 and on March 6, 1916, reported out a bill prepared in the committee. The minutes of the committee do not show the responsibility of any individual members for any particular section of the bill. The bill as prepared by Chairman Hay was considered section by section for several days in the committee and was unanimously reported from the committee.

Mr. McKELLAR, though not taking a leading part on the bill, was present in the committee at all times when action was taken and voted consistently on the floor in favor of the bill.

The members of the House committee at that time were Hay (chairman), Dent, McKellar, Quin, Gordon, Littlepage, Shallenberger, Dill, Caldwell, Wise, Olney, Nicholl, Kahn, Anthony, McKenzie, Greene, Morin, Tilson, Crago, and Hull.

The nitrate provision in the bill as reported stated:

"SEC. 82. That to provide for the fixation of atmospheric nitrogen by the development of water power, or any other means, necessary to establish an adequate supply of nitrogen, the appropriation of such sum or sums of money to construct the necessary plant for such purpose is hereby authorized."

This section was stricken from the bill as it passed the House on March 23, 1916, by a vote of 224 to 180. In the Senate the bill from the Senate Military Affairs Committee was substituted in its entirety for the House bill, with no provision being made for nitrates.

Senator Smith, of South Carolina, on April 7, 1916, introduced an amendment to the national defense bill based on his bill (S. 4971) as reported from the Committee on Agriculture and Forestry—"to authorize the designation and withdrawal of water-power sites and the construction of water-power and other plants by the United States for the manufacture of nitrates."

He based the interest of the Agriculture Committee on the startling fact that no other bill had taken cognizance of the need for nitric acid and its use for explosives in time of war and for fertilizers in time of peace.

The nitrate provision was attacked in the House by many of the Members, including Mr. Lenroot and Mr. Longworth, but it finally became section 124 of the bill which passed on the adoption of the second conference report in the House on May 20, 1916.

Thus was formed section 124 of the National Defense Act of 1916, which was the legislative basis for the Muscle Shoals development and was the antecedent of provisions now contained in the Tennessee Valley Authority Act.

In view of its importance in the history of events, section 124 is quoted here in full.

Section 124 of the National Defense Act of 1916, as passed, reads as follows:

"SEC. 124. Nitrate supply: The President of the United States is hereby authorized and empowered to make, or cause to be made, such investigation as, in his judgment is necessary to determine the best, cheapest, and most available means for the production of nitrates and other products for munitions of war and useful in the manufacture of fertilizers and other useful products by water power or any other power as, in his judgment, is the best and cheapest to use; and is also hereby authorized and empowered to designate for the exclusive use of the United States, if, in his judgment, such means is best and cheapest, such site or sites, upon any navigable or nonnavigable river or rivers or upon the public lands, as, in his opinion, will be necessary for carrying out the purposes of this act; and is further authorized to construct, maintain, and operate, at or on any site or sites so designated, dams, locks, improvements to navigation, powerhouses, and other plants and equipment or other means than water power as, in his judgment, is the best and cheapest, necessary, or convenient for the generation of electrical or other power and for the production of nitrates or other products needed for munitions of war and useful in the manufacture of fertilizers and other useful products.

"The President is authorized to lease, purchase, or acquire, by condemnation, gift, grant, or devise, such lands and rights-of-way as may be necessary for the construction and operation of such plants, and to take from any lands of the United States, or to purchase or acquire by condemnation materials, minerals, and processes, patented or otherwise, necessary for the construction and operation of such plants and for the manufacture of such products.

"The products of such plants shall be used by the President for military and naval purposes to the extent that he may deem necessary, and any surplus which he shall determine is not required shall be sold and disposed of by him under such regulations as he may prescribe.

"The President is hereby authorized and empowered to employ such officers, agents, or agencies as may in his discretion be necessary to enable him to carry out the purposes herein specified, and to authorize and require such officers, agents, or agencies to perform any and all of the duties imposed upon him by the provisions hereof.

"The sum of $20,000,000 is hereby appropriated, out of any moneys in the Treasury not otherwise appropriated, available until expended, to enable the President of the United States to carry out the purposes herein provided for.

"The plant or plants provided for under this act shall be constructed and operated solely by the Government and not in conjunction with any other industry or enterprise carried on by private capital.

"In order to raise the money appropriated by this act and necessary to carry its provisions into effect, the Secretary of the Treasury, upon the request of the President of the United States, may issue and sell, or use for such purposes or construction hereinabove authorized, any of the bonds of the United States now available in the Treasury of the United States under the act of August 5, 1909, the act of February 4, 1910, and the act of March 2, 1911, relating to the issue of bonds for the construction of the Panama Canal, to a total amount not to exceed $20,000,000: *Provided*, That any Panama Canal bonds issued and sold or used under the provisions of this section may be made payable at such time after issue as the Secretary of the Treasury, in his discretion, may deem advisable, and fix, instead of 50 years after date of issue, as in said act of August 5, 1909, not exceeding 50 years."

SECTION 124 SAVED ON POINT OF ORDER AND DEBATE BY M'KELLAR

February 21, 1917, during the debate in the House on the Army appropriation bill Mr. Longworth of Ohio submitted the following amendment:

"On page 48, line 2, strike out '$150,000' and insert in lieu thereof the following: '$140,000, and that section 124 of an act entitled "An act for making further and more effectual provision for the national defense, and for other purposes," approved June 3, 1916, is hereby repealed.' "

Mr. Longworth stated at the time:

"Mr. Chairman, the effect of this amendment, if adopted, will be to repeal section 124 of the National Defense Act, the act which authorizes the expenditure of $20,000,000 for the acquisition of a nitrate plant.

"Gentlemen will observe that up to now none of that money has been expended, and that no site has been chosen, and no recommendation made. Therefore the effect of my amendment, if adopted, will be to save to the Government of the United States $20,000,000 that I regard as a useless expenditure of the public money."

He went on at considerable length to scathingly denounce the expenditure.

Mr. MCKELLAR argued the nitrate proposition with Mr. Longworth and finally made a point of order against the amendment, as follows (p. 3824, vol. 54, pt. 4):

"The mere fact that incidentally if this nitrate plant is established on the Tennessee River it will open up that entire river to navigation is no objection to it. It is absolutely apparent that the Government needs nitrate and needs to manufacture it in our own country. It needs to be done in the cheapest manner possible. It is believed from expert testimony that it can be done by water power cheaper than by any other method, provided we can get water power in sufficient quantity. It is understood that on the Tennessee River at Muscle Shoals you can get more water power than anywhere else in the country, unless it be at some place in Oregon very near the coast and outside of the safety zone. There is no doubt whatever about the Muscle Shoals being the ideal place in all the United States for the location of this plant. That is why these gentlemen down there on the Tennessee River have believed that this was the proper place for it. Now, I say this because I do not believe that the plan to establish this nitrate plant upon the Tennessee River is subject to the criticism that the gentleman from Ohio [Mr. LONGWORTH] has seen fit to visit upon it, and if the point of order has not been made, I make the point of order against the amendment, because it is not a germane amendment."

The point of order was then argued, but was sustained in a lengthy ruling by Mr. Saunders as the chairman.

NAMING OF MUSCLE SHOALS

Under the provisions of section 124 of the National Defense Act of 1916, President Wilson had two committees organized to report upon processes for nitrogen fixation. The first committee, from the National Academy of Sciences and the American Chemical Society, submitted a final report on January 20, 1917. The second committee, from the Bureau of Mines and the Ordnance Department, submitted a final report on April 30, 1917, after making studies abroad. These reports were reviewed and coordinated by a third committee.

At this same time President Wilson had organized a committee on the location of the nitrate plant, consisting of Secretaries of War, Agriculture, and Interior, which held hearings at places in the East and South but made no formal report, since the urgent need of the Ordnance Department for ammonia (as a result of the declaration of war on April 6, 1917) compelled earlier action by the President.

The studies of the War Department, meanwhile, had indicated four places as particularly favorable for the location of the experimental nitrate plant, including Sheffield, Ala., at the foot of Muscle Shoals. President Wilson finally made the decision by placing on the edge of the memorandum before him "Advise Chief of Staff I have selected Sheffield." On September 28, 1917, accordingly, the Secretary of War notified the Chief of Ordnance that the President had decided upon Sheffield as the location for nitrate plant No. 1.

Muscle Shoals was selected as the site immediately after the visit of Senator McKellar and Senator Underwood to President Wilson.

Continuing with the excerpts from the report of the Joint Committee Investigating the Tennessee Valley Authority (S. Doc. No. 56, 76th Cong., 1st sess.):

"Section 124 of the National Defense Act authorized the President to determine the best means of producing nitrates and to build dams and power equipment for this purpose. Two nitrate plants were built but not fully equipped at Muscle Shoals; and Wilson Dam, the most important of three planned by the Corps of Engineers, was completed in 1925.

"After the war various attempts were made to find a use for the Muscle Shoals plants. A bill to set up a Government corporation to sell fertilizer and power failed of passage in the House. * * *

"Meanwhile, there were various attempts to interest private industry in the Muscle Shoals plants. In 1921 Henry Ford offered to complete the dams and lease them for 100 years and to purchase the nitrate and steam plants for $5,000,000 and produce fertilizers to be sold at an 8-percent profit. This offer passed the House but was rejected in the Senate."

(Senator MCKELLAR was favorable to the Ford offer, took active part in the debate in the Senate, and offered several amendments, some of which were accepted and others rejected, to the bill that finally failed of passage in 1925, Mr. Ford having withdrawn his offer October 18, 1924.)

"There were many other proposals. A commission, appointed by President Coolidge in 1925, recommended that the properties should be used to make nitrogen compounds but not to sell power. A joint committee was directed to negotiate with private interests to lease the property, but was unsuccessful. In March 1928 the Senate adopted a resolution of Senator Norris providing for construction of a transmission line to

sell power. The Alabama Power Co. had at that time the only line to the plant. The House substituted a bill for a corporation to produce and sell both fertilizer and power, which passed both Houses on May 25, 1928. This bill provided among other things for a dam on Cove Creek, now Norris Dam. The bill was pocket-vetoed by President Coolidge.

"A similar bill was vetoed by President Hoover on March 3, 1931, on the ground, among others that the Government should not compete with its citizens. At President Hoover's suggestion, the Muscle Shoals Commission was appointed. The Commission recommended a 50-year lease of Muscle Shoals and the construction of Cove Creek (Norris) Dam for 'navigation, flood control, and incidental power development.'"

LEGISLATIVE PROPOSALS BY SENATOR M'KELLAR TO GET THE MUSCLE SHOALS PROPERTIES OPERATED

During this time referred to in the joint committee's report when Congress was seeking some way to get the Muscle Shoals properties operated, Senator McKELLAR was constantly active and proposed the following:

December 6, 1923, introduced Senate Joint Resolution 12 on the Ford offer, which was referred to the Committee on Agriculture and Forestry, with no action taken; Senate Joint Resolution 14, to investigate the legal right of the Secretary of War to dispose of the Gorgas plant at Muscle Shoals, which was referred to the Committee to Audit and Control the Contingent Expenses, with no action taken; and Senate Joint Resolution 18, authorizing an investigation of charges regarding lobbying against the resolution accepting the Ford offer, which was referred to the Committee on Agriculture and Forestry, with no action taken.

December 3, 1924, offered an amendment to the McKenzie bill on the Ford offer to limit leasing to American citizens, which was agreed to; also offered an amendment that power in interstate commerce shall be regulated by the Secretary of War, which was rejected. Senator McKELLAR participated at great length in the day-after-day debate. The McKenzie bill failed of final passage after getting to conference.

In March 1925, during the special session, Senator McKELLAR offered the following resolution:

"*Resolved*, That a select committee of four Senators be appointed by the Vice President, two Republicans and two Democrats, two of whom voted for what is known as the Underwood proposal for the disposition of Muscle Shoals and two of whom voted against that proposal, which committee shall investigate, during the coming recess of Congress, the question of what is the best disposition to make of the Shoals property and report its findings and recommendations to the Senate at the next session of the Congress to be held in December 1925."

The resolution also provided for holding hearings and for visiting Ontario for a power study but failed on the objection of Senators Bruce and Jones.

February 1, 1926, introduced S. 3081, to create a commission for Muscle Shoals, which was referred to the Committee on Agriculture and Forestry, and no action was taken on it. (This bill is printed in full in later pages.)

January 17, 1927, Senator McKELLAR introduced an amendment to the Federal Power Act, to limit jurisdiction to navigable streams.

March 1, 1927, he presented the following notices to suspend the rule and offer amendments to the second deficiency appropriation bill:

"To enable the Secretary of War to be on a fair basis in securing current generated at Muscle Shoals, Ala., the sum of $2,000,000 is hereby appropriated to be used by the Secretary at his discretion for building transmission lines from Muscle Shoals to such point, or points, as he may select."

Also:

"*Provided further*, the Secretary of War is hereby authorized to use any funds at his disposal for river and harbor work not exceeding $200,000 for the purpose of making investigations and borings to ascertain and report to the Congress the feasibility of building a dam on Clinch River at Cove Creek, Tenn. (afterward named Norris Dam) and in the event the Federal Power Commission shall issue either a permit or a license to any private company under the Federal Power Act, such company shall repay to the United States the money so expended by the Secretary of War."

No action was taken on these proposed floor amendments.

December 9, 1927, introduced S. 839, to create a commission for Muscle Shoals, which was referred to the Committee on Agriculture and Forestry, with no action taken.

March 12, 1928, and on the following day, Senator McKELLAR materially aided in the formation of Senate Joint Resolution 46 as presented by Senator Norris, which was later pocket-vetoed by President Coolidge. He offered the following amendment, which became section 3 in the final passage:

"The Secretary of Agriculture in carrying out the purposes of this act shall locate a fertilizer plant in the vicinity of Muscle Shoals, in Alabama, and there shall be turned over to him the nitrate plant, together with the steam plant at nitrate plant No. 1, and such other buildings, houses, and shops there located as shall be necessary for the Secretary and his employees in the construction and maintenance and operation of such plants; and when such fertilizer plant is thus located and established in the vicinity of Muscle Shoals all the power necessary for the requirements of said plant shall be supplied from said steam plant located at nitrate plant No. 2 or from Dam No. 2."

And section 2 as finally passed contained amendments submitted by Senator McKELLAR and other Senators to Senator Norris', as follows:

"(e) Whenever the Secretary determines that it is commercially feasible to produce any such fertilizer, it shall be produced in the largest quantities practicable, and shall be disposed of at the lowest prices practicable, to meet the agricultural demands therefor, and to effectuate the purposes of this act.

"(f) The Secretary is authorized to make alterations, modifications, or improvements in existing plants and facilities and to construct and operate new plants and facilities in order to effectuate properly the provisions of this section."

January 5, 1929, introduced S. 5218, which he explained as being the provisions that were not objectionable in the vetoed bill, authorizing the Secretary of War to build the transmission lines and dispose of the power; which was referred to the Committee on Agriculture and Forestry, with no action taken.

April 29, 1929, Senator McKELLAR introduced S. 813, to create a commission for Muscle Shoals; which was referred to the Committee on Agriculture and Forestry, with no action taken. Also reintroduced as S. 815 the bill authorizing the Secretary of War to build the transmission lines and dispose of the power.

March 3, 1931, Senator McKELLAR argued at length on the overriding of the veto of President Hoover on Senate Joint Resolution 49, during which Senator Norris stated President Hoover had proposed a new solution, "Turn Muscle Shoals over to Alabama and Tennessee." The bill failed to pass over the veto for lack of two-thirds on a roll-call vote of 49 yeas to 34 nays.

THE PROTOTYPE OF THE TENNESSEE VALLEY AUTHORITY ACT

Among these legislative proposals submitted by Senator McKELLAR is one that stands out as a likely forerunner and prototype of the eventual Tennessee Valley Authority Act, but since it was submitted during the Coolidge administration it received no favorable action. While not at all phrased in the same language, it does contain many of the principles which were later enacted into the Tennessee Valley Authority Act and might well have superseded it under a friendly administration.

The bill was S. 3081, introduced by Senator McKELLAR on February 1, 1926—7 years before Tennessee Valley Authority—and is in full as follows:

[69th Cong., 1st sess.; S. 3081; in the Senate of the United States, February 1 (calendar day, February 10), 1926; Mr. McKELLAR introduced the following bill; which was read twice and referred to the Committee on Agriculture and Forestry]

"A bill to create a commission for Muscle Shoals, and for other purposes

"*Be it enacted, etc.*, That there is hereby established a commission to be known as the Muscle Shoals Commission (hereinafter in this act referred to as the 'commission') to be composed of three members, one of whom shall be the Director of Fixed Nitrogen Research Laboratory in the Department of Agriculture, and his successors in office, and who shall be a member of this commission, ex officio, and the other two commissioners shall be appointed by the President by and with the advice and consent of the Senate, and who shall hold their offices for a term of 4 years and until their successors are appointed and qualified. The salaries of all three of said commissioners shall be $7,500 a year, payable monthly, but the salary herein authorized to be paid to the Director of Fixed Nitrogen shall be in lieu of any salary now paid him as director.

"TRANSFER OF PLANTS AND FACILITIES

"(See sec. 7 (a) of TVA Act)

"SEC. 2. The United States nitrate plants Nos. 1 and 2, located, respectively, at Sheffield, Ala., and Muscle Shoals, Ala., together with all real estate and buildings used in connection therewith, all tools, machinery, equipment, accessories, and material thereunto belonging, and all laboratories and steam and other plants used as auxiliaries thereto; the Fixed Nitrogen Research Laboratory; the Waco limestone quarry in Alabama; and Dam No. 2, located in the Tennessee River at Muscle Shoals, its powerhouse, and all of its hydroelectric and operating appurtenances (except the locks), and all machinery, lands, and buildings in connection therewith, are hereby transferred to the commission for use by it in executing the functions vested in it by this act.

"FUNCTIONS OF COMMISSION

"(See secs. 4 (i and j), 5 (d) of TVA Act)

"SEC. 3. In carrying out the provisions of this act all functions vested in the President by the first two paragraphs of section 124 of the act entitled 'An act for making further and more effectual provisions for the national defense, and for other purposes,' approved June 3, 1916 (including such of those functions as are now being exercised by the Secretary of War and the Secretary of Agriculture, respectively), shall be exercised by the commission.

"DEVELOPMENT OF POWER

"(See secs. 10, 11, 12 of TVA Act)

"SEC. 4. (a) The commission is authorized and directed to utilize to the fullest extent the plants and facilities made available to it under sections 2 and 3, and to construct, maintain, and operate such additional plants

and facilities as it considers necessary, for the development of power by steam or water, at Muscle Shoals, for the purposes specified in section 5. Any excess power developed may be disposed of, under such terms and conditions as the commission may prescribe, as hereinafter provided.

"(b) In the disposition of such excess power the commission may give preference to the power requirements of States and political subdivisions of States, including municipalities, and thereafter dispose of the remainder to farmers, manufacturers, and all other users or distributors of current, whether individuals, partnerships, associations, or corporations, in territory within economical transmission distance from Muscle Shoals, equitably and without discrimination, and without reference to State lines, and at rates fair and reasonable and as low as practicable. The commission is authorized and directed to make classifications and shall serve all customers in the same class at like rates and under same conditions of service, and no locality or section shall be favored over any other locality or section. Should the commission sell a portion of such power to a public utility company for distribution, it shall have the power and it is hereby directed to regulate by provisions in the contract the prices to be charged by such utility company in the resale of such power to consumers. In fixing a basis of rates the commission shall consider (1) the cost of operation; (2) the cost of repairs and replacements; (3) the actual value of the steam plant; and (4) the cost of the plant at Dam No. 2 expended after the World War, less the reasonable cost of the navigation facilities of the enterprise, and the current used in the manufacture of fertilizers. After fixing the aggregate of these costs and expenditures the commission shall fix rates so as to bring in income not in excess of 4 percent per annum.

"(c) In order to dispose of such power in the manner which the commission considers most advantageous to the United States and to the public interest, the commission may enter into leases for terms of years not exceeding 10, may make contracts, may construct and/or operate either singly or with any State or political subdivision thereof, or any individual, partnership, association, or corporation, transmission lines, or other power projects, and do all other acts which it considers necessary to effectuate the purposes of this act. Any of such power shall be subject to recall when and as needed for the production of fertilizer or ingredients to be used for fertilizer; but such recall of such power shall be made in a fair and just manner, looking to just rights of all users.

"PRODUCTION OF FERTILIZER

"(See sec. 5 of TVA Act)

"SEC. 5. (a) In order to further develop the art of nitrogen fixation, experiments shall be undertaken to produce mixed fertilizers on a commercial scale, so that the actual cost of such fertilizers may be determined. Fertilizers produced as a result of such experiments shall be offered to farmers, farm organizations, and to dealers at such prices as will cover the cost of production; or, in the event that the cost of production of such fertilizers is excessive, they shall be offered at prices which the commission finds fair in order to meet commercial competition. In order that definite results may be obtained in such experiments, the facilities and equipment for each such experiment shall be utilized until it is satisfactorily shown that it is or is not commercially feasible to produce fertilizers by the method or process used in such experiment. The result of each such experiment and a statement of cost and sale prices of the fertilizers so produced shall be reported to Congress in the annual report provided for in section 9.

"(b) Whenever the commission determines that it is commercially feasible to produce any such fertilizers, it shall be produced in the largest quantities practicable, and shall be disposed of at the lowest prices practicable, to meet the agricultural demands therefor, and to effectuate the purposes of this act.

"(c) The commission is authorized to make alterations, modifications, or improvements in existing plants and facilities, to dispose of any part of such facilities, and to construct and operate new plants and facilities in order to properly effectuate the provisions of this section.

"(d) Should processes for the economical production of nitrogen be developed by the commission, the use of such processes may be transferred to other manufacturers of fertilizer or fertilizer ingredients on condition that the transferee shall agree to resell fertilizers at rates to be regulated by the commission so that no more than a reasonable profit shall be exacted: *Provided,* That the commission shall not have power by the transfer of such processes to regulate rates so as to form a monopoly, but such regulation shall at all times keep in view commercial competition.

"MUSCLE SHOALS FUND

"(See sec. 26 of TVA Act)

"SEC. 6. There is hereby established in the Treasury a fund to be known as the 'Muscle Shoals Fund,' and all amounts received by the commission in executing the functions vested in it by this act, together with all amounts appropriated or made available by section 7, shall be covered into such fund, and are reserved, set aside, and appropriated to be available for use by the Congress in building Dam No. 3 as provided in this act and by the commission in accordance with the provisions of this act.

"APPROPRIATIONS

"(See sec. 27 of TVA Act)

"SEC. 7. All unexpended balances of the amount appropriated under section 124 of the act entitled 'An act for making further and more effectual provision for the national defense, and for other purposes,' approved June 3, 1916, and all unexpended balances of appropriations made for Muscle Shoals under any act making appropriations for the military and nonmilitary activities of the War Department are hereby transferred to the Muscle Shoals fund and made available for expenditure as are other amounts in such fund.

"(b) There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $5,000,000, to be available until expended for the purposes of this act.

"CORPORATION

"SEC. 8. That said commission is hereby incorporated under and by the name, style, and title of the 'Muscle Shoals Commission' (herein referred to as the commission). Said corporation shall exist until the Congress shall repeal this provision of the act. Said corporation shall have power—

"(See sec. 4 of TVA Act)

"(1) To adopt, use, and alter a corporate seal;

"(2) To sue and be sued and to complain and to defend in any court of law and equity within the United States;

"(3) To make and enforce such contracts as may be necessary to carry out the provisions of this act;

"(See sec. 3 of TVA Act)

"(4) To appoint and fix the salaries of such advisers and experts and, in accordance with the civil-service laws, appoint and, in accordance with the Classification Act of 1923, fix the compensation of such other officers and employees and make such expenditures, including expenditures for rent and personal services at the seat of government and elsewhere, for law books, periodicals, and books of reference, and for printing and binding, as may be necessary, for the execution of the functions vested in the commission and as may be provided for by the Congress from time to time.

"(See secs. 4 and 18 of TVA Act)

"(5) To prescribe, amend, and repeal by-laws not inconsistent with this act for the conduct of its business;

"(6) In the name of the United States Government to exercise the right of eminent domain, and in the purchase of any real estate or in the acquisition of real estate by condemnation proceedings the title to such real estate shall be taken in the name of the United States Government;

"(7) To exercise all the rights, powers, and privileges conferred upon it by this act, and such additional powers as may be necessary to carry out the provisions of this act;

"(See secs. 5 (1), 17, and 19 of TVA Act)

"(8) To purchase, lease, or otherwise acquire United States or foreign patents and processes or the right to use such patents or processes, and to obtain from the United States or foreign countries patents for discoveries or inventions of its officers or employees; and

"(9) The commission shall, to the extent deemed advisable by it, exercise its functions by and through the Department of War and the Department of Agriculture, and the engineering, technical, clerical, and other personnel of such Departments. The Secretary of War and the Secretary of Agriculture shall detail for service with the commission such of the personnel of their respective departments as the commission deems necessary in carrying out the provisions of this act.

"(10) All of the stock in said corporation shall be in the name of the United States and shall be voted by the commissioners in equal amounts.

"(11) The board of directors shall be the members of the commission above named.

"ANNUAL REPORT AND REGULATIONS

"(See sec. 9 (a) of TVA Act)

"SEC. 9. (a) The commission shall submit to Congress at the beginning of each regular session a detailed report of its operations for the preceding fiscal year.

"(See sec. 4 (g) of TVA Act)

"(b) The commission is authorized to make such regulations as may be necessary to effectuate the functions vested in it by this act.

"PROVISION FOR NATIONAL DEFENSE

"(See sec. 20 of TVA Act)

"SEC. 10. The commission shall utilize the plants and facilities under its jurisdiction and shall dispose of the power developed under authority of section 5 in such manner and subject to the limitation that in the event of a national emergency such plants and facilities and such power shall be immediately available for use by the United States for national defense.

"DAM NO. 3

"SEC. 11. The Secretary of War is hereby authorized and directed to complete the construction of dam No. 3 in the Tennessee River at Muscle Shoals, Ala., in accordance with report submitted in House Document 1262, Sixty-fourth Congress, first session: *Provided,* That the Secretary of War may in his discretion make such modifications in the plants presented in such report as he may deem advisable in the interest of power or navigation, and such sums as may be

necessary for the construction of dam No. 3 are hereby authorized to be appropriated out of the funds, when available, arising under sections 6 and 7 of this act."

Continuing with excerpts from the joint committee's report:

"When President Franklin D. Roosevelt came into office the idea of unified management of the river was well developed but was opposed by the idea that power ought not to be sold in competition with private interests. Numerous unsuccessful efforts had been made on the one hand to find a way of turning the plants over to private operation and on the other to operate them as part of a general river program. President Roosevelt took the side of public operation * * *.

"On April 10, 1933, in a brief message to Congress President Roosevelt said:

" 'It is clear that the Muscle Shoals development is but a small part of the potential public usefulness of the entire Tennessee River. Such use, if envisioned in its entirety, transcends mere power development; it enters the wide fields of flood control, soil erosion, afforestation, elimination from agricultural use of marginal lands, and distribution and diversification of industry. In short, this power development of war days leads logically to national planning for a complete river watershed involving many States and the future lives and welfare of millions. It touches and gives life to all forms of human concerns.

" 'I, therefore, suggest to the Congress legislation to create a Tennessee Valley Authority—a corporation clothed with the power of Government but possessed of the flexibility and initiative of a private enterprise. It should be charged with the broadest duty of planning for the proper use, conservation, and development of the natural resources of the Tennessee River drainage basin and its adjoining territory for the general social and economic welfare of the Nation. This authority should also be clothed with the necessary power to carry these plans into effect. Its duty should be the rehabilitation of the Muscle Shoals development and the coordination of it with the wider plan.'

"The Tennessee Valley Authority Act, therefore, was an outgrowth of many previous attempts to deal with Muscle Shoals, as well as a development of long-standing public policies in regard to navigation and flood control. The main feature of the act was the combination of all the governmental interests connected with the river, and the creation of a regional agency based on local, State, and Federal cooperation, to drive all these interests in a single team for the general benefit of the region and of the Nation."

FORMATION OF THE TENNESSEE VALLEY AUTHORITY ACT

April 11, 1933, the day following the President's message, bills were introduced to accomplish the purpose therein stated.

Senator Norris introduced S. 1272, which was reported immediately, with minor amendments, from the Senate Committee on Agriculture and Forestry.

In the House, identical bills were introduced by Mr. McSwain, Mr. Almon, and Mr. Hill, which were all referred to the House Committee on Military Affairs. The bill of Mr. Hill, H. R. 5081, with certain amendments, was reported out.

The difference between the reported bills was stated by Mr. Hill on the floor of the House on April 22, 1933, as follows:

"As the Norris bill now stands, it has none of these business elements that I have been talking about. There is nothing in the Norris bill today that would cause the Authority to amortize out the cost of any dam. There is nothing in that bill that would cause the Authority to pay any interest to the Government for any money that might be used in the construction of a dam. This bill is on a much better business basis."

Mr. McSwain, chairman of the House committee, also stated on April 24, 1933:

"Why, I have introduced at this session of Congress two bills on Muscle Shoals. On the 9th of March I introduced the first bill that proposed to call the corporation that should be created the Tennessee Valley Authority. I set up in that bill my individual views about how this project should be developed.

"Then, after we had conferred with the President, I introduced another bill, which was H. R. 4559, identical with the bill introduced by the gentleman from Alabama [Mr. Almon] and the gentleman from Alabama [Mr. Hill]. These bills represented in principle, along with Senator Norris' bill, not identical as to words, the views of the President of the United States.

"It is not improper for me to say that when my friend, Mr. Norris, and I conferred with the President he said to us, 'You gentlemen draw the bills that you think represent our collective views that we have been expressing here'; and it was never understood or contemplated that the bill that would be introduced by myself or Mr. Hill and Mr. Almon on this end of the Capitol would be identical in every particular respect with the bill to be introduced by Senator Norris."

There were various substitutions of sections and parts of sections between the Senate and the House, and finally the bill that passed bore the number of H. R. 5081, introduced by Mr. HILL; S. 1272, introduced by Senator Norris, having been indefinitely postponed.

The Tennessee Valley Authority was thus created by the approval of H. R. 5081 on May 18, 1933 (Public, No. 17, 73d Cong.). All that was needed to start the operation and begin the construction of the contemplated dams in the development of the Tennessee River were the appropriations.

MEMBERSHIP OF SENATOR M'KELLAR ON SENATE APPROPRIATIONS COMMITTEE

The record shows that Senator MCKELLAR took a leading part in securing the necessary appropriations for the Tennessee Valley Authority in order to construct the many dams and install the needed facilities.

Senator MCKELLAR was first appointed to the Senate Appropriations Committee on December 10, 1923, at the beginning of the Sixty-eighth Congress and just 3 months after Calvin Coolidge became President on the death of Warren G. Harding. The members of the committee at that time were Francis E. Warren, Wyoming; Reed Smoot, Utah; Wesley L. Jones, Washington; Charles Curtis, Kansas; Frederick Hale, Maine; Selden P. Spencer, Missouri; Lawrence C. Phipps, Colorado; William B. McKinley, Illinois; Irvine L. Lenroot, Wisconsin; Henry W. Keyes, New Hampshire; Lee S. Overman, North Carolina; William J. Harris, Georgia; Carter Glass, Virginia; Andrieus A. Jones, New Mexico; Kenneth McKellar, Tennessee; Edwin S. Broussard, Louisiana; Thomas F. Bayard, Delaware; M. M. Neely, Virginia.

By the Seventy-second Congress, under the Hoover administration, Senator MCKELLAR had advanced to second on the minority side of the committee.

In the Seventy-third Congress, under the Roosevelt administration, Senator MCKELLAR was second only to Chairman Carter Glass, of Virginia, on the committee.

In the Seventy-eighth Congress, during the absence of Chairman Glass, Senator MCKELLAR has taken a leading part as acting chairman of the committee.

HISTORY OF APPROPRIATIONS FOR TENNESSEE VALLEY AUTHORITY

The act creating the Tennessee Valley Authority (Public, No. 17, 73d Cong.), approved May 18, 1933, provided in section 27:

"All appropriations necessary to carry out the provisions of this act are hereby authorized."

APPROPRIATIONS FOR FISCAL YEAR 1934

Fifty million dollars was allocated to the Tennessee Valley Authority from the appropriation for National Industrial Recovery Administration of $3,300,000,000 carried in the Fourth Deficiency Appropriation Act, approved June 16, 1933 (Public, No. 77, 73d Cong.).

APPROPRIATIONS FOR FISCAL YEAR 1935

Twenty-five million dollars was allocated to the Tennessee Valley Authority from the appropriation to carry out a number of acts, including the Tennessee Valley Authority Act, of $899,675,000 carried in the Emergency Appropriation Act, fiscal year 1935, approved June 19, 1934 (Public, No. 412, 73d Cong.)

APPROPRIATIONS FOR FISCAL YEAR 1936

Thirty-six million dollars was the amount of the first direct appropriation for the Tennessee Valley Authority, carried in the Second Deficiency Appropriation Act, fiscal year 1935, approved August 12, 1935 (Public, No. 260, 74th Cong.).

DETAILS AS TO SECURING FIRST DIRECT APPROPRIATION

The budget estimates for the independent offices appropriation bill, 1936, considered in connection with the Second Deficiency Act, 1935, contained an item of $300,000,000 for public works, of which $50,000,000 was proposed to be allocated to the Tennessee Valley Authority.

The bill as it passed the House made no reference to any dams to be constructed by the Tennessee Valley Authority.

Hearings began before the Subcommittee on Deficiencies of the Senate Appropriations Committee on June 24, 1935; those present being Senators Adams (chairman), McKellar, Hayden, Tydings, Hale, Keyes, and Dickinson. Two sessions of these hearings were devoted to the Tennessee Valley Authority.

Senator MCKELLAR proposed to the subcommittee the following amendment:

"*Provided*, That for the purposes of securing uninterrupted navigation on the Tennessee River from, at, or near Knoxville to the Ohio River and maximum flood control in the Tennessee, Ohio, and Mississippi River Basins and of otherwise carrying out the Tennessee Valley Authority Act of 1933, the Tennessee Valley Authority is authorized and directed, out of the funds herein and heretofore appropriated, to continue the construction of Norris Dam, Wheeler Dam, and Pickwick Dam, to begin a dam at or near Guntersville, Ala., a dam at Chickamauga Creek on the Tennessee River, and the Fowlers Bend Dam on the Hiwassee River, a dam at or near Aurora Landing, and at Whites Creek on the Tennessee River."

Senator MCKELLAR also stated:

"The purpose of this amendment is that, last year, when a similar appropriation was made, we were told by the head of the Tennessee Valley Authority, that these dams would be built. Senator Bailey, let me pass this down to you, if you will. We were told that these four dams were to be built. Only one has been started, and we think that the Congress ought to direct that the money be used for the purpose of building dams."

Statements were also made in these hearings by Senators Bailey and Reynolds, of North Carolina, and Congressman Weaver, of North Carolina.

Three days later, June 27, 1935, Senator BARKLEY also appeared as a witness in favor of the appropriation, particularly as to Aurora Landing.

Senator Adams, chairman of the subcommittee, read from a lengthy letter he had received from Arthur E. Morgan, chairman of the board of the Tennessee Valley Authority, stating that Aurora should be investigated first to determine whether the building of another dam might make Aurora unnecessary, and similar reasons on the other dams, and requesting a moderate appropriation to

build approach roads to the Hiwassee Dam so the equipment at Norris Dam could be transferred to there instead of being dismantled. (The complete letter is in the hearings at pp. 88 to 90.)

Senator McKELLAR replied:

"That just illustrates our friend, Dr. Morgan. Last Saturday he agreed with me on every word in this resolution except—wait a minute, let me show you what he afterward put in—except this—

" 'And maximum flood control in the Tennessee, Ohio, and Mississippi River Basins, and of otherwise carrying out the Tennessee Valley Authority Act of 1933.'

"Those were sent to me, Monday, and inserted in this resolution.

"The remainder of the resolution, as to the five dams, were absolutely agreed upon by Dr. Morgan and me, on last Saturday, and at his earnest request; and I say that his change of mind is just indicative of what has happened before; and the only way we will get these dams built is for the Congress to direct them to be built."

The amendment, as included in the bill by the Senate subcommittee, approved by the full committee and the Senate, and finally enacted into law, was as follows:

"The continued construction of Norris Dam, Wheeler Dam, Pickwick Landing Dam, and the beginning of construction on a dam at or near Guntersville, Ala., and a dam at or near Chickamauga Creek, both on the Tennessee River, and a dam on the Hiwassee River, a tributary of the Tennessee River, at or near Fowlers Bend, and the continuation of preliminary investigations as to the location and desirability of a dam at or near Aurora Landing, a dam at or near Whites Creek."

APPROPRIATIONS FOR FISCAL YEAR 1937

The budget estimates for the independent offices appropriation bill, 1937, considered in connection with the first deficiency bill, 1936, contained an item of $43,000,000 for the Tennessee Valley Authority, and the following as to the dams: "including the continued construction of Norris Dam, Wheeler Dam, Pickwick Landing Dam, and the beginning and continuation of construction on a dam at or near Guntersville, Ala., and a dam at or near Chickamauga Creek, and a dam at or near Whites Creek, all on the Tennessee River, and a dam on the Hiwassee River, a tributary of the Tennessee River, at or near Fowlers Bend, and the continuation of preliminary investigations as to the location and desirability of a dam at or near Aurora Landing and a dam at or near Coulter Shoals."

The Deficiencies Subcommittee of the Senate Appropriations Committee added the following amendment, which was approved by the full committee and the Senate but was lost in conference: "the construction of a dam at or near Gilbertsville, Ky., and a dam at or near Watts Bar."

The amendment was the result of two identical amendments offered by Senator McKELLAR and Senator BARKLEY requesting $1,000,000 additional for each of these dams, necessary to complete navigation.

Thirty-nine million nine hundred thousand dollars was the amount finally approved in the First Deficiency Appropriation Act, fiscal year 1936, approved June 22, 1936 (Public, No. 739, 74th Cong.).

APPROPRIATIONS FOR FISCAL YEAR 1938

The budget estimates for the independent offices appropriation bill, 1938, considered in connection with the Second Deficiency Act, 1937, contained an item of $43,000,000 for the Tennessee Valley Authority, and the following as to the dams: "including the continued construction of Pickwick Landing Dam, Guntersville Dam, Chickamauga Dam, and Hiwassee Dam, and the continuation of preliminary investigations as to the appropriate location and type of dams on the Tennessee River and its tributaries."

During the hearings before the Subcommittee on Deficiencies of the Senate Appropriations Committee, on May 3, 1937, Senator McKELLAR stated as follows during the testimony of Dr. Arthur E. Morgan, of the Tennessee Valley Authority:

"Senator McKELLAR. It is my purpose to offer this amendment, and I want to get your views about it. On page 8, strike out the words in lines 8, 9, and 10: 'and the continuation of preliminary investigations as to the appropriate location and type of a dam on the lower Tennessee River,' and insert in lieu thereof the following: 'and for construction of a dam at or near Gilbertsville, Ky., and a dam at or near Watts Bar, Tenn., and for a preliminary investigation of a dam at or near Coulter's site on the Tennessee River, Tenn.'

"What have you to say in reference to that amendment?

"Dr. MORGAN. I would like to make an additional change by adding the words: 'and such other investigations on the upper Tennessee River and its tributaries as are essential to the development of a unified river-control system.'

"There is certain planning necessary, and it is very essential that before we finish these dams that we know how they fit into others—what is the relationship that is going to be. If we could get cheaper storage at some other site, we will cut down the total cost by adequate planning."

Dr. Morgan described Gilbertsville as the largest proposed unified river-control project, and stated in answer to questions that 4 years and five or six million dollars had been spent on planning investigations.

"Senator HALE. But what I want to know is whether you have definitely decided that you are going ahead at Gilbertsville, because this amendment of Senator McKELLAR's provides for starting construction, and also at Watts Bar.

"Dr. MORGAN. We are satisfied that the Gilbertsville Dam is an essential, profitable, and proper element of our construction. It is for Congress to tell us whether we are going ahead with it.

"Senator HALE. This amendment of Senator McKELLAR's does tell you to go ahead. So it is a very important amendment to be put in."

Dr. Morgan stated the budget had cut the amount asked for from $2,750,000 to $750,000.

Senator BARKLEY also appeared as a witness and testified extensively on the amendment.

The subcommittee inserted the following amendment, which was approved by the full committee, passed by the Senate, and enacted into law: "and for the construction of a dam at or near Gilbertsville, Ky., and for preliminary investigations of sites for dams at or near Watts Bar and at or near Coulter's site on the Tennessee River, Tenn."

The vote in the full committee on May 10, 1937, relative to the amendment on Gilbertsville Dam was 9 to 8, as follows:

Ayes, 9: McKellar, Hayden, Russell, McCarran, Overton, O'Mahoney, Duffy, Hitchcock, Nye.

Nays, 8: Glass, Copeland, Byrnes, Adams, Green, Hale, Steiwer, Townsend.

Forty million one hundred and sixty-six thousand two hundred and seventy dollars was the amount carried for the Tennessee Valley Authority in the Second Deficiency Appropriation Act, fiscal year 1937, approved May 28, 1937 (Public, No. 121, 75th Cong.).

APPROPRIATIONS FOR FISCAL YEAR 1939

The budget estimates for the Tennessee Valley Authority in the independent offices appropriation bill for 1939 were in the amount of $40,000,000, and contained the following as to the dams: "including the continued construction of Pickwick Landing Dam, Guntersville Dam, Chickamauga Dam, and Hiwassee Dam, and for construction of a dam at or near Gilbertsville Ky., and for preliminary investigations of sites for dams at or near Watts Bar and at or near (Coulter's site) Coulter Shoals."

The House committee reduced the amount of the appropriation to $37,237,000, stating in its report as follows:

"Gilbertsville Dam: The committee has applied $2,613,000 of the cut to the Gilbertsville Dam, for which there was alloted $2,898,000, of which $185,000 was set up for 'project investigations', the remainder being for construction on the dam and various other items incident to such construction. The committee has eliminated all items incident to construction."

On the floor of the House, Mr. WIGGLESWORTH was successful in striking from the bill "and for the construction of a dam at or near Gilbertsville, Ky."

The subcommittee of the Senate Committee on Appropriations restored this language, which was approved by the full committee and by the Senate and was finally enacted into law.

During the debate on the floor of the Senate on February 25, 1938, Senator McKELLAR stated:

"Mr. President, I have only a few words to say regarding the pending amendment, which has to do with the Gilbertsville Dam. This same question was thoroughly discussed last year. In fact, this is the same fight that we had last year. Substantially the same arguments were then made; and the Senate, by a large majority, held that the Gilbertsville Dam should be built. Much money has already been spent, and to postpone the beginning of construction until next year would simply cost the Government more. While postponement is argued for, that is not the ultimate purpose. The purpose is to kill the project. The project ought to go on. * * *

"The effect of building the dams has already been to reduce power rates in that entire region. In north Alabama, Tennessee, and even in Arkansas, power rates have been reduced by the use of Tennessee Valley Authority power. The Tennessee Valley Authority has recommended building this dam. It has fixed the site, and $2,600,000 will be required to begin the dam; and that is all that is provided for by the amendment to the pending bill."

Forty million dollars was the amount carried for the Tennessee Valley Authority in the Independent Offices Appropriation Act for 1939, approved May 23, 1938 (Public, No. 534, 75th Cong.).

APPROPRIATIONS FOR FISCAL YEAR 1940

The budget estimates for the Tennessee Valley Authority in the independent offices appropriation bill for 1940 were in the amount of $40,000,000 and contained the following as to the dams: "Including the continued construction of Pickwick Landing Dam, Guntersville Dam, Chickamauga Dam, Hiwassee Dam, Gilbertsville Dam, and for the construction of a dam at or near Watts Bar on the Tennessee River and for preliminary investigations of sites for dams at or near Coulter Shoals on the Tennessee River, and on tributaries of said river."

Details as to the close fight on Gilbertsville, Watts Bar, and Coulter Shoals Dams

The bill as reported to the House provided for the continued construction of "Gilbertsville Dam, and for construction of a dam at or near Watts Bar on the Tennessee River, Tenn., and for preliminary investigations of a site for a dam at or near Coulter Shoals on the Tennessee River, Tenn."

Mr. Faddis, of Pennsylvania, on the floor of the House, was successful in having this language stricken from the bill, so that as it came to the Senate the bill made no reference to the Gilbertsville or Watts Bar Dams.

Senator McKELLAR offered an amendment in the subcommittee of the Senate Committee on Appropriations to restore this language, which was approved after a close fight

by the full committee, approved by the Senate, and enacted into law.

In the meeting of the full committee on Thursday, February 16, 1939, of the Senate Committee on Appropriations, the chairman of the Deficiencies Subcommittee, Senator Adams, moved to strike out the Watts Bar Dam item, which was at first carried by a vote of 11 to 10, as follows:

Yeas, 11: Byrnes, Tydings, Adams, Maloney, Hale, Townsend, Bridges, Lodge, Holman, Taft, chairman.

Nays, 10: McKellar, Hayden, Thomas, Russell, McCarran, Overton, Bankhead, O'Mahoney, Truman, Green.

Senator McKellar, after talking with Senator Nye, voted him against the motion of Senator Adams, creating a tie vote, and the committee adjourned to meet the next day.

When the committee met on Friday, February 17, 1939, Senator Adams asked that the amendment be divided into three parts: Gilbertsville, Watts Bar, and preliminary investigations of site at or near Coulter Shoals.

Gilbertsville was approved by a vote of 18 to 6, as follows:

Yeas, 18: Glass, McKellar, Hayden, Thomas, Byrnes, Russell, Adams, McCarran, Overton, Bankhead, O'Mahoney, Truman, Burke, Green, Maloney, Chavez, Nye, Holman.

Nays, 6: Tydings, Hale, Townsend, Bridges, Lodge, Taft.

Watts Bar was adopted by a vote of 13 to 11, as follows:

Yeas, 13: McKellar, Hayden, Thomas, Russell, McCarran, Overton, Bankhead, O'Mahoney, Truman, Green, Chavez, Nye, Holman.

Nays, 11: Glass, Byrnes, Tydings, Adams, Burke, Maloney, Hale, Townsend, Bridges, Lodge, Taft.

Coulter Shoals was thereupon approved by a voice vote.

On the floor of the Senate, during the debate on the committee amendment and increasing the amount of the total appropriation for Tennessee Valley Authority from $21,797,000 to $39,003,000, Senator Adams again sought to defeat the amendment, as follows:

"Senator ADAMS. Mr. President, I desire to submit an amendment to the amendment, to strike out the words beginning on line 5, after the word 'Gilbertsville', down to and including the words 'Watts Bar' on line 6, the language being 'and for the construction of a dam at or near 'Watts Bar.'

"Mr. President, this represents a point of issue which was discussed at length in the Committee on Appropriations. It represents a very definite issue which I wish to have submitted to the Senate.

"When the relief bill was before the Senate those of us who were arguing for a reduction in the amount to be appropriated were told that we should not begin economies with relief; that there were other places. There is now presented what some of us think a very good place, which is not subject to the objections which were made in reference to the relief bill.

"The Tennessee Valley Authority now has in the process of construction the dams on the list which appears in the pending bill on lines 3 and 4, page 48, which includes the Pickwick Landing Dam, the Guntersville Dam, the Chickamauga Dam, the Hiwassee Dam, and the Gilbertsville Dam. The item which I have asked to have stricken out is the authorization for the construction of a new dam.

"In considering the item the committee divided, 13 to 11, and then only after most persuasive and effective efforts by the senior Senator from Tennessee [Mr. MCKELLAR] who is sometimes down but is never out. Twice during the committee's deliberations the Senator from Tennessee lost, but he always came back with another vote. The result was that our efforts to strike out this authorization for a new dam were defeated by a vote of 13 to 11, representing the vote of every Senator on the committee.

"The votes of the 11 members of the committee whose views I am seeking to express were in accord with the vote in the House of Representatives. The House eliminated both the Gilbertsville Dam and the Watts Bar Dam. The motion which I have made is merely to eliminate the authorization for the construction of a new dam upon which work is not now being done, and it does seem that if we authorize the construction of the Gilbertsville Dam in addition to four other dams now being constructed, we are being extremely liberal.

"Mr. President, the Tennessee Valley Authority has already spent over $220,000,000. The completion of the plans of the engineers of the Tennessee Valley Authority will involve the expenditure of $560,000,000, and it does seem that at least we might be a little less impatient, that we might wait a little longer, and not crowd construction of a new dam while we have under construction four great dams involving expenditure of $200,000,000.

"The Gilbertsville Dam will involve a cost of $95,000,000 without the installation of power facilities. With the installation of power facilities the cost will run substantially over $100,000,000. These Senators who have been here during the past few sessions know that the construction of the Gilbertsville Dam was authorized after vigorous battles, and I think I am not exaggerating when I say that it was only the persuasiveness of two great Senators from two great States, and the personal affections of many Senators, that secured the authorization of the Gilbertsville Dam."

After lengthy debate, during which Senator MCKELLAR defended the Tennessee Valley Authority as having come through the recent investigation by a joint committee with a clean bill of health, the amendment offered by Senator Adams was rejected, 49 to 31.

Thirty-nine million three thousand dollars was the amount carried for the Tennessee Valley Authority in the Independent Offices Appropriation Act for 1940, approved March 16, 1939 (Public, No. 8, 76th Cong.).

APPROPRIATIONS FOR FISCAL YEAR 1941

The budget estimates for the Tennessee Valley Authority in the independent offices appropriation bill for 1941 were in the amount of $40,000,000, and contained the following as to the dams: "including the continued construction of Chickamauga Dam, Hiwassee Dam, Kentucky Dam at Gilbertsville, Ky., Watts Bar Dam, and for construction of a dam near Lenoir City, Tenn."

This language remained in the bill as it passed the House, and continued on through passage in the Senate and enactment into law. In the meeting of the full committee of Senate Appropriations Committee on January 31, 1940, Senator TAFT sought to strike out "and for construction of a dam near Lenoir City, Tenn," but the motion was lost on a voice vote.

Forty million dollars was the amount carried for the Tennessee Valley Authority in the Independent Offices Appropriation Act for 1941, approved April 18, 1940 (Public, No. 459, 76th Cong.).

Supplemental estimate; Public Resolution 95

Based on the supplemental estimates in Senate Document 241 (76th Cong., 3d sess.), identical resolutions were introduced by Senator MCKELLAR (S. J. Res. 285) and Congressman TAYLOR (H. J. Res. 583), providing for $25,000,000 for the Tennessee Valley Authority and stating: "including the funds necessary to begin construction of a dam on the Holston River near Jefferson City, Tenn.; to begin installation of two additional electric generating units at Wilson Dam, Ala., and one additional electric generating unit at Pickwick Landing Dam, Tenn.; and to begin construction of steam electric generating facilities with a rated capacity of approximately 120,000 kilowatts in the area served by the Authority."

The resolution was not changed as it came from the House.

At the meeting of the full committee of Senate Appropriations Committee on July 11, 1940, Senator Adams moved to strike out the references to construction of additional dam and hydroelectric facilities but to provide steam electric generating facilities to produce 220,000 kilowatts in lieu of approximately 120,000 referred to in the resolution. The motion was lost by a vote of 7 to 6, as follows:

Yeas, 6: Hale, Lodge, Adams, Taft, Bridges, Townsend.

Nays, 7: McKellar, Hayden, Thomas, Overton, O'Mahoney, Chavez, Holman.

Senator MCKELLAR spoke at length on the resolution on the floor of the Senate.

Twenty-five million dollars was the amount provided for the Tennessee Valley Authority by the resolution, approved July 31, 1940 (Public Resolution 95, 76th Cong.).

APPROPRIATIONS FOR FISCAL YEAR 1942

The budget estimates for the Tennessee Valley Authority in the independent offices appropriation bill for 1942 were in the amount of $60,800,000, and contained the following as to the dams: "including continued construction of Kentucky Dam at Gilbertsville, Ky.; Watts Bar Dam and steam plant; Fort Loudoun Dam; and Cherokee Dam." A supplemental estimate contained in Senate Document 11 was for $10,000,000 to expedite the work on the Fort Loudoun Dam.

On the Watts Bar and steam plant item, Senator MCKELLAR at the meeting of the full committee of Senate Appropriations Committee on February 24, 1941, moved to add: "including additional steam-electric generating facilities with a rated capacity of approximately 60,000 kilowatts," which was adopted by a show of hands, 9 to 4.

On the Fort Loudoun Dam item, the amendment adding $10,000,000 for expediting work on the dam was agreed to by a show of hands, 11 to 3.

Seventy-nine million eight hundred thousand dollars was the amount provided for the Tennessee Valley Authority by the Independent Offices Appropriation Act, 1942, approved April 5, 1941 (Public, No. 28, 77th Cong.).

Additional appropriation in Public, No. 179

Supplemental estimates were made for Tennessee Valley Authority in House Document 230 (77th Cong., 1st sess.) in the amount of $40,000,000, and stated as to the dams: "beginning construction of two additional hydroelectric projects and two additional storage projects on the Hiwassee River and its tributaries, (2) installing additional electric generating units in existing hydroelectric projects owned by the Authority, and (3) building the transmission facilities needed to connect these projects and units to the existing transmission system of the Authority and to deliver the power produced by these projects and units to the market."

No change was made in this provision for additional appropriation by the Senate.

Forty million dollars was the amount provided for the Tennessee Valley Authority by House Joint Resolution 194, as introduced by Mr. Taylor in the House, approved July 16, 1941 (Public, No. 179, 77th Cong.).

Third supplemental national defense appropriation

Supplemental estimates were made in House Document 376 (77th Cong., 1st sess.) for the Tennessee Valley Authority and were included in the third supplemental national defense bill, 1942, in the amount of $40,000,000, and stated as to the dams: "(1) beginning construction of hydroelectric projects on the Little Tennessee River near Fontana, N. C., and on the French Broad River near Dandridge, Tenn.; (2) installing additional electric generating units with a total rated

capacity of approximately 324,000 kilowatts in existing hydroelectric projects owned by the Authority; (3) installing an additional steam electric generating unit with a rated capacity of approximately 60,000 kilowatts in the Watts Bar steam plant."

As the bill came from the House, the Douglas Dam was eliminated and the amount reduced to $25,000,000. The Senate did not change this item, and the final language read: "(1) beginning construction of a hydroelectric project on the Little Tennessee River near Fontana, N. C."

A new section was added by Senator McKELLAR in the subcommittee of the Senate Committee on Appropriations, first calling for $24,000,000 and later being reduced in conference to $22,000,000; stating as finally enacted: "(1) for a site on the south fork of the Holston River near Bristol, Tenn., as recommended by the Tennessee Valley Authority July 7, 1941, with an installed capacity of 75,000 kilowatts, $10,000,000; (2) for building a dam on the Watauga River east of Elizabethton, Tenn., as recommended by the Tennessee Valley Authority July 7, 1941, with an installed capacity of 60,000 kilowatts, $10,000,000; (3) for the completion of the uncompleted unit of the steam plant at or near Sheffield, Ala., $2,000,000; in all, $22,000,000."

During the hearings before the subcommittee of the Senate Committee on Appropriations on December 9, 1941, Congressman B. Carroll Reece, Republican from Tennessee, made a statement as to the need for the Watauga Dam, and also stated as to the interest of Senator McKELLAR in the Tennessee Valley Authority (p. 186 of the hearings):

"Mr. REECE. I have been familiar with the development of the Tennessee Valley Authority since its inception and I am familiar with the circumstances that resulted in its inception, and I do not see how anyone who is familiar with the facts can for one moment question Senator McKELLAR'S profound interest in the development of the Tennessee Valley area and the Tennessee Valley Authority, and because of the eight or nine dams now that are embraced in the Tennessee Valley Authority, as I recall the facts, all except three were authorized in the Senate upon Senator McKELLAR'S initiative, in the committee or on the floor of the Senate, and those of us in Tennessee and in the South who are interested in the Tennessee Valley Authority, and its continued development, have looked upon Senator McKELLAR as the greatest friend that the Tennessee Valley Authority has had, and now because of a difference of view on the part of Senator McKELLAR and some particular official in the Tennessee Valley Authority, I do not see how his interest in the Tennessee Valley Authority could possibly be questioned, because he has demonstrated his interest and friendship and usefulness in the development of this great project.

"Mr. McKELLAR. Mr. Reece, I will ask you if you recall whether or not it is a fact that after the Norris and Wheeler Dams were built, that the Tennessee Valley Authority made—and the Wilson Dam being already built, and those are the three that I suppose that you referred to, that after that the Tennessee Valley Authority did not ask the Budget Director for the building of any further dams; the Budget Director did not report to the House the building of any further dams; the President did not recommend the building of any further dams, and the dams that you speak of as having been initiated here in the Senate, were they not the Pickwick Dam, the Guntersville, Ala., Dam, the Chickamauga, Tenn., Dam, the Hiwassee Dam, the Watts Bar Dam, the North Loudoun Dam, and the Gilbertsville Dam in Kentucky? Is it not true that all of those seven dams were initiated here in the Senate?

"Mr. REECE. That is right.

"Senator McKELLAR. The House agreed to them in conference.

"Mr. REECE. And the people in Tennessee were looking to the Senator from Tennessee to save these projects for them when they were being agitated, and he performed.

"Senator McKELLAR. Of those seven dams, is it not true that the Pickwick Dam, the Guntersville, Ala., Dam, the Chickamauga Dam, and the Hiwassee Dam, four out of seven, are now furnishing in very large quantities the power for the making of aluminum in Tennessee?

"Mr. REECE. And except for them the Tennessee Valley Authority would have been in pretty bad shape."

Forty-seven million dollars was the amount provided for the Tennessee Valley Authority by the Third Supplemental National Defense Appropriation Act, 1942, approved December 17, 1941 (Public, No. 353, 77th Cong.).

Fourth supplemental national defense appropriation

Supplemental estimates were made in House Document 566 (77th Cong., 2d sess.) for the Tennessee Valley Authority and were included in the fourth supplemental national defense bill, 1942, in the amount of $30,000,000, and stated as to the dams: "(1) the construction of a hydroelectric project on the French Broad River near Dandridge, Tenn.; (2) the purchase or building of transmission facilities needed to connect this project to the existing transmission system of the Authority; and (3) the acquisition of land necessary for and the relocation of highways in connection with the accomplishment of the above project."

No change was made in this item in the Senate.

Thirty million dollars was the amount provided for the Tennessee Valley Authority by the Fourth Supplemental National Defense Appropriation Act, 1942, approved January 30, 1942 (Public, No. 422, 77th Cong.).

APPROPRIATIONS FOR FISCAL YEAR 1943

The budget estimates for the Tennessee Valley Authority in the independent offices appropriation bill for 1943 were in the amount of $136,100,000, and stated as to the dams: "including the continued construction of Kentucky Dam at Gilbertsville, Ky., Watts Bar Dam and steam plant; Fort Loudoun Dam (including an extension to bring the waters of the Little Tennessee River within the pool of this project); Cherokee Dam; Apalachia Dam; Ocoee Dam No. 3; Fontana Dam; a dam on the south fork of the Holston River; a dam on the Watauga River; and an additional unit at the Sheffield steam plant; and the beginning of construction immediately of a fertilizer and elemental phosphorus manufacturing plant at or near Mobile, Ala."

No change was made in this language in the Senate.

Senator McKELLAR did propose a committee amendment, however, to add $36,120,112 to the bill, being an amount equal to the estimated receipts of the Tennessee Valley Authority, and to strike from the bill the language putting such receipts into the fund known as the Tennessee Valley Authority fund, 1943. The bill passed the Senate with those changes, but in conference the Senate receded from the amendments.

One hundred thirty-six million one hundred thousand dollars was the amount provided for the Tennessee Valley Authority by the Independent Offices Appropriation Act, 1943, approved June 27, 1942 (Public Law 630, 77th Cong.).

APPROPRIATIONS FOR FISCAL YEARS 1944 AND 1945

The unexpended balances were the only appropriations made to the Tennessee Valley Authority in the Independent Offices Appropriation Act, 1944, and in the Independent Offices Appropriation Act, 1945.

Summary of amounts appropriated for Tennessee Valley Authority

Law	Name of act	Congress	Amount
Public No. 77	Fourth Deficiency	Seventy-third	$50,000,000
Public No. 412	Emergency	do	25,000,000
Public No. 260	Second Deficiency	Seventy-fourth	36,000,000
Public No. 739	First Deficiency	do	39,900,000
Public No. 121	Second Deficiency	Seventy-fifth	40,166,270
Public No. 534	Independent Offices	do	40,000,000
Public No. 8	do	Seventy-sixth	39,003,000
Public No. 459	do	do	40,000,000
Public Res. 95	Resolutions (S. J. 285; H. J. 583)	do	25,000,000
Public No. 28	Independent Offices	Seventy-seventh	79,800,000
Public No. 179	Resolution (H. J. Res. 194)	do	40,000,000
Public No. 353	Third Supplemental	do	47,000,000
Public No. 422	Fourth Supplemental	do	30,000,000
Public No. 630	Independent Offices	do	136,100,000
Public No. 90	do	Seventy-eighth	(1)
Public No. 358	do	do	(1)
Total			677,969,270

[1] Unexpended balance.

PAYMENTS IN LIEU OF TAXES MADE BY TENNESSEE VALLEY AUTHORITY TO LOCAL GOVERNMENTAL UNITS

The Tennessee Valley Authority Act as approved May 18, 1933, contained section 13 relating to payments in lieu of taxes, as follows:

"SEC. 13. Five percent of the gross proceeds received by the board for the sale of power generated at dam No. 2, or from any other hydro power plant hereafter constructed in the State of Alabama, shall be paid to the State of Alabama; and 5 percent of the gross proceeds from the sale of power generated at Cove Creek Dam, hereinafter provided for, or any other dam located in the State of Tennessee, shall be paid to the State of Tennessee. Upon the completion of said Cove Creek Dam the board shall ascertain how much additional power is thereby generated at dam No. 2 and at any other dam hereafter constructed by the Government of the United States on the Tennessee River, in the State of Alabama, or in the State of Tennessee, and from the gross proceeds of the sale of such additional power 2½ percent shall be paid to the State of Alabama and 2½ percent to the State of Tennessee. These percentages shall apply to any other dam that may hereafter be constructed and controlled and operated by the board on the Tennessee River or any of its tributaries, the main purpose of which is to control floodwaters and where the development of electric power is incidental to the operation of such flood-control dam. In ascertaining the gross proceeds from the sale of such power upon which a percentage is paid to the States of Alabama and Tennessee, the board shall not take into consideration the proceeds of any power sold or delivered to the Government of the United States, or any department or agency of the Government of the United States, used in the operation of any locks on the Tennessee

River or for any experimental purpose, or for the manufacture of fertilizer or any of the ingredients thereof, or for any other governmental purpose: *Provided*, That the percentages to be paid to the States of Alabama and Tennessee, as provided in this section, shall be subject to revision and change by the board, and any new percentages established by the board, when approved by the President, shall remain in effect until and unless again changed by the board with the approval of the President. No change of said percentage shall be made more often than once in 5 years, and no change shall be made without giving to the States of Alabama and Tennessee an opportunity to be heard."

In the Seventy-sixth Congress several bills were introduced in the House and Senate for the purpose of amending this section of the Tennessee Valley Authority Act. The House Committee on Military Affairs held a hearing on these bills beginning on January 23, 1940, at which the purposes of the proposed amendments were stated by William C. Fitts, Jr., general counsel and secretary of the Tennessee Valley Authority, as follows:

"Now the first question that might arise is, Why do we need any legislation, if we can change the percentages under that section? The reason is threefold. In the first place, while we could change the percentages, we could not change the States to which payments are to be made, because they are stated in the section and there is no power in the Authority to change them. The only power to change them is by Congress, and this section provides only for payments to Alabama and Tennessee, leaving out Kentucky, North Carolina, Mississippi, and Georgia, in which States there is the same problem, although not to as large a degree as in Tennessee."

Chairman MAY of the committee also stated the reason, in brief, as follows:

"At the time the original act containing section 13 which you just read there was enacted, it was not contemplated that the Authority would handle it otherwise than in the two States of Tennessee and Alabama. * * * Since then, of course, it has extended its operations into other States and it is necessary to repeal this section and write some other provision in, if we are to cover the whole field."

Mr. Fitts also explained the changes that had taken place in the generation of power through acquisition of steam plants and construction of dams, and cited acts making similar payments from other agencies of the Government.

One of these bills, S. 2925, passed the Senate on April 30, 1940, and was referred to the House Committee on Military Affairs, where no action was taken on it.

Senator MCKELLAR thereupon offered the proposal as an amendment to the Emergency Relief Appropriation Act, 1941, in the Senate Committee on Appropriations. The statements on the subject made during the hearings on May 30, 1940, are as follows:

Senator MCKELLAR stated:

"When the Tennessee Valley Authority took over or bought the power companies' interest in a very large area of Tennessee last year, in some of the counties the properties of the power companies constituted a very large proportion of the taxable property of the county. * * * Of course, under our system, the property, after the Tennessee Valley Authority bought it, is not taxable by the counties or by the State. In that situation, the Tennessee Valley Authority felt that they should pay to the counties their proportion of the taxes lost, and Senator Norris introduced a bill providing therefor and I have introduced the Norris amendment as an amendment to this bill. Take for instance, the county of Polk, as I remember, in Tennessee, 41 percent of all the taxable property in that county belonged to one of the power companies that sold out to Tennessee Valley Authority. That county will lose, after the 1st day of July, 41 percent * * * of its taxable values, and that will result in the closing of schools and very great injury to the county if those taxes are lost. * * * The Government does not pay a cent. These payments, in lieu of taxes, come from the revenues of the Tennessee Valley Authority.

"They agreed on the bill that passed the Senate, and the State and county authorities agreed on it, and Senator Norris introduced it and it was passed and it went to the House Military Affairs Committee, under a long-established rule that that committee has jurisdiction over navigable waters, streams, and the result was that the Military Affairs Committee, presided over by Mr. May, who seems to be a very great antagonist of the Tennessee Valley Authority—he comes from a coal district, but I have no doubt is sincere and honest in his antagonism to the Tennessee Valley Authority—but at all events his committee has had that bill ever since it passed the Senate, I think, since last January, and their first vote on it was 12 to 12, and, of course, the bill was not reported out. The other day the bill was brought up in the committee again and by a vote of 12 to 10 they declined to report it favorably. I am advised two members favoring the bill were absent.

"Now I have offered it as an amendment to this bill, because it not only affects my State but very seriously affects the State of Georgia—I think in Fannin County, Ga., the amount of taxable property taken out is more than 50 percent of the entire taxable property in the county, and that will close some of the schools, so the testimony in the House record shows.

"Under those circumstances, I have offered this bill introduced by Senator Norris, as it passed the Senate, as an amendment to this bill. I do not believe there can be any real objection to it in either the House or the Senate, but of course the House will have to pass on it if it is put on as an amendment to this bill."

On being questioned as to why it was put on as an amendment to the emergency relief bill, Senator MCKELLAR stated further:

"If ever relief was furnished to certain counties or certain people in certain counties, this is in that sense a relief bill, because it has been testified by the officials of these several counties in the House hearings * * * that their schools will close, and many other activities that they now have will be obliged to close unless this money is furnished. If the Senate puts it on, as I hope it will—I hope this committee will recommend it—it has to go to conference, of course, and may have to go to a separate vote in the House, but, under the circumstances, it seemed best to those of us who are so vitally interested in it. * * * I am advised by the parliamentary clerk of the Senate that this amendment is in order on this bill but that it would not be in order on the deficiency bill."

Statements were also made at the Senate hearings by Senator Stewart, of Tennessee; Senator George, of Georgia; Senator Hill, of Alabama; Congressman Sparkman, of Alabama; and Congressmen Byrns and Kefauver, of Tennessee.

The attitude of the House committee is particularly stated by Senator HILL, as follows:

"I served on the Military Affairs Committee. I had the honor of being chairman of that committee. They are all my personal friends, all splendid gentlemen, but the majority of them do not look with favor on very many matters that affect the Tennessee Valley Authority, and you have an impossible situation unless we can get in this bill the relief so much needed. The relief ought to be granted as a matter of fairness and justice and right. I ask that the committee put the bill on as an amendment to this relief bill."

The conference committee reported in disagreement to the House on the amendment, which was extensively debated on the floor of the House, and on the motion of Mr. CANNON to recede and concur, a division showed 154 ayes to 155 noes, whereupon a roll-call vote was ordered, resulting in 205 yeas to 179 nays.

So that once more Senator MCKELLAR took a leading part in securing needed legislation for the Tennessee Valley Authority.

The amended section 13 of the Tennessee Valley Authority Act, passed as section 39 of the Emergency Relief Appropriation Act, 1941 (Public Res. 88, 76th Cong., 3d sess.), is in full as follows:

"SEC. 13. In order to render financial assistance to those States and local governments in which the power operations of the Corporation are carried on and in which the Corporation has acquired properties previously subject to State and local taxation, the board is authorized and directed to pay to said States, and the counties therein, for each fiscal year, beginning July 1, 1940, the following percentages of the gross proceeds derived from the sale of power by the Corporation for the preceding fiscal year as hereinafter provided, together with such additional amounts as may be payable pursuant to the provisions hereinafter set forth, said payments to constitute a charge against the power operations of the Corporation: For the fiscal year (beginning July 1), 1940, 10 percent; 1941, 9 percent; 1942, 8 percent; 1943, 7½ percent; 1944, 7 percent; 1945, 6½ percent; 1946, 6 percent; 1947, 5½ percent, 1948 and each fiscal year thereafter, 5 percent. 'Gross proceeds,' as used in this section, is defined as the total gross proceeds derived by the Corporation from the sale of power for the preceding fiscal year, excluding power used by the Corporation or sold or delivered to any other department or agency of the Government of the United States for any purpose other than the resale thereof. The payments herein authorized are in lieu of taxation, and the Corporation, its property, franchises, and income, are hereby expressly exempted from taxation in any manner or form by any State, county, municipality, or any subdivision or district thereof.

The payment for each fiscal year shall be apportioned among said States in the following manner: One-half of said payment shall be apportioned by paying to each State the percentage thereof which the gross proceeds of the power sales by the Corporation within said State during the preceding fiscal year bears to the total gross proceeds from all power sales by the Corporation during the preceding fiscal year; the remaining one-half of said payment shall be apportioned by paying to each State the percentage thereof which the book value of the power property held by the Corporation within said State at the end of the preceding fiscal year bears to the total book value of all such property held by the Corporation on the same date. The book value of power property shall include that portion of the investment allocated or estimated to be allocable to power: *Provided*, That the minimum annual payment to each State (including payments to counties therein) shall not be less than an amount equal to the 2-year average of the State and local ad valorem property taxes levied against power property purchased and operated by the Corporation in said State and against that portion of reservoir lands related to dams constructed by or on behalf of the United States Government and held or operated by the Corporation and allocated or estimated to be allocable to power. The said 2-year average shall be calculated for the last 2 tax years during which said property was privately owned and operated or said land was privately owned: *Provided further*, That the minimum annual payment to each State in which the Corporation owns and operates power property (including payments to counties therein) shall not be less than $10,-

000 in any case: *Provided further,* That the Corporation shall pay directly to the respective counties the 2-year average of county ad valorem property taxes (including taxes levied by taxing districts within the respective counties) upon power property and reservoir lands allocable to power, determined as above provided, and all payments to any such county within a State shall be deducted from the payment otherwise due to such State under the provisions of this section. The determination of the board of the amounts due hereunder to the respective States and counties shall be final.

The payments above provided shall in each case be made to the State or county in equal monthly installments beginning not later than July 31, 1940.

Nothing herein shall be construed to limit the authority of the Corporation in its contracts for the sale of power to municipalities, to permit or provide for the resale of power at rates which may include an amount to cover tax-equivalent payments to the municipality in lieu of State, county, and municipal taxes upon any distribution system or property owned by the municipality, or any agency thereof, conditioned upon a proper distribution by the municipality of any amounts collected by it in lieu of State or county taxes upon any such distribution system or property; it being the intention of Congress that either the municipality or the State in which the municipality is situated shall provide for the proper distribution to the State and county of any portion of tax equivalent so collected by the municipality in lieu of State or county taxes upon any such distribution system or property.

The Corporation shall, not later than January 1, 1945, submit to the Congress a report on the operation of the provisions of this section, including a statement of the distribution to the various States and counties hereunder; the effect of the operation of the provisions of this section on State and local finances; an appraisal of the benefits of the program of the Corporation to the States and counties receiving payments hereunder, and the effect of such benefits in increasing taxable values within such States and counties; and such other data, information, and recommendations as may be pertinent to future legislation.

REPORTS BY SENATOR BREWSTER ON AVIATION AND TRANSPORTATION FACILITIES IN EUROPE

Mr. BREWSTER. Mr. President, I ask unanimous consent to have printed in the body of the RECORD two reports made by me dealing with foreign aviation.

There being no objection, the reports were ordered to be printed in the body of the RECORD, as follows:

REPORTS OF SENATOR OWEN BREWSTER ON SURVEY OF AVIATION AND TRANSPORTATION FACILITIES IN EUROPE, NOVEMEER 10, 1947, TO JANUARY 4, 1948

REPORT NO. 1

DECEMBER 13, 1947.

Hon. WALLACE H. WHITE, Jr.,
Chairman, Committee on Interstate and Foreign Commerce,
United States Senate,
Washington, D. C.

MY DEAR SENATOR WHITE: This report is submitted in accordance with your request concerning conditions observed in Europe in connection with matters under the jurisdiction of this committee.

Congressional Aviation Policy Board

Following the recess of the Congress I was named as a member and subsequently as chairman of the Congressional Aviation Policy Board created by the last session of the Congress with instructions to investigate and report our recommendations on long range aviation policy to the Congress by March 1, 1948.

The difficulty in assembling members who had been scattered to their respective States delayed our functioning so that it was impracticable to carry out the more comprehensive survey that had been planned regarding aviation facilities and operations in more remote areas of the world.

The Congressional Joint Board, however, has now been organized and very competently staffed and careful studies are in progress as a basis for the formulation of policy recommendations.

Air safety

Meanwhile the technical member of the staff assigned to the Subcommittee on Aviation has been extremely busy investigating the various accidents which have occurred and there is attached hereto copies of the several reports made to date for the information of the full committee. Additional copies of these reports are available as may be desired. It is contemplated that recommendations based upon these reports may be considered by the full committee during the next regular session of the Congress.

International Aviation Conference at Geneva

Following the adjournment of the Congress I was also asked by the President on the recommendation of the State Department to act as chairman of the congressional advisory group for the American delegation at the International Aviation Conference at Geneva on the development of a multilateral aviation pact. Senator EDWIN C. JOHNSON, of Colorado, was also named as a member of this advisory group but was unable to attend the Conference.

During the latter part of November I spent 7 days in Geneva with the American delegation in connection with the Conference. It was a matter of profound regret that the Conference should have ended in such deep-seated differences of opinion between the United States delegation and the majority of the 28 states represented at the Conference that no agreement was possible.

Irrespective of what may be one's opinion as to the desirability of a multilateral pact at this particular stage in the development of international aviation or as to its content there can be no question that it is extremely unfortunate when an international conference of this importance assembled primarily at the urging if not the insistence of the United States results in a division in which a majority of the states oppose the viewpoint of the United States delegation on matters of such fundamental importance that the Conference ends by the United States serving notice that it will not yield to the views of the majority and that accordingly no further discussion regarding an international agreement on this subject at this time will take place. Such a result cannot enhance the prestige of the United States among our sister nations nor cultivate the spirit of good will which is so essential for the achievement of the objectives we have in view. The situation is only slightly alleviated by the fact that several other countries with large stakes in international aviation shared our viewpoint.

There can be no doubt as to the earnestness and constancy with which the United States delegation worked to achieve the policies which they deemed were wise. There is also recognition of the considerable number of international conferences which are now in progress or preparation and the very severe strain that is thus placed upon our distinctly limited reservoir of diplomatic talent. But after saying all this it does not seem that those immediately concerned with aviation in the State Department are receiving the support and cooperation in the upper levels that is demanded by the critical importance of international aviation in the postwar world from the standpoint of our defense.

The rock upon which the Conference found itself wrecked was the vote by a majority of 13 to 9 against the position of the United States in favor of including the so-called fifth freedom in the multilateral pact. This meant that the majority of the countries participating in this vote would not agree that the fifth freedom should necessarily be included in any bilateral route agreements which they might hereafter negotiate.

As a result of this vote the United States delegation announced to the conference that they felt no further useful purpose would be served by continuance of discussions and that the long labors of the Conference at that time should be incorporated in form for reference to the next gathering of the International Civil Aviation Organization known as ICAO and the Conference terminate its labors without issue. This was accordingly done.

Without discussing the wisdom of the decisions of the United States delegation, one must pay tribute again to the earnestness and the zeal with which the viewpoint of the United States was advanced and the united front which was presented by the United States delegation so far as the dealings with the other nations represented at the Conference were concerned.

Civil aviation in Germany

While the drafting committees were engaged in preparing the documents resulting from the earlier deliberations of the Conference, Representatives CARL HINSHAW and ALFRED L. BULWINKLE, who were the other two members of the congressional advisory group at the Conference, decided on a survey of conditions in Germany and this afforded an opportunity for a survey of the position of civil aviation in northern Europe. I accompanied the Representatives on this trip, spending 4 days in the Berlin area and 4 days in a survey of the airports north of Berlin at Hamburg, Bremen, Copenhagen, and Stockholm, where I was accompanied by a representative of the civil-aviation division of the administration of Gen. Lucius Clay in Germany. We were prevented from getting into Oslo, Norway, by the weather conditions, which are rather difficult at this season of the year.

Representatives BULWINKLE and HINSHAW visited the Frankfurt area. We met again at Geneva for the last 5 days of the Conference when the decisions were in process of being reached.

Copenhagen

Copenhagen, in Denmark, has one of the finest airports observed during the entire trip with one runway of over 7,000 feet in length and others of five to six thousand feet and with splendidly developed approaches as a result of its location on the shore and with excellent landing aids and direction facilities and meticulously developed instructions for landing, copies of which are hereto attached, for the committee records.

Copenhagen seems likely to be a center of very considerable activity by reason of its location and comparatively favorable weather conditions. During November most of the overseas operations for the Scandinavian area were being conducted through Copenhagen because of weather conditions and also because of personnel problems. The Scandinavian countries are extremely active in the air and have merged their efforts in overseas operations to become one of the most formidable competitors of the United States.

ABA for the Swedes, DUL for the Norwegians, and DDL for the Danes carry on local and continental services and at the same time merge their overseas activities through SILA in the Scandinavian Air Service, SAS, under the very able leadership of Per Norlin, of Sweden.

Stockholm

Stockholm has an airport adjacent to the city but with approaches that present some

problems because of the comparatively hilly nature of the country in the vicinity of Stockholm, which makes operations during bad weather rather hazardous and results in intermittent service. A larger airport that will be entirely adequate is in process of development. The importance of this development can be appreciated, particularly from the standpoint of American overseas air lines, when it is realized that there were 40,000 American visitors to Sweden this past summer and a constant increase is anticipated as more and more Americans are able to enjoy the attractions of this remarkable region and as more and more Americans of Scandinavian ancestry are able to return and visit their ancestral homes.

Conferences in Stockholm with the Director of Civil Aviation, Hon. C. Ljungberg, and Mr. Per Norlin, representing private interests in aviation, developed the interesting fact that an accommodation has been reached covering the joint participation of the Government and private finance in the expansion of Swedish civil air operations, and this may well mean further strengthening of the Scandinavian position in international air operations.

Arrangements for these meetings were made by Mr. Francis L. Spalding, the very efficient second secretary of the Embassy in Stockholm in charge of aviation matters.

The Scandinavian air lines, SAS, representing Sweden, Norway, and Denmark, are rapidly extending their service to all quarters of the Atlantic and now have a fleet of 17 DC-6's, secured from the United States, which they anticipate adding to their overseas service this coming year.

No arrangement by any of these countries for reciprocal service with Russia has been found possible because of the refusal of Russia to allow planes from other countries to fly into the interior. An interchange of traffic is accomplished at Helsinki, in Finland, where the Soviet air line flies from Moscow and where the American Overseas Airlines also make connection.

Customers of international air routes

The significant thing about the return journey from Europe to the United States was the number of people in obviously moderate circumstances who were using the air to fly to the United States. One of my seat mates was fresh from an English workhouse, where he had spent several years of his later life, and was now en route to Australia to join his son. Several of the other passengers were clearly not in affluent circumstances, and it was interesting to learn that a survey of air traffic overseas had disclosed that a very substantial portion of the traffic was originating from people in the ordinary walks of life, while the so-called luxury travel was in substantially greater measure going by steamship.

As increased facilities for air travel become available and costs are reduced, this indicates that the mass market which has accounted for the amazing development of the United States economy may very readily be tapped and that the average American will be very ready to use the air because of the saving of time and ultimately of expense.

Geneva

Geneva is one of the chief airports in Switzerland, where much of the international traffic centers and different services are available to most European points with a 2-hour flight to London or Paris and facilities on the ground to accommodate this traffic.

Orly Airport in Paris

Air France uses the Orly Airport in Paris but is handicapped by the lack of equipment, as is the case, of course, with most air lines in the world today. The French are seeking to develop both continental and colonial services, and this places a very considerable strain on their resources. A 5-inch snowstorm descended on Paris on November 28 and added very greatly to the difficulties which Paris was experiencing as a result of the extremely unsettled conditions incident to the strike and the controversies there were in progress and resulted also in considerable confusion in air schedules under the necessity of trying to carry on traffic to various parts of the Continent and Africa, England, and America with insufficient equipment.

Civil air in Germany

A discussion of the situation in Germany was left to the last because it is the situation which invites imperatively the most immediate attention. Germany is forbidden under existing agreements to resume civil air service. This means that a vacuum in the air is created over Germany, which is the heart of Europe, with air traffic centering in Frankfurt, where the Rhein-Main airport, with one hard-surfaced runway, is the center of American air activities. A hard-surfaced runway seems extremely unusual in Germany, as most of the airports are grass, including the great Templehof Airdrome at Berlin, with one of the most magnificent terminals to be found in the world, where 15 DC-4's or Constellations can roll on the apron under cover for unloading their passengers at one time, but where we are still operating on a steel mat laid down on the grass. The same situation prevailed at Munich and at Frankfurt following the war, as I observed on visits there in May 1945.

To what extent German planes during the war used the autobahns on which all obstructions had been removed for a very considerable distance on each side with no poles or wires or trees to obstruct is not clear but in many places it seemed evident this had been the plan.

The United States Government is maintaining these airports in Germany and the landing facilities with military supervision and equipment but under instructions to curtail the landing aids as rapidly as they are no longer required for military service. This means that the landing facilities in the airports in many of the smaller centers are already being put on a stand-by basis and that others will be closed out as rapidly as military necessities require.

Meanwhile the normal difficulties incident to the attempt to coordinate civil air operations with military operations are developing since military operations naturally present somewhat different requirements. It seems highly desirable that civil air personnel for operating ground facilities comparable with that with which we are familiar in the United States is to continue to carry on.

Two American overseas air lines at present fly into Frankfurt—the American Overseas Airlines and the Pan American Airways—and carry on a service from there to points beyond in countries both to the north and to the south. Meanwhile many other foreign lines are also flying in Germany using the American facilities.

The problem of the development of local air service in Germany and contiguous territory is an extremely pressing one. All concerned in Germany, from Gen. Lucius Clay down, were extremely desirous that the United States should not miss this opportunity for the development of air services in Germany, particularly in the areas under our control and in contiguous areas both in Germany and outside. Since we are at the present time responsible for the airports and the landing facilities, it would be a curious anachronism if we should carry these on largely for the service of foreign lines; but this is likely to be the result unless there is early coordination of all American air activities in this area.

I shall not undertake to discuss the advantages or significance of American air service in this particular strategic area from the standpoint of our defense with all its implications of familiarizing our pilots with operations over this terrain and with the weather conditions that prevail at all seasons of the year and with the activity of other countries particularly to the east that are in immediate contact with this area.

From the standpoint of American civil aviation interests, however, there can be no doubt as to the very great advantage of feeder services for the American overseas air lines serving this area and there seems every reason in the world why the United States, since it provides the airports and the landing aids, should have some measure of priority in the development of the air service without violation of our obligations to the other countries also concerned.

In Germany is offered an ideal opportunity for demonstrating to all Europe the superiority and advantages of American ground equipment and operating techniques for traffic control and landing aids and all-weather flying.

Standardization of operating facilities on a world-wide basis on American methods is one of the greatest contributions that could be made to United States security and that means to world peace.

Here in Germany is the ideal opportunity to show to all friendly nations the offer of the United States in this all-important field.

All that is needed is recognition by all concerned with American aviation development of this opportunity and its proper exploitation and coordination in this transitional period.

Soviet air activities

The situation with the Soviet is rapidly developing along the lines anticipated by some of those who had expressed concern over the policies originally enunciated by the United States delegation at the Chicago conference in 1944. If the plans then envisioned had been carried out, any airports of entry in this country that were opened up to the use of any international carrier must immediately be made available to any other country which would subscribe to the agreement and furnish a reciprocal opening of whatever airport or airports they might designate in their country.

Thus the United States having opened up 25 airports of entry, both along the borders and within the interior of the United States, for foreign air lines would then be obligated to open each of those airports to a Soviet air line if in turn one port in Russia at the border was opened to all countries alike and nothing more.

The danger of this situation finally dawned upon those in authority and the United States drew back in implementing this arrangement and has since conducted the development of the international aviation picture with considerably more caution—particularly as the Soviet plans have unfolded. To the various satellite states and to other states within easy flying range of the Soviet there have been made proposals that the Russians should be allowed to fly to the capitals or other aviation centers of those countries and in return Russia would allow those countries to fly their national air lines to a border port in Russia but not to fly across Russia to Moscow or to any other major interior population center.

New Swedish plane

The Swedes are developing a plane for continental service carrying 28 to 32 passengers somewhat more powerful than our DC-3 and have high hopes that it may prove serviceable in their area. It is interesting to note, however, that they are securing their engines from the United States.

British air plans

By far the greater proportion of the planes that one sees operating all over Europe are of American design and manufacture or are the older types of European-produced planes that are no longer in production. The Eng-

lish are having great difficulty in the production of a transport plane and a parliamentary committee has been recently constituted to investigate the merits of the controversy between the manufacturer of certain types of planes and the Government-owned British air lines who are apparently not satisfied with the type which is being developed.

This controversy is resulting in considerable stagnation in the plans of the British air lines coupled with the Government injunction this past spring against the purchase of any more American transport planes.

The result of this interruption of the development of their plans seems to be to give the United States somewhat more time than might have been anticipated for the development of our overseas services, but certainly there is no time to lose and very careful thought should be given to the ways in which American aviation may continue to expand its service in all parts of the world.

Atlantic flights

In going over from LaGuardia Field in New York in a Constellation one left the airport at 5 o'clock at night with only seven passengers aboard for the eastern trip which is now running very light and as a result a nonstop flight was possible and the course followed was south of Cape Cod and Newfoundland in the direction of the Azores as a result of weather conditions prevailing at that time, giving a fair wind for an extended portion of the trip and bringing us into the Heathrow Airport near London at 7 o'clock the next morning, New York time, or 12 o'clock London time.

The London Airport is in process of development with terminal facilities still of an improvised character but with an excellent field and adequate development of landing facilities well under way. European air services are carried on in part from this airport and in part from another airport some 10 miles away. The inconvenience of such widely separated terminals is obvious and it is presumed that as time goes on effort will be made to concentrate more services at a single port as far as traffic congestion would permit.

On the return trip from Paris one left the Paris Airport at 6 o'clock, reaching the London terminal at 8 o'clock and taking off immediately with connecting plane for Shannon in Ireland, Gander in Newfoundland, and LaGuardia in New York, with practically a full load of 45 passengers, arriving over LaGuardia the next morning at 9 o'clock New York time, which was 3 o'clock in the afternoon in Paris.

During the recess of the Congress, insofar as time permits, it is hoped to complete a survey of the aviation activities in southern Europe and possibly the Mediterranean.

REPORT NO. 2

Aviation and transportation in Europe

A survey of commercial aviation in Europe brings home the infinitely more difficult problem presented there in contrast with what we have thought was a somewhat challenging situation here in the United States.

The loss of $20,000,000 by American commercial air lines in a recent 12-month period looks less serious when compared with the $40,000,000 loss of the Government-owned lines of Britain, with all the other countries of Europe still to be heard from.

We find difficulty in maintaining an aircraft industry in America with our vast domestic air networks and our military procurement. Consider when England and the other countries of Europe are faced with the problem of developing a postwar transport plane almost from scratch.

British policy

A parliamentary commission has just completed an extended study of the production and procurement of transport planes for the British air lines, and it is indicated that on the basis of its report the Government may not be inclined to favor the current British transport planes that are available or any that may be envisioned in the immediate future. A discussion with some of the responsible aviation authorities in Britain indicated the likelihood that Britain might decide for the present to give up the policy adopted last May of not procuring planes from across the Atlantic.

It would be hardly gracious of the United States to intimate that this indicated our complete superiority in this field, since, to some extent, the situation is attributable to the division of inventive and production efforts during the war between the fighter planes of England and the transport and long-range bombardment planes of the United States.

The situation does, however, strongly suggest that in the present economic plight of the world and particularly of Britain and the United States, there might well continue a division of effort in our joint enterprise that might measurably ameliorate the losses on both sides.

Commercial aviation

Commercial air plays at least as important a role in our national defense and aviation development as the merchant marine played historically in the development of our Navy and our maritime defense. If we also recognize the community of interest among liberty-loving peoples in this most unpeaceful postwar world, then we should realize that Britain and America have as much reason as during the war for coordinating their aviation plans with due regard to the economical development of aviation services calculated to take care of our varying world-wide interests and, at the same time, developing a sound industrial foundation upon which to build adequate aviation production in the event of any future conflict, in which almost inevitably we should be associated.

England in front line

The last war brought home with tragic force the exposed position of England in this era of aerial war because of its nearness to the Continent and its position as practically a front-line outpost.

There seems every reason to anticipate a more rapid change in the significance of aerial warfare during the next decade than in the last 20 years between the two world wars. This must inevitably mean that England would be a more and more precarious location for the development of a vast aircraft industry upon which to depend in the event of any difficulty.

On the other hand, if these considerations are to govern, there is every reason for the United States to recognize the vital interest of England in its Empire air routes and to see to it that their proper concern in the development of these routes is not prejudiced by the strategic position which the United States occupies in the location of an aircraft industry.

American planes in Europe

These considerations were brought home with compelling force as one flew on the various foreign air lines in Europe using, almost without exception, American planes. The British Government has recognized the vital significance of aerial transportation and communication in this postwar world and has made available more than $600,000,000 of Government funds for the development of a great aircraft industry and aviation enterprises that may spread around the world. The startling losses in this first year, running into $240 a passenger on the British Overseas Airlines, is compelling reconsideration of the whole picture and causing everyone concerned to ponder whether or not $40,000,000 worth of British energy and resources, human and material, might not better be diverted into channels having a higher priority in the solution of British economic problems.

As aviation takes off its swaddling clothes and begins to walk, it becomes more and more evident that airports and navigation and adequate landing aids are the foundation of any successful expansion in air transport as well as in military operations. Here one is startled in traveling over Europe to discover the contrast in the development of airports and navigation and landing aids as compared with what has gone on in the safe security of America during the last decade.

Airports lacking

While the Air Forces of the United States developed a vast number of air fields in Europe, the development from a commercial standpoint is still in its early stages and the facilities to handle commercial traffic are still in very great contrast to those available almost anywhere in the United States. Here again it is certainly not for Americans to be critical but simply to appraise the situation.

On the Continent, including Germany, most of the airports—even at the great Templehof Airdrome in Berlin—do not have hard-surfaced runways, and were still using grass at the end of the war. This was true as well in Munich and many of the other largest airports in Germany. This was apparently a result of the German emphasis upon fighter aircraft carrying a far lighter load than our long-range bombers or transport planes.

Air transport in Europe

This all adds up to the necessity of vast expenditures for the development of adequate airports and navigation and landing aids throughout Europe and in England as well during the next few years if air transport is to come to occupy anything like the significant position which it is rapidly assuming in the United States.

These considerations also emphasize the very great desirability of standardization of airport facilities and navigation and landing aids so that pilots may fly anywhere in the world, exactly as we have developed standardized practices for navigation at sea.

Here again there has been somewhat of a tendency for a competitive approach between Britain and the United States in the development of facilities and practices, and it would seem high time that there should be recognition of the wisdom of avoiding the competitive extravagance that has threatened to develop in the postwar period.

The bitter lessons of the losses of the early postwar years seem calculated to bring about a far more conciliatory frame of mind in responsible quarters and to make possible the reexamination of the world air picture from the standpoint of the interests of all the countries concerned on this side of the iron curtain.

Greece

In Greece, the airport at Athens is almost at the point of being abandoned by the commercial services as well as by our military planes as a result of the deplorable condition of the field, which is now being operated with a steel carpet that is approaching the end of its usefulness, while the navigation and landing aids are practically useless as a result of their improvised character (a combination of British and American material), and their operation by those who are not sufficiently experienced. Those concerned with military and civilian aviation, both in the American mission and the American Embassy, were alike in emphasizing the dangers of the situation and the threat by some of the commercial lines to give up entirely operations into Athens unless conditions should be rapidly improved.

The problem of diverting some of our Grecian aid to the development of the airport at Athens also presented problems because of the very great demands in other directions, and also because of the question of developing certain airports farther north that would serve the purposes of Greek defense. If Greece, however, is to be one of the factors

in the democratic world, it is certainly desirable that there should be modern facilities for air transport and for air operations which might at any time become a very crucial factor in the struggle that is going on.

It is clear that all concerned with air operations in the Grecian area would agree with the very strongest representations upon this situation.

Turkey

Airports

Turkey has a fair airport near Istanbul, but without adequate navigation or landing aids. Twenty million dollars is being allocated from the funds made available to Turkey for the development of further airport facilities and there is certainly ample warrant for this action, although it is in sharp contrast to what has so far been provided for Greece.

Traditionally the Turkish defenses have depended primarily upon the lack of any adequate road system as the chief obstacle to the invader. To some extent, similar considerations may be raised as to the development of airports, but it seems folly to think that in the modern world such primitive notions of defense can possibly be adequate.

Harbor Developments

In Turkey, one of the major problems brought home very forcibly was the congestion in the port of Istanbul where the docks are piled high, both in warehouses and on the open docks, with goods in condition that indicates very rough handling in the unloading, with much of the material exposed to the elements and in a confusion that makes its location extremely difficult. This condition apparently has prevailed a long time, rendering almost impossible the movement of goods in and out of Istanbul.

Warehouse and rail and dock facilities have been made available for the bringing in of American relief supplies, which are expected to reach Istanbul around the first of February.

However, the arrival of American relief supplies will mean almost complete stagnation in all the other operations of the port, with all commercial shipping unable to move cargo of any character.

This situation results from the dependence upon lighters for unloading the ships. There are 400 lighters in the harbor, but over 300 of these are now filled with merchandise, being used as warehouses because of the inadequacy of storage facilities elsewhere, and the very moderate demurrage charges being made for the use of lighters in this way.

The result is that not over 40 lighters are available at any time for their intended purpose, and this means that when they are in use for unloading American relief supplies, no other ships would be able to get service in this port, with disastrous result upon the entire Turkish economy which we are seeking to aid.

This position has been presented very forcefully by the American Mission and by the American Embassy and consular officials, without thus far securing relief. It seems impossible for the American officials in Turkey to justify the bringing of American relief supplies to Istanbul until this situation is materially improved, since the only result would be to make the Turkish economic problem worse instead of better as a result of the stagnation in commercial transport that must inevitably result.

There is a naval facility in the port that is 90 percent unused, with ample dock facilities and 27 feet of water that could contribute very greatly to the relief of this situation, if proper authorization and cooperation could be secured from the Turkish authorities concerned and without prejudice to the military security.

Egypt

In Cairo, Payne Field—now Farouk Airport—constructed by the United States during the war, has now been turned over to the Egyptian Government, but the American air line—Trans-World Airline—operating in this area has not up to this time been able to secure satisfactory arrangement for the utilization of this field, in spite of the very great contribution that the United States made to its development. This, of course, is a very important point in travel to the Middle East. The American interests concerned are entitled to the fullest cooperation of those concerned in securing appropriate arrangement for the utilization of these facilities.

Italy

In Italy there are a number of airports developed in earlier days as a result of the Italian activity in aviation, and in later years incident to the war that swept over this country and compelled the development of numerous airports incident to military operations.

The Italian Government is also showing great interest in the further development of its facilities, as well as in the maintenance of the navigation and landing aids that were left over from the war period. TWA is the American line serving this area and rights and arrangements were developed with the Italian Government for domestic services by an Italian line in which TWA and the Italian Government could join in their investments. Approximately $400,000 has been invested in this enterprise for the development of local air lines in the Italian area.

This situation, however, gave concern to the British, who insisted upon a comparable arrangement with the Italian Government during the joint occupation. It is interesting now to note that the British-Italian air lines in which the British Government air line represents the British interest is now making available $5,000,000 for expansion of the air services under the British-Italian line—including an air service to Trieste, where British-American forces are located—or more than ten times the amount which the American company has found it possible or prudent to invest.

This situation affords a very forceful demonstration of the British enterprise in seeking to develop air facilities. One of the objects of these arrangements is to give priority to British equipment and operating practices. The object of the British Government allocation of a $600,000,000 credit for commercial aviation is well illustrated by the Italian arrangement.

Ireland

In Ireland, where the Irish Airline is similarly in partnership with the British with a 50-percent investment by British Overseas Airlines, the Irish have decided not to make further use of the Victor Vikings, an English plane, but to secure American planes because of their greater serviceability and economy of operation. The Irish are showing great enterprise in the development of their aviation lines and plan this spring to open a trans-Atlantic operation to New York if the American planes can be secured.

SUMMARY

In the two reports covering northern Europe and the Mediterranean area, there appears very definitely the opportunity for America, by taking proper leadership, to consolidate our own position in the aviation world and, at the same time, render a service of incalculable value to the welfare and future security of all the liberty-loving peoples of the world.

We know what it takes in the modern world to support a great and changing aviation industry. We know the problems presented in developing and preserving the necessary skills in designing and creating the airplanes of tomorrow.

If the United States is staggered by the challenge to its vast economic resources, what must one think of the problem in the war-ravaged countries of Europe? If America is to assist in a recovery program, can America afford to have vast amounts of European resources—material and human—diverted to enterprises that are at present uneconomic and that necessarily mean the neglect of enterprises far more urgent?

This does not mean any failure to recognize the concern of Europe with aerial transport, but rather, the most effective mobilization of our common resources to serve the common welfare.

This is exactly the position our State Department has taken in refusing to give priority to the European proposal to build 10,000,000 tons of merchant shipping to put our American ships off the sea. Such a diversion of steel and labor was characterized as unjustified in the current crisis when manpower everywhere outside of Italy is one of the critical shortages.

Very similar considerations apply to the aviation problem of the countries outside the iron curtain. None of us can afford to waste our energy or take other than the most efficient course for the maximum utilization of our resources, both human and material.

THE EUROPEAN RECOVERY PROGRAM—STATEMENT BY EUGENE MEYER

Mr. McMAHON. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a statement entitled "European Recovery Program," by Eugene Meyer, chairman of the board of the Washington Post, before the Senate Foreign Relations Committee on January 20 last. This statement, I am sure, will be of tremendous interest to the country.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

I am grateful to you, Mr. Chairman, and your committee for giving me the privilege of appearing before you.

If your time was unlimited, I would speak of a dozen different aspects of the European recovery program, but, instead, I shall confine myself only to a few matters where, by reason of a trip to Europe last summer and fall, and by reason of my own past experience, I hope I may offer this committee something of interest.

Specifically, I would like to address myself to what seem to be the three principal contentions of those who oppose our granting aid to western Europe in the full measure that appears necessary.

Many changes are rung on each of the three major objections, but generally the arguments boil down to these themes:

First, the European peoples are said to show insufficient willingness to buckle down to the hard work necessary to recovery. They are said to be slackers on their jobs and to rely on Uncle Sam to bail them out.

Second, aid to Europe is called operation rat hole because the present governmental forms and policies of European nations are foredoomed to failure. It is argued that, until they are revamped, stem to stern, there can be no promise of economic recovery no matter how generous American aid will be.

Third, the political danger to western Europe is said to have passed. The menace of its engulfment by the Communists is supposed to have abated to the point where little if any assistance from us is needed.

I would like to discuss these in turn. My comments are the fruit of my own observations in Europe—not just on this last trip but on a great many others, beginning with a stay of a year and a half in my youth, when I worked and studied in Germany, England, and France—and a lifetime of interest in and study of international trade and finance. The factual data are fortified by official figures from our own and foreign governments.

One hears the first argument stated in many ways:

"The people won't work in Europe. They go to a 5-day or even a 4-day week, when a 6-day week is needed. Here it is, almost 3 years after the war, and they have made no progress. They have squandered the billions we have already given them. If they got down to work, instead of conniving in black markets, they could recover by their own efforts."

These comments, I assert, are not even half-truths. But they can be stated in much shorter time than they can be answered.

As I saw it, the surprising things were the amount of progress that had been made, and the diligence of the effort of the people, not the contrary.

At the outset, it must be pointed out that no consideration of the postwar western European economy is possible without recalling the effect of the virtual disappearance of enormously important commercial relationships with Germany and middle Europe. I will not go into detail, because I am sure you know about the low state of German production and how the iron curtain has been drawn on the once-flourishing east-west trade. But I do want to point out that when we try to appraise the extent of progress in recovery, we must remember that a great many of the processes of production and distribution have been impaired and disorganized. The European recovery plan seeks to work toward reconstruction of some of the old relationships and the establishment of new ones where necessary.

It used to be, as statesmen put it, that a nation could recover from a war with two good harvests. That once was equal to a nation's total wealth. But now a nation's wealth is in large part in its plant and equipment.

In Europe, much of this plant and equipment was destroyed. That was the technique of World War II, and it was applied with terrible efficiency both by us and by the Axis. Consider the deadly success with which we and the Germans destroyed French and Italian bridges, rail facilities, and utilities. Yet in less than 3 years after the end of that process, the French and Italian rail and utility systems were restored to about 85 percent of prewar capacity.

The next point to remember is that western Europe had two bad instead of the two good harvests that were once supposed to heal the wounds of war.

The weather for the past 2 years in western Europe was a tremendously important factor and one which I think has been given too little consideration here, especially by critics of the aid program.

There was a drought in the summer of 1946. It was followed by a winter of almost unparalleled severity from Narvik to Naples. Then last summer there was a drought such as has not been experienced in a hundred years.

I am not suggesting that without this bad weather Europe would today be on its feet, or that, given good weather, Europe will need no aid from us. I mean only to say that the terrible freezes and droughts contributed in a major degree to rapid using up of the credits and aid we accorded European nations.

A few figures on the European harvest in 1947 show the plight.

In France, wheat production was only 40 percent of the 1930–39 average. Rye was only 47 percent. The total of all cereals was less than half the prewar average. Potato production was only 74 percent of normal; legumes were 69 percent; dairy production was so low that the milk ration is available only to children under four.

In Belgium, total wheat production, despite efforts to replant after the winter freezes, was just one-third of the previous year. Rye, an important Belgian bread crop, was less than half the prewar figure.

The illustrations can be multiplied. But they all show why Europe had to spend its dollars on food. They did not buy a very lavish diet. Certainly this committee, and Congress as a whole—which made such a remarkable and responsible study of the situation first-hand last summer and fall—does not need to be told that Europeans for the most part are living on a miserable ration.

But I want to tell you, Mr. Chairman, of my surprise to find how hard these people are working, despite that low ration.

Considering what the Europeans get to eat—an intake in calories from two-thirds to one-half of our usual diet—one could expect their physical labor would be keyed accordingly. The astonishing thing is that this is not the case.

Except for what the English call casual labor—dockside workers and those in the building trades—the labor efficiency in that country is up to prewar standards. In France it appears to be about 85 percent of prewar. This is remarkably high, in the light of the diet and the amount of time which workers must spend coping with the complex black market to provide enough food for their families.

I was given these figures by industrialists, and I assure you they were not the sort who would have stretched a point to toss wreaths at labor. They were hard-headed businessmen. Their figures are borne out by official statistics.

In Italy there is no question about the vigor of the labor force. Everyone remarked on the virility and energy of the industrial labor force.

I would like to add, Mr. Chairman, my conviction that the stories that Europeans are not working in a sufficiently long week for maximum production are not justified. In almost all cases where the workweek is shorter than we would like to see it, the limiting factor is not the unwillingness or indifference of the men, but rather the scarcity of raw materials and power.

In Italy and France the most important limiting factors are coal and steel. Production figures indicate that those countries are turning out all the coal and steel they can from their own resources—more coal in both countries, for example, than before the war. But both were dependent on coal from outside their borders, British and Ruhr coal. As we know, these imports are not flowing in anything like adequate quantities.

In France the scheduled workweek is 45 hours, as compared to 39 hours in 1938, the last full prewar year.

I would like to present just a few figures about the economies of the principal countries. These data concern the industries to which one should look to appraise, first, the degree of effort being put forth, and, second, the measure of significant progress.

In England steel production is at a higher rate than prewar. Mining of iron ore is back to the 1938 rate. Coal miners have temporarily given up the 5-day week which they won last spring. Thus, coal production, running at only 85 percent of prewar for the first 9 months of 1947, was better than prewar during December. It was at a rate in excess of that set as a target for 1948 in the Paris Conference Report. It permitted resumption of British coal exports, a circumstance the economic importance of which to the rest of Europe cannot be exaggerated.

In France, using 1938 as the base of 100, coal production was 87 percent in January 1946. It was 102 a year later. In October, before the Communist political strikes, it was 118. As of January 1946 steel was only 46 percent of the 1938 base. It was 95 by last June, and in October pig iron was at 93, steel at 108, and finished steel products at 117. The general index of production, only 66 percent of prewar in January 1946, exceeded prewar levels by June 1947, reaching 102.

In Italy the general index of production was as low as 46 last February. For the last 3 months preceding the Communist-led strikes, it was 81.

It should be noted that in both Italy and France the big improvements came with the accession to power of governments in which there was no Communist participation.

Many other figures are available and, I believe, have already been presented to you in much detail. All of them, I feel, belie the charge of idleness or diffidence on the part of the people and the governments. Further, they deny the assertion that no progress has been made in recovery.

By the same token, they go far to answer the second major criticism to which I have referred—that the governments of the 16 nations are so riddled with unsound policies and forms that their situations are hopeless and that no industrial or economic progress can be expected.

In more specific terms, this criticism maintains that European governments cannot hope to succeed until they set their monetary houses in order, until they balance their budgets, let their currencies find their proper levels, cut down their bureaucracies and Federal expenses, curtail their subsidies, and cease costly experiments in socialism.

Of course, this is true, but it is like the question of the hen and the egg. Production and commerce are essential to a balanced budget. All of them ultimately go hand in hand, but I think it is idle to expect that war-smashed countries, their production reduced and their commerce disrupted, could balance their budgets when the last bomb fell. The conditions simply did not exist for immediate budgetary and monetary stability.

The important thing is to look at the direction in which the governments are moving. The implication of the criticism is that western European countries are moving in a direction away from these goals of financial stability and order. The fact is, however, that they are taking substantial and promising strides in the direction we recommend.

Italy provides a rather neat illustration. In the first quarter of last year, its revenues amounted to less than one-third of its expenditures. Under the new government, in the next quarter, more than half of its expenses were met by receipts, and in the month of June receipts were 70 percent of governmental outgo. The estimated deficit for the current fiscal year will still be large—larger than anticipated because of the bad harvest—but it will be only half of the deficit of the preceding fiscal year.

From June to December of last year, governmental measures reduced prices in Italy by about 20 percent. And a few weeks ago the government revalued the lira at the level set by the free market.

Steps taken in France would appear to be promising. From interviews I had, and from further information since my return from Europe, I am confident that the French Government has full appreciation of the importance of balancing its budget and revaluing the franc to realistic levels. I believe that they are working earnestly to these ends.

The level of production in France at the end of the war and the necessity for Federal outlays were such as to make a balanced budget impossible. But since that time, and especially during the Ramadier and Schuman governments, France has taken off almost all its Government subsidies—those on wheat, coal, and fertilizers, for example. Several hundred price controls, including those on most foods, have been lifted and only a minimum remain on key commodities.

By raising rates for the nationalized industries—railroads, public utilities, coal mines and the like—France has put them on

a basis which ought to make them self-supporting or nearly so, and no longer a drain on the public exchequer.

In the third step to cut Federal expenses, France has already discharged 50,000 Government employees and has adopted a program to knock off 150,000 more. All of these steps took real political courage and reflected real economic understanding.

In connection with the move to reduce Government personnel, and my observation that that took courage, may I say that the concentrated political power of an overexpanded bureaucracy is something which we have never experienced in this country to anything like the extent it exists in France.

To increase receipts, France made a capital levy in 1946 and last year increased its surtaxes to a very high rate. The latest measure of Premier Schuman, on which he staked the life of his government, is a drastic tax law to bring in more revenues from classes which have traditionally escaped their fair share—farmers and professional men. It also will bring in more money from the upper brackets.

These steps are necessary to a balanced budget in France. Then only can the franc be stabilized at a level to promote exports and restore its valuable tourist industry.

The trend in Europe is running in a welcome direction and I think that this is as much as we may properly or wisely expect of European nations. On the evidence, we can believe that they will progress more and more in the direction of a free-enterprise economy. I cannot feel, however, that they should be required or expected to throw over all their controls. Let us remember that conditions vary between our Nation and those in Europe. What might be sound economic practices for us would not always be sound for them.

There are those who would have us attach conditions to our aid to Europe which would amount in effect to orders for fundamental changes in their government. I believe those ideas are misguided. The governments of the 16 nations give promise of improvement and one of the reasons for this is that they are independent. Indeed, the whole aim of our program is to preserve that independence.

On the other hand, I believe it is perfectly proper and most essential to demand as a condition for our continuing help that the European governments live up to the representations they made and the commitments they undertook in the Paris Conference report. These are promises for measures to reorder their single and several economies and establish mutually beneficial and sound business cooperation. Such undertakings were volunteered. Our proviso that they must be carried out, if we are to keep on extending aid, is in no way offensive and is a far different thing from an unwelcome and unwholesome intrusion into their independent governing processes.

I fully agree with the feeling in Congress that no step can be neglected to make sure that the money and materials going to Europe be used for the proper and specified purposes. To carry out this aim, either one of two ways may be adopted. Either we can formulate a plan—detailed, full of rules, and necessarily complex—and impose it, or we can ask the Committee for European Economic Cooperation to make a plan which we can approve, with such suggestions and modifications as may be desirable. To me, the second alternative is greatly preferable.

The problem is to make sure that aid-seeking countries carry through on the representations they have made. I believe they want to do it and will want to make a sound plan to assure performance if for no other reason than because continuity of help depends on it. Secondly, they ought to know how to plan it better than any American committee or officer could possibly do it. Finally, this approach conforms to the fundamental conception of the Marshall plan, which was not a plan but a suggestion to a group of European countries to formulate a plan and submit it to us for our consideration.

I sympathize deeply with the problem of the Congress in considering the question of the execution of the plan. It is difficult because of a few simple facts. With the deep sense of responsibility which is involved in this proposed program, Congress rightly wants to safeguard the proper operation of the plan as a whole. To do this, the temptation is considerable to try to draw firm, precise blueprints in the light of existing facts, economic and financial.

In a static world, this might be feasible. But with circumstances so fluctuating here as well as abroad—weather conditions for crops is an illustration—the need for flexibility and elasticity in the administration is obviously vital.

The more there can be a joint follow-through, with joint American and European checks on how the money is being used, the better will be the chances of achieving what must be a dual goal of your legislation: Safeguarding the purposes of the aid program, and allowing the latitude appropriate to a world in which conditions can at times change rapidly and unexpectedly.

A word about the third argument of the program's critics that the danger of Europe going totalitarian has passed. I wish I could believe that that were so, but I cannot. To be sure, the events of recent months have been encouraging; we can count ourselves fortunate that the Communist strikes in France and Italy were surmounted. But the reason they did not result in the overthrow of the independent governments of those nations was precisely that by that time Europe could look with some assurance to aid from the west.

Without concrete and effective steps taken here to help those countries over the crisis, the majority of their people would not have backed the present governments. They would have looked to Moscow because there would have been no point in looking to us.

The French municipal elections of last autumn convinced some people that France will never go Communist, but will turn far to the right instead. Perhaps; but, if so, I suspect that will either be a temporary expedient, followed by a swing sharply in the other direction, or else that the right will become such an extreme right that it will be just as much a dictatorship, just as totalitarian, as the far left. This, no less than communism, means an end to democracy, an end to the hope of expanding international trade and amity.

Before I close, may I refer to a point eloquently put forth by Secretary Marshall. That is that our aid must be sufficient to lay the groundwork for recovery, not merely the prolongation of relief. We can expect no great good result for our foreign policy by granting a dole or by following a coffee-and-sandwiches approach.

This proposition which you are considering is something like an atomic pile. As our scientists discovered, that pile—the amount of uranium put in one place—had to be of a sufficient size or else it would not operate; there would be no reaction at all. Too many of the neutron bullets which were supposed to smash into other nuclei and thus create still other atomic projectiles escaped into space, outside of the system, unless the whole agglomeration was built up to a point known as the critical size.

So also there is a critical size to our foreign aid. I would not presume to say what the size is, but would only point out that the Paris Conference Report, the Harriman Report, and the administration—good people working independently—reached figures not too far apart, in their appraisal of what it will take to make the operation truly chain-reacting, capable of sustaining itself in a process of economic rehabilitation, capable of getting Europe off our backs and on its feet.

The PRESIDENT pro tempore. Morning business is closed.

THE CALENDAR

Mr. WHERRY. Mr. President, I announced on Friday that it was the intention to have the Legislative Calendar called today from the beginning for the consideration of measures to which there was no objection. If the RECORD does not show that, I ask unanimous consent that that be done.

The PRESIDENT pro tempore. Without objection, the order is made.

Mr. WHERRY. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk called the roll and the following Senators answered to their names:

Aiken	Green	Murray
Baldwin	Gurney	O'Conor
Ball	Hatch	O'Daniel
Barkley	Hayden	O'Mahoney
Brewster	Hill	Overton
Bricker	Hoey	Reed
Bridges	Ives	Revercomb
Brooks	Jenner	Robertson, Va.
Buck	Johnson, Colo.	Robertson, Wyo.
Bushfield	Johnston, S. C.	Russell
Butler	Kem	Saltonstall
Byrd	Kilgore	Smith
Cain	Knowland	Sparkman
Capehart	Langer	Stennis
Capper	Lodge	Stewart
Chavez	Lucas	Taft
Connally	McCarran	Thomas, Utah
Cooper	McCarthy	Thye
Cordon	McClellan	Tobey
Donnell	McFarland	Tydings
Downey	McGrath	Umstead
Dworshak	McKellar	Vandenberg
Eastland	McMahon	Watkins
Ecton	Magnuson	Wherry
Ellender	Martin	Wiley
Ferguson	Maybank	Williams
Flanders	Millikin	Wilson
Fulbright	Moore	Young
George	Morse	

Mr. WHERRY. I announce that the Senator from Iowa [Mr. HICKENLOOPER] is absent by leave of the Senate on official business of the Joint Committee on Atomic Energy.

The Senator from Nevada [Mr. MALONE] is absent on official committee business of the Senate.

The Senator from New Jersey [Mr. HAWKES] is necessarily absent.

Mr. LUCAS. I announce that the Senators from Florida [Mr. HOLLAND and Mr. PEPPER] are absent by leave of the Senate.

The Senator from Pennsylvania [Mr. MYERS], the Senator from Idaho [Mr. TAYLOR], and the Senator from Oklahoma [Mr. THOMAS] are absent on public business.

The Senator from New York [Mr. WAGNER] is necessarily absent.

The PRESIDENT pro tempore. Eighty-six Senators having answered to their names, a quorum is present.

Under the order just made, the clerk will state the first bill on the calendar.

OBLIGATIONS OF OPERATORS OF GOLD AND SILVER MINES—RECOMMITTAL OF BILL

The bill (S. 27) to provide for suspending the enforcement of certain obligations against the operators of gold and

silver mines who were forced to cease operations because of the war was announced as first in order.

Mr. McCARRAN. Mr. President, this bill has been pending on the calendar, a long time. I ask unanimous consent that it may be recommitted to the committee from which it was reported, the Committee on the Judiciary.

The PRESIDENT pro tempore. Without objection, the bill will be recommitted, as requested.

BILLS AND RESOLUTION PASSED OVER

The bill (S. 669) to provide for the payment of a bonus of 30 cents per bushel on wheat and corn produced and sold between January 1, 1945, and April 18, 1946, was announced as next in order.

Mr. TAFT. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The resolution (S. Res. 25) amending rule XXII relating to cloture was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDENT pro tempore. The resolution will be passed over.

The bill (S. 354) to incorporate the Federal City Charter Commission was announced as next in order.

Mr. BARKLEY. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 866) to establish a national housing objective and the policy to be followed in the attainment thereof, to facilitate sustained progress in the attainment of such objective and to provide for the coordinated execution of such policy through a National Housing Commission, and for other purposes, was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 408) to repeal section 13b of the Federal Reserve Act, to amend section 13 of the said act, and for other purposes, was announced as next in order.

Mr. McCARRAN. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 299) to extend the reclamation laws to the State of Arkansas, was announced as next in order.

Mr. OVERTON. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 309) designating American Indian Day, was announced as next in order.

The PRESIDENT pro tempore. The Chair will state that the amendment of the Committee on the Judiciary to Senate bill 309 has been agreed to.

Mr. BARKLEY. Mr. President, the Senator from New Mexico [Mr. HATCH] asked that the bill go over when it was reached on the last call of the calendar. He is not present at the moment. I ask that the bill will be temporarily passed over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 1179) to aid in defraying the expenses of the seventeenth triennial convention of the World's Woman's Christian Temperance Union to be held in this country in June 1947 was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1125) to amend the act entitled "An act to define the real property exempt from taxation in the District of Columbia," approved December 24, 1942, was announced as next in order.

Mr. McCARRAN. Mr. President, the junior Senator from Washington [Mr. CAIN] reported this bill from the Committee on the District of Columbia. The junior Senator from Washington and I conferred on the bill during the last session of Congress. I should like to ask if the changes which we then suggested have been incorporated in the bill.

Mr. CAIN. Mr. President, I merely wish to say that at the moment I am not certain whether the changes referred to have been made. I must admit I am not familiar with the present status of the bill. Under the circumstances, I ask that it go over until I have had opportunity to make further investigation.

The PRESIDENT pro tempore. The bill will be passed over.

Mr. BUSHFIELD. Mr. President, what action was taken on Senate bill 866, Calendar No. 139?

The PRESIDENT pro tempore. The bill went over under objection.

The bill (S. 140) to create an executive department to be known as the Department of Health, Education, and Security was announced as next in order.

Mr. McMAHON. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 829) to provide for control and regulation of bank holding companies, and for other purposes, was announced as next in order.

Mr. McCARRAN. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 18) to establish uniform qualifications of jurors in Federal courts, and for other purposes, was announced as next in order.

Mr. RUSSELL. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 518) to amend the Nationality Act of 1940 to preserve the nationality of citizens who were unable to return to the United States prior to October 14, 1946, was announced as next in order.

Mr. RUSSELL. Over.

The PRESIDENT pro tempore. The bill will be passed over.

TRANSFER OF REMOUNT SERVICE

The bill (H. R. 3484) to transfer the Remount Service from the War Department to the Department of Agriculture was announced as next in order.

Mr. BARKLEY. Mr. President, at the request of the Senator from Oklahoma [Mr. THOMAS], who has been ill, I ask that the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

Mr. MORSE. Mr. President, if the Senator will withhold his objection for just a moment, I should like to make a brief 2-minute statement on the bill.

Mr. BARKLEY. I withhold the objection for that purpose. I am not objecting on my own behalf.

Mr. MORSE. I understand the basis for the objection.

Mr. MORSE. Mr. President, I hope that at an early date House bill 3484 can be made the order of business of the Senate for reasons of economy, because, after all, we have got to make a decision as to what we are going to do with the Federal properties which are involved in the bill. It is costing the Government a good many thousands of dollars to leave the problem in suspension. I believe the Army and the Department of Agriculture are entitled to know one way or another what disposition is going to be made of the properties. Hence I wish to make the request that at a very early date the bill be taken up for consideration, because I do not think it will take very long to debate the bill. In the interest of economy and wise expenditure of Federal money, a decision on the disposition of the remount stations involved should be made.

Mr. ROBERTSON of Virginia. Mr. President, will the Senator yield to me for a moment?

Mr. MORSE. I yield.

Mr. ROBERTSON of Virginia. I merely wish to say that I heartily endorse all the Senator from Oregon has just said. One of the remount depots in question is in Virginia. We in Virginia are very much interested in its continuation. It cannot be efficiently and properly handled until the Department of Agriculture knows whether it is going to have jurisdiction over the depot. I join with the distinguished Senator from Oregon in the expression of hope that at an early date the leadership of the Senate will permit us to vote on the bill.

Mr. MORSE. Mr. President, I have the greatest respect for the opinion which the Senator from Oklahoma [Mr. THOMAS] holds on the matter at issue, but I believe we ought to stop the little game of simply objecting to the bill when it is reached on the calendar. He and I know that disposition should be made of the subject. As he also is aware, one branch of the legislature of his own State is opposed to the very bill which he proposes in connection with this matter. I have received a great many telegrams from residents of Oklahoma who feel that the matter ought to be disposed of in accordance with the bill which I have pending before the Senate.

The PRESIDENT pro tempore. Under objection, the bill will be passed over.

The clerk will state the next bill on the calendar.

REGULATION OF LIFE INSURANCE IN THE DISTRICT OF COLUMBIA

The Senate proceeded to consider the bill (S. 612) to amend section 35 of chapter III of the act of June 19, 1934, entitled "An act to regulate the business of life insurance in the District of Columbia," as amended, so as to permit certain additional investments, which had been reported from the Committee on the District of Columbia, with amendments.

The first committee amendment was, on page 1, line 3, after "section", to strike out "35" and insert "36."

The amendment was agreed to.

The next amendment was, on the same page, line 5, after "amended", to strike out "is amended to read" and insert "is hereby repealed, and that section 35 of said chapter III of said act, as amended, is amended to read."

The amendment was agreed to.

The next amendment was, on page 2, line 13, after "Canada", to insert "any Province of the Dominion of Canada."

The amendment was agreed to.

Mr. LANGER. Mr. President, may we have an explanation of the bill?

Mr. BUCK. Mr. President, this bill, which was introduced by the junior Senator from Maine [Mr. BREWSTER], permits life-insurance companies domiciled in the District of Columbia to expand their present field of investment. The bill also affords additional outlets for investment funds. It has the approval of the Superintendent of Insurance of the District of Columbia and the committee representing the life-insurance companies of the District.

The PRESIDENT pro tempore. The clerk will state the next committee amendment.

The next amendment was, on page 6, after line 8, to strike out:

(6) Equipment trust certificates or adequately secured instruments evidencing an interest in railroad or other transportation equipment, wholly or in part within the United States, or the Dominion of Canada, and a right to receive determined portions of rental, purchase, or other fixed obligatory payments for the use or purchase of such transportation equipment.

And insert:

(6) Notes, bonds, or trust certificates secured by any transportation equipment leased or sold to a common carrier, domiciled within the United States or the Dominion of Canada, with gross revenues exceeding $1,000,000 in the fiscal year immediately preceding purchase, which notes, bonds, or trust certificates provide a right to receive determined rental, purchase, or other fixed obligatory payments adequate to retire the obligations within 20 years from date of issue and also provide (a) for the vesting of title to such equipment, free from encumbrance in a corporate trustee or (b) for the creation of a first lien on such equipment, provided at the date of purchase such notes, bonds, or trust certificates are not in default as to principal or interest.

The amendment was agreed to.

The next amendment was, on page 7, at the beginning of line 8, to strike out "That (1) no company shall invest in such obligations of any one corporation an amount in excess of 2 percent of its assets" and insert "That (1) no company shall invest an amount in excess of 2 percent of its admitted assets in any one issue of such obligations of any one corporation;"; and on page 7, line 21, after the word "in", to strike out "principal or", so as to read:

(7) Bonds and other evidences of indebtedness of any solvent corporation created under the laws of the United States or any State thereof, or the District of Columbia, or the Dominion of Canada or any Province thereof: *Provided*, That (1) no company shall invest an amount in excess of 2 percent of its admitted assets in any one issue of such obligations of any one corporation; (2) the net earnings of the issuing corporation available for its fixed charges for a period of 5 fiscal years next preceding the date of acquisition by such insurance company shall have averaged yearly, and during the last year of said 5-year period shall have been not less than one and one-half times its annual fixed charges at the time of the investment, or, if a new issue, as shown by the pro forma statement of the corporation; and (3) there shall have been no defaults in interest thereon, or on any such obligations of such corporation which are of equal or higher priority with those purchased, during the period of 5 years next preceding the date of acquisition, or, if outstanding for less than 5 years, at any time since said obligations were issued. The term "net earnings available for fixed charges," as used herein, shall mean the net income after deducting all operating and maintenance expenses and taxes other than Federal, State, and District of Columbia income taxes, but nonrecurring items of income and expense may be eliminated. The term "fixed charges" as used herein shall include interest on all of the fixed interest-bearing debt of the corporation outstanding and maturing in more than 1 year, as of the date of acquisition, and in case of investment in contingent interest obligations, said term shall also include maximum annual contingent interest as of said date. The earnings of all predecessor, merged, consolidated, or purchased companies may be included through the use of consolidated or pro forma statements provided the fixed charges of all such companies are also included.

The amendment was agreed to.

The next amendment was, on page 8, after line 19, to strike out:

(9) Preferred stock of any corporation (other than its own) created under the laws of the United States, or any State thereof, or the District of Columbia, or the Dominion of Canada or any Province thereof, which has earned and paid regular dividends in cash at the regular prescribed rate each year upon its preferred stock for not less than 5 years next preceding the purchase of such preferred stock, or during such part of said 5-year period as it shall have had preferred stock outstanding, and which corporation or its predecessor shall have earned each year during said 5-year period dividends upon its stocks of at least $100,000: *Provided*, That no company shall invest in the preferred stock of any one corporation an amount in excess of 1 percent of its assets.

(10) Common stocks of any corporation (other than its own) created under the laws of the United States, or any State thereof, or the District of Columbia, or the Dominion of Canada or any Province thereof, which shall have earned and paid common dividends in cash for not less than 5 years next preceding the purchase of such stocks: *Provided*, That no company shall invest in the common stock of any one corporation an amount in excess of 1 percent of its assets.

And insert:

(9) Preferred stock of any solvent corporation (other than its own) created under the laws of the United States, or of any State thereof, or the District of Columbia, or the Dominion of Canada, or any Province thereof, where such corporation has not failed in any one of the three fiscal years next preceding such investment, to have earned a sum applicable to dividends on such preferred stock equal at least to three times the amount of dividends due in that year, or where in case of issuance of new preferred stock such earnings applicable to dividends are equal to at least three times the amount of pro forma annual dividend requirements after giving effect to such new financing, and where the bonds and other evidences of indebtedness, if any, of such corporation are eligible as investments under the provisions of subsection (7) of this section, and where the total investment in any one issue of such preferred stock of any one corporation does not exceed 1 percent of the investing company's admitted assets.

(10) Common stocks of any solvent corporation (other than its own) created under the laws of the United States, or of any State thereof, or the District of Columbia, or the Dominion of Canada, or any Province thereof, which shall have paid common dividends in cash for not less than 5 years next preceding the purchase of such stocks, and where the bonds and other evidences of indebtedness, if any, and the preferred stock, if any, of such corporation are eligible as investments under the provisions of subsections (7) and (9), respectively, of this section, and where the total investment in the common stock of any one corporation does not exceed 1 percent of the investing company's admitted assets.

The amendment was agreed to.

The next amendment was, on page 11, line 7, after the word "all", to strike out "profits therein" and insert "amounts payable thereunder", so as to read:

(12) A life-insurance company may also purchase for its own benefit any policy of life insurance or other obligation of the company and claims of the holders thereof, and may lend to the holders of its life-insurance policies sums not exceeding in any case the reserve value of the policy at the time the loan is made, and for the payment of any such loan the policy and all amounts payable thereunder shall be pledged.

The amendment was agreed to.

The next amendment was, on page 11, after line 13, to strike out:

(14) A life-insurance company in addition to the types of real estate specified in section 36 of this chapter may purchase or hold real estate for the production of income. It may improve or otherwise develop in any manner such real estate and the improvements thereon, and may own, maintain, manage, collect and receive income from, and sell or convey the same. No investment shall be made by any company pursuant to this subsection (14) which will cause such company's investments in all real estate, other than its home office, owned by the company, to exceed 10 percent of its admitted assets.

And insert:

(14) A life-insurance company may also acquire, hold, and convey real estate for the purposes and in the manner following:

(a) the building in which it has its principal office and the land on which it stands;

(b) such as shall be requisite for its convenient accommodation in the transaction of its business;

(c) such as shall have been acquired for the accommodation of its business;

(d) such as shall have been conveyed to it in satisfaction of debts, previously contracted, in the course of its dealings;

(e) such as it shall have purchased at trustee sale or sales on judgments, decrees, or mortgages obtained or made for such debts; and

(f) such as it may purchase or hold for the production of income. It may improve or otherwise develop in any manner such real estate and the improvements thereon, and may own, maintain, manage, collect, and receive income from, and sell or convey the same. No company may, in any period of 12 consecutive months, invest in or agree to pay for real estate, including improvements thereon, under the authority of this item (f) an aggregate amount in excess of 2 percent of its admitted assets as shown in its most recent annual statement; nor shall the

total value of real estate and improvements thereon acquired or held by a company for the production of income under the provisions of this item (f) at any time exceed 5 percent of its said admitted assets. No investment shall be made by any company pursuant to this item (f) if such company then owns real estate having a total value in excess of 10 percent of its said admitted assets or if such investment will cause such company's aggregate investments in real estate owned by it to exceed 10 percent of its said admitted assets: *Provided,* That for the purpose of applying said 10 percent limitation real estate shall include all real estate then owned by the company and such real estate as it may have owned and sold on contract, to the extent of the balance unpaid on such contract of sale; or if the balance unpaid on account of real estate owned and sold by a company is secured by mortgage or other instrument, there shall be included as real estate the amount, if any, by which the balance unpaid exceeds 75 percent of the value of such real estate. A company may, subject to the limitations and conditions of this item (f), elect to consider property acquired as specified in items (c), (d), and (e) as real estate for the production of income as defined in this item (f). Such election shall be duly authorized and recorded by the board of directors or by a committee thereof charged with the duty of supervising loans or investments.

All such real estate specified in items (c), (d), and (e) of this subsection (14), which shall not be necessary for its accommodation in the convenient transaction of its business, and which it has not elected to hold for the production of income, shall be sold by the company and disposed of within 5 years after it shall have acquired the title to the same, or within 5 years after the same shall have ceased to be necessary for the accommodation of its business, unless the company file with the Superintendent an application for extension of time, supported by such evidence as may be required by the Superintendent, establishing to his satisfaction that an extension would be to the advantage of the company and that the interests of the company would be affected adversely by a forced sale thereof, in which event the time for the sale may be extended to such time as the Superintendent shall direct.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 36 of chapter III of the act of June 19, 1934, entitled "An act to regulate the business of life insurance in the District of Columbia," as amended, is hereby repealed, and that section 35 of said chapter III of said act, as amended, is amended to read as follows:

"SEC. 35. Investments of funds of domestic companies: A domestic company shall invest its funds only in—

"(1) Bonds, notes, or other evidences of indebtedness of the United States, any State, Territory or possession of the United States, the District of Columbia, the Dominion of Canada, any province of the Dominion of Canada, or of any administration, agency, authority, or instrumentality of any of the political units enumerated.

"(2) Bonds, notes, or other evidences of indebtedness guaranteed or insured as to principal and interest by the United States, any State, Territory or possession of the United States, the District of Columbia, the Dominion of Canada, any Province of the Dominion of Canada, or by an administration, agency, authority, or instrumentality of any of the political units enumerated.

"(3) Bonds, notes, or other evidences of indebtedness issued, guaranteed, or insured as to principal and interest by a city, county, drainage district, road district, school district, tax district, town, township, village or other civil administration, agency, authority, instrumentality or subdivision of a State, Territory or possession of the United States, or the District of Columbia, or of the Dominion of Canada, or any province thereof, provided such obligations are authorized by law and are (a) direct and general obligations of the issuing, guaranteeing, or insuring governmental unit, administration, agency, authority, district, subdivision, or instrumentality; or (b) payable from designated revenues pledged to the payment of the principal and interest thereof.

"(4) Legally authorized bonds, debentures, notes, collateral trust certificates, and other such evidences of indebtedness, and share certificates, which have been or may be issued by (a) the Federal home-loan bank; (b) the Home Owners' Loan Corporation; (c) any Federal savings and loan association; (d) the Reconstruction Finance Corporation; (e) the Federal Farm Loan Board; (f) any Federal land bank; (g) the Federal Intermediate Credit Bank; (h) any housing authority organized under the public housing laws of the District of Columbia or any State of the United States, or in notes, bonds, or loans secured by mortgage or deed of trust insured under the provisions of the National Housing Act, as amended, or guaranteed or insured pursuant to the provisions of title III of an act of Congress of the United States of June 22, 1944, cited as 'Servicemen's Readjustment Act of 1944', as heretofore or hereafter amended, or by any entity, corporation, or agency which has been or which may be created by or authorized by any act which has been enacted, or which may hereafter be enacted by the Congress of the United States, or any amendment thereto, which has for its purpose the relief of, refinancing of, or assistance to owners of mortgaged or encumbered homes, farms, or other real estate.

"(5) (a) Bonds, notes, or loans secured by first lien on real estate in the United States or Dominion of Canada worth at least 40 percent more than the amount loaned thereon: *Provided,* That this limitation shall not apply to any of the classes of securities mentioned in subsection (4) of this section, if guaranteed or insured in whole or in part as therein provided; but nothing in this section shall be deemed to prohibit a company from renewing or extending a loan for the original amount where there has been a shrinkage in the value of such real estate nor to prohibit a company from accepting, as part payment for real estate sold by it, a lien theron for more than the percentage herein specified of the purchase price of such real estate. For the purpose of this section real estate shall not be deemed to be encumbered by reason of the existence of taxes or assessments that are not delinquent, instruments creating or reserving mineral, oil, water, or timber rights, rights-of-way, joint driveways, sewer rights, rights in walls, nor by reason of building restrictions or other restrictive covenants, nor when such real estate is subject to lease in whole or in part whereby rents or profits are reserved to the owner.

"(b) Bonds, notes, or loans secured by first lien on leasehold estates in improved real property located in the United States or Dominion of Canada, where such real property is unencumbered except by rentals to accrue therefrom to the owner of the fee, and where there is no condition or right of reentry or forfeiture under which such lien can be cut off, subordinated, or otherwise disturbed, so long as the lessee is not in default, provided the value of such leasehold, with improvements thereon shall be at least 50 percent more than the amount loaned thereon: *Provided,* That this limitation shall not apply to any of the classes of securities mentioned in subsection (4) of this section, if guaranteed or insured in whole or in part as therein provided. Such loan shall be completely amortized during the unexpired portion of the lease or leasehold estate securing its payment.

"(c) Loans or advances by a company for the purpose of making repairs, alterations, additions, or improvements to homes or other buildings on improved real estate upon which real estate or upon a leasehold estate in said real estate, such company then holds a first lien to secure a loan previously made: *Provided,* That no such loan or advance shall be made in a sum in excess of $2,000: *And provided further,* That the amount of such loan or advance when added to the balance due on the original indebtedness shall not exceed the amount originally secured by the first lien.

"(d) Ground rents in the District of Columbia or any State of the United States: *Provided,* That in the case of unexpired redeemable ground rents the premiums paid, if any, shall be amortized over the period between the date of acquisition and earliest redemption date, or charged off at any time prior to redemption date; and in the case of expired redeemable ground rents the premiums paid, if any, shall be charged off at the time of acquisition. Redeemable ground rents purchased at a discount shall be carried at an amount not greater than the cost of acquisition.

"(6) Notes, bonds, or trust certificates secured by any transportation equipment leased or sold to a common carrier, domiciled within the United States or the Dominion of Canada, with gross revenues exceeding $1,000,000 in the fiscal year immediately preceding purchase, which notes, bonds, or trust certificates provide a right to receive determined rental, purchase, or other fixed obligatory payments adequate to retire the obligations within 20 years from date of issue and also provide (a) for the vesting of title to such equipment, free from encumbrance in a corporate trustee or (b) for the creation of a first lien on such equipment, provided at the date of purchase such notes, bonds, or trust certificates are not in default as to principal or interest.

"(7) Bonds and other evidences of indebtedness of any solvent corporation created under the laws of the United States or any State thereof, or the District of Columbia, or the Dominion of Canada or any province thereof: *Provided,* That (1) no company shall invest an amount in excess of 2 percent of its admitted assets in any one issue of such obligations of any one corporation; (2) the net earnings of the issuing corporation available for its fixed charges for a period of 5 fiscal years next preceding the date of acquisition by such insurance company shall have averaged yearly, and during the last year of said 5-year period shall have been not less than one and one-half times its annual fixed charges at the time of the investment, or, if a new issue, as shown by the pro forma statement of the corporation; and (3) there shall have been no defaults in interest thereon, or on any such obligations of such corporation which are of equal or higher priority with those purchased, during the period of 5 years next preceding the date of acquisition, or, if outstanding for less than 5 years, at any time since said obligations were issued. The term 'net earnings available for fixed charges,' as used herein, shall mean the net income after deducting all operating and maintenance expenses and taxes other than Federal, State, and District of Columbia income taxes, but nonrecurring items of income and expense may be eliminated. The term 'fixed charges' as used herein shall include interest on all of the fixed interest-bearing debt of the corporation outstanding and maturing in more than 1 year, as of the date of acquisition, and in case of investment in contingent interest obligations, said term shall also include maximum annual contingent interest as of said date. The earnings of all predecessor, merged, consolidated, or purchased

companies may be included through the use of consolidated or pro forma statements provided the fixed charges of all such companies are also included.

"(8) Bank certificates of deposit and bankers' acceptances, and other bills of exchange of the kind and maturities made eligible by law for purchase in the open market by Federal Reserve banks.

"(9) Preferred stock of any solvent corporation (other than its own) created under the laws of the United States, or of any State thereof, or the District of Columbia, or the Dominion of Canada, or any Province thereof, where such corporation has not failed in any one of the three fiscal years next preceding such investment, to have earned a sum applicable to dividends on such preferred stock equal at least to three times the amount of dividends due in that year, or where in case of issuance of new preferred stock such earnings applicable to dividends are equal to at least three times the amount of pro forma annual dividend requirements after giving effect to such new financing, and where the bonds and other evidences of indebtedness, if any, of such corporation are eligible as investments under the provisions of subsection (7) of this section, and where the total investment in any one issue of such preferred stock of any one corporation does not exceed 1 percent of the investing company's admitted assets.

"(10) Common stocks of any solvent corporation (other than its own) created under the laws of the United States, or of any State thereof, or the District of Columbia, or the Dominion of Canada, or any Province thereof, which shall have paid common dividends in cash for not less than 5 years next preceding the purchase of such stocks, and where the bonds and other evidences of indebtedness, if any, and the preferred stock, if any, of such corporation are eligible as investments under the provisions of subsections (7) and (9), respectively, of this section, and where the total investment in the common stock of any one corporation does not exceed 1 percent of the investing company's admitted assets.

"(11) Loans upon the pledge of any of the securities aforesaid.

"(12) A life-insurance company may also purchase for its own benefit any policy of life insurance or other obligation of the company and claims of the holders thereof, and may lend to the holders of its life-insurance policies sums not exceeding in any case the reserve value of the policy at the time the loan is made, and for the payment of any such loan the policy and all amounts payable thereunder shall be pledged.

"(13) A company doing business in a foreign country may invest the funds required to meet its obligations in such country and in conformity to the laws thereof in the same kind of securities in such foreign country that such company is allowed by law to invest in the United States.

"(14) A life-insurance company may also acquire, hold, and convey real estate for the purposes and in the manner following:

"(a) the building in which it has its principal office and the land on which it stands;

"(b) such as shall be requisite for its convenient accommodation in the transaction of its business;

"(c) such as shall have been acquired for the accommodation of its business;

"(d) such as shall have been conveyed to it in satisfaction of debts, previously contracted, in the course of its dealings;

"(e) such as it shall have purchased at trustee sale or sales on judgments, decrees, or mortgages obtained or made for such debts; and

"(f) such as it may purchase or hold for the production of income. It may improve or otherwise develop in any manner such real estate and the improvements thereon, and may own, maintain, manage, collect, and receive income from, and sell or convey the same. No company may, in any period of 12 consecutive months, invest in or agree to pay for real estate, including improvements thereon, under the authority of this item (f) an aggregate amount in excess of 2 percent of its admitted assets as shown in its most recent annual statement; nor shall the total value of real estate and improvements thereon acquired or held by a company for the production of income under the provisions of this item (f) at any time exceed 5 percent of its said admitted assets. No investment shall be made by any company pursuant to this item (f) if such company then owns real estate having a total value in excess of 10 percent of its said admitted assets or if such investment will cause such company's aggregate investments in real estate owned by it to exceed 10 percent of its admitted assets: *Provided*, That for the purpose of applying said 10 percent limitation real estate shall include all real estate then owned by the company and such real estate as it may have owned and sold on contract, to the extent of the balance unpaid on such contract of sale; or if the balance unpaid on account of real estate owned and sold by a company is secured by mortgage or other instrument, there shall be included as real estate the amount, if any, by which the balance unpaid exceeds 75 percent of the value of such real estate. A company may, subject to the limitations and conditions of this item (f), elect to consider property acquired as specified in items (c), (d), and (e) as real estate for the production of income as defined in this item (f). Such election shall be duly authorized and recorded by the board of directors or by a committee thereof charged with the duty of supervising loans or investments.

"All such real estate specified in items (c), (d), and (e) of this subsection (14), which shall not be necessary for its accommodation in the convenient transaction of its business, and which it has not elected to hold for the production of income, shall be sold by the company and disposed of within 5 years after it shall have acquired the title to the same, or within 5 years after the same shall have ceased to be necessary for the accommodation of its business, unless the company file with the superintendent an application for extension of time, supported by such evidence as may be required by the superintendent, establishing to his satisfaction that an extension would be to the advantage of the company and that the interests of the company would be affected adversely by a forced sale thereof, in which event the time for the sale may be extended to such time as the superintendent shall direct.

"No loan or investment, except loans on the security of life-insurance policies, shall be made by any such company, unless the same shall have been authorized or be approved by the board of directors or by a committee thereof charged with the duty of supervising loans or investments.

"No such company shall subscribe to or participate in any underwriting of the purchase or sale of securities or property, jointly with any other corporation, firm, or person, or enter into any agreement to withhold from sale any of its securities or property; but the disposition of its assets shall at all times be within the control of the company.

"Nothing in this act shall prohibit a company from accepting in good faith, to protect its interests, securities or property, other than herein referred to, in payment of or to secure debts due or to become due the company."

The title was amended so as to read: "A bill to amend section 35 of chapter III of the act of June 19, 1934, entitled 'An act to regulate the business of life insurance in the District of Columbia,' as amended, and to repeal section 36 of said chapter III of said act, as amended, so as to permit certain additional investments."

USE OF MODERN MORTALITY TABLES BY DISTRICT OF COLUMBIA LIFE-INSURANCE COMPANIES

The Senate proceeded to consider the bill (H. R. 1634), to amend section 1, and provisions (6), (7), and (8) of section 3, and provision (3) of section 4 of chapter V of the act of June 19, 1934, entitled "An act to regulate the business of life insurance in the District of Columbia," and to add sections 5a, 5b, and 5c thereto.

Mr. ELLENDER. Mr. President, may we have an explanation of the bill? What is the difference between this bill and the one just passed? I notice that they amend the same act. Why is it necessary to have two bills to accomplish the same purpose?

Mr. BUCK. Mr. President, this bill permits life insurance companies domiciled in the District of Columbia to use modern mortality tables, which are now in use in every State of the Union except one. This bill also has the approval of the Superintendent of Insurance of the District of Columbia.

The PRESIDENT pro tempore. The question is on the third reading and passage of the bill.

The bill was ordered to a third reading, read the third time, and passed.

BILLS AND CONCURRENT RESOLUTION PASSED OVER

The bill (S. 1038) to amend the Federal Airport Act was announced as next in order.

Mr. McCARRAN. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The concurrent resolution (S. Con Res. 6) to include all general appropriation bills in one consolidated general appropriation bill, was announced as next in order.

Mr. McCARRAN. Let the concurrent resolution go over.

The PRESIDENT pro tempore. The concurrent resolution will be passed over.

The bill (S. 493) to provide for the coordination of agencies disseminating technological and scientific information was announced as next in order.

Mr. WHERRY. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 1389) to amend the Veterans' Preference Act of 1944 was announced as next in order.

Mr. WHERRY. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 472) to authorize the appropriation of funds to assist the States and Territories in financing a minimum foundation education program of public elementary and secondary schools, was announced as next in order.

Mr. WHERRY. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 249) to amend the Interstate Commerce Act, as amended, and for other purposes, was announced as next in order.

Mr. WHERRY. Let the bill go over.

The PRESIDENT pro tempore. The bill will be passed over.

CONTRIBUTION TO INTERNATIONAL CHILDREN'S EMERGENCY FUND—RECOMMITTAL OF BILL

The bill (S. 1502) to authorize the contribution to the International Children's Emergency Fund of the United Nations of an amount equal to the moneys received by the Selective Service System for the services of persons assigned to work of national importance under civilian direction pursuant to section 5 (g) of the Selective Training and Service Act of 1940, was announced as next in order.

Mr. WHERRY. I ask that the bill go over.

Mr. GURNEY. Mr. President, the present situation is entirely different from the situation at the time the bill was reported. I therefore ask unanimous consent that the bill be recommitted to the Committee on Armed Services.

The PRESIDENT pro tempore. Without objection, it is so ordered.

AMENDMENT OF PUBLIC HEALTH SERVICE ACT

The bill (S. 1454) to amend the Public Health Service Act in regard to certain matters of personnel and administration, and for other purposes, was announced as next in order.

Mr. WHERRY. Let the bill go over.

Mr. SMITH. Mr. President, I should like to make a brief statement in regard to the bill, if the Senator will withhold his objection.

Mr. WHERRY. Certainly.

Mr. SMITH. Mr. President, the bill came up the last time the calendar was called. Certain amendments were agreed to, and then it was suggested by the Senator from Oregon [Mr. MORSE] that the amended bill be placed on our desks so that we could see the bill before we passed it. Consequently the bill has come back to us in that form. I believe that if I may have the opportunity to make a brief explanation, there will be no objection. The bill has been reprinted at the request of several Senators.

Mr. President, this bill, which amends the Public Health Service Act, is mainly a technical bill to aid the Public Health Service in overcoming its professional personnel problems. Most of these problems relate chiefly to the difficulties experienced by the Service in securing and retaining adequately trained physicians and other technical and professional personnel for work in the field of public health.

In the past, the Congress has kept the commissioned corps of the Public Health Service on a parity with the Army and Navy in regard to rates of pay and rates of promotion. The Public Health Servict Act provides specifically that Public Health Service officers shall be promoted after the same length of service as officers of the Medical Corps of the Army. The present Army promotion plan provided in Public Law 381, approved during the first session of this Congress, contains substantial revisions of the Army system. That bill has been passed. It became necessary, therefore, to make corresponding changes in the Public Health Service system. Most of the amendments proposed by S. 1454 are attributable to the Army revisions. The bill includes minor amendments of substance to make S. 1454 conform with H. R. 3924, as reported.

S. 1454 as reprinted now conforms with H. R. 3924, with one exception, namely, it does not include a corresponding provision which enables graduates of accredited colleges of osteopathy to be eligible for appointment as commissioned medical officers in the Public Health Service. As I have pointed out, these are technical changes, which have been so far approved by the Senate.

Subsequent to January 12, when the amendments were agreed to, a number of Senators have made inquiry and expressed their interest in this provision concerning the eligibility for appointment of osteopathic medical officers. In view of that, I offer an amendment which makes the same provision as that contained in H. R. 3924.

This amendment is in the nature of enabling legislation; it is not a compulsory provision. Similar provisions permitting the appointment of osteopathic physicians have been provided for the Veterans' Administration (Public Law 293, 79th Cong., sec. 5) and for the Navy (Public Law 604, 79th Cong., sec. 41).

I ask that the amendment be read. If it shall be approved, I shall ask for passage of the bill.

Mr. WHERRY. Mr. President, I should like to ask the distinguished Senator if the amendment he has offered is the exact amendment which was offered and accepted in the House relative to osteopathy.

Mr. SMITH. I am so advised.

Mr. WHERRY. Is the Senator sure about the amendment?

Mr. SMITH. I am so advised by my assistant.

Mr. WHERRY. If the amendment is exactly the amendment offered and accepted in the House, it would bring the Senate bill in line with the House provision.

Mr. SMITH. That is correct. The amendment has been on the desks of Senators, with the bill as amended the last time the calendar was called.

Mr. MAGNUSON. Mr. President, will the Senator yield?

Mr. SMITH. I yield.

Mr. MAGNUSON. Am I to understand that the amendment now offered by the Senator will make it possible to include osteopaths in the bill?

Mr. SMITH. If the amendment which I have offered, covering graduates of colleges of osteopathy, shall be approved, it will make such graduates eligible under the provisions of the bill.

The PRESIDENT pro tempore. What is the Senator's request?

Mr. SMITH. I should like to have read the amendment which I offer.

The PRESIDENT pro tempore. The amendment offered by the Senator from New Jersey will be read.

The CHIEF CLERK. On page 4, line 23, after the word "therefrom", it is proposed to insert the following:

Graduates of colleges of osteopathy whose graduates are eligible for licensure to practice medicine or osteopathy in a majority of the States of the United States, or approved by a body or bodies acceptable to the Administrator, shall be eligible, subject to the other provisions of this act, for appointment as commissioned medical officers in the Public Health Service.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Labor and Public Welfare, with amendments, which amendments had been previously agreed to.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from New Jersey [Mr. SMITH].

The amendment was agreed to.

Mr. CORDON. Mr. President, I should like to ask the Senator from New Jersey whether or not there is an error in printing on page 3, line 9, where there was evidently intended to be an amendment. However, the italicized words as well as the original text are stricken out.

Mr. SMITH. I am advised by my assistant that there has been an error in printing. It should read:

That the number of Assistant Surgeons General having a grade higher than that corresponding to the grade of brigadier general shall at no time exceed one-half of the number of positions created by subsection (b) of section 205 or pursuant to subsection (c) of such section.

The PRESIDENT pro tempore. The Chair is advised that the printing error has been corrected.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That paragraph (j) of section 2 of the Public Health Service Act, as amended (42 U. S. C., ch. 6A), is amended by inserting immediately after the semicolon at the end thereof the words "isonipecaine and its derivatives, compounds, salts, and preparations; opiates (as defined in section 3228 (f) of the Internal Revenue Code)."

SEC. 2. Section 203 of such act is amended by striking out the last sentence thereof.

SEC. 3. Section 205 of such act is amended by redesignating subsection (c) as subsection (d) and inserting after subsection (b) the following new subsection:

"(c) The Surgeon General, with the approval of the Administrator, is authorized to create special temporary positions in the grade of Assistant Surgeons General when necessary for the proper staffing of the Service; but the number of such special temporary positions, when added to the eight positions created by section 204 and subsections (a) and (b) of this section, shall not on any day exceed three-fourths of 1 percent of the highest number, during the 90 days preceding such day, of officers of the Regular Corps on active duty and officers of the Reserve Corps on active duty for more than 30 days. The Surgeon General may assign officers of either the Regular Corps or the Reserve Corps to any such special temporary positions, and while so serving they shall each have the title of Assistant Surgeon General."

SEC. 4. (a) The first sentence of subsection (a) of section 206 of such act is amended to read: "The Surgeon General, during the period of his appointment as such, shall be of the same grade, with the same pay and allowances, as the Surgeon General of the Army; and the Deputy Surgeon General, while assigned as such, shall have the grade corresponding with the grade of major general, with the same pay and

allowances. Assistant Surgeons General, while assigned as such, shall have the grade, with the pay and allowances thereof, corresponding with either the grade of brigadier general or the grade of major general, as may be determined by the Administrator after considering the importance of the duties to be performed: *Provided*, That the number of Assistant Surgeons General having a grade higher than that corresponding to the grade of brigadier general shall at no time exceed one-half of the number of positions created by subsection (b) of section 205 or pursuant to subsection (c) of such section."

(b) Such section is further amended by adding at the end thereof the following new subsections:

"(c) Any commissioned officer below the grade of director who is assigned to serve as chief of a division shall, for the duration of such assignment, have the grade of director and receive the pay and allowances applicable to such grade.

"(d) Within the total number of officers of the Regular Corps authorized by the appropriation act or acts for each fiscal year to be on active duty, the Administrator shall by regulation prescribe the maximum number of officers authorized to be in each of the grades from the junior assistant grade to the director grade, inclusive. Such numbers shall be determined after considering the anticipated needs of the Service during the fiscal year, the funds available, the number of officers in each grade at the beginning of the fiscal year, and the anticipated appointments, the anticipated promotions based on years of service, and the anticipated retirements during the fiscal year. The number so determined for any grade for a fiscal year may not exceed the number limitation (if any) contained in the appropriation act or acts for such year. Such regulations for each fiscal year shall be prescribed as promptly as possible after the appropriation act fixing the authorized strength of the corps for that year, and shall be subject to amendment only if such authorized strength or such number limitation is thereafter changed. The maxima established by such regulations shall not require (apart from action pursuant to other provisions of this act) any officer to be separated from the Service or reduced in grade."

SEC. 5. (a) Such act is further amended by striking out section 207 thereof and by redesignating sections 208 and 209 as sections 207 and 208, respectively.

(b) Paragraph (1) of subsection (a) of the section herein redesignated as section 207 is amended by striking "surgery," therefrom. Graduates of colleges of osteopathy whose graduates are eligible for licensure to practice medicine or osteopathy in a majority of the States of the United States, or approved by a body or bodies acceptable to the Administrator, shall be eligible, subject to the other provisions of this act, for appointment as commissioned medical officers in the Public Health Service. The second sentence of paragraph (2) of such subsection is amended to read: "Reserve commissions shall be for a period of not more than 5 years and may be terminated at any time, as the President may direct."

(c) Subsection (b) of such section is amended to read:

"(b) Not more than 10 percent of the original appointments to the Regular Corps authorized to be made during any fiscal year may be made to grades above that of senior assistant, but no such appointment may be made to a grade above that of director. For the purpose of this subsection the number of original appointments authorized to be made during a fiscal year shall be (1) the excess of the number of officers of the Regular Corps authorized by the appropriation act or acts for such year over the number of officers on active duty in the Regular Corps on the first day of such year, plus (2) the number of such officers of the Regular Corps who, during such fiscal year, have been or will be retired upon attainment of age 64 or have for any other reason ceased to be on active duty. In determining the number of appointments authorized by this subsection an appointment shall be deemed to be made in the fiscal year in which the nomination is transmitted by the President to the Senate. No person shall be appointed pursuant to this subsection unless he meets standards established in accordance with regulations of the President."

(d) Such section is further amended by redesignating subsections (c), (d), (e), and (f) thereof as subsections (e), (f), (g), and (h), respectively; by changing "subsection (c)" to "subsection (e)" and changing "subsection (d)" to "subsection (f)" in the subsection hereby designated as subsection (g); and by inserting after subsection (b) the following new subsections:

"(c) Commissions evidencing the appointment by the President of officers of the Regular or Reserve Corps shall be issued by the Administrator under the seal of the Federal Security Agency.

"(d) (1) For purposes of pay and pay period and for purposes of promotion, any person appointed under subsection (a) to the grade of senior assistant in the Regular Corps, and any person appointed under subsection (b), shall, except as provided in paragraphs (2) and (3) of this subsection, be considered as having had on the date of appointment the following length of service: 3 years if appointed to the senior assistant grade, 10 years if appointed to the full grade, 17 years if appointed to the senior grade, and 18 years if appointed to the director grade.

"(2) For purposes of pay and pay period, any person appointed under subsection (a) to the grade of senior assistant in the Regular Corps, and any person appointed under subsection (b), shall, in lieu of the credit provided in paragraph (1), be credited with the service for which he is entitled to credit under any other provision of law if such service exceeds that to which he would be entitled under such paragraph.

"(3) For purposes of promotion, any person originally appointed in the Regular Corps to the senior assistant grade or above who has had active service in the Reserve Corps shall be considered as having had on the date of appointment the length of service provided for in paragraph (1), plus whichever of the following is greater: (A) The excess of his total active service in the Reserve Corps (above the grade of junior assistant) over the length of service provided in such paragraph, to the extent that such excess is on account of service in the Reserve Corps in or above the grade to which he is appointed in the Regular Corps or (B) his active service in the same or any higher grade in the Reserve Corps after the first day on which, under regulations in effect on the date of his appointment to the Regular Corps, he would have had the training and experience necessary for such appointment.

"(4) For purposes of promotion, any person whose original appointment is to the assistant grade in the Regular Corps shall be considered as having had on the date of appointment service equal to his total active service in the Reserve Corps in and above the assistant grade."

(e) Beginning as of the date of enactment of this act, any officer of the Regular Corps of the Public Health Service on active duty on such date shall, in lieu of the service with which he was credited for the purposes of pay and pay period at the time of his appointment to such corps, receive credit, if it is greater, for 3 years if his appointment was to the senior assistant grade, 12 years if it was to the full grade, 20 years if it was to the senior grade, and 26 years if it was to the director grade.

(f) Any person appointed to any grade above the assistant grade in the Regular Corps of the Public Health Service after enactment of this act and prior to July 1, 1948, shall, for purposes of pay and pay period, and (except in the case of an appointment to the director grade) for purposes of promotion, receive the credit provided under section 207 of the Public Health Service Act, as amended by this act, or shall receive credit, if it is greater, of 3 years if appointed to the senior assistant grade, 12 years if appointed to the full grade, 20 years if appointed to the senior grade, and 26 years if appointed to the director grade. In the case of an officer so appointed to the full or senior grade (1) he shall receive 2 years' seniority in grade if appointed to the full grade and 3 years' if appointed to the senior grade, and (2) he shall be considered as having completed the 1 year of service in grade required for promotion to a restricted grade or to the director grade, as the case may be.

(g) Subsection (b) of the section herein redesignated as section 208 is amended to read:

"(b) Reserve officers, except when otherwise provided by law, shall receive the same pay and allowances when on active duty as commissioned officers of the Regular Corps, including allowances for travel and transportation of household goods and effects."

(h) Subsection (h) of the section herein redesignated as section 208 is amended by striking out "section 208 (d)" and inserting in lieu thereof "section 207 (f)".

(i) Such act is further amended by inserting after the section herein redesignated as section 208 the following new section:

"PROFESSIONAL CATEGORIES

"SEC. 209. (a) For the purpose of establishing eligibility of officers of the Regular Corps for promotions, the Surgeon General shall by regulation divide the corps into professional categories. Each category shall, as far as practicable, be based upon one of the subjects of examination set forth in section 207 (a) (1) or upon a subdivision of such subject, and the categories shall be designed to group officers by fields of training in such manner that officers in any one grade in any one category will be available for similar duty in the discharge of the several functions of the Service.

"(b) Each officer of the Regular Corps on active duty shall, on the basis of his training and experience, be assigned by the Surgeon General to one of the categories established by regulations under subsection (a). Except upon amendment of such regulations, no assignment so made shall be changed unless the Surgeon General finds (1) that the original assignment was erroneous, or (2) that the officer is equally well qualified to serve in another category to which he has requested to be transferred, and that such transfer is in the interest of the Service.

"(c) Within the limits fixed by the Administrator in regulations under section 206 (d) for any fiscal year, the Surgeon General shall determine for each category in the Regular Corps the maximum number of officers authorized to be in each of the grades from the assistant grade to the director grade, inclusive.

"(d) The excess of the number so fixed for any grade in any category over the number of officers of the Regular Corps on active duty in such grade in such category (including, in the case of the director grade, officers holding such grade in accordance with section 206 (c)) shall for the purpose of promotions constitute vacancies in such grade in such category. For purposes of this subsection, an officer who has been temporarily promoted or who is temporarily holding the grade of director in accordance with section 206 (c) shall be deemed to hold the grade to which so promoted or which he is temporarily holding; but while he holds such promotion or grade, and while any officer is temporarily assigned to a position pursuant to section 205 (c), the number fixed under subsection (c) of this section

for the grade of his permanent rank shall be reduced by one.

"(e) The absence of a vacancy in a grade in a category shall not prevent an appointment to such grade pursuant to section 207, a permanent length of service promotion, or the recall of a retired officer to active duty; but the making of such an appointment, promotion, or recall shall be deemed to fill a vacancy if one exists.

"(f) Whenever a vacancy exists in any grade in a category the Surgeon General may increase by one the number fixed by him under subsection (c) for the next lower grade in the same category, without regard to the numbers fixed in regulations under section 206 (d); and in that event the vacancy in the higher grade shall not be filled except by a permanent promotion, and upon the making of such promotion the number for the next lower grade shall be reduced by one."

SEC. 6. (a) Section 210 of such act is amended to read:

"SEC. 210. (a) Promotions of officers of the Regular Corps to any grade up to and including the director grade shall be either permanent promotions based on length of service, other permanent promotions to fill vacancies, or temporary promotions. Permanent promotions shall be made by the President, by and with the advice and consent of the Senate, and temporary promotions shall be made by the President. Each permanent promotion shall be to the next higher grade, and shall be made only after examination given in accordance with regulations of the President.

"(b) The President may by regulation provide that in a specified professional category permanent promotions to the senior grade, or to both the full grade and the senior grade, shall be made only if there are vacancies in such grade. A grade in any category with respect to which such regulations have been issued is referred to in this section as a 'restricted grade.'

"(c) Examinations to determine qualification for permanent promotions may be either noncompetitive or competitive, as the Surgeon General shall in each case determine; except that examinations for promotions to the assistant or senior assistant grade shall in all cases be noncompetitive. The officers to be examined shall be selected by the Surgeon General from the professional category, and in the order of seniority in the grade, from which promotion is to be recommended. In the case of a competitive examination the Surgeon General shall determine in advance of the examination the number (which may be one or more) of officers who, after passing the examination, will be recommended to the President for promotion; but if the examination is for promotion based on length of service, or is one for promotions to fill vacancies other than vacancies in the director grade or in a restricted grade, such number shall not be less than 80 percent of the number of officers to be examined.

"(d) Officers of the Regular Corps, found pursuant to subsection (c) to be qualified, shall be given permanent promotions based on length of service, as follows:

"(1) Officers in the junior assistant grade shall be promoted at such times as may be prescribed in regulations of the President.

"(2) Officers with permanent rank in the assistant grade, the senior assistant grade, and the full grade shall (except as provided in regulations under subsection (b)) be promoted after completion of 3, 10, and 17 years, respectively, of service in grades above the junior assistant grade; and such promotions, when made, shall be effective, for purposes of pay and pay period and for purposes of seniority in grade, as of the day following the completion of such years of service. An officer with permanent rank in the assistant, senior assistant, or full grade who has not completed such years of service shall be promoted at the same time, and his promotion shall be effective as of the same day, as any officer junior to him in the same grade in the same professional category who is promoted under this paragraph.

"(e) Officers in a professional category of the Regular Corps, found pursuant to subsection (c) to be qualified, may be given permanent promotions to fill any or all vacancies in such category in the senior assistant grade, the full grade, the senior grade, or the director grade; but no officer who has not had 1 year of service with permanent or temporary rank in the next lower grade shall be promoted to any restricted grade or to the director grade.

"(f) If an officer who has completed the years of service required for promotion to a grade under paragraph (2) of subsection (d) fails to receive such promotion, he shall (unless he has already been twice examined for promotion to such grade) be once reexamined for promotion to such grade. If he is thereupon promoted (otherwise than under subsection (e)), the effective date of such promotion shall be 1 year later than it would have been but for such failure. Upon the effective date of any permanent promotion of such officer to such grade, he shall be considered as having had only the length of service required for such promotion which he previously failed to receive.

"(g) If, for reasons other than physical disability incurred in line of duty, an officer of the Regular Corps in the junior assistant grade is found pursuant to subsection (c) not to be qualified for promotion he shall be separated from the service. If, for reasons other than physical disability incurred in line of duty, an officer of the Regular Corps in the assistant, senior assistant, or full grade, after having been twice examined for promotion (other than promotion to a restricted grade), fails to be promoted—

"(1) if in the assistant grade he shall be separated from the service and paid 6 months' pay and allowances;

"(2) if in the senior assistant grade he shall be separated from the service and paid 1 year's pay and allowances;

"(3) if in the full grade he shall be considered as not in line for promotion and shall, at such time thereafter as the Surgeon General may determine, be retired from the service with retired pay (unless he is entitled to a greater amount by reason of another provision of law) at the rate of 2½ percent of his active-duty pay at the time of retirement for each complete year, not in excess of 30, of his active commissioned service in the service.

"(h) If an officer of the Regular Corps, eligible to take an examination for promotion, refuses to take such examination, he may be separated from the service in accordance with regulations of the President.

"(i) At the end of his first 3 years of service, the record of each officer of the Regular Corps originally appointed to the senior assistant grade or above, shall be reviewed in accordance with regulations of the President, and if found not qualified for further service, he shall be separated from the service and paid 6 months' pay and allowances.

"(j) (1) The order of seniority of officers in a grade in the Regular Corps shall be determined, subject to the provisions of paragraph (2), by the relative length of time spent in active service after the effective date of each such officer's original appointment or permanent promotion to that grade. When permanent promotions of two or more officers to the same grade are effective on the same day, their relative seniority shall be the same as it was in the grade from which promoted. In all other cases of original appointments or permanent promotions (or both) to the same grade effective on the same day, relative seniority shall be determined in accordance with regulations of the President.

"(2) In the case of an officer originally appointed in the Regular Corps to the grade of assistant or above, his seniority in the grade to which appointed shall be determined after inclusion, as service in such grade, of any active service in such grade or in any higher grade in the Reserve Corps, but (if the appointment is to the grade of senior assistant or above) only to the extent of whichever of the following is greater: (A) His active service in such grade or any higher grade in the Reserve Corps after the first day on which, under regulations in effect on the date of his appointment to the Regular Corps, he had the training and experience necessary for such appointment, or (B) the excess of his total active service in the Reserve Corps (above the grade of junior assistant) over 3 years if his appointment in the Regular Corps is to the senior assistant grade, over 10 years if the appointment is to the full grade, or over 17 years if the appointment is to the senior grade.

"(k) Any commissioned officer of the Regular Corps in any grade in any professional category may be recommended to the President for temporary promotion to fill a vacancy in any higher grade in such category, up to and including the director grade. In time of war, or of national emergency proclaimed by the President, any commissioned officer of the Regular Corps in any grade in any professional category may be recommended to the President for promotion to any higher grade in such category, up to and including the director grade, whether or not a vacancy exists in such grade. The selection of officers to be recommended for temporary promotions shall be made in accordance with regulations of the President. Promotion of an officer recommended pursuant to this subsection may be made without regard to length of service, without examination, and without vacating his permanent appointment, and shall carry with it the pay and allowances of the grade to which promoted. Such promotions may be terminated at any time, as may be directed by the President.

"(l) Whenever the number of officers of the Regular Corps on active duty, plus the number of officers of the Reserve Corps who have been on active duty for 30 days or more, exceeds the authorized strength of the Regular Corps, the Administrator shall determine the requirements of the Service in each grade in each category, based upon the total number of officers so serving on active duty and the tasks being performed by the Service; and the Surgeon General shall thereupon assign each officer of the Reserve Corps on active duty to a professional category. If the Administrator finds that the number of officers fixed under section 209 (c) for any grade and category (or the number of officers, including officers of the Reserve Corps, on active duty in such grade in such category, if such number is greater than the number fixed under section 209 (c)) is insufficient to meet such requirements of the Service, officers of either the Regular Corps or the Reserve Corps may be recommended for temporary promotion to such grade in such category. Any such promotion may be terminated at any time, as may be directed by the President.

"(m) Any officer of the Regular Corps, or any officer of the Reserve Corps on active duty, who is promoted to a higher grade shall, unless he expressly declines such promotion, be deemed for all purposes to have accepted such promotion; and shall not be required to renew his oath of office, or to execute a new affidavit as required by the act of December 11, 1926, as amended (5 U. S. C. 21a)."

(b) Except as provided in subsection (d) of this section, no promotion shall be made under section 210 of the Public Health Service Act, as amended by this act, prior to July 1, 1948. Until that date officers of the Regular Corps may receive temporary promotions to higher grades with the pay and allowances thereof pursuant to section 210 (a) (1) of the Public Health Service Act, in force prior to the enactment of this act, notwithstanding

the termination, prior to such date, of the war and of the national emergencies proclaimed by the President. Any officer holding, on June 30, 1948, an appointment pursuant to such section to a higher temporary grade shall continue in such grade until such appointment is terminated, as the President may direct.

(c) Effective as of the date of the enactment of this act, each officer of the Regular Corps on such date, in addition to the credit he has under preexisting legislation for purposes of promotion, shall be credited with 3 years of service.

(d) (1) Officers of the Regular Corps who have, or who on or before July 1, 1948, will have, the years of service prescribed in paragraph (2) of section 210 (d) of the Public Health Service Act, as amended by this act, for promotion to the senior assistant, full, or senior grade, shall be recommended to the President for such promotion, to be effective as of July 1, 1948, whether or not vacancies exist in such grade. Such promotions shall be made without examination, except that no promotions shall be made to the senior grade or any grade immediately below a restricted grade until the officer is found qualified for promotion pursuant to subsection (c) of section 210 of the Public Health Service Act, as amended by this act. No promotion shall be made pursuant to this paragraph to any grade in any professional category if such grade has been made a restricted grade pursuant to subsection (b) of section 210 of the Public Health Service Act, as amended by this act. For purposes of seniority an officer promoted under this paragraph shall be credited with the years of service in the grade to which promoted equal to the excess of his years of service on the date of promotion over the years of service required for promotion to such grade under paragraph (2) of section 210 (d) of the Public Health Service Act, as amended by this act.

(2) Officers in the junior assistant grade in the Regular Corps who have, or who on or before July 1, 1948, will have four or more years of service in the junior assistant grade, shall be recommended to the President for promotion to the assistant grade, to be effective as of July 1, 1948, without examinaton and whether or not vacancies exist in such grade. For purposes of promotion and seniority in grade, an officer promoted under this paragraph shall be credited with the years of service equal to the excess of his years of service on the date of promotion over 4 years.

(e) For purposes of seniority, any officer of the Regular Corps of the Public Health Service on the date of enactment of this act shall be considered as having had service in the grade which he holds on such date equal to the excess of the service credited to him for promotion purposes over the length of service required under section 210 (d) (2), as amended by this act, for promotion to such grade.

(f) Except as provided in subsection (d) of this section the provisions of this section shall not, prior to July 1, 1948, affect the term or tenure of office (including any office held under temporary promotion) of any commissioned officer of the Service in office upon the date of the enactment of this act.

SEC. 7. (a) The first sentence of subsection (b) of section 211 of such act is amended to read: "A commissioned officer shall be retired on the first day of the month following the month in which he attains the age of 64 years; and a commissioned officer may be retired by the Administrator, and shall be retired if he applies for retirement, on the first day of any month after completion of 30 years of active commissioned service in the Service."

(b) Paragraph (2) of subsection (c) of such section is amended to read:

"(2) The retired pay to which an officer, who has served 4 years or more as Surgeon General, Deputy Surgeon General, or Assistant Surgeon General, is entitled shall be based on the pay of the highest grade held by him as such Surgeon General, Deputy Surgeon General, or Assistant Surgeon General."

(c) Subsection (d) of such section is amended by changing the words "for age" to "under the provisions of subsection (b)."

(d) Section 211 of such act is further amended by adding at the end thereof the following new subsections:

"(g) An officer of the Regular Corps in the senior assistant grade in a category in which the full grade is a restricted grade, who has had 20 years of active commissioned or noncommissioned service in the Service (including any active Federal service in the armed forces) or has attained the age of 50, or an officer of the Regular Corps in the full grade in a category in which the senior grade is a restricted grade, who has had 25 years of such service or has attained the age of 55, may be retired in accordance with regulations of the Administrator if he has not been found pursuant to section 210 (c) to be qualified for promotion to the full grade or the senior grade, as the case may be. The retired pay of any such officer shall be at the rate of 2½ percent of his active-duty pay at the time of retirement for each complete year, not in excess of 30, of such service.

"(h) Retired pay pursuant to this section shall be terminated if the officer receiving such pay is recalled to active duty or, in the case of an officer of the Reserve Corps, if he is found to have recovered from his disability. Such pay shall be suspended for any period during which an officer fails without good cause to comply with a request by the Surgeon General that he submit to a medical examination, and shall be terminated if such failure continues for 6 months."

SEC. 8. Title II of such act is further amended by adding at the end thereof the following new section:

"TRAINING OF OFFICERS

"SEC. 218. (a) Appropriations available for the pay and allowances of commissioned officers of the Service shall also be available for the pay and allowances of any such officer on active duty in the Regular Corps while attending any educational institution and, subject to regulations of the President and to the limitation prescribed in such appropriations, for payment of his tuition, fees, and other necessary expenses incident to such attendance.

"(b) Any officer whose tuition and fees while attending an educational institution are paid pursuant to subsection (a) shall be obligated to reimburse the Service for such tuition and fees if he voluntarily leaves the Service within 2 years after the cessation of such attendance."

SEC. 9. (a) Section 706 of the act of July 1, 1944 (58 Stat. 682, 713), as amended, is amended to read:

"SEC. 706. In the case of any commissioned officer of the Service appointed prior to July 1, 1944, there shall be included, in determining the amount of retired pay pursuant to subsection (b) (1) of section 211, and in determining whether he should or may be retired pursuant to subsection (b) of such section, noncommissioned service in the Public Health Service, as well as all commissioned service."

(b) Title VII of such act is amended by changing sections 711 and 712, and references thereto, to section 713 and 714, respectively, and by inserting immediately after section 710 the following new sections:

"APPOINTMENTS TO HIGHER GRADES FOR MENTAL HEALTH AND HOSPITAL CONSTRUCTION ACTIVITIES

"SEC. 711. Twenty officers may be appointed to grades in the Regular Corps of the Service above that of senior assistant, but not to a grade above that of director, to assist in carrying out the purposes of this act with respect to mental health and 20 officers may be appointed to such grades in the Regular Corps to assist in carrying out title VI of this act. Officers appointed pursuant to this section in any fiscal year shall not be counted as part of the 10 percent of the original appointments authorized to be made in such year under section 207 (b); but they shall for all other purposes be treated as though appointed pursuant to such section 207 (b). The 20 officers authorized by this section to be appointed to carry out the purposes of this act with respect to mental health and the 20 officers so authorized to be appointed to carry out title VI shall be reduced by the number of officers appointed under clause (A) and the number appointed under clause (B), respectively, of section 208 (b) (2) of this act, in effect prior to the enactment of this section.

"CERTAIN RETIREMENTS FOR DISABILITY

"SEC. 712. An officer of the Reserve Corps of the Public Health Service who was separated from the Service or returned to inactive status by reason of a disability incurred in line of duty after December 6, 1941, and prior to July 1, 1944, and who would have been eligible for retirement by reason of such disability if section 211 of the Public Health Service Act had been in effect on and after December 7, 1941, shall be considered as though he had been retired at the time of such separation or return to inactive service. Any such officer, and any other officer of the Reserve Corps retired for a disability which was incurred in line of duty after December 6, 1941, and prior to July 1, 1944, shall be entitled, for periods both before and after the date of the enactment of this section, to the same retired pay to which he would have been entitled if such section 211, as amended simultaneously with the enactment of this section, had been in effect on and after December 7, 1941."

BILLS AND RESOLUTION PASSED OVER

The bill (S. 1481) to authorize the Board of Commissioners of the District of Columbia to establish daylight-saving time in the District was announced as next in order.

Mr. WHERRY. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 2298) to amend the Interstate Commerce Act, as amended, and for other purposes, was announced as next in order.

Mr. WHERRY. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 84) to amend the Nationality Act of 1940 as amended, was announced as next in order.

Mr. RUSSELL. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1372) authorizing the Wyandotte Tribe of Oklahoma to sell its tribal cemetery, was announced as next in order.

Mr. WHERRY. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The resolution (S. Res. 150) to discharge the Committee on the Judiciary from the further consideration of Senate Resolution 116 was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDENT pro tempore. The resolution will be passed over.

RETIREMENT OF CERTAIN PERSONS IN THE BUREAU OF NARCOTICS

The bill (S. 1089) to amend the Civil Service Retirement Act of May 29, 1930,

was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the first section of the Civil Service Retirement Act of May 29, 1930, as amended, is amended by adding at the end thereof the following new subsection:

"(f) Any agent, agent in charge, field supervisor, district supervisor, assistant to the Commissioner, Deputy Commissioner, or Commissioner of the Bureau of Narcotics of the Department of the Treasury, who is not less than 50 years of age and has rendered 20 years or more of service in one or more of the positions enumerated, may, on his own application and with the consent of the Secretary of the Treasury, retire from the service. Any such person shall upon retirement be entitled to an immediate annuity equal to 2 percent of his average basic salary for the 5 years next preceding the date of his retirement, multiplied by the number of years of such service, not exceeding 30 years."

Mr. BYRD subsequently said: Mr. President, what action was taken with regard to Senate bill 1089?

The PRESIDENT pro tempore. The bill was passed.

Mr. BYRD. I ask for a reconsideration of the vote by which the bill was passed.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, the vote is reconsidered, and the bill will be restored to the calendar.

BILLS AND RESOLUTION PASSED OVER

The resolution (S. Res. 144) authorizing an investigation of law enforcement and police administration in the District of Columbia was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDENT pro tempore. The resolution will be passed over.

The bill (S. 48) to provide for the demonstration of public library service in areas without such service or with inadequate library facilities was announced as next in order.

Mr. WHERRY. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 3051) to amend the act of July 19, 1940, and to amend section 2 and repeal the profit-limitation and certain other limiting provisions of the act of March 27, 1934, was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDENT pro tempore. The bill will be passed over.

AMENDMENT OF VETERANS' PREFERENCE ACT OF JUNE 27, 1944

The bill (S. 1493) to amend section 19 of the Veterans' Preference Act of June 27, 1944, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the final period in section 19 of the Veterans' Preference Act of 1944 (58 Stat. 387), be changed to a semicolon and that the following be added thereto: "*Provided*, That any recommendation by the Civil Service Commission, submitted to any Federal agency, on the basis of the appeal of any preference eligible, employee or former employee, shall be complied with by such agency."

BILLS PASSED OVER

The bill (S. 1356) for the incorporation of the Franco-American War Veterans was announced as next in order.

Mr. CORDON. Mr. President, reserving the right to object, this bill and similar bills were before the Senate in the last session. At that time I objected to this bill and others the purpose of which was to grant national charters to veterans in specific categories. I based my objection on my belief that it is unwise to grant a Federal charter to veterans organizations unless the qualifications are such as to admit to membership any veterans of the particular war in question without reference to religion or antecedents, or without any other qualification than that the veterans served and were honorably discharged from the service. I still entertain that feeling, Mr. President. On the other hand, so far as I know, there is no objection elsewhere in this body, and if that be the case I can see no immediate object to be served in continuing to present these bills or requiring that they be presented as the original order of business, with the loss of time entailed. Therefore, although I continue to have the same feeling, I shall not object to any of the several bills on that subject.

Mr. OVERTON. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 430) to amend the Civil Service Retirement Act, approved May 29, 1930, as amended, so as to make such act applicable to officers and employees of national farm-loan associations and production-credit associations, was announced as next in order.

Mr. TAFT. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1557) to incorporate the Catholic War Veterans of the United States of America was announced as next in order.

Mr. BALDWIN. Mr. President, this bill and two similar ones have been on the calendar for a considerable length of time. They were on the calendar in the middle of last spring. Although they have been previously explained, I should be perfectly willing to explain them again. I think, however, in order to save our time, we might set these bills down for a definite time so they can be disposed of. I would ask, Mr. President, that the three bills referred to be made the order of business following the decision of the Senate on the St. Lawrence seaway. I am referring to the bill for the incorporation of the Franco-American War Veterans, the bill to incorporate the Catholic War Veterans, and the bill to incorporate the Jewish War Veterans.

Mr. WHERRY. That would require unanimous consent, would it not, because of the agreement under which we are now operating?

The PRESIDENT pro tempore. It would.

Mr. WHERRY. I feel that I should suggest that as soon as the St. Lawrence seaway matter is disposed of the Senator can make his request. The Senator's motion would then be in order.

The PRESIDENT pro tempore. Does the Senator from Nebraska object to the present request?

Mr. WHERRY. My feeling is that we are working on a call of the calendar under a unanimous-consent agreement. The request cannot be effected unless it be agreed to by unanimous consent. There are those who would possibly like to argue the question. In order to expedite matters I would suggest that the request be not taken up until the pending matters have been disposed of. I dislike to object to a unanimous-consent request, but, on the other hand, it might involve discussion which would delay the St. Lawrence seaway matter. After the St. Lawrence seaway debate has been concluded, the Senator's request will be in order.

The PRESIDENT pro tempore. Objection is heard, and the bill will be passed over.

Mr. WHERRY subsequently said: If the Senator will permit me, I would like to state for the RECORD, returning to Calendar 702, Senate bill 1557, and Calendar 704, Senate bill 1375, that I have no personal objection to those bills. The ruling of the Chair was that there was objection, and for fear the Chair might have been referring to the Senator from Nebraska, I wish to say that I was referring to the procedure, in view of the unanimous-consent request under which we are laboring. But I want it perfectly understood that I am not personally objecting to either one of these bills.

The bill (S. 1375) to incorporate the Jewish War Veterans of the United States of America was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 3978) to provide for the temporary advancement in ranks and increase in salary of lieutenants in the Metropolitan Police force of the District of Columbia, serving as supervisors of certain squads was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1663) to prohibit the payment of retirement annuities to former Members of Congress convicted of offenses involving the improper use of authority, influence, power, or privileges as Members of Congress was announced as next in order.

SEVERAL SENATORS. Over.

The PRESIDENT pro tempore. The bill will be passed over.

CARIBBEAN COMMISSION

The Senate proceeded to consider the joint resolution (H. J. Res. 231) providing for membership and participation by the United States in the Caribbean Commission and authorizing an appropriation therefor, which had been reported from the Committee on Foreign Relations with amendments.

Mr. TAFT. Mr. President, I made an objection to this resolution on several occasions when it was reached on the

calendar. I wish to withdraw my objection. I have gone into the whole matter of the Caribbean Commission. I think the work it is doing is good, and I hope there will be no further objection to the resolution.

The PRESIDENT pro tempore. If the Chair may be permitted to say so, he would like to thank the Senator from Ohio for withdrawing his objection. The resolution involves a very modest sort of an adventure. It involves only cooperative civil relationships in the Caribbean area, and it is a matter with which our Latin-American friends are greatly concerned.

The clerk will state the amendments of the committee.

The amendments of the Committee on Foreign Relations were, on page 2, in line 14, after the word "appropriated", to strike out "not more than $142,000 annually"; in line 16 to strike out "For" and insert "Not more than $142,000 annually"; on line 21, to strike out the word "For" and insert "Such additional sums as may be needed for."

The amendments were agreed to.

The amendments were ordered to be engrossed and the joint resolution to be read a third time.

The joint resolution was read the third time and passed.

BILLS PASSED OVER

The bill (S. 968) to authorize the Public Utilities Commission of the District of Columbia to limit the number of taxicabs licensed and operated in the District of Columbia was announced as next in order.

Mr. LANGER. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (H. R. 4042) to control the export to foreign countries of gasoline and petroleum products from the United States was announced as next in order.

Mr. BARKLEY. Over.

The PRESIDENT pro tempore. The bill will be passed over.

The bill (S. 1653) to control the export to foreign countries of gasoline and petroleum products from the United States was announced as next in order.

Mr. BARKLEY. Over.

The PRESIDENT pro tempore. The bill will be passed over.

NATIONAL ARCHIVES OF THE UNITED STATES GOVERNMENT

The bill (H. R. 1350) to amend the act to establish a National Archives of the United States Government and for other purposes, was announced as next in order.

Mr. CORDON. Mr. President, I should like to have an explanation of the bill.

Mr. O'CONOR. Mr. President, the purpose of the bill is to provide for the transfer of records which are now occupying space in various departments to the National Archives. The Government has imposed restrictions upon those records which last only for the duration of the particular agency involved, so that the Archivist is at a loss to continue the restrictions in effect after the expiration of the term of the particular agency head who does transfer them. Also, another difficulty has been encountered, in that the department heads are unable to certify to records which have been transferred to the National Archives, and which they consider out of their jurisdiction.

Mr. CORDON. Mr. President, I recall that a bill of this general nature was before the Senate at another time. At that time I made objection to it. Later I had conversations with the attorney for the Archivist in an attempt to correct the language of the bill. I have not had an opportunity to examine this particular bill. Therefore I ask that it go over temporarily.

Mr. O'CONOR. Mr. President, I shall be very glad to have that done.

The PRESIDENT pro tempore. Objection being heard, the bill will be passed over temporarily.

The clerk will state the next bill on the calendar.

BILL PASSED OVER

The bill (S. 1015) to amend section 7 of the act of June 25, 1910, as amended, to reduce the interest rate on postal savings deposits to 1 percent per annum was announced as next in order.

Mr. BARKLEY. Over.

The PRESIDENT pro tempore. The bill will be passed over.

PROHIBITION AGAINST ENTERING CLOSED NATIONAL FOREST LAND

The bill (H. R. 1826) making it a petty offense to enter any national-forest land while it is closed to the public was announced as next in order.

Mr. MAGNUSON. Mr. President, at the last call of the calendar I objected to the consideration of this bill. Since then I have discussed the bill with the national-forest officers, and I wish the RECORD to show that I have now withdrawn objection.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered, ordered to a third reading, read the third time, and passed.

JOINT RESOLUTION PASSED OVER

The joint resolution (S. J. Res. 37) requesting the President to proclaim February 1 as National Freedom Day was announced as next in order.

Mr. McKELLAR. Let the joint resolution go over.

The PRESIDENT pro tempore. The joint resolution will be passed over.

FREE IMPORTATION OF SYNTHETIC RUBBER SCRAP

The bill (H. R. 2029) to provide for the free importation of synthetic rubber scrap was announced as next in order.

Mr. WHERRY. Over.

Mr. MILLIKIN. Mr. President, I should like to learn what the objection is.

Mr. WHERRY. I have on my desk a note that the junior Senator from Colorado would like to have me object to the passage of this bill during the call of the calendar. [Laughter.]

Mr. MILLIKIN. I thank the Senator for his vigilance.

Mr. President, I should like to have the bill considered at this time, and I have an amendment which I should like to send to the desk and have stated.

The PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill (H. R. 2029) to provide for the free importation of synthetic rubber scrap.

Mr. MILLIKIN. Mr. President, I send my amendment to the desk and ask that it be stated.

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. On page 1, in line 6, after the word "refuse", it is proposed to strike out the words "india or synthetic" and insert in lieu thereof "synthetic or india."

Mr. MILLIKIN. Mr. President, the amendment is entirely technical in nature, and is for the purpose of clarifying the bill.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Colorado.

Mr. REVERCOMB. Mr. President, reserving the right to object, let me inquire from the Senator from Colorado whether this provides any means or requirement for the closing of synthetic plants, or will it result in the closing of synthetic plants in this country?

Mr. MILLIKIN. There is no such purpose, and the bill cannot be given such a construction, not even under the farthest reach of the most violent imagination.

Mr. REVERCOMB. I think that is a very good answer of assurance. [Laughter.]

Mr. BRICKER. Mr. President, will the Senator yield to me?

Mr. MILLIKIN. I yield.

Mr. BRICKER. How much rubber of this sort has been imported into this country during the past year?

Mr. MILLIKIN. We imported from Canada 500 tons in 1945, 800 tons in 1946, and 700 tons in the first 3 months of 1947, as compared with the current domestic consumption of natural and synthetic rubber scrap in the amount of approximately 400,000 tons a year.

Mr. BRICKER. Are we now importing such rubber from any other country which is producing synthetic rubber?

Mr. MILLIKIN. We are now importing most of it from Canada.

Mr. President, the purpose of the amendment is to put synthetic-rubber scrap on the same basis of preference with india-rubber scrap.

Mr. TAFT. Mr. President, this measure does not change the synthetic-rubber situation in any way. It relates only to scrap. Most of the rubber articles are originally made in this country and exported, and now the scrap is being sent back to this country.

Mr. MILLIKIN. Mr. President, at the present time, under a miscellaneous classification under the Tariff Act of 1930, the synthetic-rubber scrap would carry a 7½ percent ad valorem duty as waste not specifically provided for. This measure takes the synthetic scrap out of that miscellaneous category and

puts it under the same category with india-rubber scrap or refuse.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Colorado.

The amendment was agreed to.

The PRESIDENT pro tempore. The question now is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

PAYMENT OF CLAIMS TO NEUTRAL COUNTRIES

The Senate proceeded to consider the bill (S. 1605) to provide for payment of compensation to the governments of foreign countries for losses and damages inflicted on neutral territory during World War II by United States armed forces in violation of neutral rights, and authorizing appropriations therefor, which had been reported from the Committee on Foreign Relations with amendments.

The amendments were, on page 1, line 5, after the words "Secretary of", to strike out "War or the Secretary of the Navy" and insert "National Defense"; on page 2, line 6, after the words "prior to", to strike out "January 1, 1948" and insert "July 1, 1948: *And provided further*, That the total amount of compensation authorized herein shall not exceed $21,000,000," so as to make the bill read:

Be it enacted, etc., That the Secretary of State is authorized to pay to the governments of foreign countries such sums as the Secretary of State, in consultation with the Secretary of National Defense, shall determine to be necessary to provide compensation, including interest, for losses and damages inflicted on persons or property in neutral territory during World War II by units of the United States armed forces in violation of neutral rights: *Provided, however*, That no compensation shall be paid under this act unless the claim shall have been presented prior to July 1, 1948: *And provided further*, That the total amount of compensation authorized herein shall not exceed $21,000,000.

SEC. 2. Appropriations are hereby authorized to carry out the purpose of this act.

Mr. SMITH. Mr. President, on December 18, the Committee on Foreign Relations reported favorably to the Senate a bill (S. 1605) to provide for payment of compensation to the governments of foreign countries for losses and damages inflicted on neutral territory during World War II by United States armed forces in violation of neutral rights, and authorizing appropriations therefor. That bill provided for authorization for the payment of not to exceed $21,000,000 to foreign governments for such losses and damages inflicted on neutral territory during World War II by the armed forces of the United States, in violation of neutral rights.

When the matter came up during the previous call of the calendar, objection was made by several Senators, including the Senator from Wyoming [Mr. ROBERTSON]. The Senator from Nebraska [Mr. WHERRY] questioned me in regard to the matter. Their objection was that they did not wish to have a bill of this sort left open, providing authority to adjust claims which have not already been liquidated.

Consequently, at their suggestion I have had prepared, and the committee now submits, an amended bill which provides for the immediate payment of $12,000,000 to the Government of Switzerland as partial compensation for damages inflicted on Swiss territory during World War II by the United States armed forces, in violation of neutral rights.

As stated in the committee report, Switzerland has claims of $19,500,000 for damages caused by United States armed forces in violation of Swiss neutrality. Although investigation of the claims has not been completed, it has been determined that upward of $16,000,000 is due the Swiss Government for the claims which have been investigated.

The United States already has paid $4,070,183.31 to Switzerland, through allotments made from the President's Emergency Fund for National Defense. An appropriation of $12,000,000 is needed at this time to enable our Government to make further payment to Switzerland for items of claims which already have been investigated. One of the most immediate reasons for the enactment of the proposed legislation is the desirability of stopping the accrual of interest on the claims which already have been processed. Interest accrues on these claims in the amount of several hundred thousand dollars a year.

So, Mr. President, I now send to the desk an amendment in the nature of a substitute, providing for a straight-out payment at this time of $12,000,000, which amount already has been determined by our representatives as being due the Swiss people. I think this payment should be made now; and when further claims arise from the Swiss Government, as fast as they are reported and justified I shall introduce further legislation to take care of them.

Mr. ELLENDER. Mr. President, as I understand the substitute, it limits the entire amount of payment to $21,000,000; is that correct?

Mr. SMITH. No. The original bill provided an over-all ceiling of $21,000,000 for the entire amount of the claims. The amendment is in the nature of a complete substitute, and provides for the payment to Switzerland of $12,000,000, which all of us recognize is due the Swiss now.

Mr. ELLENDER. Is that all the bill as thus amended will do?

Mr. SMITH. Yes.

Mr. President, I should like to have the substitute reported from the desk, so that all Senators may know exactly what we shall be enacting.

Mr. RUSSELL. Mr. President, if the Senator will yield to me, I should like to say that of course we shall have to pay these claims, but I do not like to see them dragged along. If we keep on making payments on them, new claims may be brought forward from time to time. Why has there been such delay in processing the claims? It has been over 2 years since any damage has been done by any war anywhere, and I should like to know why this delay has occurred. We should determine the claim finally, so that when we make payments we shall make final payment. It seems to me that someone has been very dilatory in having the final determination made.

Mr. SMITH. Mr. President, I think I can answer the Senator on that point. The original bill, which was on the calendar, contemplated doing exactly what the Senator from Georgia has suggested. There was a difference of a million dollars or so, but we placed a $21,000,000 over-all ceiling on the entire matter, and provided for leaving the adjustment to the Secretary of State and the Secretary of the National Defense Establishment, so that together they could determine the exact amount of the claims.

However, objection to such a provision was made during discussion of the bill on the floor of the Senate, on the ground that we should not give an open hand to anyone in connection with the adjustment of these claims.

So I now submit a measure providing for payment of the actual amount of money which we have determined is due Switzerland today.

The reason for the delay is that these claims arise from bombings of the city of Schaffhausen, on the Swiss border. Private claims were made by the Swiss people to their own government, and were taken care of by their government. Then the Swiss Government made claim on the United States. Naturally, the Swiss people did not make claim on the United States Government, but made claim on their own government, and now the Swiss Government has made claim upon the Government of the United States.

We at once set up, through the Army, our regular adjustment machinery to discuss every one of the claims. There were hundreds of claims from different individuals in this area, and as fast as can be done, our machinery is having those claims proved. Up to date, as I stated earlier, we have discovered that we owe on the claims upward of $16,000,000. The payment of $12,000,000 in addition to the $4,000,000, plus, which we have heretofore paid, will take care of our obligation. I have served notice on the Senate that when another claim arises, because of our adoption of the practice of approving only such claims as are certified to us as closed, I shall then have to bring in other bills. I cannot help that. It would have been better, in my judgment, to have had one over-all bill giving authority to the Secretary of Defense and the Secretary of State to adjust the balances remaining, which would be less than $2,000,000 over what we admit.

Mr. RUSSELL. Can the Senator assure the Senate that the $21,000,000 level in the bill to which he refers, which he is now eliminating, would have been sufficient to pay and to have wound up all the claims?

Mr. SMITH. I am sure we know of every violation of neutral territory that occurred during the war, and that was an all-inclusive figure. There was a claim from the Vatican that is now being adjusted. I forget certain other minor claims.

Mr. RUSSELL. Does it include the San Marino claim?

Mr. SMITH. Yes. I can say, from the best information I can obtain from the War Department, that $21,000,000 is a higher figure than we shall actually have to pay when these claims are adjusted, but I feel it is only just to Switzerland now not to keep the Swiss people waiting to be paid the amount to which they are definitely entitled, and which we admit, just because we are holding up other matters.

Mr. RUSSELL. We are not keeping the Swiss people waiting, because the Swiss Government has already paid its nationals, and all it is doing is running an interest bill against the United States, which is why I did not object to the consideration of the bill.

Mr. SMITH. That is the reason why I am urging payment, because there is a ceiling.

Mr. RUSSELL. That is better than having them coming up for consideration piecemeal. It is my observation that we have never won one of these piecemeal procedures, that we always wind up by paying more in the long run than we would have paid had there been an entire settlement at the start.

Mr. WHERRY. Mr. President, I should like to state for the RECORD that I did not object to this claim when it was presented the last time on the calendar. I interrogated the Senator. I felt that approving the $21,000,000 would provide a ceiling, and that it was an invitation to countries not to file their claims until the claims had been proved. I simply interrogated the Senator. The distinguished Senator from Wyoming then objected to paying claims which had not yet been proved, but agreed to authorize an over-all ceiling to pay the claims that might come in afterward from other countries. If all the claims were here and proved, and the ceiling established, I think it would be agreeable to everyone to pay them. The method now proposed is entirely satisfactory to the Senator from Wyoming. It certainly meets with my approval, and I think it is a proper way to proceed, because we will be paying now a claim which has been proved, rather than placing a ceiling on claims, which might be an invitation to other countries to come in and establish claims which otherwise might not be made.

The PRESIDENT pro tempore. In order to keep the parliamentary situation straight, the question is on agreeing to the committee amendments.

The amendments were agreed to.

The PRESIDENT pro tempore. The Senator from New Jersey offers a substitute, which the clerk will state.

The CHIEF CLERK. It is proposed to strike out all after the enacting clause, and in lieu thereof to insert the following:

That the Secretary of State is authorized to pay to the Government of Switzerland the sum of $12,000,000 which the Secretary of State, in consultation with the Secretary of Defense, has determined to be due to the Government of Switzerland as partial compensation, including interest, for losses and damages inflicted on persons and property in Switzerland during World War II by units of the United States armed forces in violation of neutral rights.

SEC. 2. Appropriations are hereby authorized to carry out the purpose of this act.

The PRESIDENT pro tempore. The question then is on agreeing to the substitute for the amended committee bill, submitted by the Senator from New Jersey.

The amendment in the nature of a substitute was agreed to.

The PRESIDENT pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to provide for the payment of a sum not to exceed $12,000,000 to the Swiss Government as partial compensation for damage inflicted on Swiss territory during World War II by United States armed forces in violation of neutral rights, and authorizing appropriations therefor."

DEPARTMENT OF HEALTH, EDUCATION, AND SECURITY

Mr. McMAHON. Mr. President, I ask unanimous consent to return to Calendar No. 249, Senate bill 140, a bill to create an executive department of the Government to be known as the Department of Health, Education, and Security. I made objection when the bill was called. I think I was the only objector. I withdraw my objection.

The PRESIDENT pro tempore. The Senator asks unanimous consent to recur to Calendar Order 249, Senate bill 140. Is there objection?

Mr. BYRD. I object.

The PRESIDENT pro tempore. Objection is heard.

JOINT RESOLUTION PASSED OVER

The CHIEF CLERK. The joint resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof.

Mr. WHERRY. Over.

The PRESIDENT pro tempore. The joint resolution will go over.

AUTHORITY FOR THE ARMY AND NAVY TO ACCEPT GIFTS, DEVISES, AND BEQUESTS

The Senate proceeded to consider the bill (S. 1528) to authorize the Secretary of War and the Secretary of the Navy to accept and use gifts, devises, and bequests for schools, hospitals, libraries, museums, cemeteries, and other institutions under the jurisdiction of the War Department or Navy Department, and for other purposes, which had been reported from the Committee on Armed Services, with an amendment, to strike out all after the enacting clause, and to insert the following:

That the Secretary of the Army, the Secretary of the Navy, the Secretary of the Air Force, or the Secretary of the Treasury is hereby authorized in his discretion to accept, receive, hold, administer, and expend any gift, devise, or bequest of property, real or personal, made on condition that it be used for the benefit of, or in connection with, the establishment, operation, maintenance, or administration of any school, hospital, library, museum, cemetery, or other institution or organization under the jurisdiction of the Department of the Army or the Army, the Department of the Navy or the Navy, the Department of the Air Force or the Air Force, or the Treasury Department or the Coast Guard, respectively. The Secretary of the Army, the Secretary of the Navy, the Secretary of the Air Force, or the Secretary of the Treasury, as the case may be, is further authorized to pay all necessary fees, charges, and expenses in connection with the conveyance or transfer of any such gift, devise, or bequest.

SEC. 2. Gifts or bequests of money or the proceeds from sales of other property received as gifts or devises pursuant to this act shall be deposited in the Treasury of the United States under the title "United States Department of the Army General Gift Fund," "United States Department of the Navy General Gift Fund," "United States Department of the Air Force General Gift Fund," or "United States Coast Guard General Gift Fund," as the case may be, and any funds so deposited shall be subject to disbursement by the Secretary of the Army, the Secretary of the Navy, the Secretary of the Air Force, or the Secretary of the Treasury, as the case may be, for the benefit or use of the designated institution or organization, subject to the terms and conditions of any particular gift, devise, or bequest.

SEC. 3. For the purpose of Federal income, estate, and gift taxes, any gift, devise or bequest of property, real or personal, accepted by the Secretary of the Army, the Secretary of the Navy, the Secretary of the Air Force, or the Secretary of the Treasury under authority of this act shall be deemed to be a gift, devise, or bequest to or for the use of the United States.

SEC. 4. The Secretary of the Treasury is authorized, upon request of the Secretary of the Army, the Secretary of the Navy, the Secretary of the Air Force, or, in his own discretion insofar as the Coast Guard general gift fund is concerned, as the case may be, to invest, reinvest, or retain investments of the money or securities composing the United States Department of the Army general gift fund, the United States Department of the Navy general gift fund, the United States Department of the Air Force general gift fund, or the United States Coast Guard general gift fund, as the case may be, or any part thereof deposited in the Treasury pursuant to section 2 of this act, in securities of the United States of America or in securities guaranteed as to principal and interest by the United States of America. The interest and profits accruing from such securities shall be deposited to the credit of the United States Department of the Army general gift fund, the United States Department of the Navy general gift fund, the United States Department of the Air Force general gift fund, or the United States Coast Guard general gift fund, as the case may be, and will be available for disbursement as provided in section 2 of this act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to authorize the Secretary of the Army, the Secretary of the Navy, the Secretary of the Air Force, or the Secretary of the Treasury to accept and use gifts, devises, and bequests for schools, hospitals, libraries, cemeteries, and other institutions under the jurisdiction of the Department of the Army, the Department of the Navy, the Department of the Air Force, or the Department of the Treasury respectively, and for other purposes."

BILL PASSED OVER

The bill (H. R. 2239) to amend section 13 (a) of the Surplus Property Act of 1944, as amended, was announced as the next in order.

SEVERAL SENATORS. Over.

The PRESIDENT pro tempore. The bill will go over.

TRANSPORTATION OF IRON ORE BY VESSELS OF CANADIAN REGISTRY

The Senate proceeded to consider the joint resolution (S. J. Res. 172) to authorize vessels of Canadian registry to transport iron ore between United States ports on the Great Lakes during 1948.

Mr. TAFT. Mr. President, may we have an explanation of the joint resolution?

Mr. REED. Mr. President, the resolution is only to extend the use of Canadian vessels to ore-carrying purposes. As the Senator from Ohio knows, a vessel may not operate between ports, both of which are within the United States, unless it be a vessel of American registry operating coastwise. In 1941, because of the volume of traffic on the Lakes, in coal and ore particularly, and in grain, it was necessary to extend the regulation and to change the law to permit Canadian vessels to participate in such traffic. That permission was continued under the War Powers Act. When the war powers were repealed it became necessary to extend the privilege of using Canadian vessels. It is expected there will be more iron ore moved in 1948 than was moved in 1947. The joint resolution merely continues a practice that has been followed continuously since 1941. The report of the Committee on Interstate and Foreign Commerce is unanimous, and the measure is supported by all the interests involved.

The PRESIDENT pro tempore. The question is on the engrossment and third reading of the joint resolution.

The joint resolution was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Resolved, etc., That by reason of the continued extraordinary requirements of the iron and steel industry for Lake Superior iron ore, notwithstanding the provisions of section 27 of the act of Congress approved June 5, 1920 (41 Stat. 999), as amended by act of Congress approved April 11, 1935 (49 Stat. 154), and by act of Congress approved July 2, 1935 (49 Stat. 442), or the provisions of any other act of Congress or regulation, vessels of Canadian registry shall be permitted to transport iron ore between United States ports on the Great Lakes during the year 1948 or until such date prior to the end of said year as the Congress by concurrent resolution or the President by proclamation may designate.

BILL PASSED OVER

The bill (S. 1004) to amend the Atomic Energy Act of 1946, so as to provide that no person shall be appointed as a member of the Atomic Energy Commission or as general manager of such Commission until an investigation, with respect to character, associations, and loyalty of such persons shall have been made by the FBI was announced as next in order.

Mr. McKELLAR (and other Senators). Over.

Mr. KNOWLAND. Mr. President, I should just like to request that Senators withhold their objection, so that I may make a brief explanation at this time regarding the bill.

Mr. McKELLAR. I am perfectly willing to withhold the objection so far as I am concerned. It may be I shall be in favor of the bill when I learn about it, but at the present time I reserve the right to object.

Mr. KNOWLAND. I recognize there is some objection to the bill. However, I intend to ask for early consideration of the proposed legislation in the Senate. It grows out of a loophole that was found in the law at the time of the confirmation of members of the Atomic Energy Commission very early in 1947. As the Members of the Senate know, every employee of the Commission is required to have an FBI check. That does not apply to Members of the Commission, who have complete control over the situation. When the Congress decided that this question of atomic power was so different from any other question ever presented to the Congress they set up a commission with an unprecedented amount of power. It has control of something which can, for good or evil, have a tremendous effect not only on the American people but on the people of the whole world.

At the time of the confirmation early last year, the question was raised on the floor of the Senate as to whether or not there had been a complete investigation by the FBI. It was pointed out at that time that there had not been such an investigation, that the President had merely asked the FBI for what is known as a file check. While the members of the Atomic Energy Committee feel that there is sufficient power in the Atomic Energy Act giving to the Atomic Energy Committee power to require of the FBI that they furnish all the information they may have, there is nothing in the act that requires the same kind of investigation for the members of the Commission as is required concerning the employees of the Commission. It is the opinion of the Atomic Energy Committee that this does not in any way interfere with the President's constitutional right to make appointments. Since the Senate itself has a responsibility in the confirmation of the appointments, we believe that it is proper; in fact, that it is essential that this type of investigation be made and the facts presented to the Atomic Energy Committee prior to their acting upon appointments by the President of the United States. It in no way interferes with the President's right to appoint, but, the Senate having an equal responsibility, it gives them the information which I believe to be essential to the proper functioning of this body in discharging its responsibilities and to the security of the Nation.

The PRESIDENT pro tempore. Is there objection to the consideration of the bill?

Mr. McKELLAR (and other Senators). Over.

The PRESIDENT pro tempore. The bill goes over, under objection.

JOINT RESOLUTION PASSED OVER

The joint resolution (S. J. Res. 164) to authorize the Regional Agricultural Credit Corporation of Washington, D. C., to make loans to our farmers, and for other purposes, was announced as next in order.

Mr. BYRD. Over.

The PRESIDENT pro tempore. Objection is heard, and the joint resolution will be passed over.

REIMBURSEMENT TO POST OFFICE DEPARTMENT BY THE NAVY DEPARTMENT

The bill (S. 1520) to amend section 3 of the act of August 24, 1912 (37 Stat. 554), as amended, so as to provide reimbursement to the Post Office Department by the Navy Department for shortages in postal accounts occurring while commissioned officers of the Navy and Marine Corps are designated custodians of postal effects was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 3 of the act of August 24, 1912 (37 Stat. 554), as amended (39 U. S. C., Supp. V, 135), is hereby further amended to read as follows:

"Every Navy mail clerk and assistant Navy mail clerk and every Coast Guard mail clerk and assistant Coast Guard mail clerk shall give bond to the United States in such penal sum as the Postmaster General may deem sufficient for the faithful performance of his duties as such clerk: *Provided*, That the Secretary of the Navy may waive the giving of bond in the cases of Navy mail clerks and assistant Navy mail clerks. Navy mail clerks and assistant Navy mail clerks whose bonds are so waived shall not be entitled to the extra compensation otherwise authorized to be paid them by law. The Post Office Department shall be reimbursed annually by the Navy Department in an amount equal to funds embezzled by unbonded Navy mail clerks, assistant Navy mail clerks, and commissioned officers of the Navy and Marine Corps, and funds expended in payment of claims arising from errors, losses, or defalcations by unbonded Navy mail clerks, assistant Navy mail clerks, and commissioned officers of the Navy and Marine Corps: *Provided further*, That 'commissioned officers of the Navy and Marine Corps' as used in the foregoing provision shall be construed to mean only those commissioned officers of the Navy and Marine Corps who have been designated custodians of postal effects by the commanding officer."

SEC. 2. There are hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such amounts as may be necessary to carry out the provisions of this act.

TOURS OF DUTY AT CERTAIN FOREIGN STATIONS

The Senate proceeded to consider the bill (S. 1195) to repeal the laws relating to the length of tours of duty of officers and enlisted men of the Army at certain foreign stations, which had been reported from the Committee on Armed Services with an amendment, to add the following new section at the end of the bill:

SEC. 2. The Secretary of Defense shall advise the Committees on Armed Services of the Senate and the House of Representatives on the first of April and the first of October of each year concerning the regulations

governing the lengths of tours of duty outside the continental United States of personnel of the Army, and Air Force, and of any changes therein.

So as to make the bill read:

Be it enacted, etc., That that portion of the act of March 4, 1915, as amended (10 U. S. C. 17), which reads "No officer or enlisted man of the Army shall, except upon his own request, be required to serve in a single tour of duty for more than 2 years in the Philippine Islands, on the Asiatic station, or in China, Hawaii, Puerto Rico, or the Panama Canal Zone, except in case of insurrection or of actual or threatened hostilities and except in the discretion of the Secretary of War for temporary emergencies: *Provided,* That the foregoing provision shall not apply to the organization known as the 'Philippine Scouts' " is hereby repealed.

"SEC. 2. The Secretary of Defense shall advise the Committees on Armed Services of the Senate and the House of Representatives on the first of April and the first of October of each year concerning the regulations governing the length of tours of duty outside the continental United States of personnel of the Army, and Air Force, and of any changes therein."

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

TRANSFER OF LAND IN THE FORT WINGATE MILITARY RESERVE, N. MEX.

The Senate proceeded to consider the bill (S. 1478) to authorize the transfer of lands in the Fort Wingate Military Reserve, N. Mex., from the War Department to the Interior Department, which had been reported from the Committee on Armed Services, with amendments, on page 1, line 3, after the words "Secretary of", to strike out "War" and insert "the Army"; and in line 5, after the words "Department of", to strike out "War" and insert "the Army", so as to make the bill read:

Be it enacted, etc., That the Secretary of the Army is hereby authorized and directed to transfer from the jurisdiction of the Department of the Army to the jurisdiction of the Department of the Interior for use by the Bureau of Indian Affairs that portion of the Fort Wingate Military Reserve in the State of New Mexico bounded and described as follows:

Beginning at the point of intersection of the south boundary of unsurveyed township 15 north, range 16 west, New Mexico principal meridian, with the existing Wingate Ordnance Depot boundary fence; said point of intersection being approximately four and three-tenths miles easterly from the southeast corner of lot 4, section 34, township 15 north, range 17 west; then along said boundary fence approximately north sixty degrees east one-quarter mile to the western boundary of the right-of-way of the western branch of the road from Fort Wingate to Wingate railroad station; thence along the western boundary of the right-of-way of said road approximately north eight degrees east two and two-tenths miles to the southern boundary of the right-of-way of the Atchison, Topeka and Santa Fe Railroad; thence along the southern boundary of said right-of-way approximately south seventy-two degrees east one and five-tenths miles, south seventy-six degrees east two and two-tenths miles, and east two miles to the intersection of the southern boundary of said right-of-way with the east boundary of the Fort Wingate Military Reservation; thence south along the east boundary of the said military reservation approximately one and two-tenths miles to the northwest corner of section 5, township 14 north, range 15 west; thence west approximately three miles to the point for the quarter-section corner common to sections 2 and 35, unsurveyed townships 14 and 15 north, range 16 west; thence south approximately three miles to the point for the quarter-section corner common to sections 14 and 23, township 14 north, range 16 west; thence west approximately four and two-tenths miles to the southeast corner of the Wingate Ordnance Depot; thence north approximately one and nine-tenths miles to the existing Wingate Ordnance Depot boundary fence; thence along said fence approximately north forty-six degrees east one-half mile; thence along said fence approximately north sixty degrees east one and one-half miles to the point of beginning. The tract as described contains approximately thirteen thousand one hundred and fifty acres.

Title to the land so transferred shall remain in the United States for the use of the Bureau of Indian Affairs.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to authorize the transfer of lands in the Fort Wingate Military Reserve, N. Mex., from the Department of the Army to the Interior Department."

AUTHORITY OF MARITIME COMMISSION

The joint resolution (S. J. Res. 173) to continue until July 1, 1949, the authority of the Maritime Commission to sell, charter, and operate vessels, and for other purposes, was announced as next in order.

Mr. BARKLEY. Mr. President, the Senator from Alabama [Mr. SPARKMAN] is preparing a couple of amendments to this measure. They are not yet ready. On his behalf, I ask that the measure go over.

Mr. MAGNUSON. Mr. President, is that the last calendar number?

Mr. BARKLEY. Yes.

Mr. MAGNUSON. I did not hear what the Senator from Kentucky said.

Mr. BARKLEY. The Senator from Alabama [Mr. SPARKMAN] is preparing two amendments to the joint resolution, which he has not completed. On his behalf, I ask that the joint resolution go over.

The PRESIDENT pro tempore. Without objection, the joint resolution will be passed over.

Mr. REED. Mr. President, may I urge upon the Senator from Kentucky that time is of the essence with reference to the joint resolution just passed over. I am sorry that any Senator interested in the measure is not present. I should like to make a brief statement respecting the joint resolution, and urge that the Senator from Kentucky, if possible, get in contact with the Senator from Alabama to see if we cannot remove the objection he has to it.

Mr. BARKLEY. Mr. President, I am not asking that the measure go over permanently. The Senator from Alabama is not now on the floor. I think he is working on the amendments. I ask that the measure be passed over temporarily. Such action is frequently taken on the floor of the Senate.

The PRESIDENT pro tempore. Does the Senator withhold his objection for a moment?

Mr. BARKLEY. I withhold it for a moment.

Mr. MAGNUSON. Mr. President, I suggest that the Senator from Kentucky send for the Senator from Alabama so he may be present.

Mr. BARKLEY. I am objecting only on his behalf.

Mr. MAGNUSON. I am sure the Senator from Alabama does not appreciate the necessity for acting upon the measure today.

Mr. REED. Mr. President, if the Senator from Kentucky will withhold his objection, I should like to state, as briefly as I can, and within the time limit, the purpose of the joint resolution. There are three things which will be accomplished by the passage of the joint resolution. The first is the extension of the period in which the Maritime Commission may operate or sell vessels from February 29 this year to July 1, 1949. The President, in his message of December 2, recommended that that extension be made. All interests agree that the time ought to be extended. The shipping interests, the labor interests, the administration, and the Maritime Commission are all in agreement upon that point.

There is an amendment contained in the joint resolution which I shall discuss when we get to it.

Next, it is proposed to extend the time in which the Coast Guard may authorize the operation of vessels which do not fully conform to safety regulations. In other words, there is such a severe shortage of tankers that it is necessary to operate them sometimes even though such vessels may be loaded below the load line. That does not mean that such vessels are going to be operated without any regard for safety. In each case confirmation is required by the Coast Guard before the vessel is permitted to operate. The Coast Guard, however, agrees that the time should be extended. We have not made the progress in improving these Government-owned vessels it was thought might be made by this time. Therefore, if we are going to use the Government-owned vessels which cannot comply strictly with all the requirements of the safety rules, we have got to give the Coast Guard authority to waive certain requirements, and the joint resolution provides that that may be done.

There is an amendment to the joint resolution which provides that if the time is extended in which the Maritime Commission may sell or charter these vessels the Commission is forbidden to sell any of these Government-owned vessels to foreign governments or citizens of foreign governments. As a matter of fact, the Maritime Commission has never authorized the charter to anyone except a citizen of the United States. We had about 2,000 such vessels to begin with. About 1,000 of them have been sold, and a considerable number have gone to foreign governments.

Mr. WHERRY. Mr. President, will the Senator yield?

Mr. REED. I yield.

Mr. WHERRY. I think the RECORD ought to show certain facts. To begin with, I believe the authority in question ought to be renewed, or extended. I think particularly it ought to be extended so far as the chartering of vessels is concerned. I say to the distinguished Senator from Kansas that I make that statement with considerable reluctance, the reason being that the Small Business Committee of the Senate objected strenuously to the sale of 100 T–2 tankers to noncitizen applicants. Such sale, I think, is one of the chief reasons for the acute oil shortage which is developing in the United States today. I do not make that statement in a spirit of destructive criticism. I make the statement because it is a fact. If any amendments are offered to the joint resolution, it seems to me they ought to be in the form of directives, that these vessels should not be taken out of active service in plying coastwise, and hauling petroleum products from the Gulf States to seaboard ports, because an examination of the facts shows that petroleum is backing up at the production points, and that there are not sufficient supplies along the Atlantic seaboard, and at other points in the United States.

However, I think the proposal contained in the joint resolution offers the only way to operate successfully. I think the Maritime Commission should charter these vessels. I think every vessel that needs repair should be repaired, and should be brought into operation in the tanker fleet as quickly as possible. I agree with the purposes of the measure in toto, but I certainly feel that there should be some directive or directives issued, and that amendments to that effect should be placed in the measure.

I will say that the Maritime Commission was not in unanimous agreement with respect to the sale of the 100 T–2 tankers. In that connection, I wish to commend to the Senate the testimony by Commissioner Mellen, who objected violently to the sale of these vessels to noncitizens. Senators should read that testimony. If an amendment can be offerred to the Ship Sale Act of 1946, I think it should be adopted as a directive, and as indicating just how far the authority in question goes.

Personally I am not going to object to the joint resolution. The Small Business Committee stopped the sale of 16 vessels. That came about as a result of the presentation of the testimony before it. I think the matter has been very forcibly brought to the attention of the administration now. I pointed out that a shortage of oil would result from lack of transportation facilities. Now the shortage is upon us. I think that shortage has been called to the attention of the administration very forcibly. As I said, I shall not object to the joint resolution, but I do suggest that there should be a definition and a clarification made of the statute, so that the Maritime Commission may be advised in no uncertain terms that priority to citizen applicants should be given, rather than to noncitizen applicants.

Mr. MAGNUSON. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Let the Chair get the parliamentary situation straight. The Senate is proceeding now under the 5-minute rule. The Senator from Kentucky [Mr. BARKLEY] objected. Does the Senator withdraw his objection.

Mr. BARKLEY. The Senator from Alabama [Mr. SPARKMAN] has now come into the Chamber, and so far as I am concerned I have no objection.

The PRESIDENT pro tempore. Does the Senator from Alabama object to present consideration of the joint resolution?

Mr. SPARKMAN. Mr. President, I feel constrained to object to the present consideration of the joint resolution. I should like to state my reasons, as follows. Earlier today I received a memorandum from the Waterman Steamship Co., which has its home office in the State of Alabama, calling my attention to the fact that the joint resolution was to be called up today, and stating that they wished to have an amendment or two offered when the joint resolution was up for consideration. I know nothing about the joint resolution. It has been on the calendar for only a couple of days. I should like to have the opportunity to present at least the views of the Waterman Steamship Co.

Mr. MAGNUSON. Mr. President, will the Senator yield?

Mr. SPARKMAN. I yield.

Mr. MAGNUSON. I am sure the Senator from Alabama will find that those views were presented to the committee. The views of the Waterman Steamship Co. and of all other steamship companies were presented by the American Shipping Association. They had two or three amendments which they suggested. They were mainly interested in the amendments which are included in the measure prohibiting the sale by the Maritime Commission of ships to noncitizens, which has been the policy of the Commission for 4 or 5 months. There also was considerable discussion about the tanker situation. I might say, in order to clarify the record, that I agree with the Senator from Nebraska [Mr. WHERRY], but what actually happened was that the Maritime Commission told everyone who might be interested in buying tankers that tankers were available.

Mr. WHERRY. Mr. President, will the Senator yield?

Mr. MAGNUSON. Just a moment.

Mr. SPARKMAN. I have yielded to the Senator from Washington.

The PRESIDENT pro tempore. The Senator from Washington is recognized for 5 minutes.

Mr. MAGNUSON. The American citizen operators who might be interested in tankers did not take advantage of the offer. Some vessels were sold to noncitizens. The American citizen operators testified that they were asleep at the switch; that they did not realize the importance of buying these tankers. All the testimony was to that effect. They admitted that. The reason why we did not place in the measure the suggestion of the Senator from Nebraska, with which we all agree, is that there is not a single available tanker for anyone to buy, including citizens or noncitizens.

The other amendments were of minor, technical nature, with which the shipping people agreed. One of them, I believe, involves some technical consideration of register. They all agreed to those amendments. But the main objective was to clarify, by law, the announced policy of the Maritime Commission not to sell ships to noncitizens. That is in the law. I think we are all pretty much agreed on that point. I hope we can do something about this problem. This measure must pass the House. There must be opportunities for hearings in the House. I am sure that if the Waterman Steamship Co. has any further suggestions, the Senator from Kansas and I will be glad to bring such suggestions to the attention of the House committee. The authority expires at the end of this month. The President has asked for an extension of the authority, and has strongly urged it. If the authority is not continued, the entire American maritime situation will be disrupted. I hope the Senator will withdraw his objection. I know that the Senator from Kansas, the Senator from New Hampshire, and others of us who handled the joint resolution will be glad to present to the House committee any legitimate objection or amendment. However, time is of the essence.

Mr. SPARKMAN. Mr. President, I am not in a position to argue any point with the Senator from Washington. However, the joint resolution was placed on the calendar only Friday. Not until I received the calendar this morning did I know that it was on the calendar; and not until I started for the Senate Chamber did I know that my constituent was interested in having the Senate consider an amendment, which the Senator from Washington says is minor. It may be; I do not know. I see no reason why a unanimous-consent agreement could not be obtained to consider the joint resolution at a later date during the week. I do not ask for more than a couple of days' delay.

The PRESIDENT pro tempore. Does the Senator object to the present consideration of the joint resolution?

Mr. SPARKMAN. I must object.

The PRESIDENT pro tempore. Objection is heard. That concludes the calendar.

Mr. WHERRY. Mr. President, I wish to take this opportunity to correct the statement of the distinguished Senator from Washington [Mr. MAGNUSON], who made a statement relative to Senate Joint Resolution 173, Calendar 902, dealing with the sale and chartering of vessels by the Maritime Commission. He stated that the record of the T–2 tankers was that when the sale was made there were no citizen applications on file. That was the testimony of the shippers.

I invite the attention of Members of the Senate to the various reports made by the Small Business Committee, which show that as early as last July, when this subject was being investigated, the tankers were being used under charter. I believe that that is the way the tankers should be used, rather than to sell them to noncitizen applicants.

In September, at the time the announcement was made by the Department of State that it then had firm commitments with foreign countries—which it did not have—and when 51 of those vessels were being used under charter by the oil companies, because they are not in the transportation business, immediately the companies, which had relied upon chartering facilities through the Maritime Commission, submitted applications to buy the vessels. So at the time when the vessels were sold, at which time there were no firm commitments to foreign countries, there were 165 citizen applications on file. As I stated a moment ago, the reason for the chartering of the vessels was that the companies were not in the transportation business. They had relied upon operating those vessels under charter, under the American flag, to haul petroleum products. But when the policy was announced, as late as September, when Mr. Ball stated that there was ample transportation, and that the vessels would be sold to noncitizens, the applications were placed on file. If the distinguished Senator from Washington will examine the record, he will find that there were 165 citizen applications to buy those vessels when it became known that they were to go out from under the jurisdiction of the United States flag.

As I have previously stated, I am entirely in sympathy with the extension sought. I think it is the only thing left to do. I agree with the distinguished Senator from Washington that, so far as the T–2 tankers are concerned, that issue is not involved, because there are no more T–2 tankers to sell to anyone, whether citizens or noncitizens. However, I wish to keep the record straight, and I know the distinguished Senator from Washington wishes to do so. While it is true that in June and July the number of citizen applicants was down to 12, and while in that respect the record shows that these applications were not on file at that time, it is also true that there was no record of noncitizen applications on file. This issue did not become acute until the latter part of September, when the State Department announced that it was necessary to sell these vessels because of the situation across the water in regard to dollar balances. The Department wanted the vessels sold. When the industry learned about the situation it immediately filed citizen applications; and before the foreign commitments were made to foreign countries there were 165 citizen applicants who would have purchased the vessels, which would have been used to haul petroleum products domestically.

Mr. SALTONSTALL. Mr. President, I should like to ask the Senator from Washington a question. If the joint resolution were to be passed containing the amendment which has been submitted by the committee, would it not prevent the sale of any of our old Liberty ships and outworn vessels to any foreign government after March 1?

Mr. MAGNUSON. It would prevent the sale of any type of vessels under the jurisdiction of the Maritime Commission to any foreign citizen or foreign government. I appreciate what the Senator is suggesting. Suppose that the proposal in the Marshall plan is to sell so many ships. If the Congress should pass the Marshall plan with such a provision, it would supersede this section. But unless something is done affirmatively by the Congress of the United States, if this proposal should become law, it would prohibit the sale of ships to foreign countries and noncitizens.

Mr. SALTONSTALL. Would that be a wise provision, taking into account the very old ships? Would it be wise to make a flat prohibition of all sales?

Mr. MAGNUSON. There are various shades of opinion; but the Maritime Commission, all members of the American Shipping Association, and all members of the so-called seafaring and maritime labor unions, are in complete agreement that, if the Maritime Commission should change its policy and sell to noncitizens and foreigners, it would seriously damage our American merchant marine, which is now one of the sickest segments in the American economy.

Let me say to the Senator from Nebraska that unfortunately we were in executive session when the representatives of the American Shipping Association and the Maritime Commission discussed the question of tankers. As the Senator well says, it is water over the dam. There are no tankers available. I was speaking generally of the testimony, and the dates which were testified to. I think the Senator is probably correct in his dates. However, the sum and substance of the testimony, as I understood it, was that vessels were offered and no one took advantage of the offer, so the Commission went ahead and sold them. There is some dispute between the Maritime Commission and some of the oil companies as to the dates when applications were submitted; but that is all water over the dam, because there are no tankers available now.

Mr. WHERRY. But we have an oil shortage.

Mr. MAGNUSON. The testimony was to the effect that this situation has nothing to do with the bottleneck, because the vessels which were sold are now transporting oil which we sorely need from other countries.

Mr. WHERRY. Did the Senator read the record of the Small Business Committee?

Mr. MAGNUSON. No; I did not.

Mr. WHERRY. The record is that 51 of the vessels went out of active service. Did the Senator know that?

Mr. MAGNUSON. No, I did not.

Mr. WHERRY. If the Senator will read the record, it will tell him the story. The fact is that we are short of oil today because of lack of transportation. That is the primary reason. If the Senator wishes to examine the record, I shall be glad to make the entire record available to him. As early as last August, a letter was sent to the President urging that these vessels be not sold. That letter was disregarded. Only now it is being brought to light that 51 of those vessels went out of active service in hauling petroleum domestically from the Gulf ports. I refer to the T–2 tankers. They are now being operated under foreign flags. We have not the vessels necessary to haul petroleum today. That is in the evidence. It is true that the Senator's committee held one hearing, which lasted for 10 hours. Some of the representatives of the Department of Commerce testified. I have given the Senator the picture. Those are the facts.

I know that the Senator is interested in the Maritime Service. So am I. We are losing crews off those vessels. We have lost 86 of them. I know what the Senator is interested in, and I am entirely in sympathy with him. I agree with him; but the fact still remains that when this subject was brought to the attention of those who were interested, which was not until September, immediately 165 applications were filed, and they were ahead of the foreign applications. There were only commitments or so-called agreements by the State Department with foreign governments, if and when the vessels should be sold.

Mr. MAGNUSON. Mr. President, I do not wish to enter into a controversy on this question with the Senator from Nebraska, because he probably has gone into the subject much deeper than the subcommittee which held a hearing last week. There was a great deal of general discussion. The conclusions reached were testified to by the representatives of the Maritime Commission and representatives of the American shipping interests and oil interests. Those conclusions are somewhat in conflict with the conclusions of the Small Business Committee.

At any rate, so long as the Senator is in sympathy with what we are trying to do, I hope he will join with us and see that this extension is granted as quickly as possible, because of the time element.

THE ST. LAWRENCE SEAWAY

The Senate resumed the consideration of the resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof.

The PRESIDENT pro tempore. Under the order of the Senate, the Chair recognizes the Senator from Wisconsin [Mr. WILEY].

Before the Senator from Wisconsin proceeds, the Chair would like to say that when the unanimous-consent agreement was entered into at the last session of the Senate, providing for the recognition of the Senator from Wisconsin, the Senator from Illinois [Mr. LUCAS] argued at some length a point of order that the procedure was not appropriate.

The present occupant of the chair agrees with the then occupant of the chair, the Senator from California [Mr. KNOWLAND], that his rulings were correct. The Chair would like to have printed in the RECORD at this point the reasons for that statement.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

RECOGNITION BY PRESIDING OFFICER

The Constitution of the United States prescribes no duties for the Vice President. It merely says that he "shall be President of the Senate, but shall have no vote, unless they be equally divided." Article I, section 3, clause 4.

The Constitution further provides that "Each House may determine the rules of its proceedings." Article I, section 5, clause 2.

The Senate, in the exercise of this constitutional right, has formulated a set of rules, one of which at the present time, relating to the question of recognition, is in part as follows:

"When a Senator desires to speak, he shall rise and address the Presiding Officer, and shall not proceed until he is recognized, and the Presiding Officer shall recognize the Senator who shall first address him." (Rule XIX, par. 1.)

The President pro tempore of the Senate, or any other Senator temporarily occupying the chair, has no greater power of recognition than the Vice President, and derives his power to recognize Members of the Senate from the above rule.

Rule XL, relating to suspension and amendment of the rules, provides in part that no motion to suspend, modify, or amend a rule shall be in order, except on 1 day's notice in writing, etc. The rule, however, further provides that—

"Any rule may be suspended without notice by the unanimous consent of the Senate, except as otherwise provided in clause 1, rule XII."

The exception referred to relates to voting by yeas and nays, and has no bearing on the question of recognition.

A rule may be suspended either directly or indirectly. Unanimous-consent requests in the Senate for the most part are made for the purpose of obtaining some result or action that otherwise would be in violation of some rule of the Senate. The parliamentary effect of the granting of unanimous consent to give a Senator the floor at a specified time is to suspend that part of rule XIX providing for the manner of recognition; and such action of the Senate is as binding and effective as if a request had been made for unanimous consent for the specific suspension of the rule for the purpose of giving such Senator the right to the floor.

The Senate, when it gives unanimous consent for any purpose, is not acting in contravention of, but in accordance with, that provision of rule XL authorizing the suspension of any rule without notice by unanimous consent, with, of course, the exception provided in rule XII.

Such suspension of the rule, or the equivalent granting of unanimous consent, whereby a Senator is given the right to the floor at a specified time, therefore takes away from the Presiding Officer the right of recognition, which otherwise he would have; and such action in granting unanimous consent operates in the same manner and to the same extent as any other order of the Senate.

Mr. WILEY. Mr. President, I am happy to see that the two distinguished Senators from Massachusetts are in the Chamber. I shall not consume much time this afternoon, because other Senators are scheduled to speak.

In view of the situation which occurred a moment ago, when we heard that the Senator from Nevada [Mr. McCARRAN] was to be absent for 2 weeks, that I find that a number of Senators on both sides of the Chamber are leaving on Wednesday and Thursday, and that each side has 10 or 12 speakers to be heard, and in view of the significance of the subject before the Senate, I would seek to get some kind of an agreement to vote on the 20th of this month, because I understand there is an agreement that there will be no vote next week. I specifically ask for agreement on the 20th, because I have received information from Senators who are going to the Pacific coast that they will not get back until the 18th or 19th, and they desire to be present when the vote is taken. Many of them have fixed speaking engagements. If they had to cancel those engagements, it would create misunderstanding. So, Mr. President, I drop this suggestion into the hopper, so to speak, and ask that the distinguished Senators from Massachusetts who are leading the opposition give consideration to the suggestion.

Mr. LODGE. Mr. President, I told the Senator from Wisconsin at the beginning of the debate that I would neither directly nor indirectly seek to drag the matter out. So far as I am personally concerned, I should be willing to vote this week, on Wednesday or Thursday. How does the Senator from Wisconsin feel about that?

Mr. WILEY. I have talked to those Senators who wish to be heard. I can assure the Senator that there is no purpose to drag the matter out. If after the special session we could have proceeded with this subject in the forepart of January and had gone on day after day, we should now have been through with it. But the fact is that we have had only two speaking days, and only three Senators have been heard. There are practically a dozen on each side who desire to speak. If it were humanly possible to get to the point where all the speakers who desired to speak could be present and be heard, that would be well and good. But I understand that the Senator from Iowa [Mr. HICKENLOOPER] has left, as have other Senators. That is why I make the suggestion about the vote. I think the matter is of sufficient importance that if the distinguished Senator from Massachusetts will bear with me I would suggest that we let it be understood that there will be no votes next week, but that a vote on the St. Lawrence seaway project will be had on the 20th. By that time Senators who want to vote will be back. It will discommode no one. The speaking will be concluded, and we shall be ready either to put life into the legislation or to execute it.

Mr. LODGE. Mr. President, if the Senator does not want to vote this week, of course that is his privilege, and I shall not raise the question again, but I somehow feel that the 20th being a Friday, is not a very good day on which to secure a quorum. I would rather have the debate end on Monday the 16th, or Monday the 23d, although I think that using a whole month for the consideration of the matter is a little out of line.

Mr. WILEY. The 23d will be agreeable to me.

Mr. LODGE. I think Friday is rather a bad day because of Senators leaving for the week end, and so forth.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. SALTONSTALL. I would respectfully call to the Senator's attention the fact that the 23d will probably be a holiday on which Washington's birthday will be celebrated.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. AIKEN. I agree with the Senator from Massachusetts that Friday would be a bad day on which to take a vote. It seems to me that if we cannot get a vote within the next 3 or 4 days, as now appears to be the case, we should perhaps let it go over until the following Tuesday, because nearly all Senators will be present on that day. It seems to me it would be a good idea not to make any agreement as to a time for voting until the debate of the next 2 or 3 days shall be concluded. Probably by Wednesday night or Thursday morning we can tell better when we shall be in position to vote. I do not think any Senator wants to delay the vote, which is extremely important to the country and to the whole world at this time. We do not want to shut off any Senator who might have something to add to the arguments which are being placed before the Senate. I shall have something to say regarding the subject. I am not in a great hurry, but I do want to speak on the subject before the debate is concluded. The subject is extremely important. It is a matter which might be of great importance to the United States in the event we engage in a foreign war within the next 10 years. So let us not be too hasty, but if we decide to have a vote after the 20th, I suggest that Tuesday, the 24th, would be a much better date.

Mr. IVES. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. IVES. So far as I am concerned, I should be willing to cancel speaking engagements or anything else, and I stand ready to do so in connection with this matter. That applies to the remainder of this week and to next Tuesday. However, the 24th is a very bad day for me, not because of a speaking engagement; and if the Senator would be willing to accept a suggestion I would suggest the 25th. Certainly if the Members of the Senate are to be here during the week they ought to be here by Wednesday.

Mr. WHERRY. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. WHERRY. In order to have a voting date set it would be necessary to have a unanimous-consent agreement. I think the place to arrange for that is off the Senate floor. We are debating the project, and if it is as important as it is said to be, I think we should continue with the debate. I think we should conclude debate on the proposal, and when debate is concluded, we should take a vote. As far as setting the 20th or 25th or some later date is concerned, I would not give unanimous consent to any such arrangement. I suggest that the regular order be followed and that the matter be debated today, tomorrow, and the next day, and then we can see if we can get a vote on this important measure.

Mr. LODGE. I quite agree that we can whip up the details of a unanimous-consent agreement much better off the floor than on the floor. So far as I am concerned, I will stay here and vote, no matter what the date. I am willing to vote right now. I am willing to agree to vote by next Thursday, but if that is not desired, I think it would be a great convenience to Members of the Senate to agree on a date certain, a date which will be fairly soon.

Mr. WILEY. Mr. President, may I ask the Senator from Nebraska [Mr. WHERRY] whether there is an understanding that next week no important matters will be taken up and voted on in the Senate?

Mr. WHERRY. I will say to the distinguished Senator that it is the wish of the Policy Committee that during the week of February 12 the work of the Senate be so lightened that we can accommodate several Senators who would like to make addresses on Lincoln's birthday. That has been the custom for years. But that has not anything to do with making a unanimous-consent agreement for a vote on the pending joint resolution. If the opponents and proponents of the measure can get together and fix a date I shall be glad to propose a unanimous-consent request. But it seems to me we are wasting the time of the Senate at this time in attempting to arrive at a unanimous-consent request when we do not know the purpose of it.

Mr. LODGE. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. LODGE. I think we have a date. I think the Senator from Wisconsin suggested the 25th. Is not that correct? That is agreeable to me.

Mr. WILEY. That is agreeable; yes.

I want to say, Mr. President, it shows that even on the floor of the Senate two men widely separated geographically can get together in the spirit of compromise and arrive at something constructive. I did not make the request, I merely suggested it in my opening statement. I do not think I should be severely criticized for suggesting something constructive as between the proponents and the opponents of the pending matter.

Mr. THYE. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. THYE. I think the suggestion which has been made was that we proceed with the debate, and on Wednesday or Thursday decide whether or not we wish to postpone action to a definite date. It may be that on Thursday, early in the day, we shall be ready to act upon the matter. That might be a very good suggestion, and I believe it is the suggestion which was made by the able Senator from Vermont [Mr. AIKEN].

Mr. WILEY. No; his suggestion was not exactly that. His suggestion went further, and related to agreeing on a date.

Mr. THYE. Yes; but I referred to agreeing later in the week, when we have ascertained the number of Senators who still wish to speak on the question.

Mr. WILEY. Yes; I appreciate the suggestion, and in view of the tentative agreement, we shall see what we can work out. I thank the Senator.

Mr. LODGE. Then may we hope to work out something later today?

Mr. WILEY. Yes—along the line suggested by the Senator from Massachusetts and the Senator from Vermont.

ST. LAWRENCE—THE TWENTIETH CENTURY'S NORTHWEST PASSAGE

Mr. FERGUSON. Mr. President, I wish to make some remarks relative to the St. Lawrence waterway.

Let me say, Mr. President, that to our north lies one of the great landmarks of hope in this strife-torn and war-weary world. It is the longest unfortified international boundary in the world, the ocean-to-ocean frontier between the United States and Canada. For more than 150 years the people of the United States and Canada have lived along that line in unbroken peace, a symbol of the mutual trust the world is seeking today.

For generations, ever since the revival of trade after our Civil War, citizens of the United States and Canada have been looking to a portion of that boundary and thinking of a seaway from the St. Lawrence Basin to the Great Lakes, a modern Northwest Passage leading, not to the treasures of the Orient, as the early explorers believed, but to the equally fabulous treasure house that is midcontinent America.

The mutual interests of the United States and Canada in the waterway were reflected in treaties of 1871 and 1909 which gave the United States perpetual rights to navigate in boundary waters and in the wholly Canadian section of the St. Lawrence River, and the same navigation rights in the Welland Canal as Canadian vessels have in Lake Michigan.

As early as 1895 the Governments of the two countries appointed a Deep Waterways Commission, and in 1897 this Commission reported that the St. Lawrence route was feasible, and recommended further detailed surveys. Such surveys have been made from time to time since then. The Treaty of 1909 established an International Joint Commission, and in 1921 the Commission rendered a unanimous report, which was followed in later years by the supporting reports of other commissions and boards, favoring early undertaking of a through deep-sea navigation project over the St. Lawrence River route.

It has not been because opposition to the St. Lawrence seaway project has outweighed its support that its design has not been completed. For a generation Presidents of the United States have advocated it. Leaders in Federal and State governments have encouraged it. Business groups, labor groups, and farm groups have supported it. Members of Congress have stood up for it on the floor of the Senate, the floor of the House of Representatives, and in committees. It has not been a project of one party, of one section, or of one economic interest. It has belonged to all parties, to all sections, to all interests. Only the interruption of war could possibly have interfered with its earlier realization.

But this is not to say that much has not already been accomplished. Dr. N. R. Danielian, in an address before the Engineering Society of Detroit, on May 6, 1946, pointed to some of the progress. He said:

> The Great Lakes now provide deep-water navigation throughout their length and breadth. The MacArthur Lock at the Soo, built by the Army engineers in 1943 as a war project, connects Lake Superior and Lake Huron. That part of the seaway, as originally proposed, is now completed.
>
> Eight locks of the Welland Canal, completed in 1932, scale the difference in the levels of Lake Erie and Lake Ontario, 324 feet. That part of the seaway is completed, too, and deep-draft ships can now proceed from Duluth, at the head of Lake Superior, for 1,200 miles to Ogdensburg N. Y., on the upper St. Lawrence River.

Mr. President, the remaining work to be done on the St. Lawrence project has been summarized by the subcommittee of the Senate Committee on Foreign Relations, in reporting on Senate Joint Resolution 104 of the Seventy-ninth Congress; and the summary is printed in the full committee's favorable report on the present Senate Joint Resolution 111. It states:

> The main work to be undertaken by the United States will be concentrated in a 46-mile stretch of the International Rapids section of the St. Lawrence River.

In other words, the vessels can now go 1,200 miles, but because of the obstructions in the distance of 46 miles it is necessary that that short section be made into a deep waterway.

I quote further from the report:

> This involves the construction of a control dam, the construction of the Long Sault Dam and a power station, and the construction of necessary canals and locks in this section to bypass the dams. Canada will install the machinery in its half of the station and will construct canals and other works to provide a 27-foot channel in the wholly Canadian part of the river in the 68 miles from St. Regis, N. Y., to Montreal, Canada. Chief among the proposed works are the dredging of shoal areas in Lake St. Francis and the improvement of the Soulanges Canal with the construction of the twin flight locks near the Beauharnois powerhouse. Canada will also build a new Lachine Canal connecting Lake St. Francis and Montreal Harbor, which is the present head of ocean shipping on the St. Lawrence.

According to estimates of the Chief of Engineers of the United States Army, it will cost $719,928,000, at May 1947 prices, to complete the St. Lawrence seaway and power projects. Of this total, $228,319,000 would be borne by Canada. The State of New York, under provisions of this legislation, would pay $160,795,000 of the United States share for power, leaving $330,814,000 as a Federal charge.

But the great virtue of the present legislation is that the project will be placed upon a self-supporting and self-liquidating basis by the charging of tolls, so as to remove the financial burden of the completion from the United States taxpayer. It is this feature of the proposal which eliminates, in my opinion, the only reasonable doubt which could have been entertained in opposition to the project.

I personally happen to be one of those who believe in the self-liquidation of projects such as this.

It will be argued that the Federal Government is not justified, in terms of the expense involved, in embarking upon a public-works project of such magnitude. With specific reference to the seaway it will be argued that such a public-works project would mean that the Government would in effect be subsidizing a form of transportation to compete with existing means of transportation, the railroads.

The present proposal, however, would provide that the users of the new deep-water works of the St. Lawrence seaway should pay for the construction and maintenance which make such use possible. It is therefore no longer possible to argue against the St. Lawrence seaway as a public works program extravagant in outright expenditure or providing free transportation to certain interests in competition with other interests.

The Department of Commerce, on the basis of recent and detailed studies, is authority for the conclusion that revenue from the imposition of tolls on shipping should be sufficient to provide for amortization of the cost of completing the seaway project and also to cover the annul maintenance charges.

An explanation is due as to why the present resolution contains the self-liquidating provision.

Senate Joint Resolution 104 did not reach the Senate Calendar until the end of the Seventy-ninth Congress, and hence it was not acted upon. Upon the convening of the Eightieth Congress, the question was raised whether the same resolution should be reintroduced. In view of the magnitude of the national debt, the burden of taxation, and the complaints of existing transportation systems against the prospects of subsidized competition, there was much interest as to whether it was possible to put the St. Lawrence seaway, as well as the power project, on a completely self-sustaining and self-liquidating basis. The chairman of the Foreign Relations Committee, my distinguished colleague from Michigan [Mr. VANDENBERG], took the initiative to institute inquiry, through the State Department, with the Canadian Government, as to whether they would accept the principle of self-liquidation. Upon their affirmative reply, Senate Joint Resolution 104 was redrafted, making our approval conditional upon Canadian acceptance of self-liquidation, and rewriting section 3 so as to provide machinery and to define the principles to be followed in determining the details of self-liquidation.

In presenting the pending measure on a self-liquidating basis, we have the precedent of the Panama Canal. The St. Lawrence seaway will be an international waterway in that the ships of all nations will be entitled to use it on a basis of equality. Furthermore, the applicable law of the land, the Boundary Waters Treaty of 1909, in article 1 specifically recognizes the right of Canada and the United States to charge tolls. Thus in adopting the principle of self-liquidation in the St. Lawrence seaway, we are not changing the established practice of Congress regarding inland waterways, but following the precedent of the Panama Canal and the letter of the Boundary Waters Treaty which applies to the St. Lawrence River. Secretary Marshall's testimony on this subject is conclusive, and I quote it:

> The Department of State supports the principle of self-liquidation by means of tolls levied on traffic using the new deep-water works. Section 3 of the Senate Joint Resolution 111, which your committee has under consideration, authorizes the President to negotiate an agreement with Canada, under the provisions of the Boundary Waters Treaty of 1909, for the establishment of a tolls system. I am able to report that this matter has been discussed with Canadian Government officials and we have been informed that "the Canadian Government is prepared to agree to the principle of making the St. Lawrence seaway self-liquidating by means of toll charges, subject however to the conclusion of arrangements satisfactory to both Governments for the implementation of this principle. * * *"
>
> Section 3 provides that after investigating the two Governments will negotiate during the construction of the project a new agreement defining the details of tolls, and will submit it for the approval of the legislative bodies of both countries. In the case of the Panama Canal, the matter of tolls was considered during the latter part of construction in 1912, and a satisfactory system was developed just before the opening of the Canal in 1914. There does not appear to be any reason why an analogous timetable cannot be successfully followed in the present case.
>
> I should like, however, to point out that tolls will not be levied on traffic using the existing 14-foot canals on the Canadian side nor on navigation within the Great Lakes system nor on vessels traversing the Soo lock and connecting channels.
>
> The St. Lawrence seaway project is an international enterprise. The support of the Department of State for the principle of self-liquidation is based in part upon the fact that comparable international projects such as the Panama Canal embody the tolls system.
>
> This is a time for necessary financial retrenchment for the Government of the United States, and the St. Lawrence seaway project will cost a great deal of money. It therefore seems to us in the State Department that there is a good reason for having the cost of the seaway construction paid over the years by the traffic using the new facilities.

I wish to repeat these three conditions:

First. Our approval is conditional on Canada agreeing to self-liquidation. This is explicit in section 1 of the joint resolution:

> *Provided*, That the President, before said agreement enters into force, obtains satisfactory assurances, by exchange of notes or otherwise, that the Government of Canada agrees to the principle of making the new deep-water navigation works on the St. Lawrence River herein authorized self-liquidating by charging reasonable tolls, this principle to be implemented through the conclusion of arrangements satisfactory to both governments pursuant to section 3 of this joint resolution.

Second. The Boundary Waters Treaty of 1909 sanctions the charging of tolls:

> Either of the high contracting parties may adopt rules and regulations governing the use of such canals within its own territory and may charge tolls for the use thereof, but all such rules and regulations and all tolls charged shall apply alike to the subjects or citizens of the high contracting parties and the ships, vessels, and boats of both of the high contracting parties, and they shall be placed on terms of equality in the use thereof.

Third. There is no danger that we shall fail to make the seaway self-liquidating by disagreement with Canada.

(a) Because Canada, faced with the same financial problems as we, would prefer it that way.

(b) The canals at International Rapids are on United States soil and by the provisions of the Boundary Waters Treaty of 1909 we could levy tolls unilaterally, but I do not anticipate that this will be necessary, as Canadian interest in self-liquidation is similar to ours.

Mr. President, I have a memorandum from the Digest of International Law, volume I, pages 603 and 604, that may be of assistance on this question. I should like to insert at this place in my remarks the memorandum from that textbook, by Judge Hackworth, who is now a member of the International Court. It relates to a provision for tolls in the Pigeon Bay district of Lake Superior. The court held that such toll could be charged upon the international highway, because of the treaty there involved.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF STATE,
THE LEGAL ADVISER,
January 29, 1948.

To: Mr. Battle.

From: Mr. Vallance.

Subject: Charging of tolls on St. Lawrence Waterway.

I have found a statement in Hackworth's Digest of International Law (vol. I, pp. 603–4), that may be of assistance. It reads as follows:

"Pigeon River, a small international boundary stream between the State of Minnesota and the Province of Ontario, has its source in lakes on the international boundary, whence it flows in a southeasterly direction along that boundary for about 40 miles and discharges at Pigeon Bay into Lake Superior. The boundary is approximately midstream. In 1928, 1929, and 1930 Charles W. Cox, Ltd., a Canadian corporation and dealer in timber, drove quantities of pulpwood and railway ties down the river toward Lake Superior, making use of improvements in the river, consisting of sluiceways, booms, and dams, belonging to the Pigeon River Improvement, Slide & Boom Co. (a Minnesota corporation) and refusing to pay tolls thereon. The latter company brought suit against the Canadian corporation to recover the tolls. The case was removed to a Federal court, a demurrer to the amended complaint was sustained without leave further to amend, and the judgment of dismissal was affirmed by the circuit court of appeals.

"Upon appeal the Supreme Court of the United States reversed the judgment dismissing the complaint and held that the provision in article II of the Webster-Ashburton Treaty of 1842 that 'all the water communications and all the usual portages along the line from Lake Superior to the Lake of the Woods, and also Grand Portage, from the shore of Lake Superior to the Pigeon River as now actually used, shall be free and open to the use of the citizens and subjects of both countries,' did not preclude improvements of the stream by sluiceways, booms, and dams nor did it prevent the exaction of a nondiscriminatory charge for the use of such improvements. In the course of the decision (Mr. Chief Justice Hughes rendering the opinion), it was pointed out that under the decision of the Canadian Supreme Court in the case of the *Arrow River & Tributaries, Slide & Boom Co.*, decided in 1932, it had been held that the Ontario company might impose charges upon citizens of the United States for the use of its works on the Canadian side of the line." (*Pigeon River Improvement, Slide & Boom Co.* v. *Charles W. Cox, Ltd.*, 63 F. (2d) 567 (C. C. A. 8th, 1933); 291 U. S. (1934) 138, 148. *Arrow River & Tributaries Slide & Boom Co., Ltd.* v. *Pigeon Timber Co., Ltd.*, 1932 Can. Sup. Ct. 495.)

W. R. V.

Mr. FERGUSON. Mr. President, further justification for the project, if necessary, is abundant.

The region to be opened to cheap water-transportation benefits includes 40 percent in value of all American farm property, producing 67 percent of the Nation's corn and 36 percent of the Nation's wheat. Moreover, 40 percent of the Nation's manufacturing volume is produced in this area—nearly three-fourths of our automobiles and a corresponding percentage of our steel ingots. In this area lives one-third of our population.

There is no difficulty in visualizing the importance of the development to the people immediately affected. Established industries would profit. New industries would be encouraged. Quantity shipment would be possible during peak-production periods, there would be additional shipments of raw materials, there would be more of the production which is our Nation's and the world's paramount economic requirement of today and the years ahead—an endless series of chain reactions in a cycle of plenty and prosperity.

It may be asked, Is this not provincialism? I think not.

I need not dwell at unnecessary length on the fact that we of the United States are a living example of the motto of the Three Musketeers—"All for one and one for all." What affects one of us in the United States for good necessarily affects all for good.

The greater prosperity of the directly affected area would result in greater markets for the manufacturers and raw materials of all the Nation, and a means of transportation would be ready at hand to take up the additional demand from coastal points. Far from causing losses to railroads and trucking concerns, the St. Lawrence project would, by stimulating trade throughout the United States, promote fuller use of their facilities not only to and from the seaway ports, but to the far reaches of the land. The chain reaction cycle of prosperity is all encompassing.

Of further mutual interest to the entire Nation is the project's place in our scheme of national defense. It has been said, and we have learned its wisdom not without pain, "In time of peace, prepare for war."

No nation could be suspicious of us if we were to bring ocean transport 2,400 miles inland as a means of promoting our national economic interests. Yet it would be a step toward a broader interest if we were to write "finis" to a project which might well tip the scales of battle toward victory should another criminal aggressor arise to challenge the security of the United States and the world.

The Liberty ships, the Victory ships, the C-type cargo carriers, and the tankers, which did so much to win the last war, could, if necessary, go through the locks and canals of the St. Lawrence enterprise to facilitate and enhance their essential contributions. The automotive industry of Michigan, the shipbuilding of Wisconsin, the ores of northern Michigan and Minnesota, the munitions of Illinois, the steel of Gary and Cleveland, and the breadbasket of America, which lies in the Midwest and West, would be placed at the immediate disposal of an embattled United States. With the St. Lawrence seaway in operation there would be slight occasion for the charge "too little and too late."

Former President Hoover has keynoted the strategic importance of the project by saying, "There can be no doubt of its value as a defense measure." That concept of the seaway's place in national and hemispheric defense has been amplified by the Joint Chiefs of Staff, who reported to a Senate subcommittee considering this matter:

> In the light of the experience of World War II, in which total mobilization became a near actuality, it is evident that the prospective increase in our war potential that would have been contributed by these projects, had they been completed, would have been of material assistance in prosecuting the war. It is probable that attainment of success in any future world conflict would require utilization of the ultimate production and transportation facilities of the United States and Canada. The Joint Chiefs of Staff consider that it would be in the interest of national security to complete projects such as these, which would have distinct military advantages and would materially increase the industrial and transportation potential of the United States.

Thus far, the picture of the St. Lawrence project that has been spread before the Senate has included only the discussion of the project as a seaway. The seaway has been discussed as an economic stimulant to the region which it would directly affect and to the country at large. It has been discussed as a means toward attaining national and hemispheric security. There remains to be taken up a phase of this enterprise that has an equally vital bearing on war and on peace, that of hydroelectric power.

The electric-power phase of the project contemplates the construction of facilities with a capacity of 2,200,000 horsepower and an average annual output of 13,200,000 kilowatt-hours of electricity.

As such the St. Lawrence would be the second largest single-dam source of power in the world, being exceeded only by Grand Coulee. The output of the proposed plant would surpass the output of both hydroelectric and thermoelectric plants in all but eight countries of the world. It would generate as much power as all of the hydroelectric development of the Tennessee Valley area at a lower cost than any plant in the United States, with the possible exception of Niagara.

Of this power the United States will have half, for it is provided that the power generated by the project shall be divided equally between the two participating countries.

Let us look at what this 1,100,000 horsepower, this average output annually of 6,600,000,000 kilowatt hours of electricity will do for the people it will reach. Draw a great circle with Massena, N. Y., as the center and a 300-mile radius. It will touch or include New York City, New England, and the industrial area around Buffalo. And, by shifting loads over existing and projected transmission lines, this power could be extended over an expanding southern arc to take in Boston on the east, Washington, D. C., on the south, and Chicago on the west. The Department of Commerce St. Lawrence survey states that the project has it within its scope to reduce the cost of power to industrial and commercial users 25 percent below the 1937 rates and the cost to residential and farm consumers 64 percent below the 1937 norm. The New York State Power Authority translated these figures into terms of cold cash when it reported in 1944 that St. Lawrence power would represent savings amounting to $25,000,000 a year to all types of consumers.

In this connection, I like to recall the story from the pamphlet, New England and the St. Lawrence Project. It appears that opposition to cheap St. Lawrence power was registered before the House Rivers and Harbors Committee in 1941. The opposition witness claimed that cheap power would ruin Massachusetts. One Representative asked incredulously, "Do you mean that giving the people of New England electricity at reasonable rates, and taking this overcharge of $97,000,000 off of them would ruin New England?"

Most of us, certainly most Members of Congress, agree with the implication of the Representative's question, that savings for all will eventually result in savings for the concern or concerns dispensing the service.

But, cheap power does not alone concern individuals. It concerns industries, large and small, old and new. Power is the universal factor in machinery. Without power, each factory would be a silent city. With power each factory is a contributor to production. Right now, in the face of an inflationary state which is to be answered in terms of production and more production, this is more than ever important, and will continue so. With power, established industries expand and new industries will arise.

This is the type of expansion and creation which gives strength and impetus to the American system of free enterprise. Industry needs power to build or to expand, whether it is a shoe-repair shop employing two men, a shoe factory employing 2,000, or one of the hundreds of small businesses in vital new fields to whom a source of cheap power means survival.

There must be borne in mind here, too, the thousands of veterans who have set up shop for themselves since the war and of necessity have been compelled to start out on a small scale. As such they are small business, and in small business an access to reasonably priced power may spell the difference between failure and success. And the encouragement of that sort of small business is the soundest hedge toward a nation's economic security. By providing this type of power the St. Lawrence project could be not only the most practical manifestation of the enduring gratitude of the United States and Canada toward those who served their countries well during war but a peacetime investment paying long economic dividends.

Who will lose by the creation of this low-cost source of transportation and electrical power, or rather, who fear they will be the losers?

Certainly our coal-mine operators, miners, and dealers can have no fears. American coal, when it is available, is cheaper in Ontario than either Nova Scotian or British coal and the cost of producing coal in the United States, despite wages running five times as great as those in Great Britain, is so much lower than the cost of British coal that even decreased freight charges possible on the seaway could not affect the difference. And statistical studies in other great hydroelectric power development areas have proved that far from reducing coal consumption there the stimulus to industry over-all has greatly increased demands for coal.

Mr. President, why is Britain today asking for machinery with which to mine coal? It is because we here in America use electrically operated machinery for the mining of coal. Our use of such machinery is the reason why we can mine coal cheaper than coal can be mined in England today. We all know the old expression, "carrying coals to Newcastle." Today that is really an eventuality, the reason being that we in America use electric power to mine coal. If we develop the great power industry in the St. Lawrence it will not cause a loss to the coal miners or the coal-mine owners, but it will provide stimulation to them, and will result in an even better life for them than they live today, which is something of which we all are hopeful.

Existing transportation? The increased demand for transportation of all kinds, resulting from increased industrial output, will more than make up for what slight shift there might be from rail to water traffic. Then, too, railroads and trucking companies would still lead the field in the carrying of perishable and urgent-demand goods for transshipment at coastal ports.

Lake shipping concerns should have no objections. Augmented trade would go to those established lines ready to take up the opportunity. No fear at all could be held for foreign competitors because alien craft would be prevented by Federal law from freight movements between American ports on the Great Lakes as that transport is reserved exclusively to ships of American construction and registry.

The earlier attitude of privately owned power companies toward the St. Lawrence project has undergone a gradual but marked change. Earlier, in 1921, it was proposed by a group of these companies to the International Joint Commission that they would make a gift of the navigation facilities on the project if the two governments would give them franchises for electrical developments in the rapids region. More recently there has developed a feeling that power companies in the affected area would benefit rather than lose from the creation of this added public power. It would mean increased utilization of their facilities and the extension of electricity to more users. Even their subsidiaries would profit, as another phase of the endless series of chain reactions which I have mentioned.

Finally, industrial and coastal cities, which have expressed concern for the project, would be materially aided. Where one industry would suffer temporary inconveniences in the adjustment process it would ultimately gain, as many industries would be stimulated into renewed activities and new fields of enterprise would emerge. In the same fashion, where coastal cities might lose some ocean shipping, this loss would be offset by waterway-coastal vessels, plying directly to and from Great Lakes ports.

Mr. President, the surprising thing is that we in America did not have the vision to put this plan into effect many years ago. Here is a great source of power, a great highway, which has been the natural boundary between these two great countries—America and Canada. We have allowed it to lie dormant because we have lacked the vision of many of our forefathers who built the highway—yes, who carried the canoes from one rapids to another. I think the time has come when we must have greater vision on this particular point, to see to it that we use this highway.

One of the issues before the Senate today is, Should the present resolution be ratified as a treaty—by a two-thirds vote of the Senate or approved as in executive agreement by a majority vote of the Senate?

After the Treaty of 1932 failed of ratification the President and Secretary of State reopened negotiations with Canada with a view to arriving at a new agreement. These negotiations resulted in the agreement of March 19, 1941, which was then submitted to both Houses of Congress. The House Rivers and Harbors Committee of 25 members held hearings over a period of 7 weeks in the summer of 1941, and finally sent it to the floor on November 21, having approved it by a vote of 17 to 8. This was only 2 weeks before Pearl Harbor, and with other projects in the omnibus rivers and harbors bill, of which this was a part, it was laid aside. Then we were faced with a war. We faced an all-out effort, upon which we had to concentrate. That war having passed, in order that we may prepare for the future, Mr. President, we should take hold and accomplish something.

The subject did not come before the Senate until 1944. It was then within the jurisdiction of the Senate Commerce Committee. A subcommittee of the Senate Commerce Committee, under the chairmanship of the senior Senator from Louisiana [Mr. OVERTON] held hearings upon the constitutionality of the particular procedure adopted by President Roosevelt and Secretary of State Hull. I attended many of the hearings of that subcommittee. Although the subcommittee came to no conclusion, it was apparent that the chairman of the full Senate Commerce Committee, the late Senator Bailey of North Carolina, and the chairman of the subcommittee, the senior Senator from Louisiana, had doubts about the constitutionality of the particular method of ratification by majority vote of both Houses of Congress. Failing to obtain a hearing on the merits of his bill, S. 1384, the senior Senator from Vermont [Mr. AIKEN] decided to offer it as an amendment to the rivers and harbors bill then before the Senate. This move failed, but the debate before the Senate was both enlightening and helpful. It was obvious that many Senators voted against the amendment not because they did not favor the project, but because they objected to the procedure. Their objections can be summarized as follows:

First. No Senate committee had held hearings on that agreement and reported on the substantive merits of the St. Lawrence project. That was not the fault of the senior Senator from Vermont, for he had tried in vain to obtain such hearings from the committee to which S. 1384 had been referred. The committee discussed only the constitutional question.

Second. Being late in the congressional session the St. Lawrence project should be considered separately, so as not to jeopardize the rivers and harbors bill which had already passed the House.

Third. The agreement with Canada contained provisions regarding perpetual navigation rights in connecting boundary waters which in effect modified existing treaty arrangements and could be ratified only by a two-thirds vote of the Senate.

Fourth. The agreement contained provisions for increasing diversion of water at Niagara which was fixed by the Boundary Waters Treaty of 1909, and which could only be modified by treaty procedure.

I have quoted these four reasons because I think they are material, and we should consider them in the light of what we have before us today.

As of the time when the subcommittee was considering the matter in 1944, I shared the view which I have described relative to the constitutionality of the agreement with certain provisions in it, namely, sections 7 and 9; and I personally advocated that they be eliminated from the agreement and be separately approved by a treaty. Although in doubt, I felt that they could be approved in the agreement; but I am better satisfied as I appear on the floor of the Senate today to debate this subject with sections 7 and 9 eliminated, because in my opinion that eliminates all question about whether or not this proposal should be submitted to us as a treaty, or submitted, as it now is, in the form of an agreement. I think we have eliminated all questions about the treaty, as I shall now try to show.

I shared the view of Senators as to the third and fourth reasons, and advocated that the provisions referred to in the fourth reason be eliminated from the agreement and be separately approved by a treaty.

Mr. President, I am just as jealous of the Senate's prerogatives in making international treaties as is any other Member of this body. Although some of these arguments were advanced by Senators who might not favor this proposition under any guise, as seems obvious from the present debate, the proponents decided that we should do everything in keeping with good international relations to keep any legitimate objections upon procedural grounds. All through the winter and spring of 1945 a series of meetings were held to work out a modification of the agreement which

would meet these objections. This was accomplished by the sponsors of the bill and the State Department.

As a result of these conferences it was decided to inquire from the Canadian authorities whether they would agree to the deletion from the agreement of those provisions which gave rise to the constitutional questions, namely articles 7 and 9, dealing, respectively, with navigation rights and diversion of waters at Niagara. The objection to these provisions had been that they had previously been the subject of treaties between the two countries, and therefore those treaties could be amended only by the treaty procedure. The Canadian Government agreed to their deletion. Whereupon a new resolution was drafted, approving the agreement minus those two provisions, and requesting the President to negotiate treaties to effectuate the purposes of the deleted provisions.

After the resolution was drafted, the senior Senator from Kentucky [Mr. BARKLEY], then majority leader, submitted the draft of the resolution to the Chairman of the Senate Commerce Committee, the late Senator Bailey, of North Carolina, and to the senior Senator from Louisiana [Mr. OVERTON], who took the matter up with the full Commerce Committee. After study and deliberation, that committee agreed that the resolution could, under the rules of the Senate, be referred to the Senate Foreign Relations Committee. Upon introduction by the then majority leader, Senate Joint Resolution 104 was so referred by the then President pro tempore of the Senate, the senior Senator from Tennessee [Mr. MCKELLAR].

I recite this somewhat lengthy history to show that every rule of comity, legal and jurisdictional procedure was followed with scrupulous and meticulous care. The question is not one of evading the treaty-making power of the United States Senate. It is a question of bringing something before the Senate which does not need ratification as a treaty, and is, in fact, I am informed, not a treaty.

Mr. OVERTON. Mr. President, will the Senator yield?

Mr. FERGUSON. I yield.

Mr. OVERTON. The agreement went from the Commerce Committee to the Committee on Foreign Relations because after hearing testimony on the question as to whether the agreement was an executive agreement or a treaty, Senator Bailey called the full committee together and stated that hearings had been held and that it seemed to be the conclusion of the majority of the members of the committee that the compact represented a treaty, and that therefore it should not be lodged in the hands of the Commerce Committee, but should go to the Committee on Foreign Relations. He stated that without objection he would write a letter to the chairman of the Committee on Foreign Relations, and he did so, stating that it was the view of the Commerce Committee that the Committee on Foreign Relations should take jurisdiction over the question because it involved a treaty.

Mr. FERGUSON. I am glad to have that explanation from the able Senator from Louisiana, because he, being a member of the subcommittee, had personal and actual knowledge of what took place. But after the compact came over to the Foreign Relations Committee, that committee eliminated from it the provisions of section 7 and 9 which we have discussed.

But we have contemplated the vision of a St. Lawrence seaway long enough. It is now time that this vision be made into a reality. The decision is simple. Let us get on with it.

We will know in the doing that we are following in the footsteps of the great. We will be treading the ground of accomplishment where De Lesseps and Goethals, the canal builders, trod. We are on the trail blazed by the hydroelectric giants of our times and other times. We are following in the course of Champlain, of La Salle, and of the forgotten coureurs de bois, with the benefit of their pioneering and our new knowledge.

The gates are opening before us to the northwest passage of the twentieth century and to riches that far exceed those of the fabled Orient. The treasure trove of this discovery is the legitimate gain of every citizen of the United States.

Mr. BUTLER. Mr. President, during the debate on Friday on the St. Lawrence seaway, I made the statement that the quantity of power and the savings in fuel which would result from construction of the power facilities connected with the project had not been definitely determined. This statement was challenged by the Senator from Vermont [Mr. AIKEN] and I promised to supply authority for my statements.

For this reason, I ask unanimous consent to have printed in the RECORD at this point a short excerpt from the minority views submitted by the Senator from Massachusetts [Mr. LODGE].

I wish to emphasize again that the power facilities could be constructed without proceeding with the proposed navigation works. I am personally in favor of developing all the power possible on rivers where the power is not harnessed. If the St. Lawrence power development should be presented to us as a proposition separate from the navigation plan, I should be disposed to favor it, assuming, of course, that it were found to be economically justified in terms of costs and returns.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

Another illustration will suffice to indicate the need for a more careful examination in the power phase of the St. Lawrence project. Federal Power Commissioner Leland Olds, and Maj. Gen. Francis B. Wilby, at the Senate subcommittee hearings on the same day, gave widely different estimates of the fuel to be saved by developments of hydroelectric power in the International Rapids section.

Mr. Olds stated:

"In terms of fuel this would mean making available over 8,000,000 tons of coal or 41,000,000 barrels of oil annually for other war needs, if we consider both the United States and Canadian developments."

General Wilby said:

"The St. Lawrence power development will produce 12,600,000,000 kilowatt-hours a year, or the equivalent of the output of steam-power plants consuming annually 5,355,000 tons of coal or about 20,000,000 barrels of oil."

Since General Wilby's kilowatt-hour figure is the possible annual output of the United States and Canadian plants combined, it is clear that his fuel figures, like Mr. Olds', were intended to apply to the developments on both sides of the river at the International Rapids section.

As both of these witnesses have ready access to all of the official estimates ever made for the St. Lawrence project, no reason is apparent for such a large discrepancy in their estimates of coal to be saved. It may be only the difference between conservative and optimistic figuring.

It is interesting to note also that they have made very different assumptions as to the physical relationship between coal and oil as fuel for power. Mr. Olds' figure implies that a ton of coal will do the work of 5⅛ barrels of oil, while General Wilby's figures balance a ton of coal with only 3¾ barrels of oil.

Hence, these authorities on the St. Lawrence power development differ by 2 to 1 as to the amount of fuel oil that could generate the same amount of electric energy. This physical relationship is not a matter which should be subject to wide differences of opinion. It is a simple matter of fact. This appearance of carelessness in the simplest kind of evaluation of the St. Lawrence power output does not give us confidence in their supposedly comprehensive evaluations of the project.

As stated before, these examples are cited not so much on the merits but merely to corroborate our contention that much of the evidence on the power project as a national-defense asset carries a suspicion of not having had the foundation of very careful study.

As in the navigation aspect of the St. Lawrence project, the seasonal aspect is of significance when dealing with the power question. One would have expected that this consideration would have received careful attention, for obviously, if the power project is to stand as a vital contribution to national defense it must be capable of year-round operation at full capacity. This, in some 550 printed pages of testimony, is the only elucidation we have on the matter:

"Senator SMITH. I want to ask one question on this matter of the short season, just so we will get it into the record. The way we understand that power will be developed 12 months of the year is because of the constant flow of the river, irrespective of the weather conditions; is that correct?

"Mr. OLDS. That is correct. The project is carefully designed so that the flow of water from the head of Long Sault Rapids, between the Long Sault Dam and the powerhouses at the foot of Barnhardt Island—the grade is planned in such a way that it will not be disturbed during the cold weather. The design of the project is such that the power will be developed right straight through the year and will be available in freezing weather."

This is all literally correct except, we think, where Mr. Olds confirmed Senator Smith's understanding as to a constant flow of the river irrespective of weather conditions. Mr. Olds should have known that the flow and the head will be substantially decreased and that the power available similarly will be decreased in the winter period because of the weather conditions and because there is always a greater demand for power during those months. Therefore, Mr. Olds was right in saying that there will be power straight through the year, but his answer was scarcely responsive to the clear meaning of Senator Smith's pertinent inquiry. The question of how much power will be available during the cold months remains unanswered. And still the majority asks the Senate to author-

ize the construction of the power dam without being able to furnish the vital information as to the effect of the cold weather on the power potential.

Mr. AIKEN. Mr. President, I ask unanimous consent that there be inserted in the RECORD two editorials from the Cleveland Plain Dealer regarding the St. Lawrence seaway, the first in the issue of June 15, 1947, the second in that of January 30, 1948.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Cleveland Plain Dealer of June 15, 1947]

GOOD FOR ALL

We have noted before (but the point is worth making again) that the arguments used against the Great Lakes-St. Lawrence seaway cancel each other out.

With perfectly straight faces, the opponents tell us that there is no longer need for the seaway because the type of traffic it is intended to carry is becoming obsolete, then they go on to argue that the project would be unfair to existing transportation facilities and to other regions of the United States because it would take business away from them.

Obviously, they cannot be right on both counts. We are convinced they are wrong on both. Every Department of Commerce survey has disclosed that if ocean-going bottoms could come freely into the Great Lakes, there are scores of commercial products which would be hauled into and out of this great region of the United States via the waterway. This would reduce the cost to consumers of the goods hauled both ways.

If we believe in progress we must accept this as a desirable accomplishment even if it were to the disadvantage of some minority interests, for our goal must always be the greater good of the greater number.

But the fact is—as the whole history of industrial progress demonstrates—that anything which reduces costs must, in the end, benefit everyone. More prosperity in the Great Lakes region will mean more prosperity for the railroads, for it will increase industrial and agricultural production and thus give all forms of transportation more goods to carry.

Every President since Taft has favored the project. It has been blocked by Senators from other regions who imagined that their constituents will be in some way harmed. The men in the White House, looking to the best interests of the Nation as a whole, have understood that the seaway is needed by all the people of the United States.

[From the Cleveland Plain Dealer of January 30, 1948]

COMMERCE, POWER, DEFENSE

The Plain Dealer's position as an ally of those holding the conviction that the Great Lakes-St. Lawrence waterway and power project is eminently sound and desirable, is a matter of record.

The refusal of Congress for many years to accede to Presidential requests for approval of legislation clearing the way for this great national enterprise has only buttressed our belief that approval would be forthcoming if, for once, Congress would adjudge the project on the basis of broad national interest, instead of allowing local and regional loyalties and narrow economic considerations to affect its decision.

We ask that the Members of this session of Congress, particularly those who represent the people of this section of the country, which would undoubtedly derive important benefits from the project, be guided not by considerations of sectional benefits, but by their appraisals of the project as an aid to the Nation's international commerce, to the development of hydroelectrically produced power, to the strengthening of the national defense, and on the basis of greatest economic good to the greatest number of United States citizens. We believe that if the question of authorizing fulfillment of this momentous project is approached on this basis, the authorizing legislation will at last be enacted.

In asking that sectional loyalties and those to special economic groups be eschewed, we also request that rabid proponents of the Great Lakes-St. Lawrence seaway and power program cease indulging in such tactics as those of Senator WILEY, of Wisconsin, who intemperately asserted that failure to approve the legislation now the subject of debate in the Senate, would cause rejoicing in Moscow. Such assertions amount to accusations by indirection that those who are opposed to the project are, willingly or otherwise, playing the Communist game of trying to create such dissension over matters relating to American security and economic development as to preclude decisive action on those matters. Such assertions are not valid arguments in favor of the seaway and power program.

In its consideration of the question whether to sanction the program for construction of immense hydroelectric-power facilities on the St. Lawrence rapids and the creation of a waterway that could be traversed by deep-water vessels to the Great Lakes ports, this session of Congress should give especial attention to one aspect of the matter stressed in President Truman's letter of request for approval of the project.

That is the apparent ability of the shipping and the power-production facilities included in the program to produce revenue sufficient to make the whole project self-liquidating.

"Plans for this great international undertaking are now based upon the principle of making the new deep-draft navigation features self-liquidating by a levy of reasonable tolls on shipping," Mr. Truman wrote. "The Government will also be reimbursed for the new power facilities. The application of the principle of self-liquidation to the navigational features as well as to the power phases of the seaway should remove objections concerning the economic soundness of the enterprise."

It does, indeed, cut much of the ground from under those opponents of the project who contend that this country cannot afford to "sink" $490,000,000 into the undertaking as its share of the $720,000,000 that will be required. (The remainder, $230,000,000, is to be provided by Canada, which has already expended considerable sums in work connected with and valuable to the completed seaway.)

It is pertinent to the debate now being conducted in the Senate to point out that every President since World War I, Republican and Democratic, has advocated the St. Lawrence project, and all of them regardless of great differenes of opinion over other matters of state, have stood at the forefront of those who are convinced that the whole project is in the broad national interest and is desirable and necessary for commerce, for power, and for defense.

Mr. WILEY. Mr. President, in my opening statement last Monday, I referred to the countless men and women who have given to their efforts nobly and self-sacrificing in support of the St. Lawrence waterway throughout its long history.

I ask unanimous consent that there be printed at this point a very brief statement I have prepared on the subject of one of the able business leaders who has worked valiantly for this project. I wish that there were time for me to comment on many of the other far-sighted businessmen who have rendered similar yeomen work.

TRIBUTE TO MR. WALTER OLEN

One of the many outstanding business leaders of our Nation, who has led in the long and valiant struggle for the St. Lawrence seaway, is Mr. Walter Olen, president of the Four-Wheel Drive Auto Co., of Clintonville, Wis.

Mr. Olen is a great industrial leader of the Badger State, whose company stands among the most distinguished industrial enterprises of Wisconsin. Like so many other businessmen, however, he has extended his horizons and has worked nobly in the public interest in many vital areas, one of which is the St. Lawrence seaway.

I have received and read many statements on the importance and value of the waterway to America, but there are few, if any, that I have read in all my long study of this problem that compare with the brilliant clarity of the statements which Mr. Olen has submitted to the Congress, and principally to the Senate Foreign Relations Subcommittee on behalf of the seaway. In his statements, Mr. Olen always took the larger view, demonstrating the importance of the seaway to the continued welfare and development of America's great Middle West, and indeed, the continued progress of our Nation as a whole.

I feel that in paying this brief tribute to Mr. Olen, I am helping to afford recognition not only to him but to all the other practical-minded, level-headed, common-sense businessmen who have been striving valiantly for this great historic project.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the Senate by Mr. Miller, one of his secretaries.

THE ST. LAWRENCE SEAWAY

The Senate resumed the consideration of the resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof.

Mr. VANDENBERG. Mr. President, I suggest the absence of a quorum.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Green	Murray
Baldwin	Gurney	O'Conor
Ball	Hatch	O'Daniel
Barkley	Hayden	O'Mahoney
Brewster	Hill	Overton
Bricker	Hoey	Reed
Bridges	Ives	Revercomb
Brooks	Jenner	Robertson, Va.
Buck	Johnson, Colo.	Robertson, Wyo.
Bushfield	Johnston, S. C.	Russell
Butler	Kem	Saltonstall
Byrd	Kilgore	Smith
Cain	Knowland	Sparkman
Capehart	Langer	Stennis
Capper	Lodge	Stewart
Chavez	Lucas	Taft
Connally	McCarran	Thomas, Utah
Cooper	McCarthy	Thye
Cordon	McClellan	Tobey
Donnell	McFarland	Tydings
Downey	McGrath	Umstead
Dworshak	McKellar	Vandenberg
Eastland	McMahon	Watkins
Ecton	Magnuson	Wherry
Ellender	Martin	Wiley
Ferguson	Maybank	Williams
Flanders	Millikin	Wilson
Fulbright	Moore	Young
George	Morse	

The PRESIDING OFFICER (Mr. YOUNG in the chair). Eighty-six Senators having answered to their names, a quorum is present.

Mr. TYDINGS obtained the floor.

Mr. LODGE. Mr. President, will the Senator from Maryland yield to me?

Mr. TYDINGS. I yield.
